Business Account Information

About Mobie Alert

Mobie Alert provides a comprehensive network that enables businesses to protect their employees, property, and premises through a mobile location-based emergency alert and notification system. When you subscribe to Mobie Alert's services, your company is armed with a local and global system that works in real time to keep you knowledgeable and empowered as real danger unfolds.

The Business Account is organized into three types of members with different functions. This allows the greatest control of resources and information for the benefit of the company and its employees. The types are:

- ▶ Initiator—Authorized to launch emergency alerts only.
- ▶ Security—Authorized to launch both emergency alerts & notifications.
- ▶ Notifier—Receivers of all alerts only.

The Business Account can create three preset emergency messages for specific emergencies and four preset cautionary messages for general awareness broadcasting. All messages can be updated as needed. In addition, two unique Mobie Alert features are:

- ▶ Alert-On-The-Go—Security creates specific messages based on the evolving situation and provides updates to Notifiers.
- ▶ Security-Assisted Alert—All members can contact Security personnel directly for assistance.

Business Account Features

- ▶ Manage circle members according to function: Initiators, Security, or Notifier.
- ▶ Create three customized emergency messages for specific emergencies.
- ▶ Create four customized cautionary alerts for general notifications.
- ▶ Security can create Alert-on-the-Go emergency alerts and cautionary messages based on the situations.
- ▶ Security-Assisted Alert allows all members to contact Security personnel directly for assistance.
- ▶ Authorized members communicate on forum.
- ▶ Provides picture taking & sending capabilities.
- ▶ GPS integration of Security & injured members' locations activated during an emergency.
- ▶ Provides GPS mapping of medical centers & police.
- ▶ Automatic roll call & health status of circle members.
- ▶ Use members' stored personal health data as needed.
- ▶ Initiates option to call 911 for governmental help.
- ▶ Handles multiple emergency & cautionary alerts.

How Mobie Alert Works

After a business subscribes to Mobie Alert's affordable services and enrolls all employees into its alert circle, it creates stock emergency and cautionary messages. An example of an emergency message: "Armed intruders with guns. All buildings in lockdown."

If a gunman enters the company's premises, Initiators or Security personnel can respond immediately and warn everyone of the danger by launching this coded message. If Notifiers are the first witnesses, they can alert Security who then alert the entire circle. Then the app prompts the sender to call 911.

Push messages are sent to members' mobile devices, as well as emails, with "Armed Intruder" message. Alerted, members can know what to do. An emergency forum opens allowing Initiators & Security to communicate, ascertain the situation with pictures & chats, and take actions. Our app also tracks members' GPS location, performs roll call & health status checks.

After resolution, all communication data can be saved for various purposes. To clear and close the emergency forum, the sender resets his app which does the same for everyone in the business' circle.

Time, knowledge and quick actions can save lives!
