

## in the news

### INSIDE

Former Nixon speechwriter Patrick Buchanan told a Boston University audience Wednesday that the next ten days may be decisive in determining the Presidential candidates from each of the major parties. He commented that though the facts reported in *The Final Days*, a recently published account of Nixon's resignation, were generally accurate, the atmosphere portrayed was misrepresented.

p5

The baseball team defeated Bates College to make its record 10-6 with nine games left to play. Senior Mike Royal, in a superb performance, hurled a one-hit shutout to lead the Engineers to victory.

p8

MIT sailors were victorious in three regattas last weekend, as the women captured the President's Trophy; the men, the Dartmouth Bowl; and the freshmen, the Greater Boston Freshman Championship. In individual competition, Bill Critch '77 and Len Dolher '79 qualified for the finals of the New England Singlehanded Championships.

p8

### OUTSIDE

Twenty-five people were injured, two seriously, when a bomb exploded outside the State Probation Office in the Suffolk County Courthouse in Boston Thursday morning. Boston Police Commissioner Robert DiGrazia said a warning that the bomb would go off in 20 minutes was called in to the Courthouse at 8:53am. The device exploded at 9:12, just as the Boston Bomb Squad arrived. One man had been arrested in connection with the incident by 11am Thursday morning, but the suspect was not held.

Prostitutes from across the country and Europe will converge on Washington this summer for the first international Hooker's Convention. *The Washington Post* reported. The hookers wish to start a national campaign to make prostitution legal.

Boston Mayor Kevin White will lead a march through Boston today to call for an end to the violence and racial trouble that have plagued Boston in recent weeks. President Wiesner and Chancellor Gray will participate in the march, which will start at Charles and Beacon Streets at 11:30am.

## Photo Lab reappraisal defended

By Peter Coffee

The Creative Photography Laboratory will not be dismantled under proposals to reorganize the Department of Architecture and redefine the Department's arts programs, according to department faculty.

Contrary to earlier reports, the proposals, which will be submitted to the Provost soon for consideration, will not phase out the Lab's programs or scatter its functions among other departments and centers, the faculty members said.

According to Architecture Lecturer Melissa Shook, "there was never a definite plan to cut the Lab."

Professor John Habraken, Department Head, confirmed this. "We were talking about the future of parts of the Department related to the arts," he explained. "As part of a much larger program, I suggested that the allocation of funds to the Photo Lab should be studied."

Habraken denied any deliberate move toward reduction of funding for "the arts area at large." He expressed concern however, with what he observed as a tendency for elements of the Department program to grow independently of each other, a trend he described as "inappropriate." Integration of

Peter Dolhemus prepares a print for dry mounting in the Creative Photography Laboratory. Architecture Department spokesmen have denied charges that the Lab will be dismantled next year.

the photography section more firmly into the Department is one possible outcome of current deliberations.

Questioned on earlier charges that subject 4.051 and 4.052, Creative Photography I and II, were destined for cancellation,

Habraken dismissed the issue of next year's subject listings as premature.

In view of the scope of the reorganization in progress, he said, the arts curriculum must be redefined within the Department's program before such specific mat-

ters as subject offerings can be resolved. The Department's Policy Committee is now drawing up proposals which go to, among other offices, the Provost.

Habraken said there were no objections to the existence of photography subjects independent of other programs. "The Department's wish," he stated, "is to open the area of arts to as many students as is possible."

Shook observed, "There's a redefining in progress... that's a very complex issue." Associate Professor Jonathan Green, who said in December that the Photography Lab's role as an "extremely useful and creative place on campus" would come to an end with the move, refused to comment recently, saying that the imminent release of the Architecture Department's proposal for reorganization would dampen further speculation within the Department at this time.

Habraken's expressed his view of the importance of the arts section, saying, "I think, that the coverage of so wide a spectrum of the arts was one of the main achievements of my predecessor, Donald Linden... Photography in particular is immensely valuable as a medium of personal expression."

## DSA to review tutor selection process

By Mike McNamee

Dean Alice Seelinger has called for "revision of procedures" in the review of candidates for Institute house graduate residents in the wake of publication of a DSA memo calling three candidates "unsuitable."

In a memo addressed to the candidates named in the memo, which was published on March 11 in *thursday*, Eisenberg stressed her "sincere regret for the personal distress caused to the three of you caught in the middle," and said she accepted responsibility for "procedural deficiencies" revealed by the incident.

The memo, written by Assistant

Dean Alice Seelinger and addressed to house masters in each of the Institute houses, listed a number of candidates for graduate residents — graduate students who are assigned to floors or entries to act as "tutors" for residents. Three candidates were listed by Seelinger as "unsuitable." *thursday* obtained a copy of the memo and published it.

"The manner in which the Office of the Dean for Student Affairs appraisals were expressed was clearly inappropriate," Eisenberg wrote. "The use of the shorthand term 'unsuitable', without qualification or explanation, could be taken to imply an

absolute judgment, unwarranted for an opinion which is at best subjective."

