Get the expert guidance you need to give your patients the best possible results with Hematology: Basic principles and Practice, 7th Edition. This fully updated text contains both unprecedented scientific content and an essential clinical guide, so you can improve your problem-solving skills and make optimal use of the latest diagnostic techniques and therapeutic options in this field of rapid change. New in this edition It offers state-of-the-art information and guidance from global editors and collaborators who are at the forefront of their respective subspecialty areas. It has extensive content updates throughout, including basic scientific research that serves as the basis for modern hematology, recent advances in stem cell transplantation, clinical advances in the treatment of each of the haematological malignancies, immune checkpoint inhibitors, molecular diagnosis, transfusion medicine, and much more. It includes several new chapters, including Epigenetics and Epigenomics, Hematological Disease Stem Cell Model, Multiple Myeloma, IND Enabling Processes for Cell-Based Therapies, and Immune Control Point Blocking in Haematological Malignancies. New virtual microscope with the ability to zoom in on high-quality digital hematopathology slides and frequent content updates accessible anywhere, anytime on your favorite digital device. CONTENTS: I Molecular and cellular base of haematology II Haematology Cell Base III Immunological base of haematology IV Hematopoietic cell development disorders V Red blood cells VI Non-malignant leukocytes VII Haematological malignancies VIII Comprehensive care of patients with haematological neoplasms IX X Cell-based therapies Transplant XI Desaperspective Desaperspective Transplantation XII Hemostasis and Thrombosis XIII Coprofesology , Leslie E. Silberstein, Helen Heslop, Jeffrey Weitz, John Anastasi Editor: Els Edition: 7th Age: 2018 Pages: 2650 Language: English Password: booksmedicos.org Free ? 1Fichier Get the expert guidance you need to provide your patients with the best possible results with Hematology: Basic principles and Practice, 7th Edition, (PDF). This fully updated textbook contains both unprecedented scientific content and an essential clinical guide, so you can improve your problem-solving skills and make the best use of the latest diagnostic techniques and therapeutic options in this rapidly changing field. It provides cutting-edge information and guidance from global publishers and contributors who are at the forefront of their respective subspecialty areas. Includes several new chapters, including and Epigenomics, Stem Cell Model of Haematological Diseases, IND Enabling Processes for Cell-Based Therapies, Multiple Myeloma and Immune Control Point Blocking in Haematological Malignancies.It has extensive content updates everywhere, including basic basic science which serves as the basis for modern hematology, recent advances in stem cell transplantation, clinical advances in the treatment of each of the haematological malignancies, molecular diagnosis, immune checkpoint inhibitors, transfusion medicine and much more. NOTE: The product includes the ebook, Hematology: Basic principles and Practice, 7e in PDF. Access codes are not included. [Skip to Content] Anatomy and physiology of genetic epigenetics and genomic approaches to epigenomics for the hematology regulation of gene expression, transcription, Splicing and protein synthesis of RNA metabolism, Traffic protein processing and architecture: Shape ratio and function Pharmacogenomic Transduction and Metabolomic Signaling and Hematopoietic Haematological Diseases Biology Mother Cell Haematological Stem Cells Microambienonment Cell Adhesion Hematopoietic Cell Trafficking and Chemokines Interactions between Hematopoietic Stem and Progenitor Cells and the Bone Marrow: Current Biology of Stem Cell Homing and Mobilization Vascular Growth in Health and Disease Cytokine/The receiving families B-Cell Immune System Interoperability Control T-Cell Immunity Natural Killer Cell Immunity Dendritic Cell Biology Complement and Immunoglobulin biology leading to clinical translation Tolerance and Autoimmunity Biology of Erythropoiesis , Erythroid differentiation, and Maturation Granulocytopenias and Monocytopenias Thrombocytopenesis Inherited forms of bone marrow insufficiency Nocturnal paroxysmic aplastic anemia Hemoglobinuria Acquired Unilinea disorders of human erythrocyte pathobiology blood cell production and its hemoglobin approach to anaemia on the adult and child path Physiology of Disorders Iron Homeostasis of Iron Metabolism: Iron Deficiency and Overload Anemia of Chronic Diseases Biosynthesis hema and its disorders: Sideroblastic porphyria and anemias Anemias Thalassemia syndromes Pathobiology thalassemia pathobiology of sickle cell disease Sickle cell disease: Clinical characteristics and management factor Haemoglobin variants associated with hemolytic anemia, Altered Oxygen Affinity, and Methemoglobinemias Enzymopathies Red Blood Cell Membrane Disorders Extrinsic Hemolytic Anemia Extrinsic Anemia Nonimmune Anemias Hemolytic Granulocytosis , Granulocytopenia, Monocytosis, and Lintacytopenia Monocytopenia, Lymphocytopenia, Hypergammaglobulinemia, and Hypogammaglobulinemia Disorders of Phagocytic