Doctor N.Wiener

Lectures Before

Skeptics Seminar

by Stanley Shapiro '58

at the Skeptics Seminar last Tues-

day, Dr. Norbert Wiener again distin-

guished himself as a man of great

erudition. Prof. Wiener did not confine

his remarks to the announced topic,

but ventured into another not too dis-

tant field, that of Skepticism and Re-

ligion. This combination was all that

was needed to bring the audience to a

peak of interest which did not dimin-

ish throughout the course of the dis-

Dr. Wiener prefaced his remarks

with a statement that became the key-

note of his talk and the ensuing dis-

cussion period. He began by saying,

Skepticism is an intrinsic part of be-

lief." He went on to add that one can-

Speaking on Skepticism and Science

### Commuter Problem Studied; CARE Campaign Howard Thurman InsComm Revises Elections

A progress report of the Commuter Committee was presented to Inscomm at its last meeting, Wednesday afternoon, in Litchfield Lounge. The gist of the report of the committee was that the commuting population of the Institute feels left out, and doesn't have the school spirit that is found among other groups on campus. Also the commuters do not have a true representation in student government.

Under the present system the commuter representative to student government is chosen by the 5:15 Club. The fault with this system is that the

5:15 Club is more of a social organization than a political one. Besides it is not a true organization of the entire commuting population. The club can accept only a small portion of them, and any person chosen by the club is therefore not a true commuter representative.

To try and rectify this situation, the Commuter Committee proposed that the 5:15 Club be declared a Class "A" social activity with no political powers. As an alternative governing body, an Association of Commuters was suggested, which would be of the same nature as DormCon or I.F.C.

To Conduct Poll

The final decision on the formation of such an organization will be made after consideration of a proposed constitution and the results of a questionnaire which will be distributed soon to the entire student body. This poll is designed to determine just what facets of life at the Institute the commuters are missing. Among other jobs the Commuter Association will replace the present sub-committee of Inscomm which is studying the problems of commuters.

The main problem facing this group is one of communication, which resulted in the collapse of an earlier commuter organization in the early thirties.

### **Bulletin Boards Voted**

As a partial solution, Inscomm voted to place bulletin boards in Walker Memorial and the basement of Building 2 for the use of commuters. On the same topic, Inscomm recommended "that sleeping facilities for commuters be provided." Such facilities would provide sleeping space for a small fee to those students who occasionally find it difficult to get home after a lateending activity.

By a straw vote, members of Inscomm expressed approval of this proposed addition to student government.

On a related topic, Executive Committee suggested that the term "commuter" be redefined. It was proposed that residents of Westgate not be con-(Continued on page 6)

## Christmas Parties Are Scheduled By Organizations

This Christmas 27 groups here at the Institute are sponsoring parties for underprivileged children of the his work on the "Heliocentric Theory greater Boston area. Children are contacted through settlement houses of the area by TCA. Most of the parties take place this weekend, although some have already been held and others are scheduled for next week. These parties usually feature Santa Claus distributing presents, as well as games and refreshments.

Groups participating in the program are: Alpha Epsilon Pi, Alpha Phi Omega and Burton House, Beta Theta Pi, Chi Phi, DeMolay, Delta Upsilon, Delta Kappa Epsilon, Delta Psi, Delta Tau Delta, East Campus, Kappa Sigma, Lambda Chi Alpha, Phi Beta Epsilon, Phi Delta Theta, Phi Gamma Delta, Phi Kappa, Phi Kappa Sigma, Phi Mu Delta, Phi Sigma Kappa, Sigma Alpha Epsilon, Sigma Nu, Sigma Phi Epsilon, Student House, Theta Chi, Theta Delta Chi and Theta

# \$2000 Goal

The "Food Crusade", sponsored jointly by CARE and the Foreign Operations Administration, will begin at the Institute on Monday, following the Convocation in Rockwell Cage. Members of the Institute family will be able to purchase one of the most valuable Christmas gifts of modern times in terms of spiritual signifi-

Under a new plan, whereby surplus food stored by the Department of Agriculture is processed and packaged by Foreign Operations Administration, one is now able to send a 14 lb. food package to Europe at a cost of only 50 cents. At its Wednesday meeting, Inscomm unanimously adopted a resolution supporting this program, urging the participation of all members of the Institute community. The goal here is \$2000.

In order for this program to continue, CARE must raise 14 million dollars for the project before the first of the year. Using surplus foods will not only benefit the receivers, but it will decrease the ¾ million dollar per day tax bill Americans pay for the storage of the bumper crops of the last few years-enough food to feed Boston for two centuries.

An Emergency CARE Committee has been established here by students and faculty, and has drawn support from many campus organizations.

