Section 1: Getting Started

This section explains how to get started with your phone by installing and charging the battery, installing an optional memory card, and setting up your voice mail.

Before using your device for the first time, you’ll need to install and charge the battery. If desired, you can also install an SD card to store media for use with your phone.

Understanding this User Manual

The sections of this manual generally follow the features of your phone. A robust index for features begins on page 351.

Also included is important safety information that you should know before using your device.

This manual provides navigation instructions according to the default display settings. If you select other settings, navigation may be different.

Unless otherwise specified, all instructions in this manual assume you are starting from the Home screen and using the available keys.
**Note:** Instructions in this manual are based on default settings, and may vary from your device, depending on the software version on your device, and any changes to the device’s Settings.

Unless stated otherwise, instructions in this User Manual start with the device unlocked, at the Home screen.

All screen images in this manual are simulated. Actual displays may vary, depending on the software version of your device and any changes to the device’s Settings.

**Special Text**

Throughout this manual, you’ll find text that is set apart from the rest. These are intended to point out important information, share quick methods for activating features, to define terms, and more. The definitions for these methods are as follows:

- **Note**: Presents alternative options for the current feature, menu, or sub-menu.
- **Tips**: Provides quick or innovative methods, or useful shortcuts.
- **Important**: Points out important information about the current feature that could affect performance.
- **Warning**: Brings to your attention important information to prevent loss of data or functionality, or even prevent damage to your phone.
Text Conventions

This manual provides condensed information about how to use your phone. To make this possible, the following text conventions are used to represent often-used steps:

→ Arrows are used to represent the sequence of selecting successive options in longer, or repetitive, procedures.

Example: From the Home screen, press (Menu) → Settings → Connections tab → Bluetooth.

Removing the Battery Cover

The battery and SD card are installed under the battery cover.

Important! Before removing or replacing the battery cover, make sure the device is switched off. To turn the device off, hold down the key until the Device options pop up displays, then tap Power off.

Caution! Do not bend or twist the back cover excessively during installation or removal. Doing so may damage the cover.
To remove the battery cover:
1. Hold the device firmly and locate the cover release latch (1).
2. Place your fingernail in the opening (2) and firmly “pop” the cover off the device (similar to a soda can).

![Release Latch]

Installing the microSD Memory Card

Your device supports an optional (external) microSD™ memory cards for storage of media such as music, pictures, video and other files. The SD card is designed for use with this mobile device and other devices.

Note: This device supports a memory card of up to a 64GB.

1. Remove the battery cover.
2. Locate the microSD card slot on the side of the device.
3. Orient the card with the gold strips facing down.
4. Carefully slide the microSD card into the card socket until it clicks into place.

5. Replace the battery cover.

**Important!** Be sure to align the gold contact pins on the card with the device’s contact pins.

**Important!** MicroSD cards should be formatted within the Storage menu. Using an older or slow microSD card can affect camera performance, especially for video recording.

---

**To remove the microSD Memory Card:**

1. Remove the battery cover.

2. Firmly press the card into the slot and release it. The card should pop partially out of the slot.

3. Remove the card from the slot.

4. Replace the battery cover.
Installing the Battery

Before using your device for the first time, install the battery and charge it fully.

**Important!** Before removing or replacing the battery, make sure the device is switched off. To turn the device off, hold down the $\text{Power}$ button until the Device options pop up displays, then tap **Power off**.

---

**To install the battery:**

1. Slide the battery into the compartment (1) so that the tabs on the end align with the slots at the bottom of the phone, making sure the connectors align.

2. Gently press down to secure the battery (2).

**To remove the battery:**

- Grip the battery at the top end and lift it up and out of the battery compartment.
Replacing the Battery Cover

- Position the battery cover over the battery compartment and press down along the edges of the cover until you hear a click.

Caution! When replacing the battery cover, do not apply pressure to the screen (“squeeze”) as this can damage the screen.

Charging the Battery

Your device is powered by a rechargeable Li-ion battery. A wall charger, which is used for charging the battery, is included with your device. Use only approved batteries and chargers. Ask your local Samsung dealer for further details.

Before using your device for the first time, you must fully charge the battery.
Note: Verify that the battery is installed prior to connecting the wall charger. If both the wall charger is connected and the battery is not installed, the handset will power cycle continuously and prevent proper operation. Failure to unplug the wall charger before you remove the battery, can cause the device to become damaged.

Important! It is recommended you fully charge the battery before using your device for the first time.

1. Connect the USB cable to the charging head.
2. Locate the Charger/Accessory jack.
3. Insert the USB cable into the device’s Charger/Accessory jack.
4. Plug the charging head into a standard AC power outlet. The device turns on with the screen locked and indicates both its charge state and percent of charge.

Warning! While the device is charging, if the touch screen does not function due to an unstable power supply unplug the USB power adapter from the power outlet or unplug the USB cable from the device.
Note: If the charger is incorrectly connected, damage to the accessory port will occur therefore voiding the phone’s warranty.

5. When charging is finished, first unplug the charger’s power plug from the AC wall outlet, then disconnect the charger’s connector from the phone.

Important! If your handset has a touch screen display, please note that a touch screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch screen may damage the tempered glass surface and void the warranty.
Low Battery Indicator

When the battery level is low and only a few minutes of talk time remain (~15% charge), a warning tone sounds and the “Battery low” message repeats at regular intervals on the display. In this condition, your device conserves its remaining battery power, by dimming the backlight.

When the battery level becomes too low, the device automatically turns off.

The on-screen battery charge is represented (by default) as a colored battery icon. You can also choose to display a percentage value. Having a percentage value on-screen can provide a better idea of the remaining charge on the battery.

- Press ➔ and then tap Settings ➔ My device tab ➔ Display ➔ Show battery percentage.

For more information, refer to “Display Settings” on page 252.

Extending Your Battery Life

Active applications, light levels, Bluetooth usage, and GPS functionality all act to drain your battery. The following is a list of helpful tips that can help conserve your battery power:

- Reduce your backlight on time.
- Turn Bluetooth off when not in use.
- Turn Wi-Fi off when not in use.
- Deactivate the GPS when not needed. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.
• Do not wait until your battery is completely depleted before charging your device. Repeating this process of a complete discharge and recharge can over time reduce the storage capacity of any battery.

• Use the Power Saving feature to deactivate some hardware and interface functions.

• Check the Battery use screen to review what features or functions have been consuming your battery resources.

• Check the Running Services and close any unnecessary applications.

• Use the Task Manager feature to end/shutdown background applications that are still running. These minimized applications can, over time, cause your device to “slow down”.

• Animated wallpapers use processing power, memory, and more power. Change your Live Wallpaper to a non-animated Wallpaper gallery or Gallery image.

**Switching the Device On or Off**

Once the device has been configured, you will not be prompted with setup screens again.

**To turn the device on:**

- Press and hold (Power/End) until the device switches on.

  The device searches for your network and after finding it, you can make or receive calls.
Note: The display language is preset to English at the factory. To change the language, use the Language menu. For more information, refer to “Language and Input Settings” on page 270.

To turn the device off:
1. Press and hold (Power/End) until the Device options screen appears.
2. Tap Power off (istrator) → OK.

Initial Device Configuration
1. Select a language from the associated field. English is the default language.
2. Tap Next and follow the on-screen setup instructions.

Note: You may be prompted with a notification that your activation is completed.

Note: Enabling Google location services can drain battery power.

3. Tap Finish to complete the setup process.
4. Go through the on-screen tutorial.

Restarting the Device
1. Press and hold (Power/End) until the Device options screen appears.
2. Tap Restart (istrator) → OK.
Locking and Unlocking the Device

By default, the device screen locks when the backlight turns off.

- Place your finger on the screen and swipe the glass in any of the directions shown unlock the device.

**Note:** You can choose to configure lock settings to prevent unauthorized use of your device. For more information, refer to “Security” on page 285.

Voicemail

**Setting Up Your Voicemail**

Your device automatically transfers all unanswered calls to voicemail, even if your device is in use or turned off. As soon as your battery is charged, activate your voicemail account.

**Important!** Always use a password to protect against unauthorized access.

For new users, follow the instructions below to set up voicemail:

**Note:** Voicemail setup may be different depending on your network.

1. From the Home screen, tap `Contact` and then touch and hold the `1` key until the device dials voicemail. You may be prompted to enter a password.

