Dslreports mobile speed test

If you're struggling with delayed or curious Internet speeds to know how your internet provider builds up, it's impossible to know how fast your Internet speed is without using an accurate test. First quality Internet speed tests can clear up any confusion quickly and easily. Make a selection of the following Internet speed tests to learn more about your upload and download speeds, as well as other exciting information about your Internet connection. SpeedOf.MeSpeedOf.Me is an HTML5-based speed test that is lightweight and designed to replicate real-world navigation and download conditions, it does so by requesting a number of files of increasing sizes and recording download speed. The test tracks real-time information about downloads, uploads, latency, and other information, such as IP address, server location, and more. You also have a history section to easily compare your tests with chart changes and a share actions section on Facebook or Twitter. Instead of selecting a location, the website calculates the fastest and most reliable server of 127 available servers. All files are downloaded and uploaded in sequence — rather than simultaneously — to mimic actual internet browsing conditions. It's not just the most beautiful speed test around, it also provides the best data and features for a single visit. The site requires you to accept cookies before you start, but some of our other no.\$0 selections from SpeedOf.MeTestMy.netSi are looking for proof that offers more data than the average speed test, TestMy.net runs a series of exams and provides useful comparison data. You will have options to try to download, upload, combined, or just latency when you start first. Choose what interests you and the test will run automatically, and then provide you with detailed graphics about exactly how you performed. The test can also show how speeds compare to others in your city, the global average, the U.S. average, and so on. Results can also be saved for future use. If these numbers are a little unknown to you, there are also plenty of easy-to-understand documentation and guides that can help you better identify what the problem is with your Internet connection.\$0 from TestMy.netSpeedtest.netOokla's bandwidth diagnostic software featured on many other speed test sites listed here , but the most complete iteration of the test is Speedtest.net, which is owned by Ookla. The technology used here is smart and fast. Choose a nearby server (from a list of more than 1,000), run full test and returns information about loading and unloading speed, latency and loss of packages. You can fill out a survey after the test, answering questions about your ISP's claimed speed and monthly connection costs. This survey allows Ookla to accumulate an impressive database of consumer connection information, viewed and broken down by — In the US, there are significant internet speed variables on your NetIndex.\$0 site from Speedtest.netInternet Health TestInternet Health Test Do you want a full look at how your Internet speed works when pushed? The Internet Health Test takes longer than other web-based tests, but that's because it's complete. The test runs its connection through a server glove and infrastructure to see how it does in various situations. Don't worry so much about the average speed here — it's probably lower than your other tests. Instead, look at the various settings running to see how well your connection did in various server settings. If you want to dive in, you can compare it to how you use the internet to see expected speeds based on your typical activity, but this might do some research. Please note that the website has clarified its privacy policy and reserves the right to retain all test data for publication of studies. If you want to learn more about the organization behind the test, you can visit the Nonprofit Code for Science and Society.\$0 from Internet Health TestFast.comFast.com is an online speed test from Netflix. The site uses a simple interface and launches a speed test automatically. When the test is over, the site will show the current speed on Mbps. Of course, Netflix mainly intends this for people who want to test whether its current speed can handle Netflix content, especially high-def and 4K content (even on its PC), which can benefit the most from higher download speeds. You don't have to use the test to determine if you can stream Netflix content without buffer. We recommend this test if you want a quick and reliable option and don't need additional latency data information. Note that the language option covers a surprisingly large selection of languages worldwide, but it's not particularly useful unless you choose the Show more information after test option to see the details.\$0 of the NetflixGoogle Fiber SpeedtestGoogle speed test comes as part of its fiber services, but it's not an ad : Anyone can use this little speed fast test, and since it comes from Google, it's not uncommon for the test to be accurate and efficient. It is one of the fastest speed tests we have ever tested, with a time of between 10 and 15 seconds for the full test. When finished, the analysis provides information about unloading and loading speeds as well as ping. In the top right corner, it tells you the server you are connecting to. You can click Learn more to see what kind of performance you can expect from Fiber and how it compares to the current speed. If you want a quick and accurate test, give it a try.