Members of the Emergency CARE Committee are: Ken Fletcher, '55, chairman; Vinay Ambegaokar, '55; Larry Andrews, '58; Steve Cohen, '56; Glen Jackson, '55; Oliver Jons, '56; Bob Morgan, '55; Hank Salzhauer, '57; Chan Stevens, '55; Pete Toohy, '55; Prof. W. V. A. Clark; Prof. J. T. Nor-(Continued on page 2)

I join with leaders of the M.I.T. Undergraduate Association in inviting all who study and work at M.I.T. to participate in the Christmas Convocation in Rockwell Cage on December 13 at ten o'clock.

The students in charge of the Convocation and carol singing have arranged a fine program, and I feel sure that you will find it an appropriate and stirring expression of the Christmas spirit. Let us all join together in singing and celebrating the comradeship of Christ-

> J. R. Killian, Jr., President

## Hillel To Sponsor Hanukah Services At Baker House

From 2:00 to 6:00 p.m. on Sunday, December 12, Hillel Foundation will present a Hanukah festival in the Baker House Dining Hall. The program will feature the traditional candle-lighting ceremony, commemorative of the time, many centuries ago, when the eternal light of the temple at Jerusalem is supposed to have burned for eight days with but one day's oil. Also to be included in the program for the holiday, which calls to mind the brave resistance of the Maccabees to foreign aggressors in ancient Palestine, will be a dramatic presentation, a musical program, folk dancing and singing, and a social and mixer with students from Simmons, Jackson, Tufts, and other schools.

## Begins Monday; At Convocation Monday

Dean Howard Thurman of Marsh Chapel at Boston University, who was recently listed as one of the 12 most outstanding preachers by Life magazine, will speak at the annual Christmas convocation Monday at Rockwell Cage.

Dr. Thurman has had wide experience in lecturing and speaking. He has been awarded many honors for his activities in these fields, including Fellow of the National Council on Religion in Higher Education; chairman of a pilgrimage to India, Burma and Ceylon; Ingersoll Lecturer on the Immortality of Man at Harvard University; Merrick Lecturer at Ohio Wesleyan University; and convocation lecturer at Eden Theological Seminary.

## Andrew Gyorgy Completes Series Of Three Lectures

Professor Andrew Gyorgy completed his series of three lectures in the field of International Relations with a talk on "The Basic Principles of Soviet Foreign Policy" in the Library Lounge at 5:00 p.m. last Monday.

His analysis of the subject consisted of five major points. First, Russian diplomacy has a foundation of "Suspicion" and "Distrust" due to perpetual difficulties involving border definition and warm water ports and routes (such as the Dardenelles). Perhaps the greatest factor contributing BurtonHouseHas to suspicion and distrust of foreigners was the intervention of several foreign armies in 1919 at the time of the Revolution, and their occupation of Russian soil. This fear of restoration of the Czarist regime and intervention by foreign arms was basic for Stalin as a theme of his policies toward the West, and led to expectation of military difficulties.

Second on the list of basic principles and following directly from the first is that "War is Inevitable", and acceptable as part of the long-term social upheaval which must occur in capitalistic countries. The Communists and the Burton House Lounge. theorize that revolution and war are variations of the same thing, part of inform the Secretariat of its disappredetermined, inexorable history. Wars, although to be avoided since (Continued on page 6)

## MIT To Get Water From New Main During Shortages

If perchance you have stumbled into the ditch now being chipped out of the frozen sod of East Campus, you may have wondered who picked this time of year to begin plowing a garden. The answer is that no garden is a house library, the creation of a being plowed at all, but the Cambridge television room, or the acquisition of Water Commission is beginning work on an auxiliary water main to supply the Institute in case of failure of the group. main line. The work is to extend over the next several weeks.

Dr. Thurman has also written several widely read books in his field. His works include The Greatest of These, Deep River, Deep is the Hunger, Meditations of the Heart and The Creative Encounter.

Before coming to his present position, Dr. Thurman organized and developed a unique church, which is an interracial, intercultural and non-sectarian venture in religious fellowship and experience. The church now includes more than 1000 members living in more than a half-dozen countries. He now serves as minister-atlarge of the church.

### Convocation Program

The convocation will begin with selections by the brass choir, followed by an opening carol. The glee club will present Christmas numbers and the scripture will be read by Eldon Reiley, '55, president of the Undergraduate Association. Following Dr. Thurman's short talk, Dr. James R. Killian, Jr. will give the student body his Christmas greetings, and all will retire to the back of the Cage for punch, cookies, and the traditional carol singing.

A decoration party will be held on Sunday afternoon to prepare the Cage for Monday's festivities. All members of the Institute Family are invited to take part in this pre-convocation activity. This decoration party is being held under the auspices of Inscomm, the Dormitory House Committees and Freshman Council.