2. Follow the tutorial to create a password, a greeting, and a display name.
**Accessing Your Voicemail**

You can access your Voicemail by either pressing and holding 1∞ on the keypad, or by using the device’s Application icon, then tapping the Voicemail application. To access Voice Mail using the menu:

1. From the Home screen, tap and then touch and hold 1∞ until the device dials voicemail.

---

**Note:** Touching and holding 1∞ will launch the voicemail application.

---

2. When connected, follow the voice prompts from the voicemail center.

**Accessing Your Voicemail From Another Phone**

1. Dial your wireless phone number.
2. When you hear your voicemail greeting, press the asterisk key on the phone you are using.
3. Enter your passcode.
Section 2: Understanding Your Device

This section outlines key features of your device. It also describes the device’s keys, screen and the icons that display when the device is in use.

Features of Your Device

Your device is lightweight, easy-to-use and offers many significant features. The following list outlines a few of the features included in your device.

• Touch screen with virtual (on-screen) QWERTY keyboard
• 4.0” TFT screen (480x800)
• 3G network-compliant

• DivX Certified® to play DivX® video up to HD 720p, including premium content
• Easy mode functionality converts the current User Interface into larger and easier to use format
1. **Proximity Sensor** detects how close an object is to the surface of the screen. This is typically used to detect when your face is pressed up against the screen, such as during a phone call.
   - While talking on the phone, the sensor detects talk activity and locks the keypad to prevent accidental key presses.
2. **Front Facing Camera** allows you to take pictures while facing the screen and allows you to video conference.

3. **Menu key** displays a list of options available for the current screen. From the Home screen it displays Add apps and widgets, Create folder, Set wallpaper, Edit page, Search, Settings, and Help options.

4. **Home key** displays the Home screen when pressed. Press and hold to display your recent apps, Task manager, Google Search, and Remove all option. Double-press to activate S Voice.

5. **USB Power/Accessory connector** allows you to connect a power cable or optional accessories such as a USB/data cable.

6. **Microphone** is used during phone calls and allows other callers to hear you clearly when you are speaking to them. There are two microphones on the device:
   - Bottom microphone: used during handset mode.
   - Top microphone: used while an active call is in the speakerphone mode and assists in noise cancellation (2 microphone solution).

7. **Back key** redisplay the previous screen or clears entries.

8. **Display** shows all the information needed to operate your phone, such as the connection status, received signal strength, phone battery level, and time.

9. **Headset jack** allows you to connect a hands-free headset so you can listen to music.

10. **Receiver** allows you to hear the other caller and the different ring tones or sounds offered by your phone.
**Back View**

The following illustration shows the external elements of your device:

1. **Camera lens** is used to take photos.

2. **External speaker** allows you to hear ringers, music, and other sounds offered by your phone.
Side Views

The following illustration shows the side elements of your device:

1. **Volume key** allows you to adjust the ringer volume in standby mode (with the phone open) or adjust the voice volume during a call. When receiving an incoming call:
   - Pressing the volume key down mutes the ring tone.

2. **Power/End key** switches the phone off and on. Press and hold for two seconds to access the Device options screen from where you can select a sound/vibration mode, toggle the Data network mode or Airplane mode states, turn the device on or off, or Restart.
Device Display

Your display provides information about the device’s status, and is the interface to manage features. The display indicates your connection status, signal strength, battery status and time. Icons display at the top of the device when an incoming call or message is received and also alerts you at a specified time when an alarm was set. The screen also displays notifications, and Application (or shortcut) bar with five primary shortcuts: Phone, Contacts, Messages, Internet, and Apps.

Display settings

In this menu, you can change various settings for the wallpaper, brightness or backlight.

- From the Home screen, tap (Apps) ➔ (Settings) ➔ (My device tab) ➔ Display. For more information, refer to “Display Settings” on page 252.
**Status Bar**

The Status Bar shows information about the connection status, signal strength, phone battery level, and time, and displays notifications about incoming messages, calls and other actions.

Home Screen

The Home screen is the starting point for using the applications on your phone. There are initially seven available panels, each populated with default shortcuts or applications. You can customize each of these panels.

- **Notification area** displays those icons associated with end-user notifications such as: email messages, calls (missed, call in progress), new voicemail, upcoming event, USB connection, Emails, and Text/MMS messages.
  - These notifications appear at the top-left of the screen (within the Status bar area) and display important user information.
— This information can be accessed by swiping down from the Status bar (page 39).

• **Status area** displays those icons associated with the status of the device such as communication, coverage, Bluetooth, 3G, Wi-Fi communication, battery levels, etc.

• **Home Screen** is a customizable screen that provides information about notifications and device status, and allows access to application Widgets.

• **Extended Home Screens** extend beyond the current visible screen width to provide more space for adding icons, widgets, and other customization features.
  — There are six available extended screens (panels) each of which may be populated with its own shortcuts or widgets. These screens share the use of the five Primary Shortcuts.
  — The current screen is indicated at the bottom by a white square. Up to seven (7) total screens are available.

---

**Note:** Both the status bar and primary shortcuts are visible across all screens.

---

• **Google search** is an on-screen Internet search engine powered by Google™. Tap to access the Voice Actions feature where you can verbally enter a search term and initiate an online search.
  — Tap （Google Actions） to launch the function from within this Google widget.

• **Widgets** are self-contained on-screen applications (not shortcuts). These can be placed onto any of the available screens (Home or extended).
• **Shortcuts** are icons that launch available device applications such as Camera, YouTube, Contacts, Phone, Email, Play Store, etc. These function the same as shortcuts on your computer.
  — Although some may already be found on the Extended Home screens, the majority can also be found within the Applications screens.
  — The Application screens can be accessed by tapping (Apps) from the Primary shortcuts area.
  — Shortcuts can be removed from a screen and added back any number of times.

• **Primary Shortcuts**: are shortcuts present throughout all of the available screens and can be used to both navigate within the device or launch any of the following functions:
  — **Phone** ( ) launches the phone-related screen functions (Keypad, Logs, Favorites, and Contacts).
  — **Contacts** ( ) launches the Contacts-related screens (Phone, Groups, Favorites, and Contacts).
  — **Messages** ( ) launches the Messages application (create new messages or open an existing message string).
  — **Internet** ( ) launches the built-in Web browser.
  — **Apps** toggles functionality between the Home and Application screens.
    - Tap (Apps) to access the Application screens loaded with every available local application.
    - While in the Applications screens, tap (Back) to easily return to the Home screen.

As you transition from screen to screen, a screen indicator (located at the bottom) displays the currently active panel.
Home Key

The Home key ( ) takes you back to your Home screen.

- Press and hold to launch the Recent apps/Task manager screen. For more information, refer to “Accessing Recently-Used Apps” on page 171.

Menu Key

The Menu key ( ) activates an available menu function for the current screen or application.

Back Key

The Back key ( ) returns you to the previously active screen. If the on-screen keyboard is currently open, this key closes the keyboard.

Home Screen Menu Settings

When on the Home screen, press ( ) to reveal the following menu options:

- Add apps and widgets allows you to quickly access the Widget tab where you can then drag a selected widget to an available area on a selected screen.

- Create folder allows you to create on-screen folders to help organize files of application shortcuts.

- Set wallpaper allows you to assign the current wallpaper for the Home screen, Lock screen, or Home screen and lock screens. Choose from Gallery, Live wallpapers, or Wallpapers.

- Edit page allows you to add or remove extended screens from your device. You can have up to six extended screens (one Home screen and six Extended screens).
• **Search** displays the Google Search box that you can use to search for a key term online.

• **Settings** provides quick access to the device’s settings menu.
  – The Settings menu can also be accessed by pressing and then tapping ➔ Settings.

• **Help** provides on-screen help topics.

**Notification Bar**

The Notification area indicates new message events (data sync status, new messages, calendar events, call status, etc). You can expand this area to display the Notification screen that provides more detailed information about the current on-screen notification icons.

1. Touch the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel (1).

2. Tap a notification entry to open the associated application (2).
Clearing Notifications

1. In a single motion, touch and drag the Status bar down to the bottom of the screen to open the Notifications screen.
2. Tap **Clear**. The notifications are cleared from the panel.

Accessing Additional Screen Functions

In addition to notifications, this screen also provides quick and ready access to device functions. These can be quickly activated or deactivated.

Scrolling across a horizontal list of functions has been enhanced with an accessible Grid view.

**Note:** You can select the function buttons you see at the top of the Notifications panel.
Only 5 buttons are shown at any one time.
The Grid view is the only way to view all functions.

