

Tim David

AV Requirements & Setup

Tim will utilize a Powerpoint presentation and prefers to bring it on his laptop when possible, although he will have it on a flash drive as a backup. His presentation may include embedded audio. He does not require an internet connection, but it is a nice bonus if audience members have easy wifi access.

Tim prefers a wireless lav mic and **NO** podium (or a podium that is off to the side of the stage and out of the way.)

NOTE: Tim's presentation varies widely on the group and content of the talk; check in advance for details about his AV needs.
