CAMBRIDGE, MASSACHUSETTS, FRIDAY, MARCH 4, 1960

5 Cents

Senior House Names Kotovsky; East Campus Chooses Huff

Election results for dormitory officers available at the time *The Tech* went to press reveal results of the Senior House and East Campus elections.

In the East Campus elections, Robert Huff, '62, is the new president of east campus. The treasurer is Ed Ferrstel, '62, and secretary is Lew Morton, '62. Other officers which were chosen are Dormitory council chairman is Jack Walker, '62, lounge chairman is Robert Wong, '62; Athletic chairman is Isaac Shanfield, '62; Judicial chairman is Orrin Fackler, '62.

Senior House Chooses Kotovsky
Some of the Senior house returns are in, but the majority of the officers will be elected next Tuesday. Those known at press time were Ken Kotovsky, '61, new president and the dorm council is Ed Schneider, '61. On Tuesday, the secretary and treasurer, along with the tutoring committee chairman, facilities committee chairman, faculty association committee chairman, judicial committee chairman, athletic and social committee chairman.

Texas Instruments Stock Given

MIT Plans Earth Science Center

MIT sent administration representatives to a public hearing last Tuesday to urge passage of a bill which will help make possible the new Center of Earth Sciences.

The Center, to be erected on the East Campus parking lot, is at present limited by a Massachusetts law forbidding the structure of a building over 25 feet high in other than Boston and Newton.

The City Manager of Cambridge petitioned at a public hearing of the House Committee of Mercantile Affairs to have the law extended to include Cambridge. MIT acted as interested supporters along with several other groups.

Structure to Be Multistoried

Borings are now being made for the foundation of the building, which is speculated to be a multi-storied structure, some estimates running as high as twenty floors.

The architect, E. O. Pei, Class of '40, is at present drawing up the final plans. In addition to the Massachusetts law, a local Cambridge ordinance must be overcome.

Bedrock lies 164 feet below the parking lot according to the boring surveys. However, this problem may be overcome. The Prudential Building at 333 Beacon Street rests on bedrock 200 feet below street level.

Grant Given Last Year

The construction is being financed through a gift of Mr. and Mrs. Cecil Greene, Class of '23, of thirty thousand shares of Texas Instruments stock. At the time the gift was made last year the stock was valued at close to one-and-a-half million dollars. Since then, however, the value has risen greatly, and no close estimate was available at the time.

Dramashop Slates Try-outs, Future Productions

The MIT Dramashop will hold try-outs for its second evening of one-acts, in the Little Theatre, next Monday, March 7th, at 7:00. The plays chosen by the reading committee are *Yellow, Out There*, by William Saroyan, and *A Happy Journey to Trentham and Camden*, by Thornton Wilder. The performances will be held on March 18th, and will be followed by a picnic and refreshments. Mr. Everham, the director of the group, desires every student interested in theater to come for try-outs, as many opportunities are open in every aspect of the production.

The Dramashop also has announced its spring production: *Othello*, by Shakespeare. Gus Solomons, Jr. will play the title role and try-outs for the other parts will be held on March 18th and 22nd, at 7:00. It will be the last time that Gus Solomons, Jr. participates in an MIT theatrical performance, as he graduates in June in architecture.

Ira Jaffe Swept into UAP Post; Record Number Vote in Election

1523 Vote For UAP

A record-breaking number 1523 undergraduates swarmed to the polls last Tuesday to elect Ira Jaffe, '61, Undergraduate Association President.

Jerry Staack, '61, Chairman of the Elections, noted that this year 100 more voters turned out than last year when "Al Gasser", the feline UAP candidate, attracted a considerable portion of the student body. The turnout in the individual classes went as follows: seniors — 212, juniors — 328, sophomores — 393, and freshmen — 557.

Ira Jaffe, AEP, the new UAP, gave this statement to *The Tech*, "I would like to thank everyone who helped me during the campaign. I can only say two things at the present time. First, I will do my best to validate the confidence shown in me by my supporters, and second, to see that the principles of my platform are realized."

Newly elected UAP Ira Jaffe, '61, after landslide victory at the polls. — Photo by Kenneth Anderson, '63

Students Strike Woolworth Stores MIT Men To Form Similar Group

By Wally Manheimer, '63

Over one hundred Techmen attended a meeting last Tuesday in the Baker Dining Room to consider what action could be taken by northerners on the southern "lunch-counter situation". Speakers from Harvard, Brandeis and MIT discussed the situation in general and told what is being done by colleges in the Boston Area, stressing what could be done by MIT.

Mike Walzer of Harvard gave a running history of the month-long battle against segregation. On February first, four Negro College students of Greensboro, North Carolina, entered a Woolworth's dime store, sat at the counter (which was customarily segregated) and waited to be served. They remained unserved until the store closed.