All classes will be suspended from 10:00 a.m. to 11:00 a.m. on Monday so that everyone may attend the convocation.

## **ManyDecorations** For Its Entrances

Burton House held its greeneryhunting trip up at Dartmouth in New Hampshire last week-end, and the Decorations Committee was successful in obtaining three trees and a large quantity of other shrubbery. These are being used to fix up the 410 and 420 lobbies and entrances

The Burton group also moved to proval of Voo Doo's recent advertisement. In East Campus, an amendment was proposed which would require that all proxies for committee members be residents of the same constituency as their appointer. This motion will be voted on next week.

East Campus also appropriated \$20 for playing cards.

A Door-Decorating Contest is in progress in Baker House. The winner will be selected by two members of the faculty.

A permanent long-range planning subcommittee was established at the meeting for the purpose of overseeing Baker's future improvement plans, such as the establishment of improved furniture. Paul Levine, '56 was appointed to head this new

Dr. Weiner Skepticises

not study one's beliefs, scientific or otherwise, without the element of skepticism.

Outlines Physics History

To begin his discourse on science, Dr. Wiener outlined the history of the growth of physics as we know it today. Before Galileo, the "Epicyclic Theory of Celestial Rotations" was quite adequate; but as the number of known celestial bodies increased, the inadequacies of this theory became many. Kepler solved the problem with of Rotation" as we know it today. Newtonian physics gave a satisfactory description of the universe until advances in science could not be explained by the limited Newtonian mechanics. A more complete description was therefore needed and found in the united field and quantum theories. Yet we are still in a quandary, for both of these theories although satisfactory within themselves, are inconsistent with each other.

Derives Basic Principles

From this sketch Prof. Wiener arrived at a few basic conclusions in relation to scientific research. "When a new theory is presented," he said, "the scientist should not accept it without a reason, and yet in rejecting any theory he must be sure to have a reason for his rejection." Dr. Wiener also included in this summation the idea (Continued on page 2)

### COMMUTER PROBLEM

An example of the half-hearted and hesitant manner in which Inscomm has conducted many of its investigations in the past year is the problem of the large number of commuter students at the Institute. Last April, Inscomm considered this problem a serious one, sufficiently serious, as a matter of fact, to include it as one of the six major discussion topics at their annual leadership conference. At that time many constructive suggestions were made, not only by members of Institute Committee, but also by the faculty and administration men who were present.

Since April, however, Inscomm has done little constructive work. None of the suggestions made at the leadership conference have been carried into effect. Institute Committee has at least discussed the problem, and some suggestions were made at the last meeting. It appears that Institute Committee is hesitant, if not afraid, to disturb the existing archaic system of commuter government.

It should be evident to most people that the commuter government is far from representative. Its politics are dominated almost entirely by the 5:15 Club, which is made up of a small percentage of the total commuters at the school. The remaining commuters are so disorganized that they have little hope of accomplishing anything constructive.

As a partial solution to the commuter problem, both that of adequately representing them in student government, and that of providing them with sufficient desirable space to relax and study, The Tech offers the following program.

- 1. Abolish the 5:15 Club as the official organ of the commuter group, and reorganize it as a Class A activity.
- 2. Create a Commuter Council, consisting of representatives from the various suburban areas in which the commuting students reside. Such a council would have jurisdiction over problems pertaining to the commuters, much as Dormitory Council has jurisdiction over the dorm residents.
- 3. Increase the lounge facilities reserved for commuters, preferably by creating one or more Commuter Lounges in the main Institute buildings, or, if this proves impossible, in Walker Memorial. Plans for commuter space should be also included in the design of the Student-Alumni Center on West Campus.
- 4. Encourage the various departments and courses to set aside lounge space, not only for the commuters, but also for any other students who choose to spend their free time in the school buildings.
- 5. Provide sleeping and cooking facilities at a nominal price for those commuters who find it advisable to remain at school overnight occasionally.
- 6. Attempt to integrate the commuter body more fully into student life and activities by encouraging them to take part in extracurricular activities. Many of the commuters are nine-to-five students, who show no interest in the Institute other than a scholastic one. It would help considerably to have some mailbox system from the commuters where they could receive communications from the school and from the clubs and activities.

These recommendations are not a solution to the commuter problem in themselves, but nevertheless, we feel that if they are carried out, they can go a long way to provide a more responsible commuter government, as well as to integrate the commuters more fully into the life of the Institute. If Institute Committee has the courage to make a few radical changes, this program can be accomplished, at least in part.

