

# Google Apps for Work

Professional email, online storage, shared calendars, video meetings and more. Built for business, designed for teams.

## Take Gmail to work

Get custom email (@yourcompany.com), Gmail's spam protection, powerful search and integrated calendars help you get more done. Enhanced business features include 99.9% guaranteed uptime, no ads and 30GB of storage.

## Integrated online calendars

Schedule events quickly by checking coworkers' availability or layering their calendars in a single view. You can share calendars so people see full event details or just if you are free.

## Store and Share in the Cloud

Save work files in Drive, access them from any device and share them instantly with teammates. No more sending attachments or merging different versions.

## Meet face to face with anyone

Hold HD video meetings through Hangouts with up to 15 people on your laptop, tablet or phone. You can share your screen, give presentations and chat as you work.

Setup your Google Apps account today for \$300 + \$50/user/year