The Negroes came back in such numbers in the next two days, that the lunch counter had to close. For more than a month the counter has remained closed as passively-resisting Negroes crowded out whites during the store hours.

Massive, Passive Resistance

During February the movement spread to cities in six other states, including the "Deep South" state of Alabama. Walzer described the movement as one of "massive, passive resistance". He asserted that Negroes will not live in an atmosphere that is insulting and degrading to them.

Art Mitzman and Laurel Weinstein of Brandeis spoke about what has been and is being done there. Seventy-five Brandeis students picketed Woolworth's in the Boston area in an attempt to put economic pressure on the national chain store.

It was hoped that such pressure would induce the owner of the chain to force the southern branches to modify their policy. The Brandeis newspaper published a four page supplement this week which printed the truth about the southern situation, and what is being done in both the north and south to alleviate it.

Many Area Schools Picket

After the discussion, a group of about sixty Techmen gathered to discuss just what MIT could and should do. The talk was moderated by Walzer, Mitzman, Laurel Weinstein and James Geiser, MIT '62.

The Tech group split into four sub-committees: Petitions, Transportation, Publicity and Correspondence.

Meet at BU Next Friday

There will be a meeting next Friday night at 8 PM in Hayden Hall, Boston University, to organize the details of Saturday's picketing and to help the new-born MIT delegation get on its feet. All interested students are invited to attend.

Editors' Note — Anyone wishing further information should call Mike Walzer, UN 4-0235, or Laurel Weinstein, TW 3-5428.

Tech Names Class Officers

The night before elections an anonymous leaflet entitled "Vote Dorm" was circulated among all dormitory residents, containing a list of all candidates in the class and executive committee elections from dormitories, and urging all on-campus residents to co-operate in a movement to stop the "minority" — the fraternities from controlling the "majority" — the dorms. The pamphlet urged that all dormitory residents take the list of dorm candidates to the polls and make special effort to vote only for fellow dorm men. It is interesting to note that almost 70% of dormitory candidates were elected while 50% of fraternity candidates were elected. Statistics show that while only 10% of the candidates were from dorms, 30% of those elected were dormitory men.

Election Winners

Winners in the respective classes are: Seniors: President, Dick Kaplan; Vice-President, Jerry Hurst; Secretary, John Stevenson, and Treasurer, Dick McDowell; Juniors: President, Tom Geers; Vice-President, Al Brennecke; Secretary, Gary Gustafson, and Treasurer, Tom Hastings; Sophomores: President, Max Snoderly; Vice-President, Ed Linde, and Secretary-Treasurer, John Munzel; Freshmen: President, Phil Miller; Vice-President, Robert Vernon, and Secretary-Treasurer, Stephen Raphael.

New members of the Senior Executive Committee are: Ralph Buncher, Don de Reynier, Dick Greenspan, Linda Grenier, Bob Leinhard, and Carl Swanson.

Tom Geers, Alpha Epsilon Pi, new '61 President, gave the following statement to *The Tech*, "Thank you '61. Don't forget Senior Week."

Max Snoderly, Sigma Nu, Sophomore President said, "I am delighted and relieved; and I am ready to start to work to make the Junior Prom a successful weekend. I would like to thank those who supported me in my campaign; their help was invaluable".

Phil Miller, Baker House, Frosh President, gave this statement, "I want to thank all my constituents for their votes and promise to work towards the fulfillment of my campaign platform. My long-range objective is to stimulate the class members to take a greater interest in class government and class activities. Included in this and perhaps my main goal is the organization of the class into a strong, spirited, and unified body"

Fraternity Bids For New Bridge Record

What started as a pleasant evening of bridge at Phi Kappa Sigma fraternity almost turned into an attempt to set a new world's record at marathon bridge playing.

