

WarmUp Bluetooth®

User manual

Manuel d'utilisation

Take good care of your
Bluetooth® Hub serial number

Conservez soigneusement le numéro de
série de votre Bluetooth® Hub

Getting started

1. Check smartphone compatibility

You need Bluetooth Smart (not Classic Bluetooth) on your smartphone to use WarmUp Bluetooth®. This is available in the following phones/operating systems:

- iPhone 4s and newer
- Android 4.4 and newer*

**Deviations may occur. Use the Toyota WarmUp app on your phone to check Bluetooth Smart compatibility.*

2. Download app

Download the free Toyota WarmUp app from App Store or Play Store.

3. Enable Bluetooth on your phone

4. Set up Bluetooth® Hub

You need to pair your smartphone with the Bluetooth® Hub, in order to control the Toyota WarmUp system. Open the Toyota WarmUp app, find the “Set up a new device” option and follow the on-screen instructions.

5. Use

On the “home screen” in the app, select the vehicle you want to control.

Bluetooth connections

You can download the app and pair a total of 5 smartphones with the Bluetooth® Hub. However, only one phone can be connected and operating the system at one time. The first phone that enters in range of the hub will connect automatically. After setup, your Toyota WarmUp system works even if you disable Bluetooth on your phone. However, you must enable Bluetooth and stay in range to be able to edit the Pick-up times.

AC power cable alarm

We recommend that you always have Bluetooth enabled on your phone to be able to receive an alarm if the AC power cable is connected when the engine starts. Note:

- The phone must be connected to the Bluetooth® Hub
- Connection time is dependent on the phone model
- The Toyota WarmUp app must be running in the background
- The app must have access to play the alarm sound (phone settings) and the volume must be on
- There must be power present in the socket outlet

Toyota is not liable for any damages that may occur as a result of moving the vehicle while the power cord is connected.

Industry Canada Statement:

This device complies with RSS-247 of the Industry Canada Rules.

Operation is subject to the following two conditions: 1) this device may not cause interference and 2) this device must accept any interference, including interference that may cause undesired operation of the device.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: the manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
