- I Voted NEG because the aff had a good plan, it was just that there were way too many mistakes being made by the aff; and the neg essentially capitalized on the situation.

low-point win

Reason for Decision:

If the 2nr ~~sh~~ chose to go for one-position it would've been an easy ballot. But, because she doesn't it makes it hard to vote on something like the DA that has no clear link articulation.

The T debate became a wash since there were no voters or standards until the 2nr.