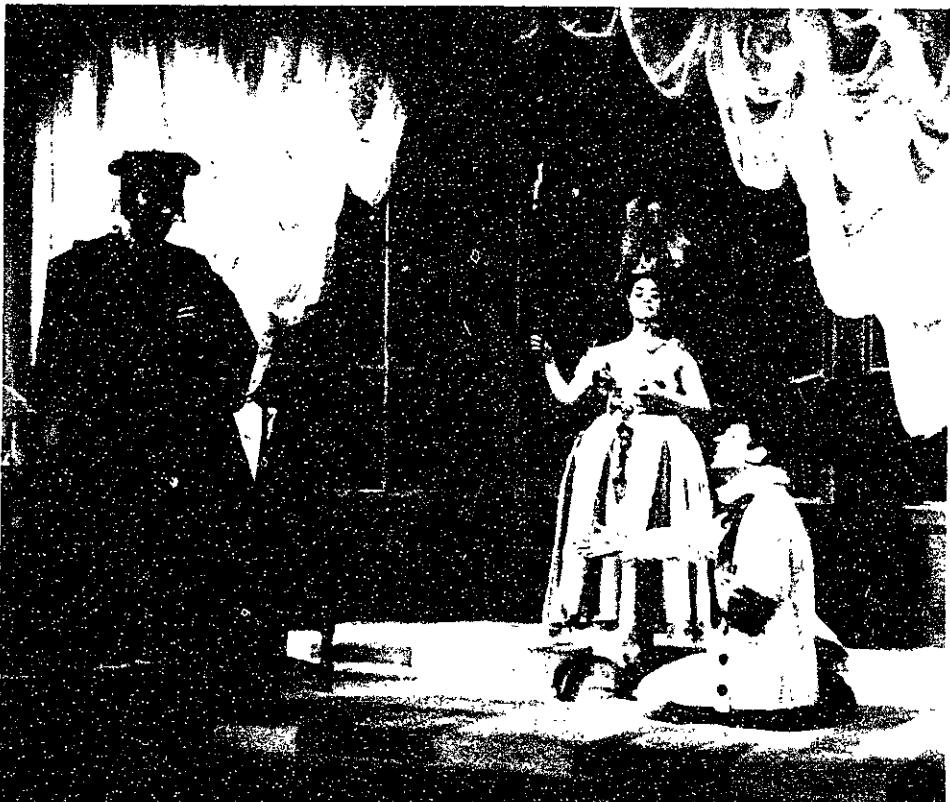

Starting after dinner last Thursday, a foursome consisting of George Yamarik, '61, Bob Caldaron, '61, Frank Lane, '61, and Bill Strauss, '61, began a bridge game with the assurance that their first quizzes of the term did not fall on that Friday.

After several hours of playing, the participants decided that the time had come to establish a new record for continuous bridge playing by a single foursome. In order to make their attempt official, they called a local newspaper and reported the beginning of their attempt.

By about 8:00 Saturday morning, roughly 36 hours after starting, the group learned that a long article had appeared in the Boston newspaper they had contacted, and also that a similar group in Bristol, England, was attempting the feat beginning Saturday morning. Because the Bristol group started with plenty of rest, whereas the Phi Kappa Sigma four began as an ordinary school-night bridge game, the attempt was cancelled until a later convenient time, as yet undetermined.

VIA

Tuesday, March 8, 5:00 P.M., Room 10-250. Electrical Engineering VIA Cooperative Course talk for sophomores by company representatives from Air Force Cambridge Research Center, General Radio Company, Boston Edison Company, Philco Corporation. Freshmen are invited.

"The Alchemist", produced in the spring of 1959, starred (from left to right) Irv Weinman, Joan Tolentino and Richard Hornby.

letters

TO THE EDITOR OF "The Tech":

It seems that each year at this time, Tech Show is forced to submit to a verbal castigation at the hands of an individual whose information is more fiction than fact. Again this year, we wish to answer this storyteller with the truth.

It is not our usual practice to make a public financial accounting. However, in order to prevent the spread of misinformation, we feel it necessary to do so. The budget of Tech Show '60 is \$5500., which is the lowest budget since Tech Show moved into Kresge Auditorium. Last year's losses of \$1200 (and not \$2000 as reported) were sustained because of an unfortunate road trip; current ticket sales indicate that the greater part of this debt will be paid this year. Tech Show has never had a budget as high as \$15,000. This information was undoubtedly the result of references to erroneous editorials concerning Tech Show which appeared in the 1959 editions of "The Tech".

With regard to our attendance, we know that our combined audience for the first three nights would virtually fill Kresge's vast auditorium twice, since we have recorded approximately 2000 paid admissions for those nights.

Concerning undergraduate support, Tech Show '60 provided activity for fifty MIT students, which is only one less than that which supports "The Tech". The total number of alumni in this year's company was two, which is hardly an overwhelming figure and entirely within the organization's constitution as filed with the Institute Committee.

It is impossible for all the talent necessary to put on Tech Show, specifically female talent, to be found within the MIT community. Tech Show is compelled to use the talents of young ladies from our neighboring schools. This has been a standard practice for many years, and it is done with the full blessing and encouragement of our faculty advisor, Professor William C. Greene. This procedure is used by other MIT musical and dramatic organizations which require the services of many talented young ladies. The use of people other than MIT undergraduates in no way affects the qualification of Tech Show as an undergraduate activity. The regulations concerning Class A activities, which were discussed at the Activities Council meeting of February 16, indicate that only the officers and 50% of the members need be undergraduates. Tech Show more than meets these requirements.

We understand that the author of the editorial which appeared in the last issue of "The Tech" had made no attempt to contact any member of the Tech Show managing board before writing his editorial. Realizing therefore that his information is entirely second-hand, and on the whole false, we ask for a public apology.

