2016 Annual Fugitive Dust Control Report

December 15, 2016

As required under 40 CFR Part §257.80(c), an annual Coal Combustion Residuals (CCR) Fugitive Dust Control Report must be completed for a regulated CCR unit. The initial report is due no later than 14-months after placing the initial CCR fugitive dust control plan in the facility's operating record. The Colstrip Steam Electric Station (CSES) CCR Fugitive Dust Control Plan was placed in the facility's Facility Operating Record on October 19, 2015. The deadline for posting of the initial Annual CCR Fugitive Dust Control is due no later than December 19, 2016. The deadline for subsequent plan completion is 12-months after completion of the initial report. The annual report is considered to be complete after it becomes part of the Facility Operating Record (FOR). The annual report is required to contain the following items:

- 1) All actions taken by the facility to control fugitive dust generated from the CSES CCR units.
The weekly inspection logs identified no actions needed to minimize and control fugitive dust at CSES. These weekly logs are kept on-file in the CSES CCR FOR.
- 2) A record of all citizens complains.
There were no citizen complaints received during this reporting period.
- 3) A summary of any corrective measures taken to mitigate fugitive dust generation.
No corrective action measures were taken (see #1 above).

As required under 40 CFR Part §257.106(g), after posting the initial and subsequent Annual CCR Fugitive Dust reports to the facility operating record, notification of the posting must be made to the MDEQ Remediation Division.

This report is also required to be posted to the publicly available web-site as required under 40 CFR Part §257.107(g).
