Bangor city forest report

Welcome to the City Forest Report at bangorinfo.com Rolland F. Perry City Forest encompasses more than 680 acres of wildlife habitats and working forest in Bangor, Maine, and includes more than 6 miles of access roads and more than 9 miles of trails for running, hiking, cycling, snowshoeing, cross-country skiing. It is owned by the city of Bangor and is open throughout the year. Dogs on the main road, Shannon Road, Tripp Drive, and East Footpath must be on a leash at all times, on command in the city. The Walden-Parke Reserve, owned by the Bangor Land Trust Foundation, covers more than 300 acres near the city forest, on the west side of Veazie's former train bed. It features more than 3 miles of hiking, cycling, skiing and hiking trails. The Land Trust also owns the 30-hectare Northeast Panjavik Reserve near the end of Kittardage Road in Bangor. This site is a private enterprise, not affiliated with bangor city or Bangor Land Trust. If you have any questions, feel free to write me ryan_robbs@bangorinfo.com. If you need more specific information about the forest, contact Forrester City's office, 10000000000.00 if you need more specific information about the Orono Bog promenade, write jim.bird@umit.maine.edu. The forest is accessible via Kittredge Road and Tripp Drive. Kittredge Road is at the intersection of Hogan Road and Stillwater Avenue near Bangor Mall. Tripp Drive is near Stillwater Avenue, 1.5 miles north of the intersection of Stillwater Avenue and Hogan Road, just before the dog and concrete factory. If you come from south on the freeway, you can take either exit 186 (Stillwater Unio) or exit 187 (fair road). If you come from the North on I-95, take exit 187. Bangor orders prohibit hunting in the forest and unauthorized use of vehicles on access roads and trails. The functioning of firearms prohibits firearms in the Walden-Park Reserve. – Ryan bangorinfo.com maps are for general use only. Conditions on the unproven paths of the forest change all the time. Mountain bikers, use trail maps only as a guide to what to expect. You bear the responsibility of knowing your abilities. All maps are in PDF format and require Adobe Reader free of charge. A sign at the entrance in Bangor, Maine, USA City Forest bangor city forest also known as Rolland F. Perry Forest City is a large recreation area in Bangor, Maine. The 2,600-acre park features nearly 10 miles of hiking, cycling and cross-country skiing trails. The trail system is well maintained and most trails are loaded with gravel. Although mostly a recreational area, it technically forest works. The park has a large parking lot and a picnic on the edge of Tripp Drive. Additional parking is available at the end of kittardage road. The entrance to the Orono Bog Promenade, a 1.6 km promenade above Orono Bog, is located on the East Trail, about 0.4 km from the parking area. The promenade is handicapped accessible. External Links Orono Bog Boardwalk Bangor City Forest Coordinate Report: 44 °52'N 68 °45'W / 44.87°N 68.75°W / 44.87; -68.75 This maine state location article is stub. You can help Wikipedia by expanding it.vte retrieved from when visiting Bangor, we decided to go to the Orono Bog Promenade in bangor city forest. We're going to do some overhead from the outside, we didn't know what to expect. Bangor City Forest is also known as Roland P. Perry City Forest. The park consists of 420 miles and includes 60 km of access roads and more than 14 km of trails for recreational use. The park is owned by bangor and is open all year round. I hope you enjoy the view. The sign is located in the Trip Drive car park to map the park's trail system. The trail starts at the Tripp Drive parking lot, at this indoor picnic table. The east path leads from Tripp Drive Gate. Looking for bird and nature wall prints and greeting cards? Look at my Etsy store. The eastern trail is a relatively light and flat path leading to the promenade. The promenade is 400 metres from the start of the east path. Information about the promenade outside the entrance. The entrance to bangor city promenade Orono Bog. It was one of those typical hot and humid days in August during our visit. While we enjoyed the beautiful area, we were surrounded by plenty of pesky mosquitoes. I don't know if it was our weather or environment, but the area reminded me a lot of Florida. While I'm... In college, I took an ecological course in Florida and many of the areas we visited, like the Florida Keys and the Everglades, looked a lot like that. It also included many experiences with these terrible mosquitoes. If you've ever been to Florida, you know what I'm talking about! There are many stations along the promenade that provide information on the local ecology. Here's