**To activate the Grid view:**
- From the Notification panel, tap **Open Grid view** to display additional functions.

**To minimize the Grid view:**
- From the Notification panel, tap **Close Grid view** to show only your primary functions.
To customize the functions displayed:
1. From the Notification screen, tap  (Open Grid view) to display additional functions.
2. Tap  (Edit) then locate the Notifications panel area located at the bottom of the Notifications panel screen.
3. In a single motion, touch and hold a desired function then drag it to the top row.

Customizing the Screens

You can customize the Home screens (panels) to display the Widgets, Shortcuts, Folders, or Wallpapers. For example, one screen could contain the Music Player shortcut and other forms of media, while another screen might contain communication apps such as Gmail.

You can customize your Home screen by doing the following:

- Adding, Deleting, and Rearranging screens
- Assigning a New Home screen
- Adding and Removing Primary Shortcuts
- Sharing Application Information
- Managing Shortcuts
- Adding and Removing Widgets
- Changing the Background (Wallpapers)
Adding and Deleting Screens

Your phone comes with seven screens. You can delete these screens and then add them back later.

**Note:** These screens can be deleted and re-arranged.

**Important!** Your phone can only contain at most seven screens and at least one screen.

To delete a screen:
1. From the Home screen, press \( \text{Menu} \) and then tap **Edit page**.
2. Touch and hold, then drag the undesired screen down to the **Remove** tab ( \( \text{Remove} \) ).
3. Press \( \text{Back} \) to return to the main Home screen.

To add a screen:
1. From the Home screen, press \( \text{Menu} \) and then tap **Edit page**.
2. Tap \( \text{Add screen} \). The newly added screen appears as the last page.
3. Press \( \text{Back} \) to return to the main Home screen.

Rearranging the Screens
1. From the Home screen, press \( \text{Menu} \) and then tap **Edit page**.
2. Touch and hold a screen and then drag it into its new location. Upper-left is screen position #1 and bottom-right is screen last screen.
Assigning a New Home Screen

1. From the Home screen, press \( \text{Edit page} \) and then tap Edit page.
2. Tap \( \text{Home screen} \). The new Home screen then indicates this \( \text{Home screen} \) icon at the top of the selected screen.

Sharing an App

The device’s Applications menu now comes with a feature that allows you to share information about your selected applications with external users.

1. From the Home screen, tap \( \text{Apps} \).
2. Press \( \text{Share apps} \) and then tap Share apps.
3. Place a check mark alongside those applications you wish to share information about and tap Done.

Note: Shared applications consist of those that have previously been downloaded from the Play Store.

4. Select an available method. The recipient will be notified about the receipt of the new information.
Managing Shortcuts

**Note:** To move a shortcut from one screen to another, you must carefully touch and hold the shortcut and slowly drag it to the edge of the screen. As the shortcut turns light blue, you can begin to move it to the adjacent screen. If this does not work, delete it from its current screen. Activate the new screen and then add the selected shortcut.

**To add a shortcut from the Applications screen:**
1. From the Home screen, select a screen location for your new shortcut by scrolling across your available screens until you reach the desired one.
2. Tap **Apps** ( ) to reveal all your current available applications. By default, applications are displayed as an Alphabetical grid.
3. Scroll across the screens and locate your desired application.
4. Touch and hold the on-screen icon. The new shortcut then appears to hover over the current screen.
5. While still holding the on-screen icon, position it on the current screen. Once complete, release the screen to lock the shortcut into its new position.

**To add a shortcut via the Add to Home screen:**
1. From the Home screen, navigate to a screen with an empty area.
2. Touch and hold an empty area of the screen.
3. From the **Home screen** window, tap **Apps and widgets ➔ Apps**.
4. Scroll across the pages and in a single motion, touch and hold an application to place a copy on the current screen.

To delete a shortcut:
1. From the Home screen, touch and hold the desired shortcut. This unlocks it from its location on the current screen.
2. Drag the shortcut over the Remove tab ( ) and release it.

**Adding and Removing Primary Shortcuts**

**Note:** You can change any of your primary shortcuts with the exception of the Apps shortcut.

To remove a primary shortcut:
- From the Home screen, touch and hold the primary shortcut you want to replace, then drag it to an empty space on any available screen. The primary shortcuts are now updated to show an empty slot.

To insert a new primary shortcut:
1. From the Home screen, tap (Apps).
2. Locate your desired application, then touch and hold the on-screen icon to position it on a desired screen. For more information, refer to “Managing Shortcuts” on page 44.
3. Locate the screen with the desired shortcut you want to add as the new primary shortcut.
4. Touch and hold the shortcut until it detaches from the screen.
5. In a single motion, touch and hold the new shortcut, then drag it into the empty space within the row of primary shortcuts. The new primary shortcut will now appear on both the Home and Extended screens.

**Adding and Removing Widgets**

Widgets are self-contained applications that can be placed on any screen. Unlike shortcuts, widgets appear as applications.

**To add a Widget:**

1. From the Home screen, tap (Apps) ➔ Widgets tab.
2. Scroll across the Widget pages and locate a desired Widget.
3. Touch and hold an available Widget until it detaches from the screen.
4. While still holding the Widget, scroll left or right across the available screens and let go of the Widget to place it on your current screen.

**To remove a Widget:**

1. Touch and hold a Widget until it unlocks from the current screen.
2. Drag the widget over the Remove tab ( ) and release it.
   - As you place the Widget into the Trash, both items turn red.
   - This action doesn’t delete the Widget, it just removes it from the current screen.
To place a widget onto a different screen:
1. Touch and hold the widget until it becomes transparent.
2. Slowly drag it past the edge of the screen until the adjacent page appears highlighted and it then snaps onto the new page.
3. Drag the widget to its desired position on the new screen.
4. Repeat these steps to continue moving it to other screens.

Managing Wallpapers

Wallpapers consist of either Gallery images (user taken), Live wallpapers (animated backgrounds), or Wallpaper gallery (default phone wallpapers).

Note: Selecting animated Live wallpapers will require additional battery power.

To change the current Home screen wallpaper:
1. Navigate to any screen.
   – or –
   Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the Home screen window tap Set wallpaper → Home screen.
4. Select a Wallpaper type:
   • Tap Gallery to select from a user image stored in the camera image gallery, crop the image, and tap Done.
   • Tap Live wallpapers to select from a list of animated backgrounds, once done tap Set wallpaper.
• Tap **Wallpapers**, scroll through the images, tap a wallpaper image, then tap **Set wallpaper**.

**Note:** Wallpapers supports the following image types: JPEG, PNG, GIF, BMP, and WBMP.

---

**To change Wallpapers from Settings Menu:**

1. From the main **Settings** page, tap **My device** tab ➔ **Display** ➔ **Wallpaper**.
2. Choose from **Home screen**, **Lock screen**, or **Home and lock screens**.

**Note:** The **Home and lock screens** is an additional option that allows you to change both screens at the same time.

3. Select a wallpaper type (**Gallery**, **Live wallpaper**, or **Wallpapers**).
4. Choose an image and tap **Done** or **Set wallpaper**.

**To change the current Lock screen wallpaper:**

1. Navigate to any screen, touch and hold an empty area of the screen, and tap **Set wallpaper** ➔ **Lock screen**.
   – or –
   From the main **Settings** page, tap **My device** tab ➔ **Display** ➔ **Wallpaper** ➔ **Lock screen**.
2. Select a Wallpaper type:
   • Tap **Gallery** to select from a user image stored in the camera image gallery, crop the image, and tap **Done**.
• Tap **Wallpaper**, scroll through the images, tap a wallpaper image, then tap **Set wallpaper**.

**Screen Navigation**

Using the touch screen display and the keys, you can navigate the features of your device and enter characters. The following conventions are used in this manual to describe the navigation action in the procedures.

**Navigating Through the Screens**

The following terms describe the most common hardware and on-screen actions.

- **Press and hold**: Pressing relates to use of the hardware keys and buttons to select or activate an item. For example: press the Navigation key to scroll through a menu. Some buttons and keys require you to press and hold them to activate a feature, for example, you press the Lock key to lock and unlock the device.

- **Tap**: Use a brief touch to select items on the display or to enter text on the virtual QWERTY keyboard. For example: touch an Application icon to open the application. A light touch works best.

- **Touch and hold**: Touch and hold an icon or key to open the available options, or to access a pop-up menu. For example: touch and hold from the Home screen to access a menu of customization options.

