

# ***Infield Drying Agent***

It's the easiest, quickest way to get your infield back in business. Our 100% natural Play Ball!® Infield Drying Agent can be used to absorb excess moisture of any turf area, infield-skinned surfaces, mound, home plate areas and warning tracks. Play Ball! Infield Drying Agent's professional sized gradation provides the durability and absorption to reduce rain delays and eliminate rainouts.

- Super absorbent, easy to apply.
- Improves surface playability fast, promoting surface safety.
- Provides a durable foundation for batter's boxes.

Successfully used at major league, minor league, college and high school fields around the US, this calcined clay infield product gives you the performance you need to keep your infield safe, playable and moisture-controlled. Works perfectly with Play Ball! Infield Conditioner and Play Ball! Mound Clay, or with the premier infield conditioner, BallGame Changer™.