### through the mail

December 8, 1954 To the Editor of The Tech:

Dear Sir: We, the undersigned, greatly disturbed by the recent trend taken by Voo Doo advertising, wish to take this opportunity to voice our opinions. We are not "prudes", nor do we have anything against an off-color joke, but we see nothing funny in the filthy scribblings distributed recently by Voo Doo. We are not amused by Voo Doo's plans to sing smutty "Christmas Carols" in Building 10. Such stunts may appeal to six-year olds; we regard them as rather disgusting, and consider them an insult to the mentality of the M.I.T. student body.

Sincerely, Malcolm Singerman, '57 John Best, '57 David A. Calling, '57 Abe Weitzberg, '57 James Bjorken, '56 Alexander Koso, '56' Edward Konik, '56 Donald W. Brusch, '56 Richard A. Finn, '56 Marvin Bahman, '56 Bruce Bredehoft, '56 Harry Mogensen, '55

Skeptics

(Continued from page 1) that the tearing down of the old is necessary in order to formulate new theories. He described the good scientist as one who not only formulates new theories but also is capable of finding the faults in those theories. He brought out the essential point by stating: "The proper attitude of a scientist is to be skeptical in his skepti-

Skepticism and Religion

Dr. Wiener then went on to discuss skepticism as related to religion. He stressed the idea that skepticism is as essential to religion as it is to science. Specifically, "It is not skepticism that is the foe of faith, but a prescribed attitude is the foe of both of these." To have true faith, one must have questioned, at one time or another, those doctrines which he now accepts. Satisfaction as to the validity of these doctrines must be acquired through skepticism if true faith is to be at-

## The McCarthy Condemnation. . . One: The Charges

by Everett H. Trop '57 (Ed. Note: This is the first in a series of articles dealing with the recent Senate proceedings)

The purpose of these articles is to floor of the Senate, as they were en-

Senate Resolution 301, to censure the junior Senator from Wisconsin, was placed before the Senate by Senator Flanders on July 30, and three days later this resolution, together with proposed amendments, was referred to a select committee to be composed of 3 Republicans and 3 Democrats and named by the Vice as a Member of the Senate. President. On the fifth of August, the following appointments were made by him: from the majority, the Senator from Utah (Mr. Watkins), the Senator from Kansas (Mr. Carlson), and the Senator from South Dakota (Mr. Case). From the minority, the Senator from Colorado (Mr. Johnson), the Senator from Mississippi (Mr. Stennis), and the Senator from North Carolina (Mr. Ervin). Mr. Watkins was chosen as chairman, and Mr. Johnson as vice-chair-

This committee had been endowed with a grave responsibility, that of evaluating the conduct of a fellow Senator, and deciding whether that Senator was guilty of misconduct. The committee recognized its responsibility at the very outset, as was expressed by Senator Watkins in this manner: "Now, at the outset of this hearing, the committee desires to state in general terms what is involved in Senate Resolution 301 and the Senate order on it, which authorized the appointment of the select committee to consider in behalf of the Senate the so-called Flanders resolution of censure, together with all amendments proposed in the resolu-

... That is a broad grant of power, carrying with it a heavy responsibility-a responsibility which the committee takes seriously. . . . The committee interprets its duties, functions, and responsibilities under the Senate order to be as follows: (1) To analyze the charges set forth in the amendments and to determine-(a) If there were duplications which could be eliminated. (b) If any of the charges were of such a nature that even if the allegations were established as factually true, yet there would be strong reasons for believing that they did not constitute a ground for censure. (2) To thoroughor records which can establish the Chief Executive." facts at the hearings to be held . . . (3) To hold hearings where the committee can present witnesses and documentary evidence for the purpose of placing on record, for later use by the Senate, the evidence and other information gathered during the preliminary investigation period, and for the development of additional evidence and information as the hearings proceed. . . . (4) When the hearings have closed, to prepare a report and submit it to the Senate. Under the order creating this committee, this must be done before the present Senate adjourns sine die."

There have been over forty charges mation to a Senate subcommittee in presented in the original resolution and its amendments, and it was quite clear to the committee that the time allotted to perform the assigned leagues In the Senate. task was woefully inadequate if all the charges were given thorough investigation, including hearings. Consequently, the select committee divided the charges into five categories and thirteen specifications, some of certain fellow Members of the Senwhich appear in more than one category.

The Charges: Category One-Ina Senatorial Committee. The most effective way to prevent the charges is titude towards the world must involve to quote directly from the text of the acle without brains or guts."

"The evidence on the question

whether Senator McCarthy was guilty of contempt of the Senate or a senatorial committee involves his conduct with relation to the Senate Committee on Rules and Administration. An reveal the facts of the recent Senate analysis of the three amendments reaction as supported by the records- ferring to this general matter (bethe Congressional Record. It is not ing amendment (3) proposed by Senintended to editorialize here, but rath- ator Fulbright, amendment (A) proer to present a precise vital picture posed by Senator Morse, and amendof the events just completed on the ment (7) proposed by Senator Flanders) reveals these specific charges:

"(1) That Senator McCarthy refused repeated invitations to testify before the subcommittee.