\$0 from GoogleWall Street on Thursday is expecting a one-year farewell affected by the pandemic on the last day of trading in 2020.Investor's Business DailyIt's DailyIt's a year of contrasts for investors. Own S&P 500 badly and billions are lost, but the huge gains were there for the taking, too. Wall Street investment firms are burning midnight oil as we approach the end of 2020, releasing their year-end notes and their New Year forecasts for both investor building. There is the obvious point: we are at a time of rising markets, and investor sentiment is riding high now that elections are resolved and covid vaccines have emergency approval and are entering distribution networks. However, the lockout policies put in place to combat the virus this winter are slowing the economic recovery. Whether the economy really tanks or not remains to be seen. Meanwhile, Raymond James strategist Tavis McCourt has posted his take on the current situation, and his comments take into account. First, McCourt points out that investors are focusing on good news: [The] equity market is more focused on rolling out vaccines and full reo openings of economies by 2021, and so far, negative data points have largely been brushed aside. From the future, McCourt writes of the next two years: We believe that the logical outcome of 2021 (and 2022 for that matter) is a likely return to normal with strong EPS growth offset by lower P&S that prohibits a change in vaccine history. We expect the cyclical sectors and equities of the smaller cap to continue to overcome, as is typical in the first cycle markets... Research analysts at Raymond James have been looking to the markets for the right purchases, and their picks have a closer look. They have been tapping high-yield dividend payers as an investment game of choice. The TipRanks database sheds some additional light on three of JMP's selections — stocks with dividends yielding 7% or better — and which the investment firm sees with 10% on the rise or better. New Residential Investment (NRZ)The real estate investment trust segment (REIT) has been known for its high and reliable dividends, a feature promoted by tax regulations that stipulates that these companies must return a certain proportion of profits directly to investors. Based in New York, New Residential Investment is typical of its sector. The company's portfolio includes residential mortgages, mortgage loan provision rights and the origin of the loan. NRZ focuses its operations on the residential housing sector. NRZ is a mid-range company, with a market value of \$4.13 billion and a portfolio worth \$5.72 billion. Income the company has increased since the second quarter of 2020, following heavy losses during the 'crown recession' of 1T. However, third-quarter earnings fell to 19 cents per share, down from 54 cents the previous quarter. But even with this loss, NRZ took care to maintain the dividend. In fact, he did more than that. The company raised in 3rd Trd at 15 cents per common share, in a continuation of an interesting story. Back in T1, the company recovered the common dividend to 5 cents, in a move to preserve capital during the crown crisis. The company has since raised the dividend by 5 cents in each subsequent quarter, and the T4 payment, announced in mid-December, is 20 cents per common share. At this rate, the dividend annualizes to 80 cents and the yield exceeds 7.87%. In addition to raising the dividend, NRZ has also announced a share buyback program totaling \$100 million. The buyback is for preferred shares, and goes alongside the existing share repurchase policy. Analyst Stephen Laws, in his NRZ coverage for Raymond James, writes, We expect strong origin volumes and attractive gain in sales margins to drive strong short-term results, and we continue to expect a dividend increase in TZ [...] For 4T20, we are increasing our core earnings estimate by \$0.02 per share to \$0.35 per share. By 2021, we are increasing our core earnings estimate by \$0.08 per share to \$1.31 per share. According to these comments, Laws values shares on a yield (i.e. Buy). Its target price of \$11.50 implies a one-year upswing of 16%. (To view the history of laws, click here) It's not often that analysts all agree on a stock, so when it happens, take note. NRZ's Strong Buy consensus rating is based on a unanimous 8 Buy. The average stock price target of \$11.36 suggests a 14% change from the current share price of \$9.93. (See NRZ action analysis in TipRanks) Fidus Investment Corporation (FDUS)Next up is a business development corporation, Fidus Investment. This company is one of many in the niche of mid-market business financing, offering debt solutions and capital access to smaller companies that may not be able to secure loans from larger markets. Fidus' portfolio focuses on senior secured debt and mezzanine debt for companies valued between \$10 million and \$150 million. Fidus has investments in 68 companies with an aggregate value of \$697 million. Most of this portfolio, 59%, is second-line debt, with the rest