TicketNetwork® POS 11

» We build success

TicketNetwork creates technology that defines the world of ticketing. Our focus on research and development keeps our software at the forefront of the industry.

The latest update to the **TicketNetwork®** Point-of-Sale software delivers improved manageability, accountability, and connectivity. Upload your inventory to TicketsNow, StubHub, Ticket Evolution, Vivid Seats, and others via the **TicketNetwork®** POS. This innovation means you can manage your ticket business from a single platform and provides massive exposure for your inventory. We understand that speed and versatility translate to money, so we continue to improve the POS so it is *precisely* the tool you need to effectively and efficiently manage tasks and grow your business.

» All the features you need

The **TicketNetwork®** POS is a turnkey solution designed for and with brokers. You are empowered to provide excellent customer service with detailed accountability in a fast-paced business environment. Our software is designed with you in mind and was the first software platform integrated with the largest ticket exchanges for maximized performance.

» **View, price, and sell inventory across multiple exchanges seamlessly.**

» **Control inventory feed and markups. Choose exactly which events you broadcast with full control over pricing.**

» **Save time with automatic order processing—import the sale, remove the ticket group, and create an invoice without pushing a single button.**

» All in *real time*

Real-time buy-and-sell capability and diverse office management tools combine to expand an already robust POS 11. You can now manage every aspect of your ticketing business from a single place. Plus, **built-in e-ticket management** helps you capitalize on last-minute sales.

As a **TicketNetwork®** POS user, you are automatically enrolled in *Mercury,* our industry-leading broker-to-broker exchange platform. With access to more than $5.5 billion in ticket inventory through the **TicketNetwork®** Online Exchange, and even more with our continuing secondary exchange integration, *Mercury* enables you to buy and sell tickets from other brokers in *real time*. This is possible directly through the **TicketNetwork®** POS. It is the only software capable of broadcasting and managing inventory at this level.

❯❯ All in one place!

We designed the TicketNetwork® POS as a strategic software platform, where you can manage all aspects of your business faster, better, and more efficiently

❯❯ **With POS 11, you can:**

- Broadcast and sell tickets on multiple exchanges
- Store and sell e-tickets automatically
- List inventory as instant download
- Manage your ticket sales
- Track ticket inventory
- Manage relationships with your customers
- Collect payments from customers
- Create shipping labels automatically

Beyond innovative technology, POS 11 comes with the support of knowledgeable and friendly sales representatives and technical support professionals to help you as you grow your business.

❯❯ **Approximately 1,000 ticket brokers in the US and Canada use the TicketNetwork® POS.**

❯❯ **More brokers use our POS than any other system.**

❯❯ **Brokers use the POS to sell about $1 billion in ticket inventory annually.**