"(2) That he declined to comply with a request by letter dated November 21, 1952, from the chairman of the subcommittee to appear to supply information concerning certain matters involving his activities

"(3) That he denounced the subcommittee and contemptuously refused to comply with its request.

"(4) That he has continued to show his contempt for the Senate by failing to explain in any manner the six charges contained in the Henning, Hayden, Hendrickson report, which was filed in January 1953.

"We have decided to consider and discuss in our report under this category the incident with reference to Senator Hendrickson, since the conduct complained of is related directly to the fact that Senator Hendrickson was a member of the Subcommittee on Privileges and Elections. This incident is referred to in the amendment proposed by Senator Flanders (30), the specific charge

"(5) That he ridiculed and defamed Senator Hendrickson in vulgar and base language, calling him 'a living miracle without brains or guts.'

The Charges: Category Two-Incidents of Encouragement of United States Employees to Violate the Law and Their Oaths of Office or Executive Orders.

"This category involves alleged statements by Senator McCarthy made at and during the hearings before the Special Subcommittee on Investigations for the Committee on Government Operations of the United States Senate pursuant to Senate Resolution 189, and reveals the following charges:

1. "That Senator McCarthy openly, in a public manner before nationwide television, invited, urged, and incited employees of the Government to violate the law and their oaths of office.

2. "That he invited, urged, and incited such employees to give him classified information.

3. "That the supplying of such ly investigate all charges not elimi- classified information by such emnated under No. 1 in order to secure ployees would be illegal, in violation relevant and material facts concern- of Presidential orders and contrary ing them and the names of witnesses to the constitutional rights of the

> The Charges: Category Three- Incidents involving Receipt or Use of Confidential or Classified Document or Other Confidential Information From Executive Files.

> "The charge or charges inherent in these specifications are-

"1. That Senator McCarthy received and used confidential information unlawfully obtained from an executive department classified document, and failed to restore the document.

"2. That in so doing he was in possible violation of the Espionage Act. "3. That he offered such infor-

the form of a spurious document." The Charges-Category Four-Incidents Involving Abuses of Col-

"The alleged abuses of senatorial colleagues, considered in this category, result from certain oral and written statements of Senator Mc-Carthy directed by him to and about ate, and center around the following specific charges:

"1. That Senator McCarthy pubcidents of Contempt of the Senate or licly ridiculed and defamed Senator Hendrickson in vulgar and base language by calling him "a living mir-

### WORLD'S LARGEST-SELLING FILTER TIP CIGARETTE

### McCarthy

(Continued from page 2) ly ridiculed and defamed Senator Flanders in vulgar and base language by saying of him, "Senile-I think they should get a man with a met and take him to a good quiet about Noah and the Ark by Clifford Odets, outstanding playwright of the Colonial until Dec. 18.

"3. That Senator McCarthy unfairly accused Senators Gillette, Monroney, Hendrickson, Hayden, and Hennings of improper conduct in carrying out their senatorial duties."

The Charges: Category Five-Incident Relating to Ralph W. Zwicker, A General Officer of the Army Of the United States.

"This category refers to the question whether Senator McCarthy should be censured for his treatment of Gen. Ralph W. Zwicker, in connection with General Zwicker's appearance before the Senator as a witness.

"The pertinent proposed amendments are that Senator Fulbright: "(4) Without justification, the ju-

nior Senator from Wisconsin impunged the loyalty, patriotism, and character of Gen. Ralph Zwicker. "And that of Senator Morse:

"(c) As chairman of a committee, resorted to abusive conduct in his interrogation of Gen. Ralph Zwicker, including a charge that General Zwicker was unfit to wear the uniform, during the appearance of General Zwicker as a witness before the Permanent Subcommittee on Investigations of the Senate Committee on Government Operations on February 18, 1954.

"And that of Senator Flanders: "(10) He has attacked, defamed, and besmirched military heroes of the United States, either as witnesses before his committee or under the cloak of immunity of the Senate floor (General Zwicker, General Marshall)."

The next item to consider is the legal aspect of the hearings-were the hearings proper Senate procedure, or were they merely a waste of Senate time, a "circus"?

THE

## Frosh Hoopsters Impress In 60-55 Huntington Win

The freshman basketball team opened up their home season Wednesday with an impressive 60-55 victory over a well balanced Huntington School quintet. It was the second consecutive triumph for coach Roy Rogers' yearlings who had previously defeated the Trinity frosh 81-53 in their curtain raiser. Rogers, who began his chores as freshman mentor last year, has already surpassed the 53-54 record with these two wins. Apparently Rogers has discovered some fine material this year and has worked them into a playing unit which shows promise of a very successful season. Tomorrow the team will meet Exeter Academy in the cage at 3:30 and will be attempting to avenge last year's defeat at the hands of the prep school.