Eisenberg said that Seelinger's evaluation had been made at the request of some of the house masters, when the DSA forwarded the applications to the house masters, before the house residents had a chance to evaluate the applicants. "With the benefit of hindsight, it is apparent that the circulation of (DSA) evaluations at the time applications are forwarded is incorrect," she wrote. "It is likely to give undue weight to the (DSA) view in a fashion that may prejudice and perhaps even predetermine the outcome of

house evaluations."

Future evaluations, Eisenberg said, would use "contemporaneous and independent" appraisals by DSA and by the houses, with final decisions made "in conference" when "major differences" arise.

Eisenberg wrote that procedures will be "set forth in writing and distributed to candidates to avoid ambiguity" in future evaluations. In addition, greater effort will be made to "communicate the judgements and the reasons for them to the applicants and so afford them an opportunity to understand and to respond to those judgments."

## You can't make a stocking from it, but . . .

... then that's not really the purpose of this nylon-making demonstration. This, and other feats of "chemical magic," are among the Chemistry Department's contribution to Saturday's Open House, whose real purpose is to give prospective MIT students and the public in general a look at what goes on at the Institute. The Open House, a bi-annual event sponsored by APO, is expected to draw 15,000 people this year. APO is still seeking volunteer tour-guides to help out.

# Police Blotter

(The Police Blotter is a report written by the Campus Patrol on crimes, incidents and actions on the MIT campus each week.)

## Suspect Charged

Patrol Officers stopped three men recently when they were observed acting in a suspicious manner in the Main Complex area. Moments after the "stop" was made, and while still conversing with the men, the Officers received a report of a handbag snatch over the police radio. The description of the suspect matched that of one of the three, who grew a bit pale upon hearing himself thus described. Taken by cruiser to the scene of the incident, he was positively identified as the thief by the victim. Taken into custody, he was charged with Unarmed Robbery, and arraigned Tuesday at the Third District Court. Warrants are being sought against the other two on related charges.

## Auto Theft Attempt Foiled

Patrol Officers, alerted by a staff member's phone call, broke up an early morning attempt to steal a late model Oldsmobile from the East Garage last week. One of the suspects, a young woman, was halted at the scene, while her comrades fled successfully into the darkness.

## Burglar Convicted

Convicted last Friday in Middlesex County Court was a

defendant arrested by MIT Officers several weeks ago after breaking into a west campus dorm room and stealing a calculator. Convicted of Breaking and Entering in the Daytime, Grand Larceny and Possession of Burglary Tools, he was sentenced to a term of 18 months in the Bilerica House of Correction.

## Frequent Prowler

A mid-afternoon larceny from the loading dock of a west campus dorm was carried out Tuesday by the occupants of a red Mercury Montego who escaped on

Memorial Drive in the direction of the BU Bridge. The same vehicle was spotted the next day prowling the east side area.

Dormitory residents are encouraged to be on the alert for this vehicle and its occupants and to notify Campus Police immediately if it appears in the area.

## Intruder Nabbed

An early morning intruder was apprehended Friday after a brief chase when he illegally entered the Alumni Pool after trying unsuccessfully to circumvent the alarm system.

## A new acquisition

To the Editor:

It gives me great pleasure to announce that my friend, the great Antonio Pippilini-Smoot, has consented to donate his latest sculpture to the Institute. The sculpture, tentatively entitled "Munkibah," is constructed entirely of steel pipe of 1 inch (excuse me, 2.54 cm.) diameter, and assorted joints. The structure, when completed, will stand approximately 3 meters high with a base diameter of 2 meters. The framework will consist of two arches around which are wrapped several rings. These basic components will then be connected in such a manner as to appear purely random, thus demonstrating the dynamic artistic genius with which men such as Mr. Pippilini-Smoot are endowed. When informed that, as donor of the sculpture, he would be given his choice of the site, so long as it was not already occupied by some important structure, Mr. Pippilini-Smoot immediately chose the Main Lobby. "My Sculpture," he said, "is an expression of the true spirit of that noble Institution, and as such, should be placed where it can inspire and guide the largest number of students."

For those of you who, unlike the average MIT philistine, realize that one cannot evaluate the art without the artist's pedigree, I have included in this letter a short biography of this contemporary master.

Born at the age of five in the log cabin he helped his father build, he had an early childhood. It was at a high school dance at the age of sixteen that he met the woman who would take care of him for many years, his mother. She had left the house shortly before he was born, and had only just returned from an

extended Hawaiian vacation. Needless to say, this had no impact at all on the struggling young Antonio, or "Dodo" as his friends called him.

When he graduated he was apprenticed to the great John W. Deever, a local plumber. It was soon discovered that Antonio had an incredible talent for not being a plumber. This, coupled with a total inability to follow even the simplest instructions convinced his father that Antonio should be sent away to study. "The kid's got-tago," he said.

It was in New York City at the Museum of Modern Art that Antonio received his inspiration. Gazing on some of the most powerful and beautiful sculptures of modern times, he suddenly realized that he could do that. "I could do that," he said.

He rose quickly to prominence as a sculptor in such varied metropolises as Landenberg, Pa. and Hoople. He is now in hiding behind Father's Six, and only comes out during the day, evening, or night.

