

Streamline your work by keeping a management solution within easy reach: Ubik mobile, Ubik's perfect complement.

Ubik mobile has developed 4 specialized screens to simplify your life!

The **Consult** screen enables you to walk around the pharmacy aisles while consulting personal and clinical patient information, as well as all prescriptions on file.

Not only does the **Preparation** screen detect which prescriptions require preparation, but it also allows the assigned employee to sign once each step is completed.

Thereafter, you can easily secure your processes by verifying that the container and its contents match the prescription with the **Validation** screen.

Finally, the **Rx Vigilance** screen will quickly provide you access to all Rx Vigilance therapeutic advisor tools.

In addition to its 4 specialized screens, Ubik mobile offers a **Compliance Packaging** tool, which eliminates clutter by capturing and managing compliance packaging information electronically. Goodbye compliance packaging binder!

Use Ubik mobile on a Toshiba Portégé, a Microsoft Surface Pro 3, or on your own tablet device!

Be more productive with Ubik 1.8!

Time is precious! The following improvements have been made to Ubik for better time management.

- The **lab results** function gives you access to common clinical values and to patient laboratory results, allowing you to provide better pharmacotherapy care. You can then produce graphics or print a report summarizing these values. This function will be tested during the month of March.
- Document your patient's verbal or written consents with the new **Consent management** function! This tool enables you to print, sign and scan forms so that you can include them to your patient's record.

Discover Ubik during a learning event and benefit from an exclusive offer.

The evening program includes:
Cocktail: **6:30 p.m.**
Presentation: **7:00 p.m.**
Demos and questions: **7:30 p.m.**
