Improving time management!

September / October 2015

Enhanced usability with Ubik 2.1

Listening to Ubik users allowed us to make several improvements with the goal of increasing the efficiency of your daily pharmacy operations. Get started now:

- **Cancel an activity that has begun** before submitting a claim to the third-party or when a claim is refused from the third-party.
- **Enter intervention codes before saving** with the improved refill with modifications function.
- **Claim and print in one step** when no intervention is required at the time of a claim.
- **Easily search and select the codes to be applied to a claim** with the revised intervention codes window.

Intervention and Authorization Codes

Ontario Drug Benefit TELUS HEALTH (Assure)
Card No: 001245667887878 01 01 2016-05-31 Relationship: Insured

Successful implementation through customer solutions delivery service

Implementing Ubik: steps

Personalized support.

Upon contract signature, a dedicated Ubik implementation team member will be assigned to you. This team member is committed to guide you through the implementation process and provide you with the tools you need to ensure a successful deployment.

Structured implementation plan.

We understand that each pharmacy is unique. The Ubik implementation team works with you to create a structured implementation plan according to the particularities of your pharmacy. Spread over a period of about one month, each task of the implementation process is defined, validated and assigned to a team member. The plan includes:

Project objectives	Elements of the implementation strategy	Human and material resources required
The approach	The success criteria	Documentation of the major activities and milestones duration
Commitment of both parties	Identification of possible risks	Presentation of key dates

Transition supported through our training.

A customized training plan is developed which includes various learning solutions, to ensure the adoption and optimal use of Ubik.
