

1° Clone the Repository:

Backend: <https://github.com/irisproject26/Iris-back.git>

Frontend: <https://github.com/irisproject26/Iris.git>

Open each one in a terminal (Both should run simultaneously)

Step 2: Install the .NET 10 SDK

<https://dotnet.microsoft.com/pt-br/download/dotnet?cid=getdotnetcorecli>

and install Node.js version v22

<https://nodejs.org/pt-br/download>

Step 3: Open VS Code and in the terminal run:

cd backend

and then:

dotnet run

Step 4: Open a new VSCode and in the terminal run:

npm i ou npm install

- Install the following dependencies:

npx expo install @react-navigation/native react-native-screens

react-native-safe-area-context react-native-gesture-handler react-native-reanimated

@react-native-picker/picker @react-native-community/datetimepicker react-native-maps

expo-image-picker

npm install @react-navigation/native-stack axios

and then:

npx expo start

Step 5: Import the database into your preferred server (XAMPP, WampServer).