divided mainly between subordinated debt, frontline debt and equity-related securities. The company has seen an increase in revenue during the second and third quarters of 2020, following negative results in T1. The top line for the third quarter reached ~\$21 million, up an impressive 129% sequentially. Since the third quarter, Fidus has declared its dividend for TB 4, at 30 cents per share the same as the previous two quarter, plus an additional special dividend of 4 cents authorized by the Board of Directors. This puts the total payout for the quarter at 34 cents per common share, placing the return at 9.5%. Raymond James analyst Robert Dodd likes what he sees in Fidus, especially the dividend outlook. We continue to see risk / reward as at current levels - with shares trading below the book, solid NII base dividend hedging forecast... We project FDUS solidly over-earning its quarterly base dividend of \$0.30/share through our projection period. As a result, we do modest project supplements ... Dodd puts a yield (i.e. Buy) rating on the stock, and sets a target price of \$14. At current levels, this target indicates an upswing of 10.5% over the coming months. (To view dodd track log, click here) Wall Street is a little more divided on FDUS stocks, a circumstance reflected in Moderate Buy's analyst consensus rating. This rating is based on 4 reviews, including 2 Purchases and 2 Holds. The shares are priced at \$12.66, and the median price target of \$13.33 suggests a modest 5% upward from current levels. (See the FDUS action analysis in TipRanks) TPG RE Finance Trust (TRTX)Returning to the REIT sector, we look at TPG RE Finance Trust, the real estate financing arm of global assets company TPG. This REIT, with a market cap of \$820 million, has built up a commercial mortgage loan portfolio worth an aggregate total of \$5.5 billion. The company is an original commercial mortgage provider starting at \$50 million, mostly in U.S. primary markets. Most of the company's loans and properties are focused on the East. Like many financial firms, TPG RE Finance saw serious losses in T1 due to the crown pandemic crisis - but has since largely recovered. Revenue in T3 reached \$48 million, up 9% on the previous year. During the quarter, TPG received loan repayments totaling \$199.6 million, a solid result, and when the quarter ended the company had on hand \$225.6 million in cash or cash equivalents. The company was able to easily finance its dividend, of 20 cents per common share, in T3. For T4, the company recently declared not only regular payment of 20 cents, but also a non-recurring special cash dividend of 18 cents. Overall, dividends yield a yield of 7.5%, almost 4x higher than the average found among

S&P listed companies. Returning to Raymond James' REIT expert Stephen Laws, we find that he is bullish on TRTX, too. TRTX has performed poorly since reporting the results of 3T, which we believe creates an attractive buying opportunity... We expect basic earnings to continue to benefit from Libor soils in lending and expect new investments to resume in 1T21. The company's portfolio has retail and hotel exposures of 14%, which will be below the industry average of 19%... To this end, laws rats TRTX to Strong Buy and its \$13 price target suggests ~22% upwards by 2021. (To view the history of laws, click here) This stock also has a Strong Buy rating of the analyst consensus, based on 3 unanimous buy reviews established in recent weeks. The shares are priced at \$10.67 and the average target of \$11.00 suggests a modest 3% upward from current levels. (See TRTX TRTX's analysis of actions Find good ideas for trading dividend stocks at attractive valuations, visit tipranks' best stocks to buy, a newly launched tool that unites all tipranks equity ideas. Disclaimer: The opinions expressed in this article are solely those of prominent analysts. The content is intended to be used only for informational purposes. It is very important to do your own analysis before making any investment. Also, how much will you get? It was a year to remember, for all the wrong reasons. Investors have a day off in the New Year, but not on Thursday. Here's what will be new when you sit down to do your 2020 taxes in the new year. The death of a spouse may be trying emotionally and mentally on many levels. There may also be financial stress if a spouse leaves behind credit card debt, outstanding loans or other monetary obligations. You may ask: I am ... Continue reading ->The post am I responsible for the debt of my deceased spouse? First appeared on SmartAsset Blog.Every October, the Social Security Administration (SSA) announces its annual changes to the Social Security program for next year. Here are the Social Security changes that were announced in October 2020 to take effect on January 1, 2021, according to the SSA's annual briefing sheet. Keep them in mind when updating your Social Security information. By 2021, nearly 70 million Social Security beneficiaries are seeing a 1.3% cost of living adjustment (COLA) to their monthly benefits. Momentum can be an elusive quality, but it is also quite easy to detect. Right now, he's clearly on the side of BioNano Genomics (BNGO). In December, the life sciences company's shares have accumulated