Competitors will have 30 minutes to prepare a 30-second elevator pitch AND a subsequent 3-minute sales pitch.

1. EchoGlow Smart Mirror

- **Product Description:** A high-tech mirror that uses augmented reality to show not only your reflection but also real-time health data, beauty tips, and mood-enhancing quotes. It can track skin conditions, give personalized skincare recommendations, and even provide tailored workout suggestions. The mirror syncs with your smartwatch and can track progress over time.

2. HoverShoes 3000

- **Product Description:** Shoes equipped with advanced hover technology that allows you to glide effortlessly above the ground, reducing strain on your joints and making walking, running, or even standing feel weightless. The HoverShoes 3000 are designed for everyday use—perfect for commuters, athletes, and anyone who wants to move with ease.

3. Cinematique VR Couch

- **Product Description:** A fully immersive, multi-sensory couch that transforms your living room into a 360-degree cinema. Equipped with surround sound, temperature control, scent emitters, and haptic feedback, it adapts to the action on screen. Whether you're watching a movie, playing a video game, or enjoying a concert, this couch makes you feel like you're part of the action.

4. GlimmerTech Digital Wardrobe

- **Product Description:** A closet system equipped with smart fabric technology that allows your clothes to change color, texture, and style at the push of a button. Need a new look for an event? Swipe on your phone and your outfit transforms—no need for physical alterations or buying new clothes. The wardrobe syncs with your calendar to suggest outfits based on your schedule and weather conditions.

5. SomaSphere Sleep Pod

- **Product Description:** A personal sleep pod that uses sound, light, and aromatherapy to optimize your sleep cycle. It monitors your biometrics and adjusts temperature, humidity, and lighting to ensure the perfect sleep environment. Additionally, it offers guided meditation, gentle wake-up sequences, and deep relaxation techniques to help you fall asleep faster and wake up feeling fully rested.

6. FlareBot Personal Assistant

- **Product Description:** FlareBot is a next-gen personal assistant that doesn't just manage tasks, it anticipates your needs. Using advanced AI and deep learning algorithms, FlareBot learns your preferences, emotions, and habits. Whether you need

help organizing your day, planning an event, or just need someone to talk to, FlareBot is available 24/7, offering personalized responses with an empathetic touch.
