While most speakers pronounce these words in exactly the same way, these two words have completely different meanings. They are shown ownership or ownership. There shows the location. Knowing the difference between them and there really isn't that important when you talk, but it's very important when you write. Things can get quite confusing for readers when a writer chooses the wrong word from a set of homophones. General basic state standards indicate that should master the choice of word. This means that a student should be able to recognize when the word steal should be used instead of the word steel, and literally hundreds more pairs like steal and steel. So how can students prepare for this? Just as you can get to Carnegie Hall: practice, practice, practice! To help with this, I created a bunch of resources on homophones and word choices and published them below. Homophones Worksheet 1 – Here are 25 practice problems on homophones.