a mighty 328%. Obviously, investors are buying into the constant flow of positive developments from the cytogenetic specialist. On Monday, the company revealed that its Saphyr genome mapping platform has been credited to the U.S. by the College of American Pathologists. The platform will be used by bionano customer Praxis Genomics, marking it as the first company to offer a laboratory developed test (LDT) using whole genome analyses. Saphyr's optical genome mapping is an alternative to traditional cytogenetic methods and Maxim analyst Jason McCarthy believes it could be a game changer. Digital cytogenetics is one of the areas where Saphyr has the potential to change the clinical diagnostic landscape, the 5-star analyst said. Current methods are labor-intensive and time-intensive, and therefore costly. Saphyr offers a more efficient and agile alternative, as well as potentially improved diagnostic performance. As more LDTs are developed, we anticipate that the adoption of Saphyr should increase, boosting income Bionano. While accreditation is the first of its kind in the US, in Europe, clinical testing of the entire genome is already ongoing through various applications, including inherited genetic disorders and leukemia. The news followed the recent publication of an article that further highlighted Saphyr's qualities. In a comparison test, PacBio's HiFi chemistry was only able to detect 72% of the large TVs (structural variants) detected by Saphyr.All in total, McCarthy reiterated a buy rating on BNGO shares along with a price target of \$2. Due to bionano's latest rise, the figure indicates a 5% drop compared to current levels. (To see McCarthy's trajectory, click here) Two other analysts recently released reviews of BNGO, with one saying Buy and the other recommending a suspension, adding to a moderate consensus rating of Buy. That said, it's hard to keep up with the current speed of stock earnings, and the median price target of \$1.42 suggests a 32% drop. (See analysis of BNGO actions in TipRanks) To find good ideas for trading healthcare stocks at attractive valuations, visit tipRanks' best stocks to buy, a newly launched tool that links all tipRanks equity statistics. Disclaimer: The opinions expressed in this article are solely those of the prominent analyst. The content is intended to be used only for informational purposes. It is very important to do your own analysis before making any investment. The investor's Business DailyApple and Moody's are two well-known Warren Buffett-winning stocks. But many of his main actions are not obvious. Business Daily InvestorThe stock market had a quietly busting day as major indexes rose and Apple stopped. Tesla, Nio and Bitcoin jumped. TSM and Visa entered shopping areas. (Bloomberg) -- For a guy who turned a few dollars into a company that oversees everything from the New York Stock Exchange to Libor, Jeffrey Sprecher was noticeably unknown outside Wall Street.And it might have stayed that way except that his wife, Kelly Loeffler, was appointed to a Georgia U.S. Senate seat to fill a vacancy late last year. Within months, the couple faced public scorn for a series of stock market operations carried out before the coronavirus outbreak rocked global markets. His wealth has become a focal point in the January 5 election between Loeffler and Raphael Warnock, a Democrat - one of two Senate races that day that will determine control of the chamber. His company's 22% rally this year helped make Sprecher, 65, a according to the Bloomberg Billionaires Index, and has cemented Loeffler's place as the richest member of Congress.It's another reminder of how Wall Street has done well during the pandemic as the broader economy struggles, and the latest twist to Sprecher's unlikely journey to the pinnacle of American finance. Intercontinental Exchange Inc., or ICE, as it's called, is now a \$63.63 sustained by much of the global financial system. It was built on Sprecher's deal, good timing and keen sense of where the world was headed. I would never have thought ICE would own the NYSE, be a leading provider of fixed income market data and try to automate the mortgage process all at the same time, said Rich Repetto, an analyst at Piper Sandler & Co. who has covered the company since its 2005 initial public offering. Sprecher, through an ICE representative, declined to be interviewed or comment on his net worth, which consists largely of his roughly 1% stake in the business. He has not spoken publicly about his wife's offer, but has donated to several Republican lawmakers and political action committees in recent years, including at least \$5.5 million to a super PAC supporting him. Loeffler, 50, was an ICE executive for more than a decade and is now in a razor-thin race with Warnock amid record early involvement. His campaign did not comment. Sprecher, who worked as a salesman out of college, got into the energy industry in 1983. In search of a way to cover the price of fuels, he formed ICE in the 1990s by purchasing a failed Atlanta company, called the Continental Power Exchange, which he modeled on an eBay for energy companies looking to buy or sell surplus electricity. He paid \$1 or \$1,000 for the business - he said two years ago that he can't remember the precise sum - and kept it to the surface with his savings. The moment was fortuitous. ICE launched shortly before its biggest rival, Enron Corp., broke down. Sprecher made a dizzying number of offers. It bought rival exchanges and also expanded ICE to areas such as commodity futures, fixed income and clearing houses, which are in the middle of each trade. The purchase of NYSE Euronext, which included the varied New York Stock Exchange, gave London-based Liffe control of ICE, which offered interest rate derivatives trading. In 2014, ICE picked up responsibility for london's interbank offer rate, or Libor, which is embedded in a number of financial contracts, ranging from credit card rates to derivatives prices. And this year he bought Ellie Mae Inc., which processes more than 40% of all new U.S. residential mortgages, a booming business now with borrowing costs at historic lows. At the heart of the company is data, which collects from customers, classes and analyses, and then sells back to those same customers. It underpins benchmark indices for everything from crude oil derivatives to interest rates. If I were starting this company today, I'd probably call it the Intercontinental Scalable Network and Database Company, because that's who we are, Sprecher said on a February call with analysts. Bloomberg LP, the parent company of Bloomberg News, competes with ICE in providing financial analysis, fixed income data and information. Loeffler arrived at ICE in 2002 in 2002 lead investor relations, and later also assumed communications and marketing - responsibilities are usually split between three jobs. She and Sprecher married in 2004. They proclaim self-proclaimed workaholics and have no children. Loeffler had been active in Republican circles for many years, but never ran for public office. But when Johnny Isakson, the state's senior senator, resigned in 2019 on health grounds, he sought and won the temporary appointment of Georgia Governor Brian Kemp, his gender and financial well-being likely playing roles in his decision. The couple's wealth, established in a 99-page financial disclosure form that lists everything from rental properties to a private plane, came under scrutiny after revealing a series of stock market operations that began the day she and other senators received classified information about the coronavirus outbreak. Loeffler has said that the couple's independent financial advisers made the trades without their knowledge, and that the investment portfolio will be liquidated. The Justice Department dropped a transaction probe by her and some other lawmakers and the Senate ethics panel itself cleared her of any wrongdoing. He sits on four Senate committees, including the Agriculture Committee, which oversees the Commodity Futures Trading Commission. The agency regulates the derivatives market, including many aspects of ICE's growing business. Sprecher didn't give any idea that he's done building the company. In February, it gave up an opening with eBay Inc., which had baffled analysts. The acquisition of Ellie Mae was announced just six months later. I really don't know how to manage a company that isn't growing, he said in a podcast in May. Part of managing a growing company is like ducking with your legs moving very quickly underneath. I really wouldn't know how to float. At last, the annus horribilus 2020 is coming to an end, and it's time to get our wallets for the new year ahead. There is good news about to encourage investors for 2021. In testing that the government can sometimes move quickly and decision-making, the FDA granted emergency authorization for both Pfizer and modern COVID vaccines, and shots are entering distribution networks. The election is settled, except for georgia's Senate leaks, but no matter how global results are known: a very divided government, without clear mandate to sweep the legislation. It is a portent of regulatory stasis, which means predictability, which is good for markets. These are the facts explained by emerging investors pushed by the Dow Jones, the S&amp;P 500, and the NASDAQ up to record levels. And its bullish sentiment, which has top Wall Street analysts selecting the stock as potential winners for next year. And when we say they're the top Wall Street analysts making those calls, we mean it. These are analysts' shares in the top 5 of the Tipranks database. These are stock experts with the most on-file recommendations, the best success rate, and the highest average return. So, let's see what they have to say about these three strong buy stocks. ZoomInfo Technologies (ZI)Tech companies, especially in cloud, communications and marketing segments, have some clear opportunities during the COVID pandemic. ZoomInfo is part of this group; The company's services include digital marketing intelligence, account and data management, demand generation, and lead prospecting. ZoomInfo offers software in the Digital Intelligence cloud designed to make these background tasks more efficient, so marketers can focus on selling. ZI shares have seen volatile trading since it went public in June 2020 but overall shares are up 34% year-on-year. The third quarter, ZoomInfo's first full quarter as a public company, showed strong results to encourage investors. Frontline revenue