Function Congenital Function Disorders Lymphocytes Lysosomal Storage Diseases : Perspectives and Principles Infectious and Other Progress of Diseases Associated with the Epstein-Barr Virus in the Classification of Hematopoietic Neoplasms and Lymphoid: Clinical Implications The Cytogenomic Base of Haematological Malignancies Pharmacology and Mecanismos de agentes antineoplásicos para las neoplasias malignas hematológicas Patobiología de las manifestaciones clínicas de leucemia mieloide aguda y tratamiento de la leucemia mieloide aguda síndromes mielodisplásicos: Biología y tratamiento trasplante de células madre hematopoyéticas alogénicas para la leucemia mieloide aguda y el síndrome mielodisico agudo en adultos Leucemia mieloideia aguda en niños Síndromeodisplásico y Síndrome mieloproliferativo en niños Patobiología de Leucemia Linfoblástica Aguda y Tratamiento en Niños de Leucemia Linfoblástica Aguda Leucemia Aguda en Adultos Leucemia Mieloide Crónica Las Policitemias Trombocitemias Primarias Mielofibrosis Eosinophilia, Leucemia eosinófila crónica, y los síndromes hipereosinofílicos Células del mástil y Mastocitosis sistémica La base patológica para la clasificación de los linfomas linfomas no hodgkinianos y hodgkinos Orígenes del linfoma hodgkiniano linfoma: Manifestaciones clínicas, Estadificación y terapia Orígenes de linfomas no hodgkinos Linfocito crónico leucemia linfocítica : Marginal Zone Lymphomas (Extranodal/Malt, Splenic, and Nodal) Clinical Manifestations, Staging, and Treatment of Follicular Lymphoma Mantle Cell Lymphoma Diagnosis and Treatment of Diffuse Large B-Cell Lymphoma (DLBCL) and Burkitt Lymphoma (BL) Viral-Related Lymphomas Malignant Lymphomas in Childhood T-Cell Lymphomas Multiple Myeloma Waldenstrom Macroglobulinemia/Lymphoplasmacytic Lymphoma Immunoglobuin Light-Chain Amyloidosis (Primary Amyloidosis) Clinical Approach to Infections in the Compromised Host Psychosocial Aspects of Hematologic Disorders Pain Management and Antiemetic Therapy in Hematologic Disorders Palliative Care Late Complications of Hematologic Diseases and Their Therapies Overview and Historical Perspective of Current Cell-Based Therapies Practical Aspects of Hematologic Stem Cell Harvesting and Mobilization IND Enabling Processes for Cell-Based Therapies Graft

Engineering and Cell Processing Principles of Cell-Based Genetic Therapies Mesenchymal Stromal Cells T Cell Therapy of Hematological Diseases NK Cell-Based Therapies Immune Checkpoint Blockade in Hematologic Malignancies Overview and Choice of Donor of Hematopoietic Stem Cell Transplantation Indications and Outcomes of Allogeneic Hematopoietic Cell Transplantation for Hematologic Malignancies in Adults Unrelated Donor Hematopoietic Cell Trasplante de células hematopoyéticas haploidentes no relacionadas con el trasplante de sangre del cordón del donante para las módcas hematológicas Enfermedad del injerto contra el huésped y las respuestas al injerto contra la leucemia: Biología y terapia Complicaciones después del trasplante de células hematopoyéticas Antígenos del grupo sanguíneo humano y los principios de anticuerpos de las consideraciones clínicas de transfusión de glóbulos rojos en la transfusión de plaquetas Antígeno leucocito humano y Sistemas de sistemas de antígenos neutrófilos humanos Principios de las transfusiones de neutrófilos (granulocitos) Transfusión de derivados del plasma: Plasma, Crioprecipitado, albúmina e inmunoglobulinas Preparación de la terapia transfusional de proteínas plasmáticas y recombinantes de plasma humano de origen plasmático para las deficiencias del factor de coagulación Reacciones transfusionales a la sangre y los productos de terapia celular Enfermedades transmisibles Transfusiones Pediatric Transfusion Medicine Overview of Hemostasis and Trombosis The Blood Vessel Wall Megakaryocyte and Platelet Structure Molecular Basis of Platelet Function Basis of Blood Regulatory the patient with bleeding or misty laboratory evaluation of hemostotic and thrombotic disorders Acquired from platelet function diseases Number: Immune thrombocytopenia, Neonatal aloinutive thrombocytopenia and post-transfusion purple thrombocytopenia caused by platelet destruction, hypersplenism or hemodilution-induced thrombocytopenia, Biology, and Genetics of Von Willebrand Disseminated Factor Hypercoagulable States of Intravascular Coagulation Thrombomyloid Syndrome Mechanical Interventions in Arterial and Venous Thrombosis Atherotrombosis Stroke Coronary Acute Syndromes Peripheral artery disease Atrial artery disease Bleeding disorders in haematological changes of neonates of haematological manifestations of pregnancy of childhood diseases Haematological manifestations of systemic diseases: Liver disease Liver manifestation Manifestation Haematological diseases of systemic diseases : Kidney disease Haematological manifestations of integrated cancer therapies in patients with haematological diseases Haematological manifestations of HAD haematological manifestations of parasitary diseases Haematological problems in the surgical patient : Bleeding and thrombosis Spleen and its disorders Hematology in aging resources for the hematologist: Interpretive comments and selected reference values for neonatal, paediatric and adult populations
