

Basic App Usage Instructions

Sign Up and Login

When opening the app, click the “Register” button to create an account.

After registering, log in with your username and password.

First Access (Questionnaire)

On the first login, the user must complete a mandatory questionnaire:

- At least one answer must be selected for each question
- In the last question, more than one option can be selected

Food Suggestions

After the questionnaire, the app will display:

- A list of recommended foods, OR
- No food (if there is no compatibility with the answers)

 The user can:

- Click “Start planting” on a suggested food
- Or click “Plant another food” to choose manually

Container Selection

A list of containers will be shown based on the questionnaire answers.

The user must:

- Choose a container suitable for the selected food
- Confirm that they have an adult (18+) responsible (if underage)

Planting Preparation

The process follows 3 steps:

1. Container Preparation

- Follow the step-by-step instructions
- Click “Container Ready”

2. Soil Preparation

- Follow the instructions
- Click “Soil Preparation Ready”

3. Planting

- Follow the final step-by-step guide

Benefits Screen

After planting, the app will display:

- Amount of CO₂ reduced 🌱
- Number of foods planted
- Amount of recyclable materials reused

Main Menu

My Foods

- View planted foods
- Access specific tips for each one

Recommended Foods

- Updated list based on the questionnaire

Community Gardens Near You

- Requests location access
- Shows nearby gardens
- Clicking displays the garden's location

Ideas and Tips

- Suggestions and content to improve planting

Game

- Interactive game developed in Scratch
- Planting activity (tomato and lettuce)

Benefits

- Displays environmental impact and user progress

About the App

- Objectives
- Mission
- Innovation
- Team

Quit

- Allows the user to log out

- Data remains saved