reached \$123.4 million, up 11.8% and 56% year-on-year. EPS, which had been negative in T2, turned positive in T3 with a profit of 2 per cent per share. The company ended the quarter with \$59.8 million in free cash flow. ZoomInfo reported having 720 customers with \$100,000 or more in annual contract value. In his Review of ZoomInfo, Brent Bracelin of Piper Sandler, rated the 1-on-Wall Street analyst for TipRanks, lays out a simple case. We are raising revenue estimates by \$13.6 million for this year and \$19.6 million for next year factoring in broad-based strength and minor contributions from acquisitions Everstring and Clickagy. We are ZI buyers based on their ambitions to build a modern go-to-market operating system (GTM) with a unique business model that balances high growth and high margins... Based on strong GDP results and favourable outlook for T4, we would be aggressive buyers of ZI given their unique profile of a high-growth, high-margin model with limited down risk, Bracelin opined. Bracelin sets a price target of \$59 to go along with this overweight rating (i.e. Buy), suggesting that ZI has room for growth of ~25% next year. (To view bracelin's track record, click Overall, there are 9 recent reviews on ZoomInfo's record and all are purchases - making the consensus rating of analysts a unanimous strong buy. The shares are priced at \$47.03 and the median price target of \$55.89 indicates ~19% bullish potential from this level. (See [zi action analysis in TipRanks](#)) Ichor Holdings (ICHR)Next up is a holding company whose subsidiaries design, engineer and manufacture gas and chemicals essential delivery systems in a variety of industries. Ichor is best known for his contributions to the capital teams of the semiconductor industry, where his gas module and chemical process subsystems make up a substantial part of the cost of each chip. Ichor systems are also used in the manufacture of LED screens, biomedical equipment and alternative energy sources. Specialized manufacturing can be a solidly profitable niche, especially when a company is building parts and tools needed for frontline industries. Semiconductor chips are essential in the digital world, and cannot be manufactured without the input of Ichor's tools. This gives Ichor a competitive advantage as it offers a product that its customers cannot do without. This should be seen in quarterly revenues, which have been rising slowly but steadily until 2020. The company saw \$220 million on top in T1, and reported \$228 million in T3. The third quarter rose 47% year-on-year, and was the sixth consecutive quarter to show sequential gains. EPS, at 45 cents per share, rose 28% and rose 28%. Fans include Needham's Quinn Bolton, who is ranked 2nd on Wall Street, according to TipRanks. [We] believe that Ichor's fundamentals remain strong... we hope the offer will allow ICHR to pursue M&amp; To significant accumulators they should strengthen their market position, accelerate revenue growth and provide vertical integration and greater gross margin over time. Looking further afield, if the company achieves its LT operating model over the next ~3 years, we see NG earnings power of \$4.85 per share, Bolton commented. To this end, Bolton values a Buy's shares, and its \$40 price target implies a one-year increase of 32%. (To view the Bolton track record, click here) Like Bolton, Wall Street is choosing ICHR as a long-term winner. With 4 unanimous Buy ratings allocated over the past three months, the shares gain a consensus from Strong Buy analysts. Adding to the good news, its \$40 average price target puts upward potential at ~32%. (See ICHR action analysis in TipRanks) DocuSign (DOCU)Last but not least is DocuSign, San Francisco's cloud-based electronic signature service. DocuSign offers customers a verified and secure electronic signature option for online documents. Customers get efficiency savings, in the form of faster change, less ink and paper used in printing, and less time spent printing and distributing hard copies for the signature. DocuSign shares have experienced a strong in 2020, as the move towards remote work and virtual offices put a premium on digital services and online verification. DOCU is up 205%, more than tripling its value this year. Shares have been gaining as the company's revenue has climbed. The top line increased by 29% between T1 and 3T, with third quarter numbers reaching \$382.9 million. Third quarter earnings were 53% 53% The yoy increase in free cash flow was even more impressive, turning negative \$14 million to a surplus of \$38 million. All this brings Alex Zukin of RBC, the 3 analyst at the TipRanks database, to rate DOCU an outperformer (i.e. Buy) along with a price target of \$325. Investors will pocket a 44% gain if the analyst's thesis is played. (To view Zukin's track record click here) Supporting his stance, Zukin writes, [The] Beats continue as DOCU delivered another very strong quarter of acceleration in each metric... What is even more impressive in our mind is that this is being driven almost entirely by an acceleration of the main e-signature business with the company confident that it is still very modestly penetrated in its TAM (which has expanded significantly) that can keep growth above pre-pandemic