

Environmental Responsibility Statement

The environment affects our employees, customers, suppliers and the community. As responsible citizens, we recognize that we affect our environment. Therefore, we will continuously improve our business practices to incorporate advances in knowledge and technology as they relate to our environment.

The employees of Masters Gallery Foods, Inc. have always demonstrated a sincere and conscientious desire to take environmentally sound actions. The following principles guide our employees to operate, construct, develop, procure and manage in an environmentally responsible manner.

We will strive to:

- Develop products using procured ingredients and materials that are good environmental choices for employees' health, safety and quality needs.
- Manufacture and distribute our products with a minimum of energy consumption and waste generation.
- Design, build and maintain facilities that operate to minimize environmental impact.
- Educate our employees on how they individually and collectively impact our environment by providing information on alternative environmental choices.
- Maintain a proactive approach in pursuit of compliance with environmental rules and regulations using evolving technology.