From this short biography it can be seen that the life of Antonio Pippilini-Smoot contains all the elements needed for true artistic greatness. He has starved, he is misunderstood. He feels great emotions down deep in his heart unlike those of mortal men; feelings which can only be expressed in his sculpture. As an added bonus, Antonio has graciously consented to remedy the fact that one last requirement of true artistic greatness is lacking. Immediately following the dedication of "Munkibah," he will take a swan dive off the Green Building.

I hope this is appreciated.

### Suzanne Weinberg and Lobby 7

To the Editor:

Mike McNamee's piece in *The Tech* (Friday, April 9) accurately reported that the staff position of Lobby 7 Coordinator is being eliminated at the end of this academic year. He also correctly cited the sharp reduction in administrative and support budgets

as the reason for this action.

What I cannot accept in McNamee's report is his use of the words "controversial" and "unpopular" as a summary judgment of the efforts by Suzanne Weinberg and the Lobby 7 Committee over the past four years to make the Lobby a lively, enter-

taining, often informative place. Major exhibits such as "Weather" and "Food" did provoke controversy. Where the issues are taste and quality, people may differ, and while these exhibits may have been unpopular with some, there were many who found them imaginative and enjoyable. It is important to note, too, that these exhibits afforded MIT students an opportunity to exhibit and gain reaction to their work — to serve in some sense as a laboratory.

But those major exhibits by no means encompass the Lobby 7 program. Living Chess with the MIT Chess Club; Otto Piene's Balloon Carpet; Cloud One, the EE Department IAP project last year; the many performances of the National Mime Theatre; Devils and Bells by Paul Earls with Stephen Erdeley; the open Messiah readings during the Lobby Holiday celebrations; Gus Solomon's Dance Company; the MIT Chamber Players Midnight Concerts are but a few of the succession of Lobby events that have brought pleasure to those who pass through and live around the Lobby. We will miss Suzanne Weinberg's initiative and organizational skills in creating a Lobby program we have thus come to take for granted. But the Lobby 7 Committee is reviewing alternatives to providing some level of exhibition and performance to continue what many have come to enjoy.

John M. Wynne

Chairman, Lobby 7 Committee

David Hoicka '77

## Public morality: sex and marriage

To the Editor:

Although public morality is at a low ebb these days, one would hope that truth hadn't disappeared altogether as well.

Kopelson, Moore *et al* commit the same blunder they are accusing the rest of us of. They define their own terms, produce unprovable assumptions and arguments, and try to slide in the back door by playing on our sympathies.

First, "Liberation" does not mean "social... androgyny [hermaphroditism]". Worms and other hermaphrodites are certainly not high on the social order of things, and it is misleading and deceptive to re-define "liberation" in that way. For the record, "liberation" means "release from slavery, enemy occupation, etc." I don't see many slaves on the MIT campus.

Second, the argument that sex is intended to be pleasurable is very good and well-worded, but by no means does it lead to the conclusion that masturbation, homosexuality, etc. are proper. Sex has its proper place, which is within marriage, and there are good reasons for this. It is only within the bond of marriage, where two partners commit themselves to love, cherish and support each other, that love can have its fullest expression. Marriage is not a restrictive enterprise; rather, it is a "hot-house", where love is amplified, as marriage partners unselfishly try

to please each other. Sex is an expression of that love: an expression of union.

Thirdly, Kopelson's argument is deceptive when he says "not every facet of the universe must fit into... the moralist's two value (right-natural, wrong-unnatural) ethical system". The fact of the matter is that it's plain to see that every human action has a moral significance. When Johnny goes to the store and steals a candy bar, we say it's wrong. Why is it wrong? Somebody might say the store will never miss the candy bar that is gone — a "victimless crime". Nevertheless, even when there is no clear damage evident to the eye, one can say that an act is wrong. So it is with masturbation, fornication, homosexuality, etc. which Kopelson champions.

I've met many prostitutes who surely have had more experience in sex than most people here. Yet they are depressed, bitter, cynical, filled with disgust and hate. They smile at the man on the street, take his money, and wait for it all to be over with. "Psychological maturation entails exploring the depths and breadth of human emotions" says Kopelson. Has Kopelson, Moore, *et al* talked to prostitutes — in Boston or anywhere, who hate what they're doing?

The number of illegitimate children increases each year. Does anyone know what it is like not to know who your father is? Not to have the right every kid should have of growing up in a decent home?

Venereal disease continues to afflict people. Even homosexuals get it. Sometimes it's pretty shocking to see a child born with congenital syphilis.

As in any other human activity, sexual involvement calls for critical judgement. Kopelson obviously disagrees, but most people it seems will accept that sexual restraint before marriage (including restraint from

homosexual activities) will lead ultimately to sexual intensity and depth inside marriage, when you can really give yourself completely to a partner you can trust. Self-denial in the present in order to gain greater benefits in the future is the hallmark of a rational human being. It is tough — I grant that — but many people seem to do it.