levels in a post-pandemic world... Similarly, other Wall Street analysts like what they're seeing. With 10 purchase ratings vs. 3 Holds received in the past three months, the shares earn a Strong Buy consensus rating. At an average price target of \$276.46, analysts see a potential upward of 22% at the DocuSign store. (See docu-action analysis on TipRanks) To find good ideas for trading stocks at attractive valuations, visit TipRanks' best stocks to buy, a newly launched tool that links all tipRanks equity statistics. Disclaimer: The opinions expressed in this article are solely those of prominent analysts. The content is intended to be used only for informational purposes. It is very important to do your own analysis before making any investment. It is not uncommon for people to receive considerable inheritances, but it is less common for them to make the most economically advantageous decisions about what to do with their newly acquired assets. If you inherit a significant amount, such as \$50,000, ... Continue reading ->The Post What should I do with a \$50k inheritance? first appeared on SmartAsset Blog.DEEP DIVE During the Stock Exchange's March slump, it may have been difficult to expect 2020 to end as a good year for stocks, but the Federal Reserve's incredibly low interest rates, unprecedented federal spending to support the economy and investor enthusiasm for technology stocks did. While times remain difficult, canny investors will find opportunities abound. These penny stocks could weather coming economic storms. Investor's Business DailyAlibaba shares are recovering from a tough Christmas week as the giant queues up helps boost a top China fund close to a point of purchase. Investor business diaryThe Dow Jones Industrial Media remained on pace for a new high close Wednesday afternoon as the fate of the \$2,000 stimulus checks remains unclear. (Bloomberg) -- JCPenney's new owners replaced CEO Jill Soltau less than a month after re-launching the department store chain that went bankrupt during the he will leave on December 31 and be succeeded by Stanley Shashoua, the chief investment officer of Simon Property Group Inc., while a search for a new CEO is conducted, according to a statement Wednesday. Mall owners Simon and Brookfield Asset Management Inc. acquired J.C. Penney Co.'s retail operations to help keep one of its largest tenants in the business. The brief two-paragraph announcement gave no explanation for the CEO change. The exit is another burden for the department store chain, which made rapid leadership changes over the past decade as a number of turnout plans fell short. While it wouldn't be unusual for new owners to bring in a new leader, restarting the process could hurt JCPenney as it tries to right the company, said David Swartz, equity analyst at Morningstar Inc. It's not great news, Swartz said. Turnaround PlanSoltau, hired in October 2018, was in the midst of overseeing its own turnaround plan and launching a new team when the Covid-19 pandemic swept the world this year and temporarily closed many retail stores. In May, J.C Penney Co. was bankrupt. He remained in the top job throughout the bankruptcy process, and the new owners highlighted his comments as CEO in the December 7 announcement of the relaunch under the name JCPenney. Simon and Brookfield plan to establish a temporary CEO office that will include members of JCPenney's current management team, according to the statement. J.C Penney Co. was split during the bankruptcy at the operating company, which is owned by commercial operators while lenders obtain the real estate company. The latter remains in the Process of Chapter 11 and is expected to emerge in the first half of 2021.Penney's problems were long before Soltau's arrival. He became the company's fifth CEO in seven years - fourth if you count Mike Ullman's reprise mandate - in an effort to make the stalwart mall a more compelling destination. The carousel began in 2011 when activist investor William Ackman pushed toward ouster Ullman in favor of Ron Johnson, new triumphs at Target Corp. and Apple stores. Previous planJohnson imagined not so much a change as a wholesale reabrication of the company. At an event dotted around the Hudson River introducing his plan, he promised to end the endless sales cycle and instead train customers to shop at fair prices. He redesigned the shops to feature boutique brands built around a so-called town square. Sales in its first year fell by 25%, and in 2013, the company replaced it with Ullman after less than two years. Marvin Ellison, who was made After Ullman retired, he left to become CEO at Lowe's Cos. after less than two years. Soltau came from leading craft chain Jo-Ann Stores Inc., and before that he was an executive at the now defunct Midwestern department store chain Shopko Stores Inc. Soltau worked for inventory management and attract more buyers by renewing goods. There were signs of progress when the company reported its year-end earnings in late February, with improved sales of womenswear and better-than-expected results. Now, as an intensified pandemic threatens more disruptions and store closures, it would be much smoother if Soltau could continue to direct the change, or if the company had a plan in place, Swartz said.
