

Course Management System

A course management system is a platform that allows instructors to manage a variety of courses with a large number of students.

Create a Model-Driven App called “Course Management System” and make the following customizations to the sitemap.

Note: You need to complete chapters 1, 2, 3, and 4 from MB 200 Microsoft Dynamics 365 and Power Platform Training to finish this assignment.

Course Requirements

- Students can register for their desired courses.
- Students can register for more than one course.
- Students can have the following fields.

Field name	Field Type
Name	Text
Total Amount	Currency
Courses enrolled	Lookup
Region	Text
Email ID	Email
Phone Number	Whole Number

- The Course Management system has different types of courses. (Ex: MB-200, MS 900, MB-400, etc.)
- Each course can have the following fields.

Field name	Field Type
Course name	Text
