Verbal, ALSO.

I really wanted to vote Neg, I really did.

The problem was IMPACTS.

NEG: You logically battered them and had a strong showing in CX. However, the problem was you never addressed the issue that the pulled 40 million people over the poverty line. You also never quantified effects of resource conflicts.

AFF: The reason I voted for you was because you impacted out poverty, and women's jobs. I thought you could improve on making more quantitative claims (tech, etc.) but I voted on your final focus.

Neg: Long-term benefits, sustained + can change

① Gov dev.

- India's industry as food
- Env damage permanent
→ preneg

② Urgent Env. problems
- electronic disposal
- air pollution (last ranking) 116K deaths/yr
- V capacity to produce
→ preneg

③ Benefits skewed
- Insufficient employment opportunities for poor
- Rich spent 10x that of poor
- Indian development not equal
- 42% live off less \$1/day
→ economic growth (500M out poverty)
→ wealth disparity
