

# TEAM: TECH OCEAN

PROJECT: *Underwater Communication*

- ***Our project is about ocean preservation, aiming to guide and inform others about pollution and ocean conservation..***
- **We interviewed students and teachers from our Digital Inclusion Center (CID), showcasing our project, its functionalities, objective, and how to navigate it.**

# About the project:

- ***Approximately 30 people have already tested our app.***
- ***The feedback was generally very positive, praising the ease of use and efficiency in solving the proposed problem.***

***However, we also received constructive suggestions regarding design and functionality.***

- ***To convince individuals and organizations to use the app, it's important to show that it's not only informative but also practical. With simple, easy-to-use content and tools that encourage sustainable actions, the app becomes useful in everyday life. Furthermore, it offers benefits such as environmental education and strengthening a sustainable image, making it an accessible and relevant solution.***