the first stop. The promenade opened in 2003 and is a collaboration between bangor, the University of Maine and the Orono Land Foundation. Boardwalk season is open from May 1 to Thanksgiving weekend or from the first snow. Those of us who live in Maine know it could be early October. The promenade also provides educational tours during the open season. For more information, you can visit the Bangor City Forest Report. The promenade is 1,200 metres long and allows visitors to enjoy the area, without compromising the integrity of the egg. Here's another informative stop along the way. After walking under the tree-liner, visitors are greeted by the open area of the swamp. Where the swamp is today, used to be a lake. A sign does not collect remind visitors to respect the egg and stay on the boardwalk. In swamps, the water beneath the surface of the earth is very acidic. This is one of the main reasons why pine trees in the area survive in the area. The pine trees that thrive here are not much higher than six to six feet taller. The acidic component of the water also attributes to the accumulation of chained in the egg. In some places, it can be more than half a metre deep. Although the soil of the egg is of poor quality, many plants have been able to flourish in the environment. Another view of the boardwalk in the swamp. The fifth information station along the boardwalk. A sign showing the water level in the swamp. Maine blueberries (and cynium) grown in the swamp. The swamp covers 66 hectares on the Bangor and Orono city lines. The egg is home to hundreds of diverse plants and a rare bird species of Maine. A northern jug plant (Sarachnya Popora) grows in the swamp. They are also known as the purple jug plant, turtle stockings or a side saddle flower. The common name refers to urn-shaped leaves. It can be found in peat swamps on the East Coast and the U.S. Gulf Coast, in the Great Lakes region, in areas of Canada, Washington state and Alaska. It is an interesting plant, as it is a predator. Like other species of this plant, it obtains most of its nutrients by capturing prey. Station 7 on the boardwalk. Open skunk cabbage (Simplocarpus foetidus) grows along the promenade. A view of trees and plants growing along the promenade. Mushrooms grow on a tree stump. Cedar tree (Cedros Livani) grows above the promenade. Coming out of the boardwalk. The boardwalk creates a loop and you're done. You started your walk. The promenade and the swamp turned out to be quite a pleasant surprise and one of those hidden gems that can be found here in the great state of Maine. Hopefully the next time you're in Bangor, we'll have a chance to explore some of the other diverse trails in the park. Hope, this visit will include fewer mosquitoes! This subscription team of masked and socially plucked volunteers repairs the bridge and will finish their work as soon as the weather allows it. In the meantime, we recommend using a different path. A big thank you to PRNEMBA for covering a rocky spot on the northeastern Panjasuk Trail with some gravel. Makes it more comfortable to travel for everyone. And not a mud hole anymore! This extensive network of trails, officially called Roland P. City Forest. Rolland F. Perry City Forest, but commonly known as Bangor City Forest, extends across the city's northern border with Veazie and Orono and surrounds more than 3,800 acres of wildlife habitats and working forest. . Hiking, cycling, snowshoeing and cross-country skiing. The hill linking to the southern approach of the forest was once the city's landfill, but today it offers scenic views and great sledding in winter. The main forest and trails are owned by Bangor, but its part at the southern end, the northern Panjasuk Forest, is owned and maintained by the Bangor Land Trust and provides connection to the Panjasuk Northeast National Park. Other connections exist with Bangor Land Trust's Walden Parke and Orono Bog Promenade, creating a larger integrated system of more than 20 miles of trails. Visitors to Bangor Land Trust Reserves should be aware that they may find additional trails planned and maintained but not mapped. More information Bangor Municipal Forest Report is an independent website that provides great and specific information about the Bangor Municipal Forest. Please follow the policies to help maintain a natural and symthing place for all visitors. Fires are prohibited and no-go. Well-groomed ski runs are for skiing only! Please do not walk or snowshoe on well-groomed ski runs in winter. Dogs are only allowed on a leash, please be respectful and have difficulty after your pet. Flora and fauna of Forest City offers frequent observations of the natural world, recorded by Maine Naturalist Master Claire Cole.