First Half Deadlock

Reviewing the Huntington contest, the first half was a tight battle pitting M.I.T.'s rebounding strength against Huntington's ball handling ability. Center Mac Jordan netted fourteen points on tap-ins and assorted short range shots. Ernest Irwin looked effective in tying up the opposition under the boards, and Tech rallied to a 31-31 deadlock at half-time.

The fast-breaking visitors quickly took a three point advantage after intermission. They missed other scoring opportunities because of poor lead passes to men who had broken away from the Tech defenders.

#### The Tables Turn

After a time out called by Rogers a more stable Tech team took command. Jordan hit twice from underneath and Dave and Paul Larson scored from the outside to put the Rogermen in front by four. Jordan fouled out shortly after, but despite this loss M.I.T. was never headed. Irwin also committed five personals with more than eight minutes remaining, putting two key men on the

THE TECH

opportunities in

bench. However, Dave Rachofsky filled in adequately and combined with Dave Larson to control the backboards.

The team worked smoothly in the final minutes as Dave Klein, one time South Dakota high school all star, teamed with Paul Larson in an effective freeze which proved invulnerable to the Huntington press. Rachofsky's last bucket in the waning seconds iced the verdict.

#### Jordan High Scorer

Ragazzio of the visitors was outstanding in the pivot. He was the high scorer with 24 points, and his fine faking forced Jordan to foul out early. Jordan collected 22 points giving him a total of 53 in the first two contests. He is not too strong defensively, but with a little seasoning should become an excellent nucleus for the team.

Overall the team has fair shooting ability, steady back court men, and enough depth to continue their winning ways.

## Varsity Hoopsters To Face Stevens, Pratt On Weekend

The once-beaten Engineer varsity basketball team journeys to New York to face Pratt and Stevens Institute this weekend. The cagers should rebound from their two-point set-back at the hands of a fighting Trinity team. Pratt has been weak so far this season and should offer little resistance to the varsity in its attempt to return to winning ways.

Beat Stevens Last Year

MIT decisioned Stevens last year and should repeat although Stevens will be hepped up for this traditional tiff. An outside note to watch is the performance of Dimitry Vergun '56, who with a total of 57 rebounds, is one of the nation's leaders. The showing of the entire team should provide a good clue to their actual strength.

# Successful Season Strong WithFrostbite Win

The sailing team ended a most successful season last weekend when they won the Potomac Frostbite Regatta for the Marvin-Gorman-Byrd Trophy in Washington Saturday and Sunday. Skippers Alain deBerc '55 and Nick Newman '56 and their crews Sal Pomponi '55 and Bill Stiles '57 got off to a slow start and after Saturday's three races found themselves in third place behind Georgetown and George Washington. However Sunday they pulled into the lead by sailing consistently and always finishing in the first four places. Navy also pulled up Sunday and breathed hard on the Beavers' necks but after the eighth and final race Tech had a 61/2 point lead over the midshipmen. Final scores were: M.I.T. 1251/2, Navy 119, George Washington 106, Georgetown 103, Catholic U. 100, Stevens 941/2, Webb 76, Maryland 67, and Detroit 62.

Nine Firsts

The team completed the season with a record of nine firsts, three seconds, and one third. Notable among the first places was the Lipton Trophy in which the team defeated the Oxford University team in the first British-American intercollegiate dinghy championship. Several members of the team will travel to England next summer for a return engagement for this Trophy.

For all this much credit should be given to Alain deBerc, the team captain, who is also rounding out the year as President of the Intercollegiate Yacht Racing Association of North America and the New England section thereof.

#### PHOTO NOTICE

The Tech is organizing its own photography staff. In order to maintain and extend good coverage, we feel that, in keeping with the ancient Chinese proverb, one picture is worth a thousand words. Consequently, we ask all interested undergraduates to contact Felipe Vicini in Ware 201, Dick Bloomstein in Baker 602, or the office of The Tech.

## Tech Fleet Ends Engineer MSRA Teams In Title Defenses

The defending MSRA class "B" champion MIT varsity squash team moved into first place in the league with successive wins. They have an individual record of 13 and 2 with both individual losses coming in a hard-fought match against the MIT Faculty-Grad team, last year's runner-up and this year's biggest threat.

Hermosilla Undefeated

Juan Hermosilla '57, number one man, is undefeated in three matches. Hermosilla is ineligible for intercollegiate competition as a transfer student. Ray Morales '55 and Walt Stahl '56, who play in intercollegiate matches as numbers two and three respectively behind Howard Cohen '57, are also undefeated. Cohen has lost one match, i de Leon '56, Bob Millard '55, Bill Batewhich was in the 3-2 Tech defeat of | man '58 and Charlie Diebold '58 has the faculty-grads. Don Steig '55, won its first four matches and leads 2-0 in another. Their overall 19-3 inplaying number five, has lost one of his three matches, to Hossein '54 co-

Hot Competition

captain of last year's fine team.

