Evan,

We will try and line up someone to take over the Website management. But I am not the one. You have a responsibility to take good care of the site until we have selected someone to take on that responsibility. Your resignation from everything does not supersede your responsibilities that you accepted when you took it on. I hope you will work with the one selected to do it going forward.

Tim Barnett-CSSC President

Tim's talking about my VOLUNTEER work for the league.

Evan,

Be careful here Evan. Dictating what you will and won't do now is not beneficial to our league. You were entrusted to take care of that Website. Your duty still lies in you working with the man selected to have to take that over. Your duty does not end with your resignation. Your cooperation is appreciated and is necessary too.

Tim

Will do. Thank you for the message and access code. Thank you too for the good Website management you did.

Hello Tim,

The attached "Zoho CSS Admin Access.txt" file contains the logon information to the Zoho Admin portal for the leagues new email platform, Zoho. Once you add your email to the account you can remove the [KCath54n@mail.com](mailto:KCath54n@mail.com) email from the account. That is a account I use for junk stuff.

Please keep the attached file in a safe location as I will be deleting it from my system and will not be able to re-send it.

FYI,

Evan