We hope that in the future when "The Tech" comments editorially on Tech Show, it will state as facts what really are the facts, and not the uneducated guesses which have appeared in the past.

Yours truly,
HAROLD E. HOLZER, General Manager
STANLEY J. MICHALIK, Secretary

To answer these points in order:

The Tech desires nothing more than to have the facts revealed. If they are brought to light, the undergraduates can judge for themselves. We will be more than happy to print the facts, as witness the above, and the following.

As far as public financial accountings go, if an activity is having financial trouble, it owes the MIT undergraduates enough of an accounting so that the situation is clear. Tech Show's budget this year is indeed \$5500. But in addition the show owes \$1750 to MIT, in the form of a \$1500 debt to Finance Board and a \$250 debt to a special fund at MIT for Tech Show. Other Tech Show debts to this fund were unavailable from the Finance Board, from which the above information was obtained.

We regret our error in stating on Tuesday that the three Tech Show audiences of the previous weekend would just fill Kresge. Actually, as Messrs. Holzer and Michalik make clear above, they would fill Kresge one and two-thirds times.

With regard to undergraduate participation: we count in the Tech Show program seventy-two people connected with it! The young ladies are included in this figure since a number of them do have responsibilities off stage, as well as playing more than a supporting role on stage.

Of the cast of Tech Show, 40% are MIT undergraduates. Of the people responsible for Music, Choreography, Lyrics, Orchestration, Set, Lighting, Costumes, Writing, and Directing 64% are MIT undergraduates. The people behind the scenes of Tech Show — on the Managing, Business, and Production Staffs — are almost to a man (except where they are women) MIT undergraduates. For any injustice we have done them, we apologize. It is our contention that Tech Show would be an outlet for MIT undergraduate talent on the stage as well as behind the scenes. However, we do not feel that it is such to the extent it could and should be.

As far as information published on this page is concerned, we will take full editorial responsibility for it, as witness this statement, which should clarify any erroneous impressions created by our editorial.

Some of the points cited in last Tuesday's editorial are successfully challenged in the above letter. For our errors

of fact we apologize. We still stand wholeheartedly behind the spirit of the editorial, which is this:

— Tech Show has steadily declined in quality over recent years.

— It does not seek to be an MIT undergraduate activity insofar as it does not present a show that can be staged and acted, as well as produced, by MIT undergraduates. The girls, as we have said, play more than a supporting role. — Tech Show has substantial outstanding debts at the Institute.

We feel that when this year's show is over there should be a discussion of the future of Tech Show by members of the faculty, administration, and student body. In this belief we are encouraged by Tech Show's adviser, Professor William C. Greene, for this is essentially what he has recommended to us. Special attention should be given, we feel, to the areas of undergraduate participation, financial position, and show quality.

— Ed.

cherchez la femme

The mixer season for this school year is finally drawing to a reluctant close, so fellows, this is your last chance to make new contacts, for even Endicott Junior College has given up.

Wellesley will have its own separate dormitory mixers from time to time during the term. Apparently they're experimenting with various types of mixers to see what type attracts the most men. For instance, last weekend Tower Court had a Saturday night mixer while Stone Davis and Cazenove had Sunday afternoon coffee mixers. This Saturday afternoon, March 5, Shafer is having a tea dance, so if you don't have a date as yet for Saturday night, here's your chance. A mixer is being considered by Bates — Freeman in the future.

Also scheduling mixers this weekend are Simmons, Garland, and Brandeis. The Simmons upperclass mixer is Friday evening and a good turnout is expected on behalf of the girls, but arrive early, for many of the girls leave by nine-thirty for nearby Back Bay fraternity houses. There may be a small admission charge at this mixer, and don't forget your MIT registration card.

Dancing at Garland Junior College begins at eight o'clock at 411 Commonwealth Avenue. Garland will probably not be as crowded as the Simmons dance, but Garland girls always look their best at these dances. Many Techmen have found exceptional dates at this school.

To complete the weekend and the mixer season, Brandeis is sponsoring some open houses this Sunday afternoon at two o'clock. One of these is at Usen Hall (Hamilton E) and the Techmen usually find themselves welcome, for the girls are interested in meeting men from other schools.

— LMA

reviews

Our Man in Havana

Our Man in Havana is a confused picture. From the meager evidence available in the film, it seems that Graham Greene's book, from which this movie was adapted, is not only a take-off on spy-thrillers, but a commentary on the tragic absence of personal morality in the modern world. Not having read the novel, I cannot say whether it succeeds in combining these diverse elements; but in any event, the movie does not. After seeing *Our Man in Havana* you feel cheated: it seems as if the producers couldn't decide whether they wanted a side-splitting comedy or a satire with a strong moral point; the result is sometimes funny, but usually quite dull.