## Planting trees

To the Editor:

Yesterday, I was disappointed to see that MIT, in true Institute style, planted a large beech tree in the area between building 8' and the Dreyfus building. When you realize that this small area serves as the back yard for those working in the Dreyfus building, not to mention the Eastman building, this is certainly an imposition on them. In all fairness, they should have been given the opportunity to vote on the issue before the tree was planted.

Not only is it an imposition, but you can also bet that the damn thing will be green all summer, every summer and dull grey all winter. A rather unsightly object, all in all. Furthermore, the pointed branches can very easily poke someone in the eye, particularly in the winter, when it has no leaves to act as shielding.

Trees have already been placed almost all over campus, and if someone really wants to see more trees, they can see

literally thousands of them in areas just a short ride from here. If the Institute has its heart set on planting more trees, they can at least put them in the garden near Baker House where they belong. Even though the tree may have been donated to MIT, it is hardly sound financial planning to have to pay for raking up those leaves every fall, particularly in these years of financial difficulties.

In conclusion, I would like to thank the Institute for planting the tree. It's really beautiful.

# Buchanan: next primaries vital

By Thomas J. Spisak

"The next ten days may decide the nominees of both parties," Patrick Buchanan, former White House speechwriter under Richard Nixon and a syndicated political columnist, told a lecture audience at BU's Morse Auditorium Wednesday night.

"Because Republicans are not rebels by nature, Reagan's candidacy demonstrates that Gerald Ford has not developed roots within his own party," Buchanan said.

A Reagan victory in Texas, the middle of the conservative heartland, Buchanan believes, would demonstrate that Ford is not electable in November; it "could be the first in a series of firecrackers since all the other May primaries are in essentially conservative states," he said. "Even with victories in the other primaries, the damage to Ford would make him vulnerable to the Democrats in November."

Buchanan also believes that the April 27 Pennsylvania Democratic race is between Jimmy Carter and the non-candidate, Hubert Humphrey, since neither Jackson nor Udall has enough support to stop Carter on his own. "Humphrey is now seen as the savior of the McGovernites, but even now it may be too late since Carter faces the same primaries after Pennsylvania that Ford and Reagan do; the only way Carter could be stopped after Pennsylvania victory would be by a coalition of all the other candidates and favorite sons behind Humphrey," Buchanan maintained. "And robbing Carter of the nomination that way would alienate most of his constituency."

Carter threatens the Republicans' "New Majority" according to Buchanan, since he draws from the same constituency

— the Old Confederacy and urban, ethnic voters.

Buchanan predicted that while Henry Kissinger could not be removed without contributing to the "unraveling image of the Ford administration because of the Schlesinger firing, he probably will not be Secretary of State in 1977." Detente is "not long for this world," and the US and the Soviet Union are entering a period of increased tensions following Soviet involvement in Angola.

Asked about the last days of the Nixon administration, Buchanan, who figures heavily in *The Final Days*, the Woodward and Bernstein account of the period, said the reporting of individual events was very good but "the events reported were chosen to support a thesis that the White House was falling apart then. It just wasn't that way at all."

# Faculty to alter voting rules

(Continued from page 3)  
Medical Department, and the Summer Session. The proposed change would add the Director of Financial Aid to this list.

In other business, Ross presented the Faculty with another amendment to its rules to allow for three student members of the Committee for Academic Performance (CAP) and the Committee on Student Environment. According to Ross, there have been student members on these

committees for several years. The amendment also allows for one non-voting graduate student on the CAP. The CAP also contains six members elected from the faculty, one appointed from the CEP, and the following non-voting members: the Dean for Student Affairs, the Registrar, the Medical Director, the Director of Financial Aid, and the Chairman of the Freshman Advisory Council.

The Committee on Student En-

vironment is composed of the Dean for Student Affairs, the Associate Dean for Student Affairs, six members elected from the Faculty, a member appointed from the CEP, as well as the three undergraduates and one graduate student that the new rules will allow. According to the Faculty rules, the Committee on Student Environment "shall be concerned with student life, especially with non-academic features which have a direct bearing on the education of the student..."

## notes

\* All seniors concentrating in literature who have not filled out a form acknowledging completion of their concentration should contact Prof. Myra Brenner as soon as possible (14E-310G, x3-7893). Office hours are Thurs. 11:30am to 5pm and by appointment. Home phone is 547-7258.

\* There will be a Mechanical Engineering Dept. open house today from 3-5pm in Room 3-143. There will be exhibits and displays by the department showing current projects. Faculty and students from the ME Department will be there to answer questions. Refreshments afterwards.

\* "Selections from an Autobiography," a group of recent oil paintings by Lowell Nesbitt, will be on view in Hayden Gallery from 10am to 4pm April 17 through May 15 except Sundays.

\* The new Light Rail Vehicle, built for the Massachusetts Bay Transportation Authority by the Boeing Vertol Company, will be available for public inspection today at the Brattle Loop at Government Center Station from 10am to 2pm. MBTA staff and Boeing Vertol representatives will be available to answer questions.

\* The Black Rose/Black Circles Lectures will be presenting Joel Whitebook, speaking on "Some Problems of the Frankfurt School," this evening at 8pm, in Room 9-150.

