Customer Loyalty Plan

Develop sales strategies backed by loyalty purchases

Assyst Customer Loyalty Plan from TELUS Health helps you understand the people who shop in your store. Our Loyalty Plan will maintain valuable demographic data about your customers, help you reward your most loyal shoppers and attract new customers.

Loyalty plan that builds long-term customer relationships

- Competes with other industry loyalty programs
- Accommodates AirMiles, Gift Cards, etc.
- Offers flexible user defined programs
- Customer benefits from multiple clubs/programs
- Immediate savings and reward points
- Collect points to be used toward purchases
- Customer savings by quantities or dollars
- Include or exclude specific sales categories in clubs
- Discounts printed on the customer's receipt
- Quick look up by name or telephone number
- Manage customer programs by all product groups
- Monitor customer visits, purchases, and profitability
- Categorize customers based on a 24 month history
- Customer follow up with mail out letters

Document File Attachments

Organize scanned photos, documents and graphics that are easily attached to your patient profile

TELUS Health Assyst Rx-A Pharmacy Dispensary system offers the ability to attach media, images and document files to Patient, Prescription, Drug and Doctor records.

Pharmacy documentation management made easy

Attachments are commonly used to:

- Quickly reference images of written/faxed prescriptions captured when the prescription was originally received
- Reference signed patient authorization forms at time of filling a prescription
- Allow easy access to supplementary information available on the web linked to drug records
- Confirm the identity of patients with photo ID attached to their profile
- Easily verify identity of person(s) authorized for prescription pickup
- Fill in forms using templates and easily attach completed copies to patient records
- Integrate with other modules such as Patient Medication Exchange to generate customized forms
- Retain qualitative information from prescribers about their prescribing and refill policies
- Preserve sample prescriber signatures for reference to prevent prescription fraud
- Archive drug recall notices for easy reference
- Attach electronic files of any type such as: WMV, AVI, MP3, JPG, BMP, PNG, PDF, DOC, XLS

Integrated Debit, Credit Card

“One Step” processing for debit, credit transactions

TELUS Health Point of Sale High Speed Debit/Credit Module is fully integrated with various payment processors such as Moneris Solutions and Chase Paymentech. Transactions are processed quickly, with no keying or card errors. Your customers will appreciate the faster service and security of the high speed internet connection.

Integrated transaction processing through high speed lines

- Eliminates duplicate entries that can result in costly errors and potential employee fraud
- All Point of Sale and bank information can be printed from the tills thermal printer
- Improves speed of service
- Increases customer throughput
- Reduces cashier training
- System reports make reconciliation easy for the debit and credit card transactions
- Eliminates the cost of standalone equipment
- Request total or detail transaction information
- Settle transaction totals at day end
- Saves labour costs through increased productivity
- Supports multiple tills over one internet connection

Multi Store

Operate multiple store sites from one central location

TELUS Health Point of Sale Multi-Store module is designed for chains, multi-store owners and groups of store owners. Multi-store handles the challenge of maintaining a current and accurate information network for your operations, either from a main store location or a centralized head office environment.

Simplify the process of operating multiple remote locations

- Convenience of one location maintenance
- Centralized maintenance gives data consistency
- Standard product classifications for all locations
- Consistent item pricing and sales margins
- Easily pinpoint overstocked locations
- Transfer excess stock from other locations
- Promotion files distributed to all locations
- Automated distribution of data on demand
- Multiple communication formats
- Remote access to all store locations
- Accurate meaningful management reporting
- Consolidated ordering and sales information
- Amalgamated reporting of all locations
- Supports integrated accounting modules

Pro Sign

Design, develop and print professional quality signs

Take advantage of the power of signs with Pro Sign from TELUS Health. Pro Sign provides the tools needed to design, develop and print your own professional looking signs and labels.

Attract customer attention with store designed signage

- Design and develop you own signage
- Fully integrated with Assyst Point of Sale
- Import signage data from promotion files
- Increase sales on featured items
- Increase the sale of "slow-moving" items
- Competitive store price comparisons
- Compare house-brand versus trade-name pricing
- Influence your customers' buying choices
- Various customer announcements
- Easy and efficient maintenance tools
- Wireless device set up option
- Multiple price label and ticket print features

Prescription Scanning

Protect your profits from walking out the front door

TELUS Health Point of Sale Prescription Scanning is a tool that helps pharmacies remain competitive. Prescription Scanning eliminates the need for manual tracking and helps prevent losses due to prescription walkouts.

Prescriptions easily tracked to prevent shrinkage and fraud

- Bar code printed on prescription receipts
- Prescription Scanning at the cash register
- Prescription pickups and deliveries
- Eliminates keying errors at the cash register
- Finalize transactions quickly
- Adds a professional look to your business
- Frees up a pharmacist's valuable time
- Provides exact margins of the pharmacy sales
- Third Party charges directly posted to AR
- Integrated customer account with patient profile
- Front store and Dispensary inventory transfers
- On-screen Rx monitoring controls walkouts
- Print out of unpaid prescription list
- Document Imaging integration
