

100% Granular Diatomite Absorbent

OptiSorb[®]

OIL ABSORBENT

Automotive

Industrial

Janitorial

Farm/Ranch

Oil and Gas

- ◆ Made from a special grade of fresh-water DE, a naturally occurring mineral, with superior absorptive ability
- ◆ Absorbs liquid internally, like a sponge, allowing quick cleanup of water, oil, grease, water coolant, and much more
- ◆ Low density and high pore space allow more absorbency at a lighter weight
- ◆ Can use less product = less disposal of use material/ cheaper costs
- ◆ Industrial grade absorbent designed for quick cleanup of water, oil, and grease
- ◆ Large particles quickly and easily soak up messy spills
- ◆ Enhances safety
- ◆ 100% Natural Mineral
- ◆ NSF Registered

What is Diatomaceous Earth?

Mined in the western region of the US, diatomaceous earth (DE) consists of microscopic skeletal remains of unicellular plants (diatoms), deposited on lake beds & ocean floors, formed millions of years ago. Similar to a sponge, DE absorbs liquid internally through small pores. This unique mineral is thermally processed to make a broad range of powdered filter aids, functional additives, and granular absorbents.