\* Open House '76 needs you! Many people are needed tomorrow to help give tours, to man information booths, and to serve refreshments to the thousands of people who are expected. Anyone interested should contact Open House, x3-2600 right now.

\* The Senior House Art Show will be held tomorrow, April 24, 1-5pm, in the Senior House courtyard. Painting, photography, sculpture, batik, macrame, and lots more by residents of Senior House. Live music, and food available. Rain date Sunday, April 25.

\* There will be an organizational meeting for an MIT Model United Nations Club on Monday, April 26 at 7:30 in Student Center Room 491. For more info, call Dave Strauss, d15-7660.

\* The Dramashop major production for the spring term will be Tennessee Williams' "The Night of the Iguana" to be directed by Prof. Joseph D. Everingham. The performance dates are Friday and Saturday, April 23 and 24, and Thursday, Friday, and Saturday, April 29, 30, and May 1.

\* Tech Model Railroad is having an Open House tomorrow, Apr. 24, from 2-5:30pm and 7-9pm. Come over and have a coke.

\* "Shakespeare in the Courtyard" by the MIT Shakespeare Ensemble, will be presented free, Sunday, April 25 at 4pm at 808 Memorial Drive. The ensemble will present scenes from five different Shakespearean plays.

\* Noted poet, Elizabeth Bishop, will give a reading of Katharine Lee Bates' poetry, April 29, at 9pm in Room 100, Sage Hall, on the Wellesley College campus. Katharine Lee Bates graduated from Wellesley in 1880 and wrote the words for "America the Beautiful."

\* On Thursday, April 29 the Harvard Law School Forum presents a panel discussion on the topic, "The SEC: Morality and the Limits of Regulation," led by SEC Chairman Roderick Hills. The discussion is at 8pm in the Ames Courtroom of Austin Hall on the Law School campus. Admission is \$1.50 at the door.

\* A concert of contemporary music by Milton Babbitt, George Edwards, Robert Helps, and Godfrey Wintram will be presented by the Harvard Department of Music at Sanders Theatre on Monday, Apr. 26 at 8:30pm. The concert is free and open to the public.

## Theta Chi and Conner 4 win Spring Blood Drive

By Marty Weinstock

The spring MIT-Red Cross Blood Drive which ended March 12 netted a total of 1465 pints of blood, significantly surpassing last year's spring total of 1392 pints, the Technology Community Association (TCA) announced yesterday.

Vinay Reddy '78, student Blood Drive chairman, attributed the increase to the larger number of evening hours and the fact that the drive was open until 5:30 on the last day, permitting donors to give after work. "We are pretty happy with the results," he stated, "we are still the largest institutional donor in the state, but Harvard is catching up fast."

The dormitory beer contest winners were Conner 4 with 72% of eligible residents donating, Conner 5 with 68%, and Burton 3 with 48%. In the fraternity contest, Theta Chi brought in a record-breaking total of 100%, although Student House with 97% and Phi Kappa Theta with 93% were not far behind. Additional beer, donated by a special vote of IFC, will go to Sigma Chi and Delta Upsilon, each of whom topped the

80% figured.

The next drive is planned for two days during R/O week, with the regular fall drive occurring October 27-29 and November 1-5. People who would like to donate before then may do so at the Red Cross Regional Center on Huntington Avenue in Boston. "Make sure they credit the blood to MIT," Reddy advised.

## Two MIT sailors qualify for championship finals

(Continued from page 8)

Gibb Trophy. Elliot Rossen with crew Bob Schulz starred in the regatta, winning low-point honors in A-Division. Len Dolhert with Steve Boos narrowly missed winning B-Division, finishing three points behind the winner. The combination gave the frosh their first trophy win of the season.

The men hosted the Oberg Trophy for their Greater Boston Championship on the Charles, also on Monday. Three divisions, Larks, Interclubs (dinghies from Harvard), and Tech Dinghies, were sailed in the regatta. Due to the light wind conditions, eight races were sailed, rather than a full double round-robin of ten races. MIT placed second, two points behind Tufts, and well ahead of Northeastern, BU, and Harvard. Critch with crew Orlov won the Interclub division. Erb with Steve Gourley '77 and Belt took second in the Larks, and Smith with crew Husted got second in the Tech Dinghies.

Eliminations for the New England Singlehanded Championships (the Monotype Trophy) were held on both Saturday and Sunday. A finish of first or second in heats of ten sailors was necessary to qualify for the finals. Critch and Dolhert, first and second respectively at Harvard, both qualified for MIT. John Stautner '79, Bruce Gage '79, and Jim Newman '79 missed the cut at

Harvard. At Tufts, Smith (3rd), Chris Berg '77 (4th), and Rossen (5th) fell short, while Ryan and John Star '78 missed at Coast Guard.

Since the finals are to be sailed at MIT, Critch and Dolhert should have a good chance of placing in the top three and qualifying for the Nationals.

The women host the New England Championships tomorrow and Sunday on the Charles. A finish in the top three will qualify them for the Nationals, also to be sailed at MIT this spring. The men go against top competition in the Friis Trophy at Tufts this weekend.

