

Gloria Wangari

Thank you for being a Mentor for Technovation Girls.

As a mentor, you play a pivotal role in fostering connections within the communities where our girls are currently involved and those they aspire to join; contributing to the realization of Technovation Girls' mission to empower girls to become leaders, technology innovators and real-world problem solvers.

Your patience, passion, and willingness to grow with your team is what makes you a strong role model. You were the motivator for your team(s) learning about their community, finding a problem they are passionate about solving, building a technology based solution using mobile app development and/or AI, creating a business around that idea, and sharing it with the world!

Regardless of the competition outcomes or whether your team was able to submit, take immense pride in your accomplishments. Know that at Technovation, we are genuinely proud of your efforts and achievements! You have accomplished so much this season in supporting girls' work towards their visions for cleaner, safer, and more just communities.

In your role as a mentor, you have contributed at least 37 hours towards reaching the United Nations Sustainable Development Goals 4, Quality Education, and 5, Gender Equality.

We feel very honored to be a part of your journey, and we hope this is just the beginning. Thank you for your time, effort, and tireless support this season as a mentor and champion for girls discovering all they are capable of!

We appreciate you!

TECHNOVATION

Mentor

CERTIFICATE OF RECOGNITION

Empowering girls to **become leaders, technology innovators** and **real-world problem solvers**

IS AWARDED TO

Gloria Wangari

For their outstanding work as a Technovation Mentor in the 2024 season. They supported Technovation Girls participants in finding a problem they were passionate about solving with technology, building the idea, testing it with users, and pitching to industry professionals . All while providing project management support, encouragement and contributing to participant?s sense of belonging in STEM. Their efforts are changing the world through technology.

Tara Chklovski, Technovation Founder & CEO