- **Flick**: Move your finger in lighter, quicker strokes than swiping. This finger gesture is always used in a vertical motion, such as when flicking through contacts or a message list.
• **Swipe or slide**: Quickly drag your finger vertically or horizontally across the screen. This allows you to move the area of focus or to scroll through a list. For example: slide your finger left or right on the Home screen to scroll among the seven panels.

• **Drag**: Press and hold your finger with some pressure before you start to move it. Do not release your finger until you have reached the target position.

• **Rotate**: Automatically change the screen orientation from portrait to landscape by turning the device sideways. For example: rotate to landscape orientation when entering text, to provide a larger keyboard, or when viewing web content to minimize scrolling.

• **Pinch**: “Pinch” the screen using your thumb and forefinger to zoom out when viewing a picture or a Web page. (Move fingers inward to zoom out.)

• **Spread**: “Spread” the screen using your thumb and forefinger to zoom in when viewing a picture or a Web page. (Move fingers outward to zoom in.)

---

**Note:** These screens can be re-arranged in any desired order. For more information, refer to “Customizing the Screens” on page 41.

---

• **Motion Navigation and Activation**: The device comes equipped with the ability to assign specific functions to certain device actions that are detected by both the accelerometer and gyroscope.
Note: Motion must be enabled for this feature to be active. For more information, refer to “Motion Settings” on page 277.

Using Gestures

By activating the various gesture features within the Motion menu (page 277), you can access a variety of time saving functions.

Caution! Excessive shaking or impact to the device may cause unintended results. To learn how to properly control motions, tap (Apps) ➔ Settings ➔ My device tab ➔ Motion. When tapped, each entry comes with an on-screen tutorial.

To activate motion:

1. From the Home screen, press and then tap Settings ➔ My device tab ➔ Motion.
2. Tap the desired on-screen motion option.

The following is a description some of the most commonly used gestures:

- **Smart alert**: Once enabled, pick up the device to be alerted and notified of you have missed any calls or messages.

- **Turn over to mute/pause**: Once enabled, mute incoming calls and any playing sounds by turning the device display down on a surface. This is the opposite of the Pick up to be Notified Gesture.

- **Learn about motions**: tap an on-screen entry to display a brief tutorial on the use of the selected function.
Menu Navigation

You can tailor the device’s range of functions to fit your needs using both menus and applications. Menus, sub-menus, and features are accessed by scrolling through the available on-screen menus. Your device defaults with seven screens.

Navigating Through the Application Menus

There are three default Application Menu screens available. As you add more applications from the Play Store, more screens are created to house these new apps.

1. From the Home screen, tap (Apps). The first Application Menu screen displays.
   - To close the Applications screen, press (Home).
2. Sweep the screen to access the other menus.
3. Tap any of the on-screen icons to launch the associated application.

Using Sub-Menus

Sub-menus are available from within most screen and applications.

1. Press . A sub-menu displays at the bottom of the screen.
2. Tap an available on-screen option.
Using Context Menus

Context menus (also called pop-up menus) contain options that apply to a specific item on the screen. They function similarly to menu options that appear when you right click your mouse on your desktop computer.

- Touch and hold an item on-screen to open its context menu.
Section 3: Call Functions and Contacts List

This section describes features and functionality associated with making or answering calls, and the Contacts list, which is used to store contact information.

Displaying Your Phone Number

- From the Home screen, press and then tap Settings ➔ (More tab) ➔ About device ➔ Status. Your phone number displays in the My phone number field.

Note: The device’s Settings menu can also be activated by pressing and then tapping (Apps) ➔ (Settings).

Making a Call

You can store phone numbers that are regularly used to the device’s memory. These entries are referred to as the Contacts list.

1. From the Home screen, tap (Phone).
2. Enter the phone number and then tap .
   - If you make a mistake while dialing, tap to clear the last digit. Touch and hold to clear the entire sequence.

Note: If your screen goes black during your interaction with the device (launching Keypad, etc.), you might be accidentally swiping over the front sensors.
Quick Dialing a Number from the Contacts List

1. From the Home screen, tap 📞 (Contacts).
2. Locate a contact from the list.
3. In a single motion, touch and drag your finger over the number by going to the right. This action places a call to the recipient.

Running a Call in the Background

If you exit the current call screen and return to the Home screen, you are visually notified that you are still on an active call by the green phone icon within the Status bar.

This is the best way to stay on your current call and do something else (multi-task) such as access the Contacts list, view a recent email, locate a picture, etc..

Ending a Call

- Briefly tap 📞 key to end the call.

**Note:** To redial a recent number, tap 📞 at the end of the call or locate the number from the Logs list, tap the entry and tap Call.
**Ending a Call from the Status Bar**

1. From an active call, you can launch a separate application or return to the Home screen. The current call is kept active in the background.

2. Tap the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel.

3. Tap End (End) to end the currently active call.

**Making Emergency Calls**

If you do not have service set up the first time you turn on the phone, you can only make an emergency call with the phone; normal cell phone service is not available.

**Making an Emergency Call**

The Emergency calling mode makes redialing an emergency number a 1-tap process. Before you can resume normal calling operations, you should first exit this mode.

1. Swipe the Lock screen to unlock the device.

2. From the Home screen, tap 📞.

3. Enter the emergency number (ex: 911) and then tap 📞.

4. Complete your call. During this type of call, you will have access to the Speaker mode, Keypad, and End Call features.

---

**Note:** This mode can drain your battery power more rapidly than a normal calling mode.

- At the Emergency call back screen, follow the on-screen instructions.
Dialing Options

When you enter numbers on the Keypad, you will see three on-screen options.

From the keypad screen, use one of the following options:

- **Voice Mail** ( ) to access your Voice Mail service.
- **Call** ( ) to call the entered number.
- **Delete** ( ) to delete digits from the current number.

To view additional dialing options:

- Tap ( ):
  - **Send message** to send the current caller a text message while still maintaining the current call active.
  - **Add to contacts** to add the current number to either a new or existing Contacts entry.
  - **Speed dial setting** to access the Speed dialing setting menu where you can assign a speed dial location to a current Contacts entry.
  - **Add 2-sec pause** to insert a two-second pause to enter a 2-second delay within a number string (the phone continues dialing after 2 seconds without any additional keys being pressed).

**Tip:** You can create pauses longer than two seconds by entering multiple 2 second pauses.

- **Add wait** to insert a hard pause within the number string (the phone waits for your input). A wait requires that any consecutive numbers be manually sent by tapping **Yes**.
- **Call settings** to provide you access to the Call settings screen.
Answering a Call

When somebody calls you, the phone rings and displays the incoming call image. The caller's phone number, picture, or name if stored in Contacts List, displays.

- At the incoming call screen:
  - Touch and slide ✆ in any direction to answer the call.
  - Touch and slide 🚫 in any direction to reject the call.
  - Touch and drag the **Reject call with message** tab upward and tap a predefined rejection message or tap **Create new message** to create a new custom outgoing response.

Pressing the Volume down button mutes the ringer.

If the incoming call is from a number stored in your Contacts, the entry’s name is displayed. You may also see the caller’s phone number, if available.
Managing Reject Calls

This feature allows you to categorize both known and unknown callers as rejected contacts. These Contacts are then added to your Rejection list which can be managed for individual entries from within the Contacts list or as a whole from the Call rejection screen.

1. From the main Call settings page, tap Call block.
2. Tap the Block calls field to configure your automatic rejection settings. Rejected calls are routed automatically to your voicemail. Choose from:
   - Off: disables the auto rejection feature.
   - All numbers: enables the features for all known and unknown numbers, including those contacts that are not assigned to the rejection list.
   - Call block list only: automatically rejects all entries assigned to the Reject list.

Adding numbers to the rejection list

Entries can be added to the list via either the Contacts menu or via the Auto reject list menu. The Contacts menu option assigns all numbers for an individual as rejected. The Auto reject list allows to assign individual numbers.

To assign multiple numbers as rejected via Contacts:

1. From the Home screen, tap Contacts.
2. Locate an entry and tap it to open the Contact Overview Screen.
3. Press and then tap Add to reject list. All phone numbers associated with this entry are then added to the reject list.
To assign single number as rejected via Auto reject list:

1. From the main Call settings page, tap Call block ➔ Call block list.
2. Tap + (Create) and either enter the phone number or select a Contact from your Logs or Contacts list.
3. Tap Save to complete the assignment.