The faculty-grads will be strengthened soon by the return of Shep Holt, their number one man, and should then provide hot competition for the varsity in its quest to defend its title.

The varsity has notched 5-0 wins over Lincoln's Inn Society, a Harvard Law School group, and over Union Boat Club in addition to the win over the faculty-grads.

Two Class "D" Entrants

MIT has two other MSRA entrants, both competing in class "D" play. The freshman-J.V. team of Gordie Bruggeman '55, Al Hahn '56, Rene Mendes championship year.

dividual record has put them in an excellent position to retain the title won last year.

The other Tech entry in "D" competition has lost but one match and that to last year's runner up by a 4-1 score. This is an all-J.V. outfit composed of Dave Morse '56, Gene Vinson '56 Elliot Cramer '55, Pem Shober '56 and Walt Frey '56.

One Loss

The play of Engineer MSRA teams is following the trend started last year. In previous seasons, the MIT entries had been the league's doormats, but it looks like Tech MSRA squash squads are in for another

# Hoop Season At Halfway Mark; Forfeitures, Officials Sore Spots

by Jerry Marwell '57

As football fades slowly in the East, basketball assumes more and more of the intramural limelight. By this time most of the wheat has been sepa- glect coughing up the fees. Nineteen rated from the chaff and it has become fairly apparent just which teams will others were in the same boat. This find their way into the finals. This isn't the only thing that the season so far list includes 13 fraternities, two fachas brought out. It has also focused attention on some unsavory facts about ulty teams, Club Latino and Burton student attitude towards intramural sports.

Let's face it, intramural sports, more than anything else in the Institute have to be paid, expenses met, but are run off, for and by the student body. The varsity program and athletic obviously these people don't care. two starts, the last of which resulted classes are run by the Institute because the administration, to some measure, in an 8-1 drubbing by Dartmouth, the demands that the students participate in them. Intramural sports, on the other

Basketball fans at the Institute will Beavers will face one of the strongest hand, exists only because the students

not only something for the students doesn't seem that this fact is fully appreciated.

Let's take the case of the one fraternity on campus, to give some idea of a not prevalent, but all too present attitude around campus. Last year this group didn't supply ref's for football and were therefore disqualified from playing basketball.

Basketball Fees Unpaid

This year they neglected to pay their basketball fees and were therefore booted out of the competition. They decided that this was too bad, they had a good chance to win their league crown, and have protested their disbarment. On what grounds I

cannot guess.

They weren't the only entry to ne-House. This is quite a record. Referees

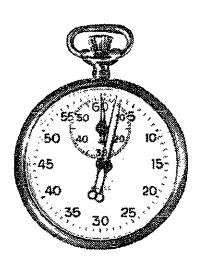

Then there's the problem of basketball referees. Ref's get paid, an added inducement to turn out for the job. want them. Without this desire the program should fold. The program is This does not mean, however, that payment of dues absolves everybody to use, it is their responsibility. It from supplying referees. There has been plenty of complaining about poor officiating. Usually only one ref works a contest where there should be two. Why? Is it the basketball manager's fault? He's got the testing facilities to assure good refs. He contacts all possible candidates. The onus remains on the student body itself. If there were a sufficient number of applicants only good refs would work games, and the individual load would be less. It seems, however, that few people care about the refereeing situation. Everybody depends on "the other guy." They don't realize that it's their own responsibility, that if they don't do it nobody will, and that consequently there'll be no intramural games.

Results To Date

To bring us up to date on the intramural standings: ATO seems to be the ultimate winner in league one. A victory over the Chem. dept. is the clincher. In league two, as in league four, a problem has arisen. If certain teams hadn't been eliminated a three way tie would have resulted. Now one team only has no losses. The Intramural Council will decide whether or not to declare a tie. East Campus Raiders and Theta Delta Chi are the two possibilities. In league three a tight battle between SAE and TEP has developed. We pick TEP, mainly because they now have Marty Goldstein. League four goes to Grad House or D.U., probably the grads; and league five has been wrapped up by Theta Chi. Theta Chi "B", Catholic Club or Walker staff can win league six while East Campus has taken league seven laurels.

time is in the Russians' favor, are "good" if they are wars of liberation by the Red Army, are anti-colonial and/or anti-imperialist, or are wars uniting great peoples (e.g., WWII). Wars are bad only when they are directed against the USSR and its satellites, when they are trade wars, or, most dangerously, when they are religious-type crusades against Bolshevism such as the type that Hitler claimed to conduct-which bring in emotional factors unanswerable by the Russians.