Alec Guinness plays a vacuum cleaner salesman drafted into the British Secret Service. Faced with the problem of reporting on espionage activities in the Caribbean area, he invents a spy plot of enormous proportions — including a military installation in the mountains which he bases on vacuum cleaner plans! As we might expect, the situation finally gets out of hand and Guinness finds himself involved with real spies.

It seems hard to believe that with a story like this the film could go wrong, but it does. The trouble is that neither the comic potential of the fake spying nor the terror of the real cloak and dagger work is fully realized. About the funniest scenes are those of Noel Coward dressed in a black suit, carrying an umbrella, and looking like someone out of *The Third Man* plunked down in the steaming streets of Havana. The terror never becomes stronger than a few mysterious phone calls and a murder or two — old stuff in spy pictures — and the corrupt police chief, known as the Red Vulture and played by Ernie Kovacs, seems like a pretty nice guy. Maureen O'Hara and Jo Morrow decorate the screen nicely, but we don't see enough of them.

On the same bill at the Kenmore Theater is a clever short about a night in a pet shop. Occasionally they sneak in a Magoo cartoon so a trip down there might not be a total waste.

Course X Claims New Techretary

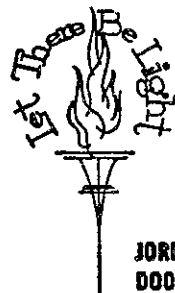

Course Ten was represented for the first time in *The Tech's* contest as Miss Kathleen Germazzi was nominated by a petition signed by thirty MIT students. Secretary of Professors J. E. Vivian and R. C. Reid, Kathleen or Kitty as she prefers to be called, has worked here since September.

Kitty is 23, five feet four, a striking brunette with black hair and brown eyes. She comes from Roslindale, Massachusetts, and is a graduate of Emmanuel College. Prior to her MIT job, Kitty was secretary for an engineering firm — a Professor of Mechanical Engineering here at the Institute recommended that she apply for her present job.

Kathleen was tagged Kitty as a child by a relative and has been known as such by her acquaintances ever since. Of MIT men, Kitty said "Those I am closely connected with all have very pleasant personalities."

Kitty likes dancing, tennis, and music—especially hi-fi. She is a member of the Hockflieger Ski Lodge in New Hampshire and skis "when I can."

Arise — nominate your secretary — petitions given great weight — bribe a member of *The Tech* staff.

Juvenile Delinquency at M

Lighting men Frank Vento (l) and Ken Anderson (r) adjust a spotlight and ... they then ... Paul Neft.

The reasonably placid nocturnal noises of the MIT campus, to wit, the footsteps of night students trotting from classes and the swish of slide rule cursors being whisked to and fro, were witnesses to an unusual scene recently.

The casual observer would have been startled to see two juvenile delinquents pursuing a third around the Mercantile Building across Massachusetts Avenue from Building 7, and reappearing without the third. The famed casual observer, had he been in back of the Mercantile Building, would have seen a brutal beating scene, typical of the much-publicized teen-age delinquents of this generation.

"Net" National Contest

A scene, however, is just what it was. The participants were lighting men from WGBH-TV, Boston's educational television station, and the action was for a TV film entitled "Main Street", concerning Boston's West End Redevelopment Project. A special production team from WGBH filmed the fight sequence as a part of that station's contribution to a national series, actually a contest, sponsored by "National Educational Television" and open to all educational TV stations in the country. Five hours were spent filming the scene, which will run for only about twenty seconds of the air.

Alley Rediscovered

The entire movie, with the exception of this scene, consists of candid shots taken in the West End of Boston. Since a genuine fight scene would prove exceedingly difficult to film, the

KNICKERBOCKER

satisfies your thirst for living!

It took four generations of family tradition to produce the matchless Ruppert Knickerbocker flavor. One swallow and you'll know why it took so long. Fine beer, like a fine family name, gains character with each generation. If you want a glorious golden example of family pride, open a Ruppert and swallow deep!

production team, consisting of Bob Giuliano, engineer; Will Morton, audioman; and Don Hallock, cameraman, was at a loss for a suitable place to stage such a scene until someone discovered an underground alley in back of the Mercantile Building, housing WGBH-TV's offices. Appearing to have been deserted for years, and properly littered with old trash, the alley was the perfect fight setting, and the technicians proceeded to act out the scene in lieu of the services of a more professional group.

Only Shadows on TV
The fight was photographed from street level through a grating, and will appear on TV only as shadows. WGBH-TV is operated in co-operation with the Lowell Institute Co-operative Broadcasting Council, of which MIT is a member. When asked about the alley, engineer Giuliano said, "Until tonight, we never even knew it was here."