International Calls

1. From the Home screen, tap ☎️ and then touch and hold 0 + until the device shows “+” on-screen.
2. Use the on-screen keypad to enter the country code, area code, and phone number.
3. If you make a mistake, tap  once to delete a single digit. – or –
   Touch and hold  to delete all digits.
4. Tap ☎️.

Pause Dialing

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or financial phone numbers.

- 2-Second Pause automatically sends the next set of numbers after a two-second pause. This is indicated in the number string as a comma (,).

1. From the Home screen, tap ☎️ and use the on-screen keypad to enter the phone number.
2. Press  and then tap Add 2-sec pause. This feature adds an automatic two-second pause.
3. Use the keypad to enter the additional numbers that will be dialed automatically after the second pause.

**Tip:** You can create pauses longer than two seconds by entering multiple 2-sec pauses.

4. Tap \[\text{Call}\].

**Wait Dialing**

Inserting a Wait into your dialing sequence means that the phone waits until it hears a dial tone before proceeding with the next sequence of numbers.

- **Wait** sends the next set of numbers only after tapping \[\text{Yes}\]. This is indicated in the number string as a semicolon (;).

**Note:** Do not add multiple Waits (;) to a number string as this will continue to prompt you after each sequence.

1. From the Home screen, tap \[\text{Call}\] and use the on-screen keypad to enter the phone number.

2. Press \[\text{Add wait}\] and then tap **Add wait**. This feature causes the phone to require your acceptance before sending the next set of entered digits.

3. Tap \[\text{Call}\].

4. Once prompted to **Send the following tones?**, tap \[\text{Yes}\] to dial the remaining digits.
Redialing the Last Number

The device stores the numbers of the calls you’ve dialed, received, or missed if the caller is identified.

To recall any of these numbers:

1. From the Home screen, tap .
2. Tap the (Recent tab) to display the list of recent calls.
3. Tap the name/number and tap .

Speed Dialing

Once you have stored phone numbers from your Contacts List, you can set up to 99 speed dial entries (2-100) and then dial them easily whenever you want, simply by touching the associated numeric key.

Note: Speed dial location #1 must be reserved for Voicemail use.

Setting Up Speed Dial Entries

Important! Speed dial location #1 is reserved for Voicemail. No other number can be assigned to this slot.

1. From the Home screen, tap ➔ Keypad (Keypad tab).
2. Press  and then tap Speed dial setting. The Speed dial setting screen displays a virtual list of locations with the numbers 2 through 100.
3. Tap an unassigned number slot. The Select contact screen displays.
4. Tap a contact and select a number to assign it to the speed dial location. The selected contact number/image is displayed in the speed dial number box.

**Changing a Speed Dial Entry Order**

1. From the Home screen, tap 📞 → Keypad tab.
2. Press 🔄 and then tap Speed dial setting.

---

**Important!** The number 1 is reserved for Voicemail and another number cannot be assigned to this slot.

---

3. Press 🔄 and then tap Change order.
4. Tap the current entry then tap the new target speed dial location.

---

**Note:** Tapping 2 existing speed dial locations causes the entries to switch positions.

---

5. Tap Done. to store the change.
6. Press ↵ to return to the previous screen.
Removing a Speed Dial Entry

1. From the Home screen, tap 📞.

2. Press 📞 and then tap **Speed dial setting**.

3. Touch and hold a existing on-screen speed dial location and select **Remove** from the context menu.
   - or –
   Press 📞 and then tap **Remove**.
   Tap an entry and select **x** *(Remove entry)*.
   Select either **Done** (to complete the deletion) or **Cancel** (to exit).

4. Press ↪️ to return to the previous screen.

Making a Call Using Speed Dial

You can assign a short cut number to a phone number in the Contacts List for speed dialing.

1. From the Home screen, tap 📞.

2. Touch and hold a previously created speed dial location (numbers 2-100, or 1 if you are dialing voice mail) until the number begins to dial.

3. If you are not certain of the speed dial location, tap 📞 → 📞 → **Speed dial setting** and tap a speed dial number to view the assigned phone number.
In Call Options

Your phone provides a number of features that are available for use during a call.

Adjusting the Call Volume

During a call, use the Volume keys on the left side of the device, to adjust the earpiece volume.

- During a call, press the **Up** volume key to increase the volume level and the **Down** volume key to decrease the level.

  -- or --

  Adjust the audio by enabling selecting an audio preset. Tap the on-screen **Personalize call sound** button select an equalizer setting for the incoming call.
Enabled/disabled via the Call settings menu (Call settings ➔ Personalize call sound). For more information, refer to “Configuring General Call Settings” on page 258.

– or –

Quickly add more volume to the incoming audio by tapping the on-screen Extra volume button.

From the Home screen, you can also adjust the ring volume using these keys.

**Adjusting Noise Reduction**

During a call it may be necessary to adjust the noise reduction feature. Activating this feature can improve the quality of your conversation by reducing ambient noise.

1. Tap (Noise reduction off) to toggle the status and activate the feature.
2. Tap (Noise reduction on) to toggle the status and deactivate the feature.

**Personalizing the Call Sound Setting**

During a call it may be necessary to adjust the sound of the incoming call by selecting an audio equalizer setting for the current call.

1. Tap (Personalize call sound).
2. Confirm the option is enabled .

---

**Note:** If prompted to enable the feature via the Call settings menu, go to Call settings ➔ Personalize call sound ➔ In-call sound EQ.

Placing a Call on Hold

You can place the current call on hold whenever you want. If your network supports this service, you can also make another call while a call is in progress.

To make a new call while a call is in progress:

1. Enter the new phone number that you wish to dial or look it up in Call history.
2. Once connected, tap Add call to dial the second call.
3. Dial the new phone number and tap .

4. Wait for the second caller to answer the incoming call and tap Merge. The two calls are now joined into a multi-party call and display in the order in which they were called.

Important! Multiple callers can be joined to a single multi-party line. Additional callers participate in a new Multiparty session and are held in conjunction with the previous multiparty call.
Call Waiting

You can answer an incoming call while you have a call in progress, if this service is supported by the network and you have previously set the Call waiting option to **Activate**.

You are notified of an incoming call by a call waiting tone.

**To answer a new call while you have a call in progress:**

1. In a single motion, touch ‼️ ‼️ ‼️ ‼️ ‼️ and slide it in any direction to answer the new incoming call.

**Note:** The new caller appears at the top of the list. The previous caller is placed on hold and appears at the bottom of the list.

2. Tap **Swap** to switch between the two calls. This places the new caller on hold and activates the previous call.
Recent Tab

The Recent tab is a list of the phone numbers (or Contacts entries) for calls you placed, accepted, or missed. The Recent tab makes redialing a number fast and easy. It is continually updated as your device automatically adds new numbers to the beginning of the list and removes the oldest entries from the bottom of the list.

The Notification area of the Home screen (upper left) displays phone notifications, status, or alerts such as:

- Displays when a call is in progress.
- Displays when a call was missed.

Accessing the Recent tab

1. From the Home screen, tap ➔ (Recent tab).
2. Tap an entry to view available options.

Note: The Recent tab only records calls that occur while the phone is turned on. If a call is received while it is turned off, it will not be included in your calling history.
Each entry contains the phone number (if it is available) and Contacts entry name (if the number is in your Contacts).

Indicates all outgoing calls made from your device.

Indicates any received calls that were answered.

Indicates a missed call.

Indicates any received calls that were rejected.

Indicates auto rejected calls.

2. Touch and drag the button (with the number of missed calls on it) anywhere on the screen. The Recent tab is then displayed.
Section 4: Entering Text

This section describes how to select the desired text input method when entering characters into your device. This section also describes the predictive text entry system that reduces the amount of key strokes associated with entering text.

Your device comes equipped with an orientation detector that can tell if the phone is being held in an upright (Portrait) or sideways (Landscape) orientation. This is useful when entering text.

Your device also provides several on-screen keypad text entry options to make the task of text entry that much easier.

Text Input Methods

There are two text input methods available:

- **Google voice typing**: provides a voice to text interface.
- **Samsung keyboard** (default): an on-screen QWERTY keyboard that can be used in both portrait and landscape orientation.
  - Swype is now embedded as part of the Samsung Keyboard called T9 Trace.
- **T9 Trace**: is enabled so as you can enter text as you swipe across the on-screen keyboard. Instead of tapping each key, use your finger to trace over each letter of a word.

The on-screen QWERTY keypad works the same in both portrait and landscape mode.
Selecting the Text Input Method

The Text Input Method can be assigned from within one of two locations:

Settings Menu:

- From the Home screen, press 📚 and then tap **Settings ➔ (My device tab) ➔ Language and input ➔ Default** and select an input method.

