

THE TECH

VOL. XXXI. NO. 127

BOSTON, MASS., TUESDAY, MARCH 19, 1912

PRICE TWO CENTS

MECHANICALS TO HOLD BIG BANQUET TONIGHT

Four Prominent Men to Speak— Election Results to Be Announced.

The Mechanical Engineering Society will hold its annual banquet tonight at 6.30, at the Boston City Club on Beacon street, during which the results of the election of officers will be announced.

The society has secured four prominent members of the Boston branch of the American Society of Mechanical Engineers to speak, and it invites any Course II man who may be interested to come to the banquet to hear them.

The first speaker will be Professor Hollis of Harvard, president of the Engineering Club of Boston. Professor Miller of the Institute, Mr. Ralph E. Curtis, chief designer for the Boston Edison Company, and Mr. Richard A. Rice, mechanical engineer at the Lynn plant of the General Electric Company, will also talk.

Any man who expects to attend this banquet can get his ticket from any officer of the society. The ballots for the election of officers can be obtained at the Cage any time today before 4 o'clock, when they are due. Any member who does not return his ballot to the Cage before that time should take it with him to the banquet, where any late blanks will be collected. The officers desire that each man who votes write his name on the envelope.

TECHNOLOGY CLUB.

Ovington, '04, Will Speak On Aviation.

The Technology Club will hold its sixth smoke talk of the season at the club rooms this evening. The club has been particularly fortunate in securing as a speaker Mr. Earle L. Ovington, who will talk on the "Reminiscences of a Birdman." Mr. Ovington, who is a Technology graduate, '04, gave a similar lecture before the Society of Arts last January, but since it came during the mid-year exams, not very many were able to attend.

Mr. Ovington's brilliant achievements as an aviator are too well known to need recounting, and he promises to fill the evening with tales of his most thrilling experiences. The lecture will be illustrated with superb lantern slides. Members of the club are privileged to invite guests, and it is hoped that many will do so.

DAWSON ON TECHNIQUE.

At a meeting of the 1914 Electoral Committee, Monday afternoon, E. E. Dawson was elected treasurer. The rest of the time was taken in nominating members for the position of Athletic Editor. Further elections will be held later.

A whisker-growing contest is being held at the University of Colorado. The swain who succeeds in growing the most beautiful hirsute adornment will have his picture officially published in the Silver and Gold, the university weekly.

HENRY L. SOUTHWICK WILL READ "RIVALS"

The Christian Association Will Meet for a Social Saturday Night in the Union.

Saturday night the Christian Association will meet for the third social of the year, the first being the annual Freshman reception at the opening of the first term, and the second not very long ago, when a new President was elected and Professor Bates entertained the little group around the fire in the Union by readings from three different authors, all of which "took" the crowd by storm.

This time the Association has been fortunate enough to secure Henry Lawrence Southwick, President of the Emerson College of Oratory, as the principal entertainer of the evening. President Southwick will read Brinsley Sheridan's comedy, "The Rivals." The play is entertaining enough in itself, even if poorly rendered, for no one could possibly make "Mrs. Malaprop" anything but funny. The present speaker has won a reputation that but few readers of the country have the good fortune to be able to match, and his rendering is sure to be a masterpiece. Every member who possibly can should be present to hear him.

In the summer of 1906 President Southwick, then Dean Southwick, was on the programs of many of the Chautauqua programs, and every manager who had him on a program tried to get him again. His work is strictly classical, and so it is all the more the wonder that his popularity is so great.

Dr. S. Parkes Cadman of Brooklyn, himself one of the greatest speakers or preachers of our times, said of him:

"Dean Southwick's interpretation of the great tragedies are the greatest that I have ever heard at any Chautauqua, and you are to be congratulated on the opportunity to hear so great an artist."

President Southwick stands easily at the head of all the interpreters of dramatic literature, says an editorial (Continued on Page 2.)

HARE AND HOUND COURSE

Four and a Half-Mile Trail Will Be Explored Today.

The Technology four and a half-mile course from Highland Station to the Field will be explored by the Hare and Hound Club on Wednesday. This is the first trip over the course this year. The pace will be the usual Hare and Hound clip, and the bunch will have time to look around, get their bearings and collect other data which may be useful in later trips over the same trail.

Everybody has heard of "that first long hill, the brook, the pig-pens," or at least of "Lars Anderson." This is the chance for the fellows who have any interest at all in self-locomotion to come out and look at these famous spots. Given a pleasant day, this will be as fine an outing as one could wish for.

The train will leave Back Bay Station at 4.02, and the clothes will be taken in a wagon from Highland Station to the Field. The total expense will be twenty cents.

CIVIL SOCIETY HOLDS DINNER TONIGHT

Mr. J. W. Rollins Will Give Illustrated Lecture On Foundations.

The Civil Engineering Society dinner, which will be held tonight, will be its last important meeting before the annual banquet, and the society will be addressed by Mr. James W. Rollins, who has chosen for his topic the subject, "Foundations."

Mr. Rollins, who is a member of the firm of Holbrook, Cabot & Rollins, graduated from the Institute in 1878, is a member of the Institute Corporation and the president of the Alumni Association. He has been engaged in various kinds of engineering work and is especially capable of talking on the subject. His lecture will be illustrated by excellent stereopticon slides, and as he has addressed the society on former occasions it should prove exceedingly interesting. Mr. Rollins has been mentioned as president of the Boston Society of Civil Engineers.

JUNIOR PROM TICKETS.

Men Must Sign Up Promptly— Sale Has Been Good.

Nearly the required number of men to make the Junior Prom a financial success have already signed up. There will be a table in the Union every noon, so that any man who wishes to attend the dance will have a chance to buy his ticket. Everyone intending to go is urged to sign up as soon as possible, as the tickets are nearly gone and it will soon be impossible to obtain them.

This week the preliminary dance orders will be out and the Prom posters put on sale. The regular orders will be out about the first of April.

ELECTRICALS' MEETING.

Macomber, '07, to Talk On Station Economics.

This afternoon the Electrical Engineering Society will hold a meeting in 6 Lowell, at 4 o'clock. The society has been fortunate in securing for its speaker Mr. Alexander Macomber, '07, who will speak on "Central Station Economics." Mr. Macomber is a former president of the E. E. Society, and has been manager of the Show.

HOCKEY NOTICE.

All men who have left their hockey outfits at the Arena may get them by applying to the janitor. The Arena management wishes that these articles be removed as soon as possible.

The various Greek letter fraternities in North America have approximately 300,000 members in the colleges and universities. It is said that all these societies were derived from a secret society, formed in 1750 by the students at William and Mary, called the Hat hat club.

A new rule has gone into effect at Columbia which forbids smoking in any form.

CHEMICAL SOCIETY MEETING TOMORROW

Professor Prescott Will Give Illustrated Talk on the Milk Question.

At a meeting of the Chemical Society, to be held in the Union tomorrow, at 7.30 P. M., a number of important and interesting matters will be considered. Professor Prescott of the Biological Department will give a talk on the "Milk Question." It is expected that Professor Talbot also will speak.

Sanitary milk is probably the most important branch of the pure food problem. There is no doubt that milk is one of the necessities of life. Moreover, it is the only animal food extensively used that is eaten raw. It has been proved that more harmful matter in food has been disposed of by cooking than by any other process. Since this means of purification is for the most part not given to milk, it will be readily seen that the care with which milk is handled is of the utmost importance to the safety of the consumer. Professor Prescott's talk on this subject will be adequately illustrated by lantern slides.

An important business meeting will also be held, and among other things, President Torrey's resignation is to be acted upon, together with the matter of next year's election. Refreshments will be served after the speaking.

CREW PRACTICE.

The Stone School, to whom the rowing machines used in the Gym belong, is going to start crew practice soon, so that the machines will have to be returned. For this week the practice here will be a run in the Gym. It is expected that things will be in good running order by the latter part of the week, and members of the crew are asked to watch Friday's TECH for further announcements.

According to statistics compiled by the "Yale News" the high cost of living has not affected the cost of an education at Yale. The total cost of four years was \$4,372 in 1893 and in 1912 \$4,472.

CALENDAR.

In Charge of S. J. Taylor, 1914.

Tuesday, March 19.

1.00—Sophomore Basketball Meeting—Union.

ROGERS STEPS.

Now that the good, old sunny days are coming around again we will soon be sitting during lecture intervals on the steps in front of Rogers. What a happy bunch of memories enshroud those old steps for most of us! The upperclassmen can call to mind many a pleasant hour spent there with bosom friends, and surely life glided by like a song those days. You, who are Freshmen, have a good deal to look forward to, and many a happy moment to be spent where your predecessors have sat for the last fifty years and thought out a whole host of schemes for the betterment of their Alma Mater.

Now the New Technology is so nearly being an accomplished fact (only three or four years more and our school will be in Cambridge), we are wondering what is going to become of our dear old Rogers Building.

In the early days, when the Institute consisted of only two buildings, Walker and Rogers, the whole life of the school was centered around them, and with it grew a mighty love for the latter among our older Alumni.

Several times lately men have come back to the school, after long years of absence, and their first question has been: "What is going to be done with Rogers when we move to Cambridge?" The wealth of affection existing among them for the old building has been surprising.

We think it would be a good idea for the Alumni Association to formulate some definite plan for the preservation and holding of this edifice, which has so thoroughly grown into the heart of every Institute man, and become such an indispensable part of our school life.

Freshmen at Northwestern are subject to several rather unusual regulations. They may not use automobiles or cabs in the college town, must limit the depth of their trouser "cuffs" to four inches, and in addition are forbidden to smoke pipes or to smoke cigarettes in public.

FRESHMEN ORGANIZING CROSS-COUNTRY TEAM

Hill Is Unopposed in Election of Captain—Wall Named But Declines.

At the meeting held yesterday in the track room of the Union, the Freshman cross-country team elected M. E. Hill as their chief. The meeting was opened by Nye, the Institute captain, who took charge of the election. F. J. Wall and M. E. Hill were the two men nominated, but the former withdrew for the reason that he is unable to attend Saturday runs.

Hill was then unanimously elected. He is probably at present the best runner the Freshmen have, and has showed up well during the first part of the fall practice, although he was obliged to stop on account of some trouble with his knee. The way in which he took the first place in the Hare and Hounds' run last Saturday shows what he is doing this spring and what may be expected of him later. The position which he is now holding is one of responsibility, for the captain of the 1915 cross-country team must act not only as captain, but also as manager.

T. C. A.

(Continued from Page 1.)

in the Chautauqua Idea Magazine. Others have the dramatic intensity, but lack the scholarly insight. He, however, seems to have an ideal combination of characteristics for success and leadership in his chosen line of achievement.

The Transcript said of one of his readings: "An artistic triumph."

Cards have been sent to most of the members already, but if any member of the Association has not received one it means that there has been some accident, and he will be welcome. All members are again invited by this notice, and the Social Committee asks that every one planning to come will send word to the office as soon as they can, so it will be easier to estimate for refreshments.

Remember, Saturday night, in the Union, at 8 o'clock.

COLLEGES AND AUTHORS.

Among the colleges, Harvard leads with 83 authors, and Yale follows second, though at some distance. Foreign universities claim 22, Columbia 17, Pennsylvania 16, University of Michigan 9, Amherst and Cornell each 12, Princeton and Williams each 11, Dartmouth 7, and Brown 6. The smaller colleges of the country are well represented, for nearly 50 per cent. of the writers included in the graduates' list are from small or minimum-sized institutions. Less than 4 per cent. are members of Phi Beta Kappa.

BASEBALL IN BIBLE TIMES

Sihon pitched in Gabez and fought against Israel.—Judges.

He put forth his hand and caught it.—Exodus.

And he struck it into the pan.—I Sam.

And he said unto him, Run!—II Sam.

So they ran, both together.—John.

Ahaz cut off the borders of the bases.—II Kings.

Archer hit him and he was sore wounded.—I Sam.

—Chicago Tribune.

Three Cornell Seniors were hurt recently in an auto accident, when the chauffeur, not knowing that the car was in reverse gear, started the auto and backed the car over a thirty-foot embankment.

A 24-inch telescope which will cost \$30,000 is being constructed at the University of Michigan.

Coffee in Your Room

ONE PIECE HAMMER IN THE NEW MODEL

Ithaca

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods, and hammer stirrups and cock the gun direct from toe of hammer.

OUR hammer travels less than half an inch, taking only 1-825 of a second to operate.

STOCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent splitting and spreading.

THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically fool-proof, and will last you a lifetime if you take care of it and a good many years if you don't.

CATALOG Free; 18 grades, \$17.75 net to \$400 net. OUR 5 1/4 lb. 20 bore is a hummer—be down-to-date and shoot one.

SENIOR CLASS DAY COMMITTEE MEETS

Committees and Chairmen Announced—Program for Senior Week Submitted.

The third meeting of the Senior Class Day Committee was held yesterday afternoon and several matters of importance discussed, together with the reports of several sub-committees and chairmen. The general program for Senior Week was submitted to the committee and will probably stand as suggested.

First Marshal Benbow announced the chairmen and members of the following sub-committees, which have all held meetings at this time and were able to submit reports:

Class Day Committee: Randall Cremer, Chairman.

Dinner Committee: Arch Eicher, Chairman.

Dance Committee: Harold Greenleaf, Chairman.

Nomination Committee: Peter Whittlesey, Chairman.

Spread Committee: R. P. Wallis, Chairman.

Gift Committee: Harold Kebbon, Chairman.

Sermon Committee: C. H. Carpenter, Chairman.

Printing and Engraving Committee: Herbert Woebeling, Chairman.

Program Committee: R. M. Ferry, Chairman.

The program for Senior Week as submitted by the Program Committee is as follows:

Senior Dinner, Thursday, May 30th.
Senior Spread, Friday evening, May 31st.

Senior Baccalaureate Sermon, Sunday, June 2nd.

Senior Class Day, Monday, June 3rd.

Senior Graduation, Tuesday Afternoon, June 4th.

President's Reception, Tuesday afternoon, June 4th.

Pop Concert at Symphony Hall, Tuesday evening, June 4th.

This program is still subject to changes, but they will be minor ones, if any.

The Dance Committee have the Hotel Somerset and the Tuileries under consideration, and have also offered the suggestion that, owing to the extreme heat which will probably be felt at that time it may be found advisable to countenance the wearing of informal dress.

Various other business was considered, including a decision on the form of tickets for the several functions of the week, together with the nominations for places in the events of Class Day, which will be decided at the next meeting.

LONG DISTANCE SPEECH.

An interesting innovation in speech-making occurred last Saturday night when President Hadley of Yale addressed over the telephone the Yale Alumni of Chicago at their annual banquet.

He was fittingly introduced by the toastmaster and gave a talk of some little duration.

WEST. ENGINEERS' TRIP.

The Mechanical Engineers of Michigan are expecting to take a much more extended trip during the spring than is the Civil Engineering Society of the Institute. The men will pass by the Western cities and spend most of their time in the East visiting Pittsburg, Washington, Philadelphia, New York and Niagara Falls.

The class will spend most of the time in exploring steel mills, power plants and ocean liners, as well as sewing machine factories and locomotive works.
