

APPLICATION USAGE INSTRUCTIONS

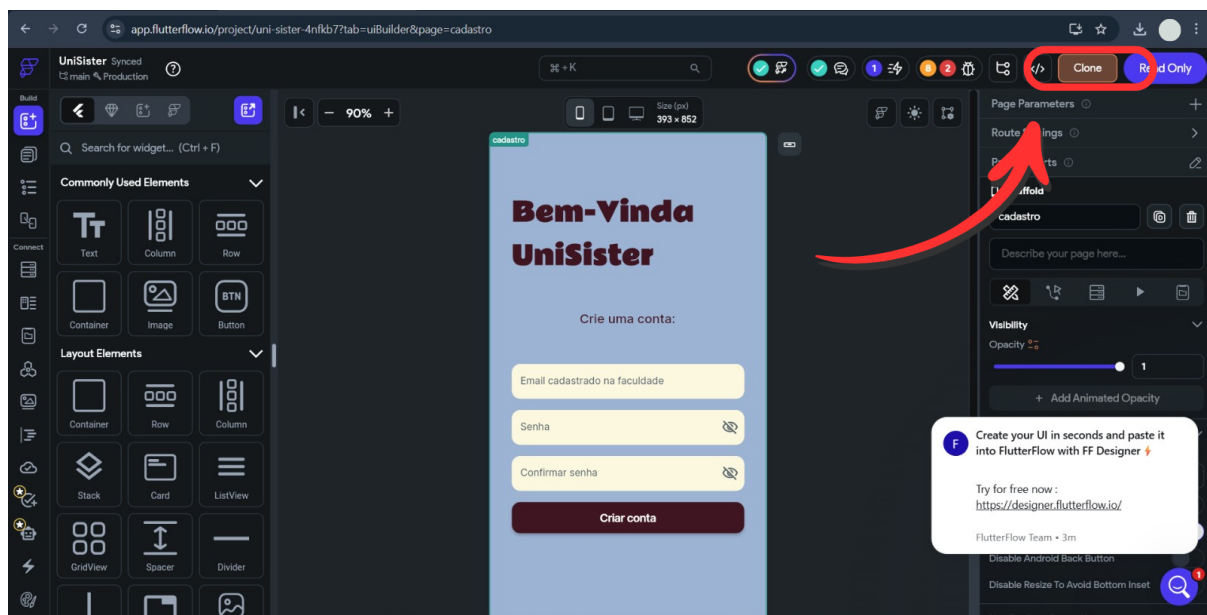

App name: **UniSister**

Description:

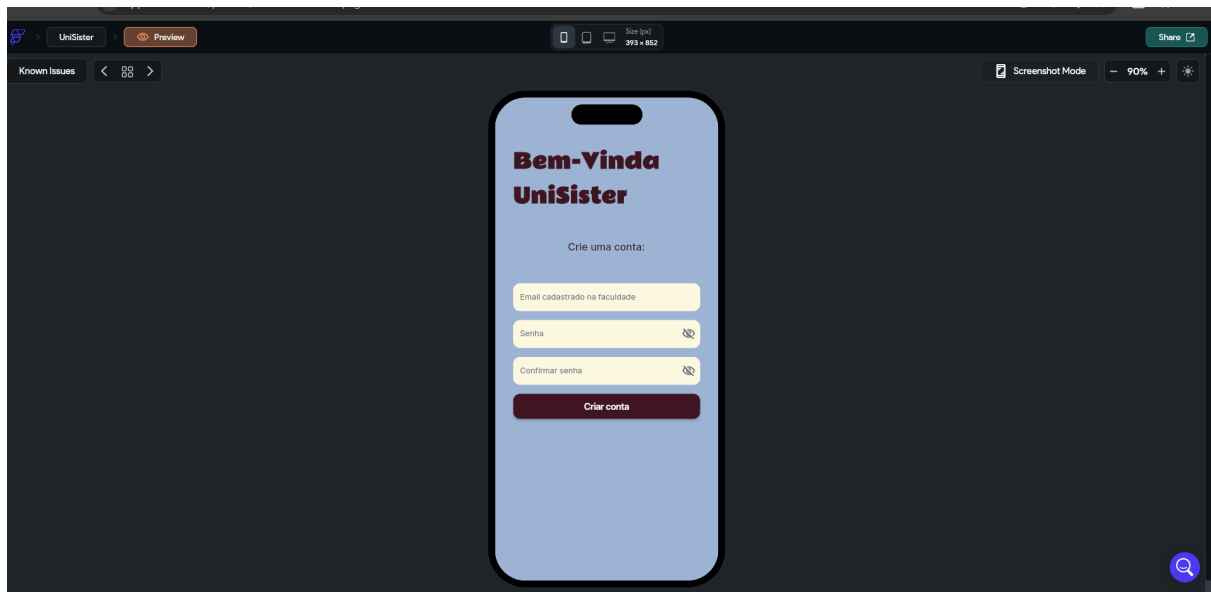

UniSister is an integrated platform that provides a support network for first-year students through mentorship from senior students approved by university representatives. The platform includes features such as: integrated safety with buttons for emergency calls, a mental health support channel with space for anonymous venting, a chat for users to talk to each other, an area with place suggestions, and a section where users can ask or answer questions.

How to access:

1. Use the following link to open the application:
<https://app.flutterflow.io/project/uni-sister-4nfkb7>
2. Wait for the homepage to load
3. Complete the login process
4. Select the indicated icon to proceed

5. Area for testing

How to use:

1. Log in or create a new account and change your password.
2. Browse the available features.
3. Explore the emergency options, tips, chat, frequently asked questions, and places to ask/answer questions.

Test login:

User: teste@gmail.com

Password: 123456

Notes:

- The application is a prototype (MVP)
- Some features may be under development
