CV (English: /kəˈrɪkjʊləm ˈviːtaɪ, -ˈwiːtaɪ, -ˈvaɪtiː/),[[]¹[]][[]²[]] Latin for the course of life, often shortened to CV or vita (genitive case, vitae), is a written look at someone's life's work (academic formation, publications, degrees, etc.). Vitae can be plural or possessive (genitive case in Latin). Vitae often strives to be the perfect record for someone's career, and it can be extensive, but it can (depend on the country) be used in the same way as a RESUME, which is typically a short 1-2-page summary of work qualifications and work experience and often presents only recent highlights. In many countries, a CV is typically the first thing a potential employer faces when it comes to jobseekers and is typically used to screen applicants, often followed by an interview. Vitae can also be requested from applicants for post-20-year programs, scholarships, scholarships and funeral homes. In the 2010s, it became popular for applicants to submit electronic text about their CV to employers via email, online on an employment website or using a work-driven social networking site such as LinkedIn. Content This section requires additional references for verification. Help improve this article by adding citations to trusted sources. Non-outsourced material may be challenged and deleted. (February 2015) (Learn how and when to delete this sample message) In the UK, most Commonwealth countries and Ireland, the CV is short (usually no more than two sides of the A4 paper) and therefore contains only a summary of the job history, qualifications, training and some personal information of the job seeker. Some parts of Asia require photos of applicants, date of birth and latest salary information. CTVs are often tailored to change the emphasis on information according to the position the job seeker is applying for. The CV can also be expanded to include an extra page in jobseeker's publications if they are important for the job. In the United States, Pakistan, Canada, Australia, Germany, India, Cuba and Russia, the CV is a comprehensive document that is used in academic circles and medical careers and includes education, publications and other achievements. A CV contains a shorter summary of the CV in more detail, which is used more frequently for job applications, but often professionals are expected to use a short CV with: the current focus of their academic lives, and their entire history. A CV is usually used to apply for a position in a scientific world, while a CV is usually used when applying for a position in industry, a nonprofit, and the public sector. [3] Etymology, spelling and pronunciation Curriculum vitae is a Latin expression that can be loosely translated into the course of [my life]. In the current use, the curriculum is less marked as a foreign loan term. Traditionally, the word vitae is made in English using ligature æ, so vitæ,[4], although this Convention (curriculum vitæ) is less common in current practice. The plurality of curriculum vitae, in Latin, is formed as curricula and used in conjunction with the vitarum of curricula.[5] each of which is considered grammatically correct than the other. In English, the plurality of the entire cv of the term is rarely used; the plurality of the curriculum is usually written as curricula[6] instead of traditional curricula. CV Guide – Massachusetts Institute of Technology – Global Education & Career Development, U.S. Covering Letter Guide – Massachusetts Institute of Technology – Global Education & Career Development, United States Retrieved from a document created by a person and used to showcase their background, skills, and achievements for other purposes, see Résumé (details page). An example of a resume with a common format. A CV or RESUME[a][1] is a document created by a person and used to showcase their background, skills and achievements. Resumes can be used for a variety of reasons, but most often they are used to secure new employment. [2] the CV contains a summary of the relevant work experience and training. A CV is usually one of the first items, as is the covering letter covering letter sometimes a job application that a potential employer sees for a job seeker and is typically used to screen applicants, often followed by an interview. The CV used in employment in the UK (and other European countries) is more similar to a CV – a shorter, summary version of education and experience – than the longer and more detailed CVs expected in US academic circles. In South Asian countries such as India, Pakistan and Bangladesh, biodata is often used instead of a CV. [3] History The word resume comes from the French word CV, which means summary. [4] Leonardo da Vinci is credited with the first CV, although his CV is a letter written from around 1481 to 1482 to a potential employer, Ludovico Sforza. [5] [6] For the next 450 years, the CV was still merely a description of the person and included their ability and previous employment relationship. At the beginning of the 20th century, the CVs listed weight, height, marion and religion, among other things. It wasn't until 1950 that the CV developed into something other than words written on a papercle. By then, CVs were considered very mandatory and began to include information such as personal interests and hobbies. It wasn't until the 1970s, at the beginning of the digital age, that resumes took a more professional look when it comes to presentation and content. [7] Description In many contexts, a RESUME is usually limited to one or two A4 sizes or letter sizes, highlighting only those experiences and competences that the author considers most relevant to the desired position. Many resumes contain keywords or skills that potential employers search for through applicant tracking systems, use a lot of active verbs, and display content in a flattering way. After the name of the applicant, abbreviations and credentials should be written in full in the appropriate part of the CV, which is a greater chance of being found in a computerised keyword scan. [8] A CV is a marketing tool in which content should be adapted for each individual job application or for an application for a particular sector. The transmission of CVs directly to employers became increasingly popular already in 2002. [citation required] Jobseekers were able to circumvent the job search process and reach employers through direct email contact and cv blasting, which means mass distribution of CVs to increase personal visibility in the labour market. However, the mass distribution of CVs to employers can often have a negative impact on the applicant's ability to safeguard employment, as CVs are generally not tailored to them for which the