### IN THE NATION THIS WEEK

#### HOW TO CURB THE F.B.I.

Jerry J. Berman

"It is not guidelines we need to limit F.B.I. domestic intelligence but a legislative charter to prohibit it . . . a vast record has been compiled on F.B.I. domestic intelligence. It is a record of official lawlessness: invasion of privacy, violation of civil rights and systematic lawbreaking . . . no less important from the public standpoint, is that the record fails to show that F.B.I. intelligence has in the past served a useful purpose or will do so in the future, so why adopt guidelines when the overwhelming body of evidence suggests an outright ban?"

Senior Mike Royal's one-hit pitching was the key to the Engineers' victory over Bates College.

## Baseball tops Bates on Royal's one-hitter

By Glenn Brownstein

Mike Royal '76 twirled a one-hit, 14-strikeout shutout Wednesday to lead MIT's varsity baseball team to a 2-0 win over previously undefeated Bates.

Royal's masterful performance capped a 2-2 week for the Beavers, who ran their record to 10-6 with nine games remaining on the spring schedule.

Bates and MIT matched zeroes on the scoreboard until the last of the eighth, when designated hitter Rich Chmura '76 opened the inning with a walk. After Jay Coopridge '78 popped out, Vince Maconi '76 and Steve Edelson '76 singled to load the bases. Roy Henriksson '76 then drilled a bad-hop grounder over the third baseman's glove and into left field, scoring Steve Maconi '77 (who ran for Chmura) and his brother Vince with the game-winning runs.

Royal gave up the hit to Bates' first hitter in the game, but allowed only four runners the rest of the way, two on walks and two on errors. Royal threw just 117 pitches in the one hour, 55-minute game.

Last Saturday, MIT gained a split against a strong Lowell team, dropping the first game 7-4 and winning the second 6-2.

In the opener, the Beavers spotted Lowell a 4-0 lead before staging a dramatic game-tying rally in the bottom of the sixth inning. After Vince Maconi singled, and Edelson flied out, Henriksson walked and catcher Dan Sundberg '77 singled to right, scoring Maconi. Mike Dziekan then hit a long fly that sailed over the Lowell center fielder's head for a three-

run homer, tying the score at 4-4.

Lowell came back with some firepower of its own in the seventh and final inning, though, as a two-out, three-run round tripper spoiled MIT's comeback.

In the second game, the Beavers fell behind early in the contest, but scored four in the fifth and two in the sixth inning to hand Lowell only its second loss of the year (against ten victories).

On Monday, the Beavers locked up with the Judges of Brandeis in a key Greater Boston League matchup. Although getting no hits in the first eight innings, the Beavers trailed Brandeis by only a 2-1 count before the Judges smashed three home runs to put the game away. MIT's Jeff Felton '78 and right fielder Coopridge punched out ninth-inning singles to break the no-hitter, but the Beavers could not score and went down to their second GBL defeat in four games.

Kenny Smith '77 pitched 6 2/3 strong innings for MIT, allowing only two runs on six hits before reliever John Cavolowsky '76 came in to replace the tiring starter. Cavolowsky had his problems with the Brandeis hitters in the eighth, surrendering two homers before being replaced by Don Proper '76. Brandeis designated hitter Vin Hillyer greeted Proper with a center-field home run, but the MIT hurler finished the inning without further damage.

The Beavers face Coast Guard in a 1pm twinbill at Briggs Field Saturday, and will take on Suffolk Tuesday at home in a 3pm matchup.

## Trackmen trample Tufts

By Dave Dobos

Rebounding from Saturday's 97-57 loss to Bowdoin, the MIT outdoor track team used its depth to down Tufts 89 1/2-64 1/2 Wednesday afternoon. Although the Engineers could manage only eight of 18 first places, the thinclads did pick up 13 of 16 seconds and a majority of thirds to assure the victory.

Once again senior co-captain Greg Hunter led a field event attack that produced a 54-18 scoring margin. MIT captured all but two events, including Hunter's javelin (180'11 1/2") and shot put (44'6 1/2") wins. John Lundberg '77 recorded another personal best in the hammer throw when he tossed the 16 lb. weight 165'6". Teammate sophomore Fred Bunke earned seconds in the hammer (personal best 160') and shot.

Paul Kuzmenko '77 captured the triple jump and a second in the long jump for eight of his 9 1/2 points. In the pole vault, Jim Williams '77 cleared 14' for yet another personal best. Reid von Borstel recorded his fourth straight high jump victory to re-

main undefeated in dual meet competition and Steve Mayhew '78 took the discus in his first scoring effort for the Engineers.

In the running events, Rich Okine '77 edged out archrival Fred Hintlian with a blazing, wind-aided 14.7 in the 120 yard high hurdles. Okine also took close seconds to Tufts' Tim Donolow in the 100 and 220 yard dashes. Sophomore Chris Svendsgaard was MIT's only other running event winner, racing to a two mile victory in 9:40.4.