Text Input field:

1. From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen to open the Notifications screen.

2. Tap 📚 (Select input method) and select an available input method.

Using the Samsung Keyboard

This QWERTY keyboard can be used to enter text in either a Portrait or landscape orientation. The only difference between the two orientations are the sizes of the keys.

From a screen where you enter text, rotate your phone counterclockwise to a landscape orientation. The on-screen QWERTY keyboard displays.
The Samsung Keyboard

This device has a built-in, QWERTY keypad (portrait mode) or keyboard (landscape mode). Using the QWERTY keypad/keyboard, you can type letter, numbers, punctuation, and other characters.

To use the Samsung keyboard you must first configure the settings to default to the Samsung keyboard.

1. From the Home screen, press \ and then tap Settings ➔ (My device tab) ➔ Language and input ➔ Default ➔ Samsung keyboard.

   – or –

   From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select \ (Select input method) ➔ Samsung keyboard.

2. The virtual keyboard is then assigned to the Samsung keyboard configuration for all subsequent text input.
For detailed information about the Samsung Keyboard settings, see “Samsung Keyboard Settings” on page 272.

For detailed information about using Predictive Text, see “Predictive Text - Advanced Settings” on page 273.

**Entering Text using Different Input Options**

Although the default text input method with the Samsung keyboard is to use the on-screen keys you have other options.

**Note:** To access settings, touch and hold the **Input Methods** button ☢️, then tap ☰️ (Settings) then select it from the available options.
1. From within an active message, tap the text input field to reveal the on-screen keyboard.

2. Tap (Input Methods) to use the default Voice typing input method to convert your spoken words to on-screen text.

– or –

Touch and hold to select from other input methods such as:

- **Handwriting** to launch an on-screen handwriting area that can be used to convert on-screen patterns (text) to text.
- **Clipboard** to launch the device’s clipboard area from where you can select a current clipboard item to place in your current message.
- **Settings** to access the Samsung keyboard settings menu.

### Changing the Text Input Mode in Keyboard

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.

2. With Samsung keyboard as your text entry method, select one of the following text mode options:

- **Abc ABC**: to use alphabetic characters from the on-screen keyboard. In this mode, the text mode button displays 123 Sym.
- **Symbol/Numeric 123 Sym**: to enter numbers by pressing the numbers selecting them on the on-screen keyboard. In this mode, the text mode button displays ABC.

There are up to 3 available pages of numeric symbols available by tapping 1/3.
**Note:** After typing an initial uppercase character, tap 🔌 to toggle capitalization.

- **All lowercase**
  Displays when the next character is entered in lowercase.

- **Initial Uppercase**
  Displays when the first character of each word is entered as uppercase but all subsequent characters are lowercase.

- **All Uppercase**
  Displays when all characters will be entered as uppercase characters.

By default, the first letter of a new entry is capitalized and the following letters are lowercased. After a character is entered, the cursor automatically advances to the next space.
Using ABC Mode in Samsung Keyboard

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.

2. Tap ABC to configure the keyboard for ABC mode. Once in this mode, the text input type shows 123 Sym.

Note: After typing an initial uppercase character, the key changes to and all letters that follow are in lower case.

3. Enter your text using the on-screen keyboard.
   - If you make a mistake, tap to erase a single character. Touch and hold to erase an entire word.

4. Tap (Send) to deliver the message.

Using Symbol/Numeric Mode

Use the Symbol/Numeric Mode to add numbers, symbols, or emoticons. While in this mode, the text mode key displays ABC.

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard. Rotate the phone counterclockwise to a landscape orientation, if desired.

2. Tap 123 Sym to configure the keyboard for Symbol mode. Once in this mode, the text input type shows ABC.

3. Tap a number, symbol, or emoticon character.

4. Tap ABC to return to ABC mode.
To enter symbols:

1. Tap 123 Sym to configure the keyboard for Symbol mode.
2. Tap the appropriate symbol key.
   – or –
   Tap 1/3 button to cycle through additional pages.
   • The first number on this key indicates which page (1, 2, or 3) of additional characters is active.

**Entering Text Using T9 Trace**

T9 Trace allows you to enter a word by sliding your finger or stylus from letter to letter, lifting your finger between words. This input method uses error correcting algorithms and a language model to predict the next word.

**T9 Trace Text Entry Tips**

Use these T9 Trace text entry tips.

• Create a squiggle (like an S shape) to create a double letter (such as pp in apple).
• Touch and hold a key to view the punctuation menu then make a selection.
• Move your finger or stylus over the apostrophe to enter contractions.
• Double-touch on the word you want to change to correct a misspelled word, then touch the delete key to erase one character. Touch and hold the delete key to erase an entire word.
Using the Google Voice Typing

This feature uses Google voice recognition to convert your spoken words into on-screen text.

You can use your voice to enter text using the Google Voice typing feature.

1. From the keyboard, touch the top of the screen and drag it down to display your notification panel.

2. Tap (Select input method) → Google voice typing.

3. At the Listening prompt (Speak now), speak clearly and distinctly into the microphone.
   The text is displayed in the message as you are speaking.

4. Tap (Done) when you are finished.
   – or –
   Tap (Resume) to resume recognition.

Note: The feature works best when you break your message down into smaller segments.

For detailed information about configuring Google Voice typing, For more information, refer to “Configure Google Voice Typing” on page 275.
Using Google Voice Typing

1. From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select (Select input method) → Google voice typing. The virtual keyboard is then removed and all subsequent input to done via the microphone as text to speech.

2. Speak into the device’s microphone and watch your text being entered on-screen.

3. If the text is incorrect, tap DELETE.
Section 5: Contacts

This section explains how to use and manage your Contacts List. You can save phone numbers to your device’s memory.

Accounts

From the Accounts menu you decide if you want applications to synchronize, send, and receive data at any given time, or if you want the applications to synchronize automatically. After determining how you want the accounts to synchronize, indicate which account to synchronize with your Contacts list.

1. Sign in to your Google account.

2. From the Home screen, press and then tap Settings ➔ (Accounts tab) and then navigate to the My accounts area.
   – or –
   From the main Settings page, tap Accounts tab and then navigate to the My accounts area.

Note: The Accounts area lists those accounts that have been added to the device and provides an Add account button to quickly and easily add new ones.
Contacts List

Creating a Contact

The default storage location for saving phone numbers to your Contacts List is your device’s built-in memory.

If existing Google and Corporate email accounts have been synchronized to your phone, these will be made available to your device during the creation of new entries. These new Contacts entries can be assigned or saved to synced accounts such as Device, Google, or Corporate.

Your device automatically sorts the Contacts entries alphabetically. You can create either a **Device**, **Samsung account**, **Google**, or **Microsoft Exchange ActiveSync** contact.

---

**Important!** The Google and Microsoft Exchange ActiveSync account types are only visible after creating an email account of those types on your phone.

---

- **Device** contacts are stored locally on the device.

**Note:** If the device is ever reset to its factory default parameters, contacts stored on the phone can be lost.

---

- **Samsung account** contacts are shared with your existing Samsung account.
- **Google** contacts are shared with your existing Google account and can also be imported to your phone after you have created a Google Mail account.
• **Microsoft Exchange ActiveSync** (also known as Work or Outlook) contacts are those contacts that are intended to be shared with either an Exchange Server or from within Microsoft® Outlook®.

• **Add new account** lets you create a new account type.

**To save a Number from your Contacts:**

1. From the Home screen, tap 📞 (Contacts).

   - **Add shortcut to home**: adds a shortcut to the current Contacts entry to an available screen location.
Contact Entry Options

1. From the Home screen, tap  

2. Tap an entry to reveal the  
   **Contact entry’s Overview Screen**. 
   This screen contains Name, contact numbers, email, and linked contact information. 

3. Press  to reveal the context menu specific to this entry. 

4. Tap an available option. 

**Linking Contact Information**

Most people now maintain multiple email accounts, social networking logins, and other similar account information. For example, a Facebook account login name might differ from a corporate email account login because they are maintained separately and for different groups of people. 

This device can synchronize with multiple accounts. When you synchronize your phone with those accounts, each account creates a separate contact entry in the Contacts list. 

If one of your contacts (Amy Smith) has a regular email account that you maintain in Gmail, but also has a Facebook account under her maiden and married name, as well as a Video! chat account, when you merge those accounts into your Contacts list you can join all of her entries and view the information in one record.
Joining contact information makes sending messages easy. You can select any account email address or information all from one screen, versus searching multiple, individual screens to locate the desired account information.