Saturday nite action! Sophomores with Sophmistresses come, invoke the spirit of '62 from 8 P.M. ad infinitum at Sigma Iota Phi convention at Delta Tau Delta, 416 Beacon, this Saturday. Come early or after Tech Show. Business will be conducted as usual. Coffee and aspirins will be served.

Seniors — find out what Kearfott's flexible training program offers You

Check the experiences of four '59 graduates at Kearfott

JAMES KEATING
Villanova University '59

Not at all sure of the area of engineering (development, design, test, manufacturing) which would interest him most, Jim has been most impressed by the way Kearfott Project Engineers STAY WITH A PROJECT from study phase right through to production, assuming full technical and financial responsibility for the quality and salability (price-wise) of the finished hardware. He finds that this Kearfott philosophy enables him to operate across the broad spectrum of engineering... Coming from out-of-town, Jim was also pleasantly surprised by the wide choice of living quarters readily available.

STANLEY WALLERSTEIN
Ohio University '59

The very advanced nature of many Kearfott projects fired this engineer's imagination. He joined the Electronics Systems Lab, where he worked on the development of a tiny counter — part of what is believed to be the most accurate test equipment yet devised for missile guidance systems. After exposure to the diversity of the projects in the Systems Lab, Stan has decided to look no further, but requested permanent assignment here, where work ranges over space navigation, digital computers, guidance systems, solid state physics, industrial automation systems and diverse electronic systems.

LENNART G. JOHANSSON
Lafayette College '59

Len is pleased with his six months' experience at Kearfott on two widely different counts. First is the combination of both theoretical and practical know-how he has gained in a field that has fascinated him for a long time — transistor applications. The other is Kearfott's location. Finding midtown New York only 40 minutes away by car, Len, a veteran, is planning to continue his studies for an MS at one of the many colleges in the New York/New Jersey area: Columbia, N.Y.U., Stevens, Newark College of Engineering are all close by. This semester, Len has enrolled for two Kearfott sponsored courses taught at the plant.

GARY WOERNER
Newark College of Engineering '59

Gary has worked by choice in two Laboratories since he joined Kearfott last June — Astronautics and Electronics. He values the opportunity he had to work in direct contact with senior engineers and scientists who have played a leading role in developing the Kearfott inertial systems and components which have been selected for application in over 80 aircraft and 16 major missile systems. Gary now leans to the choice of a permanent assignment in the Electronics Lab but has decided to work a few months in the advanced Gyrodynamics Division, before coming to a decision.

Opportunities at Kearfott are expanding

Long occupying a unique position in the fields of electronics and electro-mechanical components and precision instrumentation, Kearfott — in recent years — has moved more and more into the development of complete systems. This has led to major staff expansion at all levels, including a sizable number of positions for recent graduates in all 4 major company units:

The Systems Division
The Gyrodynamics Division
The Electro-Mechanical Division
The Precision Component Division

Through its flexible TRAINING PROGRAM, Kearfott offers young engineers freedom to explore the field, before selecting the broad area best fulfilling individual interests. Remarkable rapid professional advancement is possible — and likely — through the PROMOTION BY MERIT POLICY. For detailed information, see the Kearfott representative on campus.

LUCKY STRIKE presents

Dear Dr. Frood:

Dr. Frood, Ph.T.T.

Dear Dr. Frood: Would you please explain Einstein's theory of relativity in simple terms.

Physics Major

Dear Physics: Gladly. It is a theory. It is about relativity. It was thought up by a man named Einstein.

Dear Dr. Frood: I wear button-down shirts. I wear grey flannel trousers. I wear fine tweed jackets. I wear British-made shoes. I wear thin striped ties. But still I have no friends. Why?

Friendless

Dear Friendless: Your ties must be a trifle too thin.

Dear Dr. Frood: My sociology Professor says parents should be held responsible for juvenile delinquency. Do you agree?

Soc. Major

Dear Soc: Only if they are very young.

OBFUSCATED ENGLISH PROF. FAILS TO FOOL FROOD

(see below)

Dear Dr. Frood: Very soon the major corporations will be scouting the colleges for capable seniors. They'll be offering fabulous salaries, big titles, golden opportunities. Whom should I work for to guarantee myself a secure future and top income?

Capable

Dear Capable: Dad.

Dear Dr. Frood: Recently I saw this slogan for Lucky Strike: "Remember how great cigarettes used to taste? Luckies still do." I wonder if the Lucky Strike people realize there is a most serious obfuscation here. The modifier is awkward. Does "great" modify "taste"? Or does "great" modify "cigarettes"?

English Professor

Dear English: You can answer that one yourself. Simply put a match to a Lucky Strike and puff.