The Engineer athletes fared quite well at the Somerville facility considering the drastic temperature decrease and despite being subjected to a poorly managed meet in which only one official was present, requiring that MIT managers, coaches, and competitors judge and time the meet. It was a much needed victory after Bowdoin's 40 point thrashing on Saturday.

In the Bowdoin meet, the MIT thinclads ran competitively, but were simply overwhelmed by a talented Polar Bear squad. The Engineers could muster only five

first places throughout an afternoon that saw five meet records fall — four of them, unfortunately, to Bowdoin athletes.

Junior Frank Richardson's 9:16.0 two mile victory was MIT's only contribution to the record book revision. In the javelin, Hunter enjoyed his most consistent day ever with four throws greater than 190'. Okine (high hurdles), von Borstel (high jump), and Williams (pole vault) were the only other Engineer individual winners.

The Bowdoin-Tufts split brings MIT's record to 3-1. Only tomorrow's contest at Worcester Poly remains to complete the Engineers' dual meet season.

## Laxmen nail Holy Cross 7-6; Forrest scores winning goal

By Glenn Brownstein

Junior John Forrest's goal with 50 seconds remaining in the second overtime gave MIT a hard-fought 7-6 win over Holy Cross in Worcester last Thursday.

Forrest scored his second goal of the game (and seventh of the season) on a line drive shot that tipped the goalie's stick and deflected in. The victory moved MIT's record to 3-6.

Holy Cross led for almost all of regulation time, building a 4-2 lead after three quarters. Just 34 seconds into the final period, Al O'Connor '78 moved in on net, hesitated, and then sent a high shot over goalie Jim Garrity to pull MIT within one goal. Gordie Zuendorfer '78 then scored on a pass from Roger Renshaw '77 at the seven-minute mark to tie the low-scoring game, and the teams settled into respective defensive shells.

With about five minutes left in regulation, a defensive mixup allowed Holy Cross' Bill Hayes to break in all alone toward MIT goalie Jeff Singer '77, and beat the helpless netminder on a point-blank high shot.

The Crusaders tried to stall out the remaining time, but Renshaw helped break a Holy Cross clear, darted in, and tied the game on a bouncer that eluded Garrity.

In the first four-minute overtime, MIT scored first as Blake

Hurt '77 put a shot past Garrity at the 2:04 mark. Less than a minute later, though, Pete Von Loesecke evened the count at 6-all on his fourth goal of the game, setting the stage for Forrest's game-winner in the next period.

Goalie Singer was superb, allowing just six goals out of 31

shots on net, raising his save percentage to .664 and earning him the Greater Boston "Player of the Week" award. MIT faced New Hampshire in Durham, NH yesterday, and shoots for its fourth win (most in four years) against Trinity at home Saturday in a 2pm start.

## Golfers drop three of four

By Leo Bonnell

(Leo Bonnell '77 is a member of the golf team)

After its fine season start, the golf team dropped a trio of matches last week to Babson, WPI, and Harvard, but pulled out a victory against Vermont to even its season record at 4-4.

The dual match against Babson and WPI was played last Thursday at the Wellesley Country Club, a tight layout demanding accurate tee shots. Scores were high for all the competitors, but the Engineers scored highest as they were defeated 5-2 by Babson and 4-2 by WPI. Contributing to the MIT cause were Mark Swenson '78, who won each of his matches with an 84 in a fine performance, Mike Varrell '79, who scored 82 to win against Babson, and the trio of Mark Hughes '79, Bob Kneeland '77, and Leo Bonnell '77, each of whom held his WPI opponent to a stalemate.

This past Tuesday the Engineers

moved to the troublesome Concord C. C., meeting Vermont and nemesis Harvard in two stroke-play matches, with the lowest five scores for each team determining the winners. The Concord layout, with its narrow, tree-lined fairways and deceptive greens, has been a perennial problem for the Engineers, and this day was no exception as the MIT total was 427, a dismal 72 over par. Harvard had fewer difficulties enroute to a 392 total, but Vermont's net was 433, giving MIT a split in the day's play. Varrell and Kneeland were MIT winners with scores of 84, while an improved pair of freshmen, Les Suna and Tapio Kusinen, scored 86 each.

The golfers play Lowell University this Friday before heading back to the Concord C. C. next Monday for the Greater Boston championships, where they will once again attempt to break the "Concord Jinx."

## Sailors take trophies in 3 major regattas

By Chris Donnelly

All three sailing teams — the men's varsity, women's varsity, and the freshmen — collected major regatta wins last weekend. The men took the Dartmouth Bowl, the women won the President's Trophy, and the freshmen sailed away with the Gibb trophy for the Greater Boston Freshman Championship.

The Dartmouth Bowl, sailed at Coast Guard in International 12 Dinghies, served as eliminations for the New England Championships to be held in May. Gary Smith '78 led the varsity, winning low point honors for the regatta. His first place in B-Division, coupled with a second place by Bill Critch '77 in A-Division gave MIT the victory. Steve Ryan '77 and George Orlov '78 crewed in the event, and Paul Erb '76 skippered one race to preserve his eligibility for the New England Championships.

The varsity topped five schools,

including highly ranked Harvard and Yale. The victory again demonstrated the team's ability to beat the top schools in the area.

