Resolution #879

A Resolution to Encourage States to adopt Top 4 Primaries used with Ranked Choice Voting

- 1       Whereas:       First-past-the-post election systems prevent fair elections from taking  
2       place and prevent voters from having a representative that they agree with on policy;
- 3       Whereas:       Someone running for office could be running in a very large field and win  
4       their race despite getting less than a quarter of the vote;
- 5       Whereas:       People getting elected without a majority vote prevents the majority of a  
6       community from having a representative that represents their beliefs, and only represents  
7       the beliefs of a plurality;
- 8       Whereas:       A top-4 primary system would allow for every candidate to run on one  
9       ballot and the top 4 vote getters would advance to a general election where voters would  
10      have the opportunity to rank the candidates, meaning if no one reaches a majority of  
11      votes, those votes would be redistributed to the candidates that remain, that the voters  
12      ranked second, third, or fourth;
- 13      Therefore:     Be it resolved, by the Student Congress here assembled that the American  
14      Government encourages all states to implement a top-4 primary system as seen in Alaska.
