

Company Fact Sheet

About us

Thinkful is a new type of school that brings high-growth tech careers to ambitious people everywhere. The company provides 1-on-1 learning through its network of industry experts, hiring partners, and online platform to deliver a structured and flexible education.

Thinkful offers programs in web development and data science, with in-person communities in up-and-coming tech hubs around the U.S. To join the Thinkful network send us an email hello@thinkful.com.

Founders

Darrell Silver and Dan Friedman founded Thinkful in October 2012 to make 1-on-1 mentorship available to everyone. [Read their bios](#).

Mission

We believe that if schools put in even half the amount of effort that students do the outcome would be better for everyone. People would have a path to a fulfilling future, instead of being buried under debt. Employers would benefit from a workforce trained for today. And education could finally offer students a return on their investment of both money and time.

At Thinkful, we put in outlandish amounts of effort to create an education that offers our students a guaranteed return on their investment. We partner with employers to create a world-class curriculum built for today. We go to the ends of the earth to find mentors all over the globe who are the best of the best. We invest more in career services than any of our peers. We work hard to be on the ground in the cities where our students are. Simply put, no other school works as hard for its students as we do.
