

Here are the websites you'll want to make sure you've whitelisted:

-
- *.jitsi.net
- meet.jit.si
- web-cdn.jitsi.net
- meet-east.speechanddebate.org
- meet-west.speechanddebate.org
- meet.speechanddebate.org
- campus.speechanddebate.org

You can also test it by going to <https://campus.speechanddebate.org/>

Additionally, the following ports will need to be opened:

- 80 TCP: HTTP
- 443 TCP: HTTPS
- 10000 UDP: Web-RTC

Your IT people may ask which domains/IP addresses to use for the above ports. Because the video servers are dynamically scaled and do not have fixed hostnames or IP's, at least the UDP port will need to be open to all IP addresses. If they require a range, they can use Amazon's IP list and filter by the AWS regions for us-east-1, us-east-2, us-west-1, and us-west-2:

<https://ip-ranges.amazonaws.com/ip-ranges.json>

It is possible that Campus may eventually use other UDP ports between 10000 – 20000, so if you want to be proactive, ask your IT department to open a wider range than just 10000.
