Note: Its support for Windows XP and Windows Vista is still available trough Firefox ESR (Extended Support Release). Download Firefox for Windows XP or Vista. Also available: Download Firefox for Mac and Firefox Portable stay up to date with the latest software releases, news, software discounts, deals and more. Affectionately stated as the developer browser in the software development industry, Firefox is free and open-source and it uses the Gecko layout engine to render web pages. When it was released in 2002, no one could have anticipated the kind of loyal consumer base it would create over the years. Despite gaining tough competition from counterparts like Edge and Chrome, Firefox has conducted its own, thanks to its responsive engine, low memory usage and feature-pack interface. Let's discuss some aspects of firefox browser with direct download link to the latest version of the browser for all operating systems. Finally, you can also choose a specific version of Firefox to be downloaded. What is Firefox Quantum? Firefox Quantum, the latest version of Firefox, is claimed to be the fastest version of the browser ever. This includes several improvements to Firefox's Lizard browser engine and also includes the refinement of UI and interactions. Firefox Quantum when it was launched it created a lot of market hype and many people have also shut down their browsers. And rightly so because of the following reasons: Firefox Quantum is much faster than its predecessor and chrome also gives users more control over how Edge.It their data is handled Firefox Quantum's dev tools are slightly better than Chrome, it takes less system resources than The Chromit UI Snappier! What is Firefox ESR? Firefox ESR or Extended Support Release is a version of the browser specifically designed for IT professionals. Using Firefox ESR, IT professionals can easily configure and deploy Firefox in their organization. It is based on the regular release of Firefox for desktops and is intended for use by a variety of organizations such as schools, businesses, and all those who need extended support for mass deployment or who want to install and maintain Firefox at large. The main objective of Firefox ESR ESR is to provide support for outdated technologies such as Microsoft Silverlight that have been deprecated. This feature of the browser is extremely useful for those who are still using old technology. Firefox 52 ESR, Silverlight, as well as Java were supported by the browser, however, with firefox 60 ESR released, this support has been removed and Now only Adobe Flash supports the NPP plugin. How to install FirefoxInstling Firefox is easy. Just download Firefox from the link below and run The installation is, more or less, almost automated. Firefox's default install location will be C:\0 The program Files.Migrated chrome and Edge browsers are generally quite long and cumbersome in Firefox. They include a lot of preparation, setup and configuration, and careful planning will be executed successfully. Switching from one browser to another is no different. You need to prepare the proper setup and import all your settings, bookmarks, preferences, etc. However, switching from any other browser to Firefox is pretty straightforward. Also, it has its perks! (Read the benefits of Firefox mentioned in the section on Firefox Quantum). Here, we'll show you how you can easily migrate from your two biggest competitors – Edge and Chrome to Firefox. Firefox makes it extremely easy to migrate bookmarks from your saved information (passwords, history and cookies) and Google Chrome. Typically, if you install a fresh copy of Firefox, it automatically prompts you to import all your data as shown below. Import bookmark history and passwords into Firefoxu, Mozilla can also choose to sync your data to the cloud server so you can carry all your data with you on all your devices. This option is also given to you when you first install Firefox Syncf, however, you already have Firefox installed and now you have chosen to import your data, you can do so with the help of import browser data tool. Follow the steps mentioned below to use this tool: First, launch Bookmark Manager. Click the library icon in the toolbar for this and then click on the bookmark -> Show all bookmarks. You can also access there by clicking on the CTRL + Shift + B show All bookmarks will open this library dialog box from where you can organize and import your bookmarks from another browser. In this dialog box, click the Import and Backup button on the toolbar and then choose the import data option from another browser. Import data from another browser This will open another dialog box that will show you the installed browser available on your machine. Select the browser from which you want to import the data and click Next.Next. Select the browser to select the data to import 2xt, select the data you want to import. That is, cookies, browsing history, and/or passwords saved. Select items to import cookies browsing HistoryNext, Firefox will import data and give you a proper success message. You can repeat this process for as many browsers as you need. Bookmarks from different browsers <browserName>your bookmarks will be stored from folders in the menu and toolbar, but you can reorganize them but you want. Note: Firefox cannot import your add-ons. For this you need to search for equal extensions yourself from the Firefox add-on gallery. Check that firefox's SA version is installed Two ways to check the installed version of Firefox. You can go through the post to check which version of Firefox is installed on your computer. Is my Firefox up to date? Keeping your web browser up-to-date is essential to ensure a safe and risk-free browsing experience. With each new build, the manufacturer releases important bug fixes and other updates to the existing browser version that need to be installed. If your browser isn't updated, you can easily succumb to online threats such as viruses, malware, etc. To check if your Firefox browser is up to date, click the menu button. Next, click help and choose about Firefox. Mozilla Firefox will open the window and Firefox will start checking for updates and download them automatically. Check if Firefox relies on DateCam to automatically update Firefox? To set your Firefox browser to update automatically, follow the steps mentioned below: Go to The Apps and Features (Windows Key + X+F) search Firefox from Listclick on listing and select Uninstall and it will open uninstall wizard as shown below Ampinstall Firefox to reinstall Firefox again, you will need to run firefox installer again. What's the difference between each Firefox version? Mozilla typically releases Firefox in four versions according to the development stages. Firefox Nightfirefox Aurora (now Firefox Developers Edition) Firefox Betafirefox ReleaseFirefox Nightly this version has been released at night. It gets checked-in each day and updated twice a day. It can often cause problems until fixed, finished or returned. It follows, the most unstable construction. Firefox Beta Firefox Beta is the next version of Firefox originally released 6 weeks ago. It is more stable than at night, it is still not final and can be minor insects. Firefox Developers Edition Firefox Developers Edition is more capable towards developers. It has Java debuggers and a lot of tools that you can access Or a right click to diagnose issues with web pages you may be working on.