Dear Dr. Frood: For many months I have worked nights in the lab, developing the formula that I am convinced will make possible the perfect crime. It is a deadly poison that works externally, rather than internally. To test my formula, I have placed a large amount of the poison on this letter that you are now holding in your hands. Sorry it had to be you, old man.

Wolfgang

Dear Wolfgang: My secretary received your letter. Now that there is no one to care for them, I'm sending you her 14 cats.

COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T. — Lucky Strike means fine tobacco.

TOBACCO AND TASTE TOO FINE TO FILTER!

Product of The American Tobacco Company — "Tobacco is our middle name"

FOR SALE: 57 Ford Convertible — 20,000 miles — Power Steering — White Walls — Safety Dash — Visor and Steering Wheel — Official Color: Cowhide Beige. — BEST OFFER — Call ASpinwall 7-6587

WANTED: Two working girls, college grads '56, looking for 3rd girl to share Back Bay Apt. by the end of April. Call COpley 7-1226, Evenings

ENGINEERING NOTICE

The Martin Company representative will visit the campus on March 10 & 11 to discuss opportunities for graduates of the School of Engineering.

New England Fencing Here

MIT varsities will be competing for two New England and one national championship today and Saturday at three locations in Massachusetts.

The varsity wrestlers, who have compiled a five win, three loss and one tie record this season, will face nine New England schools at Williams. Favored Springfield will return to defend its crown. Four members of this year's Springfield team are defending New England champions.

Among the competitors for MIT, captain Don Weaver, '60, and Andy Bulfer, '61, scored for Tech in last year's meet. Bulfer, wrestling in the 130-lb. class, copped a third place while Weaver, grappling with the 123 pounders, took fourth.

Among the freshmen, Jim Evans, Mike Williams and Terry Chatwin are expected to pace the Engineers to a high finish.

Burnell West, '60, and Tom Ising, '61, will lead the swimming team in its quest of the New England title at the University of Massachusetts.

Amherst will host the three-day national squash championships. Each team will send four men to the tournament, which concludes Sunday.

At BU (Friday)
NRA Sectionals at BU (Sat.)

Skiing

Foley Combined Trophy (Saturday and Sunday)

By Ron Baecker, '63

The 1959-60 New England Intercollegiate Fencing Championships will be held all day Saturday on the second floor of the Dupont Athletic Center. Beginning at ten o'clock the host Crimson and Grey will vie for the title against six other squads.

The MIT cavaliers finished second in last year's competition, which included all of Saturday's entries plus Boston University, not fencing this year. UConn copped the title with 59 points, the Beavers followed with 55, and Trinity placed third with 50. Harvard, Brandeis, BU, Holy Cross, and Bradford-Durfee finished fourth through last. MIT's foil team did exceptionally well; Barrie Shabel, '59, who has since graduated, captured second place, and Jerry Yarbrough, '60, took the third award.

MIT Prospects Bright

Expectations for an MIT championship on Saturday are high. The Beavers have defeated every team with the exception of Harvard, who may send its second squad because of a conflicting match. The season also indicates that the Tech sabremen and especially the foil squad should rank among the highest in the tournament. There is a strong feeling in the MIT camp that Captain Sherman Karp, '60, is the man to watch in the foil competition.

Each School Enters Six

Each team sends six fencers, two each in the foil, epee, and sabre, and if time permits each man will meet the thirteen others in his particular event. The matches, which will run almost continuously for about 12 hours, are open to the public. We urge all, especially those who have never seen a fencing match, to go to Dupont and view some top-flight competition.

Varsity Swimmers

Whipped By Brown

The varsity swimming team ended its regular season Tuesday with a 6-26 loss to Brown University. It was the third loss for the Beavers, who have won seven meets. The Engineers, however, defeated the Providence yearlings 47-30.

Tom Ising, '61, and Burnell West, '60, picked up the only victories for the losers. Ising won the 200-yard backstroke in 2:19.8, his best time for the season.

West took the event in 2:29.4, three tenths of a second over the existing New England standard, of which he is a co-holder.

Although bowing to the visitors, the medley relay of Ising, West, Tony Svestri, '61, and captain John Windle, '60, unofficially broke the MIT varsity record for the 400 yards. Jed Engle, '62, turned in his best time of the year for second in the 220-yard freestyle.

Lauren Sompayrac broke the freshman record for the 100-yard breaststroke, taking the event in 1:09.6, full second below the present mark.

Also aiding in the frosh triumph with two victories apiece were Tom Sloat in the backstroke, Joe Schra in freestyle and Neil Golden in the butterfly. Together with Sompayrac the trio will greatly increase varsity strength next year.

Since 1791, when Alexander Hamilton founded the Society Of Establishing Useful Manufactures, all types of manufacturing have flourished in New Jersey, the Crossroads of the East.

