Toyota Carpeted / All-Weather Floor Mat Inspection, Application and Installation Instructions

Read these important warnings BEFORE installing ANY type of floor mat

Only install floor mats designed specifically for the model and model year of your vehicle. Check for correct part description and part number information on the packaging label to confirm.

- Never install a floor mat if it was not designed for use in your vehicle.
- Never install the floor mat upside down or turned over for any reason.
- Only install the driver's side floor mat designed specifically for your vehicle's model and model year in the driver's foot area.

Always properly secure the driver's side floor mat using the retaining hooks (clips) supplied in the bag with the original floor mats. Follow the floor mat retention clip installation instruction supplied with the clips. If the floor mat designed specifically for your vehicle's model and model year is properly secured, it will not interfere with the accelerator pedal.

- Never install the front driver's side floor mat without all retaining hooks (clips) securing the mat firmly in place.

The retaining hooks (clips) are designed to accommodate only one floor mat at a time.

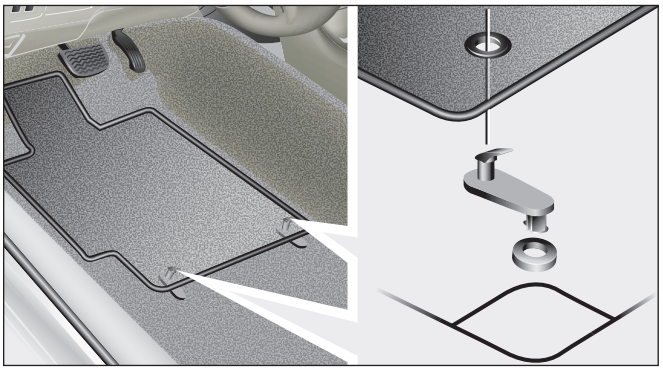

- Do not install another floor mat(s) on top of an existing driver's side floor mat.

After installation, always check the operation of the accelerator, brake and clutch (if applicable) pedals to ensure the floor mat does not interfere with them.

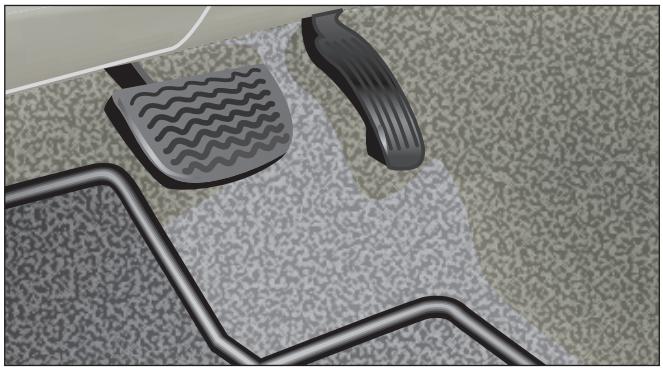

Carefully read the warning tag attached to the driver's side floor mat regarding installation.

Regularly verify the correct floor mat is securely installed in your vehicle using the retaining hooks (clips).

Check regularly for correct floor mat installation

Ensure the retaining hooks (clips) are properly installed and secured into the eyelet(s) located in the driver's side foot well.

Check the pedal operation by fully depressing the pedal to ensure the floor mat does not intefere with it. When testing, make sure the vehicle is off, in 'Park' (for automatic transmission models) and the parking brake is on.
