

# **Waste Duty of Care**

The Duty of Care legislation sets legal responsibility to ensure waste is handled in a way that does not harm the environment and human health.

Please read below and, if needed, take the required steps to assure your collection of waste complies with Duty of Care requirements.

### 1. Waste Transfer Note (WTN)

It is a document that details the transfer of waste from one person to another. An <u>annual waste transfer note</u> is needed for waste originating from:

- A Business: waste resulting from a commercial/business activity.
- A Public Drop-Off Location set up in commercial/business premises: waste collected from your local community.

For Public Drop-off Locations set up by members of public (households), the address and SIC code (Standard Industrial Classification of Economic Activities) of the commercial premises in which waste is collected should be listed and "Position" should be detailed as "Collector" on section A of the TerraCycle® waste transfer note.

SIC codes provide a description of the company's nature of business. If you're unsure, please find it on the Companies House website.

Please note members of the public (households) sending the waste generated by themselves to TerraCycle® or taking the waste to Public Drop-off Locations set up by another TerraCycle® collector are exempt from requiring waste transfer notes.

To receive your TerraCycle® waste transfer note for parcels sent via UPS, **please fill in the form** <u>here</u>. Please keep in mind waste transfer notes for shipments via pallets are handled by TerraCycle® directly with the collector registered on the programme.

Please note, a waste transfer note covers your location for a whole year for all programmes selected on the form. Every year, a new one will need to be completed (as explained above). If you join a new programme after signing your annual waste transfer note, you will need to submit a new form, selecting the programme you have joined on the list.

Need help? Check out our guide on how to fill in TerraCycle® waste transfer note.

# **Waste Duty of Care**

### 2. Waste Storage Permit

This permit is not required for Public Drop-Off Locations Administrators who temporarily store waste before sending waste to TerraCycle<sup>®</sup>, as it complies with the requirements of waste exemption (Non-Waste Framework Directive 4).

However, all collectors should fulfil the conditions set (some of the main conditions are outlined below, but please see the full list of conditions <u>here</u> and <u>here</u>):

- You must not collect waste as your main business activity
- You must not carry out any waste treatment activity that changes the characteristics of waste
- You must not store more than 5 cubic metres of waste at any one time
- You must not store waste for longer than 3 months

### 3. Waste Carrier Licence (WCL)

A WCL is required by businesses and charities who transport waste from the site it is collected at (e.g. when transporting the waste from a public drop-off location to a UPS access point).

TerraCycle® members collecting on behalf of a business or who only transport waste produced by their own business activity, must apply for/be registered as an Upper Tier Waste Carrier. Please register <a href="here">here</a> (registration is for a fee and lasts 3 years).

TerraCycle® members working for a charity and raising funds for this charity who also transport waste, must apply for/be registered as a Lower Tier Waste Carrier. Please register <a href="here">here</a> (registration is free and lasts indefinitely).

If you're using a pickup service offered by TerraCycle®'s transport partner, this registration is not needed (as this is covered by TerraCycle® Third Party Waste Carriers Licence, see details below).

Members of the public (households) managing Public Drop-off Locations, and who occasionally transport waste collected at Public Drop-off Locations from other households, are exempt from requiring a Waste Carrier Licence.