Next time you synchronize your device with your accounts, any updates contacts make to email account names, email addresses, etc. automatically update in your contacts list.

1. From the Home screen, tap .

2. Tap a contact name (the name you want to link to another entry) to reveal the Contact entry’s Overview Screen.

   **Note:** Typically this is the same contact with a different name or account information.

3. Press and then tap Link contact.

4. Tap the second contact entry (the entry in which to link). The second contact is now linked with the first and the account information is merged into one screen.

   **Note:** The information is still maintained in both entries, but displays in one record for easier viewing when you link the contacts.
Important! It is the first contact image that is displayed for both, and the first contact’s name that is used. For example: If Amy (original entry) is joined with Julie (second entry). Julie seems to disappear and only Amy remains. Tap the Amy entry (showing the Amy image) to view both.

5. Tap the main linked contact to view the contact information you linked. The contacts and information displays with an icon next to the contact name to indicate what type of account information is contained in the entry.

Unlinking a Contact

1. From the Home screen, tap .

2. Tap a contact name (the account name from which you want to unlink an entry). This reveals the details for entry.

Note: Typically this is the same contact with a different name or account information.

3. Tap the link icon within the Connection area.
   – or –
   Press and then tap Separate contact.

4. Tap next to the entry you want to unlink and select OK. The contacts are “unlinked” or separated and no longer display in the merged record screen. Both contacts now go back to being separately displayed.
Marking a Contact as Default

When you use applications such as the Voice Dialer or other messaging type applications, the application needs to know which information is primary (default) in a contact entry list. For example, when you say “Call John Smith”, if you have three phone records for John Smith, the Voice dialer is looking for the “default” number or entry.

The Mark as default option marks one entry in a contact record to use as the default. This comes in handy when you have multiple entries for the same person.

1. From the Home screen, tap .
2. Tap a Contact entry.
3. Press and then tap Mark as default. The Mark as default screen displays radio buttons next to the contact name, phone number, or other contact information.
4. Tap the radio button next to the entry information you want to be the primary information (such as name, phone number, or email) and select Done.

Note: If there are multiple phone numbers assigned to an entry, assigning one as the default will automatically dial that number when the contact is selected for dialing.
Sending a Namecard

A Namecard contains contact information, and can be sent to recipients as a Virtual Business Card (V-card) attachment using Bluetooth, Google Mail, or as a message.

1. From the Home screen, tap  
2. Tap a Contact entry. 
3. Press  and then tap Share namecard via and select a delivery method: Bluetooth, Drive, Email (Exchange or Internet), Gmail, Messages, or Wi-Fi Direct.

The Namecard attaches to the selected message type and is delivered when you send the message.

Note: Email appears as an option only after an Internet or Exchange email account has been created.

Sending All Current Namecards

Rather than selecting once Contact entry at a time, you can send all of your current entries at once.

1. From the Home screen, tap  
2. Press  and then tap Share namecard via. 
3. Tap Select all to place a check mark alongside all currently displayed Contact entries.
4. Tap Done and select a delivery method:
   • Bluetooth to transmit the contacts to another bluetooth-compatible device.
   • Drive to share the contacts via Google Drive.
• **Email** to attach the contact cards to a new outgoing email (Exchange or Internet).

• **Gmail** to attach the contact cards to a new outgoing Internet-based email.

• **Messages** to attach the contact cards to a new outgoing text message.

• **Wi-Fi Direct** to transmit the entries to another Wi-Fi Direct enabled device.

**Sending a namecard using Bluetooth**

You must create a Contact prior to sending a Namecard to a recipient. For more information, refer to “Creating a Contact” on page 87.

1. From the Home screen, tap 📞.
2. Touch and hold the entry to reveal the on-screen context menu.
3. Tap **Share via → Bluetooth**.

**Important!** You must activate Bluetooth to use this feature.

4. Tap the Bluetooth device in which to send this Namecard. Bluetooth forwards the Namecard to the recipient.
Copying Contact Information

Copying Contact Information to the microSD Card

This procedure allows you to copy entry information saved on the phone’s memory, onto the SD Card.

1. From the Home screen, tap 📞.
2. From the Contacts List, press 📞 and then tap Import/Export ➔ Export to USB storage.
3. Tap OK to choose all current phone contact entries.

Synchronizing Contacts

Syncing data from your managed accounts allows you to add and manage a new or existing contact from your online or remote accounts to your phone. Prior to syncing, you must first have an active Google or Microsoft Exchange account with current Contact entries, and be signed into your account via the phone.

With syncing, any Contacts entries (with phone numbers, email addresses, pictures, etc.) are updated and synced with your device.

1. From the Home screen, press 📞 and then tap Settings ➔ (Accounts tab) and then navigate to the My accounts area.
2. Select the email account containing the contacts you wish to synchronize.
3. Tap ❌ within the adjacent account field to reveal the account’s synchronization settings screen.
   • If ❌ appears within the adjacent account field, this indicates a sync error.
4. To synchronize only Contacts, toggle the active state of the **Sync Contacts** field. A green check mark indicates the feature is enabled.

**Note:** The process of updating your Contacts tab can take several minutes. If after 10-20 minutes, your list has not been updated, repeat step 2-3.

5. Your **Contacts** tab then reflects any updated Contact information.

**Note:** Syncing of contacts requires you are logged into your Gmail and Corporate accounts via the device.

**Display Options**

The Display options menu allows you to choose which contacts to display. You can also choose to display only contacts that have phone numbers.

**Note:** Once a display filter has been selected, only those Contact entries are shown until the **All contacts** option is re-selected.

1. From the Home screen, tap ☑️.
2. Press ☐️ and then tap **Contacts to display**. Select any of the following to filter according to the selection:
   - **All contacts** allows you to display all available Contacts.
   - **Device** lists those Contacts currently found only on your device.
• **Samsung account** lists those Contacts currently found and sync’d within the Samsung account.

• **Google** lists those Contacts currently found within the Google account.

• **Microsoft Exchange ActiveSync** lists those Contacts currently found within the Exchange account.

• **Customized list** allows you to enable which account categories are displayed. For example, on Google contacts, you can filter which Contact categories are shown (Friends, Family, etc..)

**Adding more Contacts via Accounts and Sync**

When you synchronize applications such as Facebook, Twitter, MySpace, a corporate email account, or Google, using the Accounts and sync option synchronizes the data from the selected account type with your Contacts list.

1. From the Home screen, press 📡 and then tap **Settings ➔** (Accounts tab) then navigate to the **My accounts** area.

2. Tap **Add account**.

3. Determine which type of account information you want to synchronize with your Contact list. Selections are: **Samsung account**, **Email**, **Google**, **LDAP**, **Microsoft Exchange ActiveSync**, **Server**, **Sync apps with Facebook**, or **Twitter**.

4. Tap an account type to add.

5. Follow the prompts. The selected account type synchronizes with your Contacts list.
6. After synchronizing accounts you may want to link contact information. For more information, refer to “Linking Contact Information” on page 97.

**To add Facebook content to your Contacts list:**

You can now add your Facebook contact information, such as pictures, email, and phone numbers directly to your Contacts list. All of their current contact information is then migrated over to your phone. If a Contacts entry already exists with a slightly different name, separate entries are created and can later be linked (joined) together into a single entry.

---

**Important!** This process not only synchronizes your contact information but also your status, events, and more.

---

1. From the Home screen, tap (Apps) ➔ (Play Store).
2. Search for and select the Facebook app.
3. When you are prompted to download the Facebook application from the Play Store.

Emergency Alert Configuration

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System (CMAS); which may also be known as the Personal Localized Alerting Network (PLAN). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider's coverage area. If you travel outside your provider's coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.

Emergency Alerts allows customers to receive geographically-targeted messages. Alert messages are provided by the US Department of Homeland Security and will alert customers of imminent threats to their safety within their area. There is no charge for receiving an Emergency Alert message.

There are three types of Emergency Alerts:

- Alerts issued by the President
- Alerts involving imminent threats to safety of life
- AMBER Alerts (missing child alert)

Customers may choose not to receive Extreme Alerts, Severe Alerts, and AMBER Alerts.

Important! Alerts issued by the President can not be disabled.

To disable Extreme, Severe, and AMBER Alerts:

1. From the Messages screen, press \textbf{[]} and then tap \textbf{Settings}.
2. Scroll to the bottom and select \textbf{Emergency alerts}. All alerts are enabled by default (check mark showing).
3. Tap on an alert option to disable the alert and remove the check mark.

