

KOOL-AID GADGET HOLDER

KOOL-AID GADGET HOLDER

Upcycle your used drink pouches into this handy gadget holder!

MATERIALS

- 1 Kool-Aid drink pouch
- Washi-tape
- 1/8" -1/4" Grommet set
- Key ring and clip

TOOLS

- Scissors
- Hole punch
- Hammer

START!

STEP 1 Using scissors, cut across the back as cleanly as possible and drain the remaining juice. Rinse out the pouch and dry.

STEP 2

Fold over the top ¼" of the pouch and use the washi-tape to seal it down. Add an extra piece over the straw hole for strength. Use more tape to clean up any rough edges from the scissors.

DESIGN TIP!

Make or recycle an old lanyard to use with it.

STEP 3

Use a hole punch to punch out the straw hole. Set a grommet into the hole using grommet-setting tools. These are usually included when you purchase grommets.

STEP 4

Decorate the back and sides of the pouch with washi-tape.

STEP 5

Attach the key ring and clip and enjoy!
