

100% Granular Diatomite Absorbent

Absorbent DE™

Automotive

Industrial

Janitorial

Farm/Ranch

Oil and Gas

- ◆ **Made from a special grade of fresh-water DE, a naturally occurring mineral, with superior absorptive ability**
- ◆ **Absorbs liquid internally, like a sponge, allowing quick cleanup of water, oil, grease, water coolant, and much more**
- ◆ **Low density and high pore space allow more absorbency at a lighter weight**
- ◆ **Can use less product = less disposal of use material/ cheaper costs**
- ◆ **Industrial grade absorbent designed for quick clean up of water, oil, and grease**
- ◆ **Large particles quickly and easily soak up messy spills**
- ◆ **Enhances safety**
- ◆ **100% Natural Mineral**
- ◆ **NSF Registered**

**Off White Medium
Coarse Granulation**

OIL ABSORBENT DE™ is perfect for a variety of applications...

- ◆ **Automotive Retailers, Dealers, Repair Garages, Body Shops**
- ◆ **Hydraulic and Chemical Spills**
- ◆ **Manufacturing Facilities**

Part #	Weight	Bag Type	Pallet Configuration	Plant
8834	25 lb	Paper	Bags per Pallet: 80 Pallet Size: 40 x 48" Pallet Height: 72"	Fernley

For more information on Oil Absorbent DE or to request a free sample kit, please call your sales representative or contact us directly at (800) 366-7607 or visit www.epminerals.com.

What is Diatomaceous Earth?

Mined in the western region of the US, diatomaceous earth (DE) consists of microscopic skeletal remains of unicellular plants (diatoms), deposited on lake beds & ocean floors, formed millions of years ago. Similar to a sponge, DE absorbs liquid internally through small pores. This unique mineral is thermally processed to make a broad range of powdered filter aids, functional additives, and granular absorbents.
