

# Magento: Installation guide

## What's this?

This guide is intended for system administrators for installation reference.

Read more about the extension from [here](#).

Before we start, please make sure..

..that the environment meets following requirements:

- PHP 5.3 or newer
- PHP extensions: mbstrings, curl
- Magento 1.6.0 or newer
- Administrator access to Magento

If you need support at any time, please feel free to contact us: [support@transfluent.com](mailto:support@transfluent.com)

# INSTALLATION

Go to [Magento Connect page](#) of the extension. Click **Install now**, accept terms and retrieve a key. Click on **Select key** and copy it to your clipboard.

Login to your Magento installation as an admin and choose **Magento Connect / Magento Connect Manager** from **System**-menu. Your admin login is re-prompted. Now under topic **Install new extension** provide the key from clipboard into the "**Paste extension key to install:**" -field. Click on **Install**. Once done, it is recommended to clear caches and log out&log back in before doing anything with the extension.

That's it! For further steps, please refer to our Getting started guide.

## Install New Extensions

1 Search for modules via [Magento Connect](#).

2 Paste extension key to install:  **Install**
