Dear Friends,

Rocking on the front porch of the The Growers Exchange nursery office, I have a yard full of herb plants to observe as I rock away a few moments of peace. With mind and body thoroughly relaxed, the sights, sounds, and movement in the herb garden invite me in. It may be that I need a rest from all the digging, planting, and weeding this garden requires, but the payoff is now - watching a small world living amongst my herb plants. This herb garden is fecund in a way no flower garden can match. Herb flowers lure in more visitors than I could name: bees, butterflies, hummingbirds and goldfinch keep our herb garden in constant motion. And it is that motion that will surely draw me out of my rocker and back into the garden.

Keeping our herb garden keeps us familiar with the herbs we grow throughout their lifecycle. Last spring, we added several hundred new plants to the garden. Using the greenhouse staff, we swooped through and planted it all in a morning. The quality of the plantings vary, as many hands made light work. But some of the herbs were not properly planted. With hot temperatures here, I have earned my PhD (professional hose dragger) keeping the little plants hydrated. The experience gave us great insight into what could go wrong with our herb plants when not planted correctly. All we learn, through our successes and our failures, has gone into our online planting guide as well as the tips included in this catalog. We hope what we have learned while growing our herb garden will help our customers grow a better herb garden this year!

The Growers Exchange would like to help you grow your field of dreams. Our goal is for our customers to have success with our plants. We are truly here to help, so don't hesitate to contact us. Often, a quick tip is all it takes. So, check out our selection of 150 herb plants. Take a little time to plan your garden, place your order and we will deliver the plants at the right time for your zone.

Happy Gardening,

BRISOL

WHY BUY OUR PLANTS?

Our plants are grown on our farm, using 'Best Practices'—healthy, well-rooted and ready to plant. Our plants are grown to explode when transplanted. We think pot size counts, but potential growth is what matters most.

Growing a Better Garden

Our goal at The Growers Exchange is to help our customers grow a better garden. We do everything possible to ensure that opening a box of our plants is a happy experience – we'd love to exceed your expectations! We grow over 150 different types of herbs, we only ship when they are 'root ready' – their roots are full in the pots and once planted, they will thrive. We grow our herbs in a 3.25" pots which makes them large enough to grow to their potential within their first season.

To do your part, gardeners provide these plants with everything they need to thrive. Healthy and well-draining soil, the proper amount of water and sunlight each day and a bit of maintenance. It is important to pay attention to the specific needs of each type of herb and you can find a lot of information on the Product Page as well as throughout the site. We really try to pass on what we have learned over the years; you shouldn't have to 'reinvent the wheel'. And, if you have questions or run into issues, feel free to contact us: info@thegrowers-exchange.com. We are here to help, and our best advice is to address any issues sooner than later.

Growing a better herb garden is a joy! A great way to unwind after a busy day is to poke around the garden, checking on things and pulling little weeds before they gain hold. A little daily maintenance avoids weed build up. While there, it is easy to tie up a few plants, prune and pick, and keep an eye out for garden pests. Early morning, before work, is another good time. Starting and ending a day with a little garden time makes a workday feel like a weekend!

The herb garden surrounding our nursery office keeps us familiar with the plants we offer for sale, and allows us to understand their entire life cycle. This allows us to address our customer's questions, provide good advice and provides a lot of insight into the plants themselves. With over 150 different herbs to observe and monitor throughout the year, we have plenty of garden tales to tell. Please contact us with questions, concerns or your own observations. After all, we are The Growers Exchange!

So, let us help you grow the best garden ever this year!

Thymus herba-barona

Z 5-9 ☉ | 6"H x 15"S | ■ | S

Ground hugging Lemon Thyme is the lowest yet, and it tolerates trampling better than others. Smells of lemon and spice! Great between paving stones in walkways and patios.

HER-THY13 \$6.95

Thyme 'Silver Edge'

Thymus argenteus

Z 4-9 | 8"H x 15"S | ■ | S

Leaves are dark green with white margins. Makes a wonderful color contrast in your garden, as a border plant. Used for any recipe calling for the flavor of thyme. Lovely!

HER-THY04 \$6.95

Valerian

Valeriana officinalis

Z 4-9 | 4'H x 3'S | □ | S

Masses of strongly fragrant flowers, used for sedative tinctures and called the "poor man's Valium." Makes a relaxing tea, and evokes the same effect of Catnip in cats!

HER-VAL01 \$5.95

"Unlike most places where you get the stuff and it's dormant or looks like a stick, these were all green and just like if you got them at the nursery. Prices are great, too!" - Nancy, Laurel, MS

Vervain

Verbena officinalis

Z 4-9 | 36"H x 24"S

A spicy anise flavor that adds tons of flavor to any dish! A key ingredient in Fines Herbes, Herbes de Provence and Bouquet Garnis.

HER-VRV01 \$5.95

Woad

Isatis tinctoria

Z 4-8 | 48"H x 24"S | ■ | SP-S

Commonly called "dyers woad", this herb is famous as the source of the natural blue dye, indigotin. Hardy biennial plant native to the British Isles.

GUARANTEE

Our plants are of the highest quality, and are healthy when they leave our greenhouse. They are ready for transplant AS LONG AS YOU FOLLOW OUR INSTRUCTIONS CAREFULLY. If your plants fail within fourteen (14) days of arrival, please contact us via our email address. Please understand that we cannot be responsible for the results of extreme weather, neglect, ignoring our hardiness zone information and care instructions. There are too many factors outside of our control to guarantee long-term survival: your neighbor's dog, poor soil, insect infestations or moles! We are here to help, so feel free to contact us.

HOW AND WHEN WE DELIVER

We ship at the right time for your zone, with orders dispatched on a first come, first serve basis by climate zone. Kindly provide us with 14 days notice if you'll be away at time of delivery.