applicant applies. Therefore, it is usually more sensible to optimize your CV for each to-do its keywords. In order to monitor all experiences, it is recommended to keep a master résumé document so that jobseekers have the opportunity to adapt their tailored CV while ensuring that external information is easily accessible for future use if necessary. The complexity or simplicity of different resume formats usually produces results ranging from person to person, occupation and industry. CVs or resumes used by medical professionals, professors, artists and other specialties can be relatively longer. For example, an artist's RESUME, which typically excluding all non-art-related employment relationships, can contain extensive lists of private and group exhibitions. Styles Résumés can be arranged in different ways. Here are some more common resume formats: Reverse chronological RESUME The reverse chronological RESUME lists the applicant's work experiences in chronological order, which usually covers the previous 10 to 15 years. Locations have start and end dates. The current locations of a resume typically include a start date to the present day. The reverse chronological resume format[9] is most commonly used by professionals who progress at the same vertical level. [10] Using this format, the main part of the document becomes the Work Experience section, which begins with the most recent experience and chronologically moves backwards several previous experiences. The reverse chronological CV aims to build credibility through the experience gained, while at the same time illustrating career growth over time and filling all gaps in career development. A chronological CV is not recommended for jobseekers with gaps in their career summary. In the United Kingdom, a chronological CV usually extends only as far as the applicant's GCSE/Standard Grade qualification. Functional CV Functional CV lists work experience and competence sorted by skill or job function. The functional CV focuses on the skills that are characteristic of the type of post applied for. This format directly emphasises certain professional abilities and makes use of experience summary as a primary means of communicating professional competence. Instead, the chronological CV format briefly highlights these skills before presenting a comprehensive career development schedule using reverse chronological lists, and the latest experiences are listed first. A functional CV works well for those who make a career change, who have a diverse work history or little work experience. A working CV also favours applications for jobs that require very specific skills or clearly defined personality traits. A working RESUME is a good way to highlight certain or experiences, in particular where: skills or experiences may have come from a role that was held some time ago. Instead of focusing on the length of time spent, the functional CV allows the reader to quickly identify these skills. Resumes When job search has become electronic, it is common for employers to accept resumes electronically only because of practicality or preference. This has changed a lot the way resumes are written, read, and processed. Some career experts point out that today a paper-based RESUME is the exception rather than the rule. [11] Many employers now find applicants' CVs through search engines, which makes it more important for applicants to use appropriate keywords when writing a RESUME. Larger employers use applicant tracking systems to find, filter, and manage large CVs. Job advertisements can direct applicants to send a CV by email to a company or visit its website and send a CV in electronic form. Many employers and recruitment agencies working on their behalf require resumes to be received in a specific file format. Some require Microsoft Word documents, while others only accept resumes formatted with HTML, PDF, or plain ASCII text. Another aspect of electronic RESUME documents is that they are structured by natural language processors. Resume members can correctly interpret some parts of resume content, but not other parts. The best resume parsers store a large percentage of location, names, item information, but are less accurate with skills, industries, and other less structured or rapidly changing data. Resumes are more likely to be interpreted correctly with resumes, which can make the applicant more discoverable. One advantage for employers in online CVs is significant cost savings compared to traditional rental methods. [12] The second is that potential employers no longer have to sort massive stacks of paper. Infographics, video and website resumes As the Internet has become multimedia-driven, job seekers have sought to capitalise on the trend by moving their resumes away from traditional paper and email media to website resumes or e-resumes. [13] Video, infographic and even Vine CVs have gained popularity, albeit mainly in the creative and media sectors. [14] This trend has attracted criticism from HR professionals, who warn that this could be a passing craze, pointing out that recruiters whose workflow is only traditional resume format can ignore multimedia-based resumes. [15] Cv evaluation Many CV development agencies provide CV evaluation services in which they evaluate the CV and propose the necessary changes. Candidates are free to: make these changes yourself or may itself assist the Agency. In some career fields there is a special section listing the author's lifetime works: in computer-related fields, softography; discography of musicians and composers; filmography for actors. Keeping CVs online has become increasingly common for people in professions that have benefited from multimedia and rich detail on html CVs, such as actors, photographers, graphic designers, developers, dancers, etc. [16] Jobseekers are increasingly in demand to have an electronic version of their CV available to an employer and professional using internet recruitment. [17] Online resume delivery services have emerged that allow jobseekers to share their CVs with a wide range of employers via email. [18] Cv as one part of the personal branding portfolio In some areas, especially the start-up community, the use of traditional CVs has been steadily declining. [19] While separate CVs are still used to find work, jobseekers can also consider their CV to be one of several assets that make up their personal brand and work together to strengthen their job application. In this scenario, CVs are usually used to provide facial information about a potential employer (e.g. achievements), while social media platforms provide insight into job seekers' motivations and personality in development.
