DESCRIPTION OF NEIGHBORHOOD REVITALIZATION AREA

The Neighborhood Revitalization Area (Map #1) follows the boundaries of *Intensive Care* and *At Risk* neighborhoods as identified in the Neighborhood Element of the Comprehensive Plan. This element, originally approved in 2000, establishes four (4) health classifications for neighborhoods (intensive care, at risk, out patient, and healthy) to determine priorities for re-investment and planning assistance. They are described below in order of priority:

The four health classifications were based on five (5) vital signs that measured the relative health of all neighborhood areas in Topeka. This neighborhood health assessment was used to develop a “triage” approach to revitalization. Those areas that had more “life-threatening” or urgent needs as measured by the vital signs should receive higher priority for treatment over those areas with less urgent needs. These higher priority areas (*intensive care/at risk*) are the focus for neighborhood planning efforts and public re-investment. A summary of the vital signs include:

Poverty (2000 U.S Census) - High concentrations of poverty are one of the most reliable indicators of performance in school, crime rates, family fragmentation, job readiness, housing conditions, etc.

Public Safety (2001-2002, Topeka Police Dept.) – Public Safety, as measured by number of Part I crimes reported for the last three years, is a symptom indicating the local environmental conditions conducive to crime and how well a neighborhood is organized to prevent crime from occurring.

Residential Property Values (2002, Shawnee County Appraisers Office) – Property values are in part a reflection of the quality of housing supply and the image of a neighborhood. The median value of a house purchased in Shawnee County was \$79,000 in 1998.

Single Family Housing Tenure (2002 Shawnee County Appraisers Office)
The percentage of homeowners residing in a neighborhood can be an indication of the willingness (or confidence) to invest in the area. The most relevant measure of this is how many single-family dwellings are owner-occupied since these homes were built for individual ownership.

Boarded Houses (2001-2002, City of Topeka Code Compliance) - A boarded-up house is one of the most, if not most, evident physical displays that will undermine confidence in an area for investment and precipitates a downward spiral for the block and/or neighborhood.

Vital Sign Ranges

Neighborhood Condition Level	Number of Part 1 Crimes	% of Persons Below Poverty Level	% Owner Occupied Housing Units	Number of Boarded Houses	Average Residential Property Levels
Worst ↓ Best	High	25-100	0-33	6-12	\$14,700 - \$31,400
	Above Average	15-24	34-49	3-5	\$31,401 - \$53,400
	Below Average	8-14	50-69	1-2	\$53,401 - \$82,100
	Low	0-7	70-100	0	\$82,101 - \$234,622

Area Profile

Health rankings are determined by averaging all vital sign levels for each neighborhood area. *Intensive care* and *at risk* neighborhoods have the lowest vital sign measurements, and hence are being targeted as the Neighborhood Revitalization (NR) Area. Below is a comparison profile of the NR Area and non-NR Area:

Total Primary Neighborhood Revitalization Area

Neighborhood Health Rating	Number of Part 1 Crimes	% of Persons Below Poverty Level	% Owner Occupied Housing Units	Number of Boarded Houses (by Census Block Group)	Average Residential Property Levels