On Sunday, the women were led by sophomore Allana Connors' first place finish in B-Division at the President's Trophy sailed at Wellesley. Light, shifty winds made for tricky sailing in the Sprites (small sloops). Barbara Belt '77 skippered for MIT in A-Division, and Sally Husted '78 and Robin Newmark '78 crewed in the regatta. In winning the regatta, the women outsailed four other schools from around New England.

The Regis Bowl, a one division regatta for women, was sailed the previous day at Wellesley. Sailing in Sprites, Belt and Husted beat five of eight schools, finishing third behind Wheaton and host Wellesley.

The freshmen sailed at Tufts on Patriots' Day against all the freshmen teams in the area for the

# You Can Change The World of Tomorrow by Molding The Boy of Today

**The Salesians of St. John Bosco**

SERVICE TO YOUTH

# Who are The Salesians?

The Salesians are a modern religious society of Priests and Brothers, founded in 1859 by St. John Bosco. His concern for youngsters who needed help and encouragement began early in his life, and he eventually established schools and youth centers which grew and multiplied. The Salesians — the Society of St. Francis of Sales, named after St. John's favorite saint — were organized and the new order quickly spread from continent to continent. St. John Bosco died in 1888 and was canonized in 1934 as the Apostle of Youth.

Today his Salesian sons — some 20,000 strong — continue his work in over 80 countries around the world.

## What do we do?

Our principal apostolate is with youth. Our mission in life is working with and for young people . . . in boy's clubs, academic and technical high schools, summer camps, retreat houses, guidance centers, orphanages . . . wherever boys are to be found.

Unlike other orders whose apostolate has changed with varying conditions the Salesians have always been — and always will be — youth oriented. We're trying to prepare youngsters today for the world that awaits them tomorrow. Not an easy task in these times, but one which we welcome.

Salesian Priests and Brothers also staff parishes . . . work with the press, films, film strips . . . and, on voluntary basis, serve in many lands as missionaries.

**OUR MISSION IN LIFE IS TO BRING AID AND GUIDANCE TO THE YOUNG . . . THE NEEDY . . . AND THE FORGOTTEN**

## The methods of St. John Bosco

In the beginning, St. John Bosco was concerned with the hundreds of homeless boys who were often hungry and utterly without hope. But giving them bread, he reasoned, would be only a temporary solution — there had to be some way to help them *help themselves*. The answer came to him: by learning a skill that would last them all their lives. Education was the keynote — for what good is one meal today when one must think of all the tomorrows?

He believed that a program of play, learn and pray would help make useful citizens of the world. He crowded out evil with reason, religion and kindness in an atmosphere of family feeling. That he succeeded is very evident today in the many Salesians who carry on his work and the number of boys who have benefited from the Salesian experience.

Salesian Priests and Brothers teach in academic schools, both day and resident, in the U.S. and Canada.

Salesian Technical Schools provide boys with the qualifications for leadership in a modern technological society.

In the summer months, Salesians run day and residence camps for boys.

# What you could do as a Salesian Priest or Brother

Help kids. Serve them with your mind . . . your heart . . . your hands . . . and your will. You can bring them closer to God, influence them for the good and give them the chance to be better men someday.

Every Salesian enjoys working with and helping boys and, as a Salesian, you are guaranteed the chance to help them in a wide range of endeavor. According to your own abilities and tastes you could:

teach in an academic high school . . . become a technical instructor in such fields as electronics, drafting, graphic arts, electricity, architectural and industrial drafting, automotive mechanics, machine shop, metallurgy, building construction, wood-working . . . coach sports full or part time . . . direct a boys' club . . . help to run a summer camp . . . volunteer for foreign missions . . . act as guidance counsellor . . . serve in parishes . . . retreat houses . . . orphanages.

If you feel, as we do, that service to youth can be an important mission in your life, we welcome your interest. The rewards are not material but you will find your Salesian apostolate rich and rewarding in service to others, especially the young and the poor. Walking in Christ's footsteps means peace of soul and an inner joy that comes from helping others in His name.

# Join the third largest Family in the World . . .

Imagine a family of 20,000 members in 80 countries around the world — that's a pretty big family, but that's what the Salesians are all about. They are a community of *family minded individuals united for a common goal.*

The Salesians are made up of Priests, Brothers and Clerics — men studying for the priesthood but not yet ordained — who live and work together, equals in the Society, observing the same rules and enjoying the same privileges. St. John Bosco specifically wanted his Salesian communities to possess a warm, family like spirit where each member can grow and where both triumphs and setbacks are shared in the companionship of his fellow Salesians.

The Salesian is highly trained for his mission, and he has the opportunity to go as far as he wants to; for the better his education, the better service he can give both to the Society and to the people he helps. He achieves his rewards in the realization of the good he accomplishes and the youthful hearts and minds he inspires.

If you are looking for a future that trades self-sacrifice for inner satisfaction . . . aimlessness for dedication . . . and the opportunity to help change the world of tomorrow by molding the boy of today, get more information from the Salesians. Fill out and mail the postage-free card today.