Since Public Service Electric and Gas Company serves about 80 per cent of the population of this great state, this industrial story is highly important

to the people who work for the company. You would be wise to investigate your opportunities with Public Service.

Write for your copy of the 1960 edition of "Training Courses for College Graduates." Write Public Service, 80 Park Place, Room 2152A, Newark 1, New Jersey.

MIT

Cagers Drop Final Tilt 91-75; Morrow Leads Scorers With 25

By Bill Mihaltse, '62

The MIT varsity basketball team closed out its season Wednesday evening with a 91-75 loss to the University of New Hampshire despite 25 points by captain Hugh Morrow, '60. The loss was Tech's twelfth in succession and brought the Beaver's season record to 1-15. MIT's 75 points was their season high.

The game was fairly even for the first seven minutes with New Hampshire holding a slim 17-13 lead. However, the fine play of the visitors' center, Pete Smilkis, who scored 23 points, and the faltering play of the Engineers put MIT behind at the half, 52-34.

Tech Rallies

During the second half, New Hampshire continued building up its lead until at one point the Techmen trailed by 29. But the Beavers, sparked by Morrow and Tom Burns, '62, who each scored seven points in the space of ten minutes, rallied to within twenty. The Engineer substitutes, brought in with two minutes left in the game, reduced the losing margin to 16 points on the strength of seven quick markers by Terry Bray, '62.

High man for Tech and high man for the game was Morrow with 25 points. Other high scorers for MIT were Burns with 16 and Phil Robinson, '61, with eight.

Tall Men Lacking

This game ended one of the poorest seasons in MIT's history. The Engineers were plagued throughout the season by their lack of height and consequently were beaten by the opposition under the boards. For example, on the road trip to the Midwest for games against Case and Chicago University, the varsity was at a distinct disadvantage from the start since their opponents starting teams averaged 6 feet 3 inches while the tallest player on the MIT starting five was 6 feet 3 inches.

The varsity also suffered a great loss when the team's high scorer, Dave Koch, '62, sustained an injury which put him out for the season. Koch had helped offset the Beaver's deficiency in rebounding but after his injury the burden fell upon the shoulders of Burns and Howie Ziehm, '62.

WPI Lone Victim

The varsity's only victory of the season was a 49-48 upset win over WPI. The Hoopsters also played several tight games including 63-59 and 66-52 losses to Bowdoin and a 52-49 loss to Northeastern.

The freshman team enjoyed slightly better success as they compiled a 2-10 record, with victories over WPI and Huntington. High scorers for the frosh were Kent Groninger who scored 29 points for a 17.4 point average and Jeff Paarz with 189 points for a 15.8 average.

Player	Season's Totals	Average
Morrow	223	13.9
Burns	158	10.5
Koch, D.	109	18.2
Ziehm	82	5.1
Gamble	75	4.7
Robinson	59	9.8
Eston	40	8.0
White	37	6.2

T-Club Elects Skendarian

Joe Skendarian, '61, was elected president of the T-Club at a special meeting Wednesday evening. The lettermen's group also elected Eric Arens, '61, vice-president.

SPORTS

A freshman lacrosse rally will be held next Monday, in the Dupont Center conference room, at 5:15 P.M. All interested freshmen are invited to attend. Candidates for the varsity squad are urged to come to practice in Rockwell Cage any day after 5 P.M.

HUGHES

HUGHES AIRCRAFT COMPANY

Calver City, El Segundo, Fullerton, Los Angeles, Malibu and
Newport Beach, California; and Tucson, Arizona

let's level
with
each other

You're looking for a job. Not just any job, but one where you *know for sure* you'll be doing exactly the kind of work you are most interested in. One that will give you every chance to *grow* with the company.

Sure, fringe benefits are fine. Link Aviation offers as good or better than the rest. But how about the day-to-day operation? What kind of assignments will you get? Check these opportunities available *right now* at Link:

- servo-mechanism design work
- analog computer design, solving linear and non-linear differential equations.
- function generator problems using 1, 2 or 3 variables, utilizing both digital and analog techniques
- resolving solutions relating to fire control equations for rockets, missiles and bombs
- navigational equation solutions: simulation of fire control and navigational radar systems
- simulation of complete missile systems
- transistorized circuitry, pulse generation, amplifiers and digital computer components
- optical and visual display systems

Many of the above techniques are used in current Link projects, such as building jet simulators for the Boeing 707, Douglas DC-8, Convair 880, Lockheed Electra, the Navy's A3J jetfighter, or the fire control on the B-58. And there are others that we can't talk about just yet.

There they are . . . some of the current opportunities at Link, both in Binghamton, New York, and in Palo Alto, California. If these or similar positions interest you, contact your Placement Office for an interview in advance. Link Aviation will be on the MIT campus on Wednesday, March 9, or if you prefer, forward a brief resume of your qualifications to:
