VOL. XXXII. NO. 11

BOSTON, MASS., FRIDAY, OCTOBER 11, 1912

PRICE TWO CENTS

PRESIDENT MURLIN ADDRESSES T. C. A.

Head of Boston University Talks to Large Crowd on "Living One's Own Life."

President Murlin of Boston University addressed the students yesterday noon at the Union at the first of the Thursday noon talks given under the auspices of the Technology Christian Association. The meeting was well attended and was thoroughly enjoyable. Dr. Murlin was introduced by C. W. Brett, president of the T. C. A., who spoke of the work which was being done by the Association.

Dr. Murlin spoke of the many differences of opinion in regard to the most important part of life. He said: "The consensus of opinion is that a man is largely made by the important stage in his life. The most important period in the life of a Technology student is his four years spent at the Institute. He is cut loose from all of his former influences and starts to form his own ideas. Each man lives in his own world and among his own friends and associates. This period, as well as a man's choice of friends, determines his character for the future. A man makes his future because of what he has done in the past. This principle applies in all walks of life; it helps to build a man up in social and moral problems in life. The most valuable asset is a good, firm character."

Arthur W. Carpenter, chairman of the Immigrant Work, told of the work that was being done in teaching the Greek immigrants the English language. He issued a call for teachers to work one evening a week, which will be a great help to the immigrants and a benefit to the students.

President Brett spoke about the discussion classes, to which every student is urged to come. The classes are to be held at the following places: Monday, 5.15 to 6 P. M., at the Union; Friday, 1.30 to 2 P. M., at the T. C. A. office; also 6.30 to 7 P. M., at Mr. Talbot's room, 40 Rutland square. Classes are to be formed on St. James avenue, under the charge of Messrs. Palmer '15 and Keyes '16; also on lower St. Botolph street, under the charge of Mr. Holmes, '16. The Association has in mind meeting places on upper St. Botolph street, Gainsborough street, and upper Newbury street and vicinity.

Secretary Talbot announced at the end of the meeting that the next talk would be given by Dr. Gordon, pastor of the Old South Church, next Thursday, October 17th.

TENNIS CLUB.

There will be a meeting of the candidates for the Tennis Club in Rogers 21, today, at 1 P. M. The election of officers for the coming year will take place, followed by a discussion of the plans for this fall. Information concerning the fall tournament will be given out. All those who play tennis, especially Freshmen, are urged to be present.

FRESHMAN GAME OFF.

The football game between the Freshman team and Tufts' second, which was scheduled for this afternoon, was canceled at the request of the Tufts manager.

BANJO CLUB TO BE GREATLY ENLARGED

This Year Mandola Players Will Form Part of the Club—More Freshmen Wanted.

The first step in the enlarging of the Banjo Club was taken last night at the trials which were held in the Union. Mandola players will be included in the club this year, and the membership this year will include far more banjo players than has been the custom in past years.

The men who reported at the trials yesterday were C. P. Wallis, 1916; M. A. Gillis, 1916; R. W. Moorhouse, 1914, and J. M. Phillips, 1916. The following of last year's members were also present: W. A. Bryant, 1913; A. C. Sherman, 1914; R. S. Rankin, 1913, and F. H. Achard, 1913.

All these men are expected to report Monday in the Union, at 5 o'clock, at which time any men who are interested in banjos and mandolas are also expected.

C. E. SMOKER TONIGHT.

Civils, Miners and Sanitary Engineers Invited to Union.

The first meeting of the Civil Engineering Society will be held in the Union at 8 o'clock tonight. Dean Burton, Professor Spoford and Professor Russell have promised to speak and if reports are true what they have to say will be worth while hearing.

The first year of work at the new Summer Camp up in Maine will come in for its share of the speaking as well. This should prove of interest to Sophomores in Courses I, III, and XI, as they will spend six weeks up there next summer. Last but not least there will be eats and drinks on the side (later inside).

MANDOLIN CANDIDATES.

First Selection Announced By Mandolin Club Officers.

The management of the Mandolin Club has made the following preliminary selection from the candidates who were at the trials Wednesday. These men are expected to report for rehearsals on Wednesdays and Fridays at 4 o'clock:

R. H. Dickson,	D. L. Patten,
E. H. Weil,	H. N. Calver,
R. B. Nichols,	L. L. Dickford,
C. W. Howlett,	L. S. Hall,
O. B. Caldwell,	F. E. Stern,
L. T. Hill,	H. A. Pieper,
R. F. Friebe,	W. A. Brotherton,
E. L. Osborne,	D. O. Dunn,
I. B. McDaniel,	F. L. Surls,
H. R. Bassett,	M. Sayward,
E. J. Kingsbury,	R. S. Howlett,
R. C. Fellows,	W. A. Bryant,
A. V. DeBeech,	H. P. Claussen,
G. R. Duryea,	E. C. Taylor,
D. O. Hooper,	R. A. Allton,
G. D. Kittredge.	

The list is provisional and is subject to change later. It is important that all these men attend the first rehearsals, which come on October 16 and 18, because the coach will be there.

The Minnesota football squad numbers over seventy this year. Their first game is with the North Dakota University.

COURSE XIV MEN IN DOUBT AS TO SOCIETY

Electro-Chemists Meet Again Next Wednesday to Make Final Decision.

The meeting yesterday for the purpose of considering the organization of an Electro-Chemical Society was called to order shortly after 5 o'clock, with an attendance of eighteen, and unanimously elected E. C. Crocker as chairman. Professor Goodwin, the head of the course, then gave his ideas upon the project in a careful analysis of the situation, both pro and con. He mentioned that the idea was not a new one; that several years ago the members of the course had attempted to organize a society, but failed on account of the small number of men in the course. He expressed the opinion that, although the number is larger now, it is hardly

PROF. H. M. GOODWIN.

yet sufficient to justify asking prominent men to speak at its meetings, and therefore that, as an educational or professional organization, the society would not be a great success.

He believed a social organization might succeed if the members of the course thought that another such was needed, but advised them to join the already existing chemical and electrical societies, rather than organize separately. He concluded with the statement that whatever course was decided upon would receive his hearty support.

An animated discussion then followed, many different views being advanced. A communication was read from the Chemical Society, urging Course XIV men to join them, and promising that electro-chemical subjects would receive places on their program for this year.

The lack of interest shown by the Seniors, of whom only one was present, discouraged the idea of a separate organization, although their one representative declared that he did not believe the absence was due to lack of interest. A vote was finally taken on the question whether the organization should be attempted, and resulted in a tie.

(Continued to Page 2.)

IMPORTANT CHANGES MADE IN COURSE II

Shop Work Reduced, Theoretical Increased—More Mathematics in Third Year.

The Department of Mechanical Engineering has made several important changes in Course 2, and these will go into effect this year, and affects all men graduating after 1913. The primary object of these changes has been to adapt this course to the ever changing conditions in the outside world. One particular instance is the addition of German to the curriculum of the first term of the second year. This has been done because of the predominance of Germans in Heat Engineering, and to enable men to read the current German magazines on the subject.

The amount of shop work has been lessened and more mathematics has been assigned in the first term of the third year. The general aspect of the changes has been towards an increase in theoretical work, an addition of new and practical subjects, and a general diminishing of the amount of shop work required. Following is a detailed account of the changes. There are no changes in first year work.

In the first term of the second year Mechanical Engineering Drawing has been reduced fifteen hours, sixty hours of Carpentry and Wood-turning have been replaced by thirty hours of Forging, fifteen hours each of German and Physical Laboratory have been added. In the second term, Mechanism and Valve Gears has been reduced fifteen hours, an increase of fifteen hours in Mechanical Engineering Drawing has been made, and seventy-five hours of Foundry and Forging take the place of twenty hours of Pattern Work.

In the first term of the third year the most important changes have been a marked reduction in the amount of Machine Drawing, an increase in Heat Engineering, the addition of a course in surveying, and the omission of work in Metallurgy of Iron. In the second term shop work has been reduced sixty hours, and a general increase in Mechanical Engineering Drawing, Boiler Design and Engineering Laboratory have been substituted.

In the fourth year there has been a general rearrangement of studies and an addition of a number of new subjects, including Foundations, Heating and Ventilation, and Refrigeration.

THE WEATHER.

UNSETTLED.

For Boston and vicinity: Unsettled, probably showers today. Cooler. Moderate variable winds.

CALENDAR.

Friday, October 11, 1912.

FRIDAY, OCTOBER 11, 1912

COLUMBUS DAY.

Tomorrow is a holiday; exercises at the Institute will be suspended, and for the first time since the term has begun the student will have a chance to get away from work and enjoy himself. Although we have been back but a short time, the pause offered by Columbus Day is looked forward to by all, for to most of us "getting into harness again" is a hard thing to do. Let us hope that there will be no one who is so addicted to grinding that he will let such a chance go by in order to get a bit ahead. Everyone should avail himself of the opportunity to get out into the country and enjoy the wonderful autumn weather and the magnificent coloring of the fall foliage. We sincerely hope that the weather tomorrow will be as pleasant as that of the first of the week.

There will be no Saturday issue of THE TECH.

INSIGNIA.

Mr. Teddy Freshman, did you ever read that little text which ends, "Shall put away all childish things," because if you have never come in contact with it, now is the time to read, learn and inwardly digest?

While you were at "prep" school it may have been an excellent thing to run around wearing the school's insignia, and trying to bluff yourself into the belief that you really were a big factor in the running of the universe, but now that you have reached the age of manhood you must learn to discard the evidences of your past life.

Several times during the last few days we have seen certain members of your entering class trotting around with the childish baubles that they collected in bygone years flying from their mastheads, while benevolent gleams suffused over their radiant countenances.

Mr. Teddy, you have much to learn; and the first thing is, that the wearing of preparatory school insignia is not countenanced in this school which turns out men and not infants wrapped in swaddling clothes.

DOUBT AS TO SOCIEY

(Continued from Page 1.)

It was then decided to think the matter over for a while and meet again next Wednesday at 1.30, for final decision. This time was chosen as one which would suit the Seniors' schedules better than that of yesterday's meeting.

Bowdoin College has been admitted into the Intercollegiate Fencing Association.

SOPHOMORES TO PLAY B. Y. M. C. A. ELEVEN

Opening Game of Season Tomorrow Morning at Field—Few Out For Team.

Tomorrow morning the Sophomore football team will play its first game of the season when it meets the B. Y. M. C. A. eleven at 10 o'clock, at the Technology Field. Little is known of the work of the Association team, but the game will give Captain Scully a chance to try out the material he has.

Only the following men showed up for practice at the Oval last night: O'Brien, Howlett, Boynton, Morse, Fletcher, Helseth, Haslam, Murphy, J. M. Dalton, Whiting, Quirk and Walter. Walter and Quirk are new men. The latter was a prominent athlete at Mechanic Arts High School. Crowell, the heavy guard on last year's team, was out but not in playing togs. The work consisted chiefly of tackling, falling on the ball, with punting practice for the backs, while the ends ran down under the ball. To end up with, Scully put the men through a hard half-hour signal practice, to get the men thoroughly familiar with the signals for Saturday's game.

Up to the present time Manager Frye has games arranged with the following teams: Oct. 16, St. John's Academy; Oct. 26, Rindge Technical School; Nov. 6, Lowell Textile School. He is also in communication with several strong prep school teams in the vicinity, and will probably have several good games listed before Field Day. Captain Scully wants to call attention of the fact to the Sophomores that unless more men show up for practice, in order to have a scrimmage, the chances are that the Freshmen will walk off with the gridiron battle on November 8th.

SECRETARIES TO MEET.

Secretaries of All Activities to Meet in Union Wednesday, At 5 P. M.

J. J. Strachan, chairman of the committee appointed by the Institute Committee to arrange for a meeting of the secretaries of all Institute activities for the purpose of adopting a system of uniform minute books, announces that such a meeting will be held next Wednesday afternoon, in the Union, at 5 o'clock.

Secretaries of every student activity in the Institute are expected to be present, and to bring a sample of the minute books of their respective activities.

The object of this system of uniform minute books is that these books be kept as permanent records and filed in the General Library for reference by future officers of the various societies. The committee is: J. J. Strachan, 1913, chairman; R. C. Thompson, 1913, and L. F. Hamilton, 1914.

STUDENTS' PEWS.

The Tech Chapter of the Brotherhood of St. Andrews has realized one of its ambitions. At last there are three pews in Trinity Church at the disposal of all Tech men. These pews are numbers 107, 109, 114, and every student is expected to feel at perfect liberty to use them. They are located in the middle aisle, and if the student just tells the usher that he is a Tech man he will have no trouble in obtaining the use of one of these pews. If he is attending Trinity for the first time he is asked to go out by the Clarendon street door and make himself known to Dr. Mann.

THE TECH

Morning Delivery

THE TECH is prepared to deliver the paper before 3 a. m. to all students rooming on the following streets - St. James Avenue, Newbury St. The Fenway, Westland Avenue, Huntington Ave., below Massachusetts Ave., St. Botolph and cross streets.

**GOOD TRACK MATERIAL
IN FRESHMAN CLASS**

**Twenty-eight Men Report For
Relay Work — Good Pole
Vaulters, Too.**

The Freshmen have been particularly responsive to the call of Coach Kanaly for track men, twenty-eight having come out for the relay work. A large number of them are men who have never run before, and among this number are some who are showing up well. This fact should be an incentive to men who are reluctant to come out for track work because they have had no previous experience.

Several men are giving valuable assistance in cross-country work. C. T. Guething is showing up strong in this line. He shows steady improvement, and the chances are that he will make the team. Quite a number of men are working with the weights, among them Hawley seems to be showing the most class. Laurason appears to have the makings of a good pole vaulter, and he will probably represent the Institute in most of the meets.

Coach Kanaly is particularly fortunate in having such a wealth of good material in the new class and will probably be able to fill the places of the men lost to the team by graduation.

1916 TUG-OF-WAR.

**Twenty-two Men Reported Fri-
day—Many More Needed.**

Friday afternoon, at the Gym, twenty-two men reported for the Freshman tug-of-war team. This shows an increase but there ought to be at least double that number now.

The practice consisted in short pulls against the stake and counting off. H. A. Affel, captain of last year's Sophomore team, coached the men, and was assisted by C. P. Fiske, manager of the 1914 tug-of-war.

The following men reported for practice: MacRae, Fletcher, Carpenter, Pieper, Connelly, Besly, Stockman, Sanford, Dewson, Chapman, Garia, Stocking, Sully, Bousquet, Duryea, Fuller, Curtis, Rees, Townsend, Hastie, Ellis and Bennett.

Practice is held every day at the Gym at 4 o'clock except Saturday.

COLLEGE NOTES.

The Athletic Board of Brown has voted that there will be no Freshman football team because of the previous consistent failures of the classes to make good in that direction.

The use of fountain pens has been prohibited in certain buildings at the University of Kansas, because through the carelessness of students the floors were being ruined with ink.

The University of Michigan has made a change in the system of marking. Heretofore, only two grades have been given—passing and failure. Now a system of grades showing different qualities of work is to be inaugurated.

A cyclone recently wiped out the navy of Syracuse. The loss is estimated at \$8800, and includes the entire loss of their boat house, seven shells, six other boats and about seventy-five suits belonging to the men.

Sixty-one men, the largest cross-country squad in the history of Harvard, reported this fall.
