

Background:

This four day seminar introduces trainees to a complete, hands-on view of the Oracle Policy Automation 12 environment. Exercises reinforce presentations on modelling policies, administration of the team, deployment and collaboration and integration.

Prerequisites:

The seminar assumes no knowledge of Oracle Policy Automation 12. Basic knowledge of Microsoft Office and Windows is assumed. Some knowledge of business software (ERP, CRM or similar) is useful. The target audience is any member (policy designer, modeller, team leader, manager, and administrator) of the Oracle Policy Automation project.

Environment:

The target environment for this seminar is Oracle Policy Automation 12 18B or later.

Content:

1. Introduction
2. Oracle Policy Automation : Architecture
3. Oracle Policy Automation : Job Roles
