

Swimming Pool Filtration Products Guide

- Best swim pool filtration on the market
- Easy to use
- Clearest pool that will even make your neighbors jealous
- Compatible with all diatomaceous earth filters

Celatom[®]

CelaPerl

Diatomite Filter Media For Swimming Pools

- Standard diatomaceous earth for swim pools
- Provides sparkling pool day or night
- Superior to sand or cartridge filters
- Available in 25 lb, 50 lb, and bulk sizes

Celatom Recommended Dosage Chart

Square feet of filter area	10	25	35	40	50	70	100
Pounds of Filter Powder required	1	2 ½	3 ½	4	5	7	10
Quarts (Scoops) of Filter Powder required	2	5	7	8	10	14	20

Note: A 32 oz drink cup filled with filter powder equals 1 qt or ½ lb and makes for a handy scoop.

Perlite Filter Media For Swimming Pools

- Perlite for swim pool filtration
- Natural, non-toxic
- Compatible with all diatomaceous earth (DE) filters
- Alternative to DE media with the benefits of a clean pool
- Available in 12 lb and 25 lb sizes

CelaPerl Recommended Dosage Chart

Square feet of filter area	10-20	21-30	31-40	41-50	51-60	61-70	71-80
Pounds of Perlite ¹	1	1 ½	2	2 ½	3	3 ½	4
Scoops ²	2	3	4	5	6	7	8

1. Perlite weighs approximately half that of DE. For example, 1 lb of DE is equivalent to ½ lb of perlite
2. A typical pool scoop is approximately two quarts (Equivalent to 8 cups)

NEW

LOW DUST Diatomaceous Earth Filter Powder

- New low dust formulation
- #1 choice of pool pros
- No leaky bags and no mess
- Thermally sealed poly bag
- Patent-pending
- Available in 6 lb and 24 lb sizes

CelaPool Recommended Dosage Chart

Square feet of filter area	10	25	35	40	50	70	100
Pounds of Filter Powder required	1	2 ½	3 ½	4	5	7	10
Quarts (Scoops) of Filter Powder required	2	5	7	8	10	14	20

Note: A 32 oz drink cup filled with filter powder equals 1 qt or ½ lb and makes for a handy scoop.

Swimming Pool Diatomaceous Earth Application Tips

- Apply approximately 1 pound diatomaceous earth per 10 square feet.
 - Example a 60 square foot pool would require 6 lbs diatomaceous earth.
- Measure the required diatomaceous earth amount, mix in a pail of water to create a slurry, then feed it into the filter via addition to the pool skimmer. Always review filter manufacturer's instructions.
- Record pressure after diatomaceous earth has been applied to the filter. When the pressure increases 8 – 10 pounds above this baseline, then it is time to clean the filter.
- Diatomaceous earth filters should be cleaned at least once per year. To clean the filter, turn the pump off, drain the filter, remove the filter, hose off the grids, and then reassemble and apply fresh diatomaceous earth.
