The Salt Lake City School District provides Guest Wireless access to non-employee and Non-student users such as presenters, vendors, consultants, auditors, School Community Council Members, PTA members and other such personnel who help meet the educational & business needs of the District.

Guest access is NOT intended for students, teacher or district employee use. Guest access only allows a limited number of connections and does not allow printing or access to other internal District functions and is filtered to comply with the Child Internet Protection Act. All activity on the Guest Wireless network is logged. If District employees would like to access wireless with their own personal devices, they are encouraged to use the BYOD network. If Students would like to access wireless with their own personal devices, they are encouraged to talk to their Principal. BYOD for students is a site based decision that the Principal would make.

To connect to the Guest Wireless Network:

Connect to Network: SLCSD-GUEST
• For security settings, use NONE or OPEN

Open web browser and enter user name and password.

• Username: slcsdguest

Password: dPaWzL6zFC

(Password is case sensitive and will change every week*)

May not be as often during summer, holidays/breaks or technical difficulties.
