

Xervo™ by Progress Enterprise Class is a solution that enables companies to build Node.js applications with greater quality and efficiency, get them to market faster and run them more reliably.

Xervo Enterprise Class does this without organizations needing to make premature business decisions about whether they need to exist on-premises or in the cloud.

**FAST AND EASY DEPLOYMENTS**

Don't spend hours getting your application running.

**COST-EFFECTIVE SCALING**

Meet customer demand as it changes with Xervo load balancing and provisioning.

**IN-DEPTH ANALYTICS**

Make real-time decisions to ensure a great user experience and keep your customers happy.

**FEATURES**

- Isolated Resources to Promote Security
- Configurable CPU/Memory
- IaaS Platform Agnostic
- Multi-Region Scalability
- Dedicated Load Balancers

**CHOOSE YOUR ENVIRONMENT**

**CLOUD**

Be up and running quickly without needing dedicated IT resources

Reduce capital spending with subscription model

Rapidly scale up and down based on seasonal demand

Free up IT resources for more strategic initiatives and get back to your core business\*

**ON-PREMISES**

Full control and access for your IT staff

The highest degree of customization

Meet required corporate compliance policies by running applications internally

Ensure mission-critical applications are on your own hardware

**HYBRID - BEST OF BOTH WORLDS**

Integrate both environments seamlessly and enjoy the benefits that each has to offer.

\*30% of developer, time is spent on non-value added tasks. That's \$27,000 per developer, per year that could be spent on creating revenue-generating products and bringing them to market.