That the USSR's foreign policy must be peaceful, but yet aggressive, is the third major point, perhaps the most important. War is a last resort, useless as long as the goals of world Communization can be attained by skillful misinterpretation of diplomatic agreements, and by the greatest weapon in the Red arsenal-fear of "liberation" by the Red Army. The peaceful facade slips most often, proposes Professor Gyorgy, when the USSR deals with Britain, the chief target of the Reds since it (1) is the bastion of reactionism, (2) has footholds barring Russia from many of its and (3) is Socialist and therefore anti- sor, is that aggression can exist on group at a time, the point of attack

The Tech-Technique

Communist.

major objectives (Iran, Turkey, etc.), simultaneous peace-lover and aggres- tions. Therefore, alienating only one

a limited scale without impairing a The secret of Russian success as global impression of peaceful inten-

constantly shifts from Tito to Churchill, from anti-Semitism to American generals.

Foreign policy should be prefabricated, and given a military orientation. Satellite nations are run, Professor Gyorgy points out, by Russian generals posing as military advisers, defense ministers, or unadulterated commanders of the occupying Red armies. The military cannot be overvalued, nor too much power given to this ultimate arm of liberation.

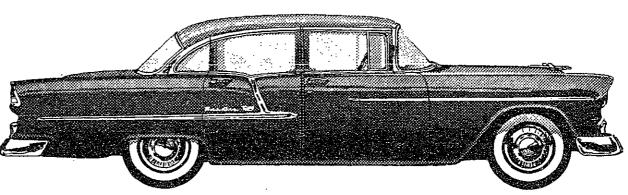

The final point in Russian foreign policy is the unusual combination of Utopianism and its attendant promises of unlimited improvement with a cynical realism. This contradiction is known as "The Great Retreat," a gradual prostitution of Marxism, and is, perhaps, the most vulnerable point in USSR Foreign Policy.

# The exciting new idea behind the motoramic Chevrolet

The Bel Air 4-Door Sedan—one of 14 new Fisher Body beauties in three new series

Maybe once in a car-buying lifetime, you come across something that breaks all the old patterns and establishes new ones. This is that kind of car. This is the true story of how Chevrolet and General Motors shaped a new idea in steel.

Like most good ideas, this one is pretty simple. Chevrolet and General Motors set out to build the first low-priced car that

- bring you the very freshest and finest styling to be had.
- bring you the most advanced engine design and engineering features.
- bring you the kind of performance and the kind of ride that have never been available before in a low-priced car.
- bring you the highest quality of manufacture and materials.

All this in Chevrolet's price field? That did take some doing! And isn't it logical that only Chevrolet and General Motors have the people, skills, resources and facilities, to carry out this

exciting new idea? Here is how this new Chevrolet changes all your ideas about cars!

### Real Show-Car Styling!

Your eye tells you the Motoramic Chevrolet is no styling "patch-up" job. A rakish, low profile . . . soft swiftness from its sleek rear fenders

to its wide-eyed Sweep-Sight windshield . . . a new outlook for motoring. And that outlook doesn't change when you slip inside . . . exciting fabrics and trim are harmonized with the whole car.

### A Sensational Ride!

You live the new idea instantly ... you glide ... actually glide because spherical joints "roll with the punch" of the road in Chev-

rolet's new Glide-Ride front suspension. And outrigger rear springs mean new balance in turns . . . turns made so effortless by new ball-race steering.

And when you stop suddenly, new Anti-Dive braking control checks that nosing down in front . . . you get "heads up" stopping. Tubeless tires mean much greater protection against blowouts. And with new high-level ventilation there's fresher air.

### **Power Beyond Compare!**

You also feel the new idea quickly . . . quick power like a panther's paw with the new "Turbo-Fire V8" (162 h.p.) and two new "Blue-Flame" 6's. And sparking this performance is a 12-volt electrical system giving you better igni-

tion, faster starting, greater electrical reserve for any of the power assists you might desire. You have a transmission choice of economical Overdrive and improved, automatic Powerglide (optional at extra cost) or standard shift.

### Even Air Conditioning!

And if you desire the convenience of power assists (optional at extra cost) . . . you'll find new power-steering and improved power brakes on all models. Power-controlled windows and powershift seat are available on the Bel Air and "Two-Ten" models, while air conditioning may be added on V8 models.

### Won't You Try It?

Here, we can only tell you how successfully the Motoramic Chevrolet expresses the new idea behind it. But the car itself can quickly show you! Come in for a demonstration drive, won't you, first chance you get.

### 

MORE THAN A NEW CAR. A NEW CONCEPT OF LOW-COST MOTORING

Everything's new in the

motoramic