**Assigning Messages as Spam**

Using Email

Email (or Internet Email) enables you to review and create email using several email services. You can also receive text message alerts when you receive an important email. Your phone’s Email application lets you access and manage multiple email accounts simultaneously in one convenient location.

There are currently three main types of email accounts on your phone: Gmail, Internet-based email, and Microsoft Exchange (Corporate email or Outlook®).
To send and receive email messages through an ISP (Internet Service Provider) account, or if you wish to use your device to access your corporate email through a VPN (Virtual Private Network), you will first need to set up an IMAP or POP account.

- **IMAP** (Internet Message Access Protocol) - This protocol is frequently used in large networks and commercial settings. IMAP4 is the current standard.

- **POP3** (Post Office Protocol) - This protocol is supported by most ISPs (Internet service providers) and common among consumer applications. POP3 is the current standard.

- **Microsoft Exchange ActiveSync** - This protocol is frequently used with a large corporate email server system and provides access to email, contact, and calendar synchronization.

Section 7: Multimedia

This section explains how to use the multimedia features of your device, including the Camera/Camcorder, Music Player, Samsung Link, and how to manage your photos, images and sounds.

You can take photographs and shoot video by using the built-in camera functionality. Your camera produces photos in JPEG format.

**Important!** Do not take photos of people without their permission.
Do not take photos in places where cameras are not allowed.
Do not take photos in places where you may interfere with another person’s privacy.

**Note:** An SD card is no longer needed to take pictures or shoot video since there is already built-in storage.

Assigning the Default Storage Location

**Important!** Too many users can overlook this storage location until something goes wrong. It is recommended that you verify this location or change it before initiating the use of the camera or camcorder features.

1. From the Home screen, tap (Apps) ➔ (Camera).
2. From the viewfinder screen, tap (Settings) ➔ (Settings) ➔ Settings and scroll up to the Storage entry.
3. Tap this entry and select the desired default storage location for newly taken pictures or videos. Choose from: Device or Memory card.

**Note:** It is recommended that you set the option to Memory card.

4. Press 📲 to return to the Home screen.

**Using the Camera**

**Taking Photos**

Taking pictures with your device’s built-in camera is as simple as choosing a subject, pointing the camera, then pressing the camera key.

**Note:** When taking a photo in direct sunlight or in bright conditions, shadows may appear on the photo.

1. From the Home screen, tap 📸 (Camera).
2. Using the device’s main display screen as a viewfinder, adjust the image by aiming the camera at the subject.

**Note:** Use either the Up and Down volume keys or spread/pinch the screen to zoom in or out. For more information, refer to “Navigating Through the Screens” on page 49.

3. If desired, before taking the photo, use the left area of the screen to access various camera options and settings.
4. You can also tap the screen to move the focus to a desired area of interest.

152
5. Press (Camera) until the shutter sounds. (The picture is automatically stored within your designated storage location (page 151). If no microSD is installed, all pictures are stored on the Device.) For more information, refer to “Camera and Camcorder Settings” on page 156.

**Note:** Touch and hold to take a burst shot. These are saved using a fine image quality.
Camera Modes

There are many different camera modes that you can use to help optimize your photos depending on the conditions and your experience.

- From the camera viewfinder, tap the **Mode** button to change the mode to one of the following:
  - **Auto**: Automatically adjusts your camera to optimize color and brightness. This is the default setting.
  - **Beauty face**: Use this to take photos with lightened faces for gentler images.
  - **Sound & shot**: Use this mode to enrich pictures by adding background sounds for a few seconds. The background sound is recorded for up to 9 seconds after taking the photo.
  - **Panorama**: Use this to take wide panoramic photos. Press the Shutter button to take a photo, and then move the camera in any direction. When the blue frame aligns with the preview screen, the camera automatically takes another shot in the panoramic sequence. To stop shooting, press the Shutter button again.
  - **Sports**: Use this to take fast action photos.
  - **Night**: Use this to take photos in low-light conditions, without using the flash. Press the Shutter button to take multiple photos. Photos are automatically merged into a single photo.

- From the front-view camera viewfinder, tap the **Mode** button to change the mode between **Auto** and **Sound & shot**.
Quick Settings

Tap 🔄 at the top of the display to quickly change Camera settings. Not all of the following options are available in both still camera and video camera modes. The available options vary by mode.

Configure Camera settings.

Camera and Camcorder Settings

This section describes the different settings that you can configure on your camera. Not all of the following options are available in both still camera and video camera modes. The available options vary by mode.

1. From the viewfinder, tap (Quick Settings) ➔ (Camera Settings).

2. The follow settings are located under the Camera, Camcorder, and General tabs. The settings that are displayed will depend on what camera mode you are in.

Camera:

- **Photo size**: Select a resolution for photos. Use higher resolution for higher quality. Higher resolution photos take up more memory.
- **Focus mode**: allows you to select the focus mode. Choose from Auto focus or Macro.
- **Metering**: allows you to set how the camera measures or meters the light source: Center-weighted, Matrix, or Spot.
- **ISO**: determines how sensitive the light meter is on your digital camera. Choose from Auto, 100, 200, or 400. Use a lower ISO number to make your camera less sensitive to light, a higher ISO number to take photos with less light, or Auto to let the camera automatically adjust the ISO for each of your shots.

Camcorder:

- **Video size**: Select a resolution for videos. Use higher resolution for higher quality. Higher resolution videos take up more memory.
Settings:

- **Location tag**: attach a GPS location tag to the photo. To improve GPS signals, avoid shooting in locations where the signal may be obstructed, such as between buildings or in low-lying areas, or in poor weather conditions. Your location may appear on your photos when you upload them to the Internet. To avoid this, deactivate the GPS tag setting.

- **Review pics/videos**: set this option if you want to view each picture after you take it. Select a time value.

- **Volume key**: assigns a function to the volume key. Choose from: The zoom key, The camera key, or The record key.

- **Timer**: Use this for delayed-time shots. You can set the timer to Off, 2 sec, 5 sec, or 10 sec.

- **White balance**: Select an appropriate white balance, so images have a true-to-life color range. The settings are designed for specific lighting situations. These settings are similar to the heat range for white-balance exposure in professional cameras.

- **Exposure value**: allows you to adjust the brightness level by moving the slider.

- **Guidelines**: Display viewfinder guides to help composition when selecting subjects.

- **Contextual filename**: allows you to have your location added as part of the file name. You must first activate GPS tag described above.

- **Save as flipped**: Saves the image as a mirrored image.

- **Storage**: Select the memory location for storage.

- **Shutter sound**: Turn the shutter sound on or off.

- **Reset**: Reset the camera settings.
Pictures and Videos Image Viewer Options

After you take a photo or record a video, you can access various options.

Photo viewing options

1. From the Home screen, tap 📦 (Apps) ➔ 📷 (Gallery).
2. Locate your folder and video.
3. Tap 🎥 (Play) to playback your video.
Section 8: Connections

PC Connections

You can connect your device to a PC using an optional PC data cable using various USB connection modes.

Media device (MTP): allows you to transfer media files in Windows, or using an Android file transfer on a Mac.

Camera (PTP): allows you to transfer photos using the camera software, and transfer any files onto a PC that does not support MTP.

Note: To sync your device to your computer it is highly recommended that you install Samsung Kies which is available at http://www.samsung.com/kies (for Windows/Mac).

Note: If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer. Also, ensure that you have Samsung Kies 2.0 or Windows Media Player 10 or higher installed on your computer.
**Connecting as a Storage Device**

You can connect your device to a PC as a removable disk and access the file directory. If you insert a memory card in the device, you can also access the files directory from the memory card by using the device as a memory card reader.

---

**Note:** The file directory of the memory card displays as a removable disk, separate from the internal memory.

---

1. Connect the USB cable to the device and connect the cable to the computer. After a few seconds, a pop-up window displays on the PC when connected.
2. Open the folder to view files.
3. Copy files from the PC to the memory card.
Section 9: Applications and Development

This section contains a description of each application that is available in the Applications Menu, its function, and how to navigate through that particular application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided.

Note: This manual only addresses applications that have been loaded on your [device/computer/tablet] as of the date of purchase. Information concerning third party applications that you may choose to download from the Google Play Store or otherwise should be obtained from the application provider directly.

Tip: To open applications quickly, add the icons of frequently used applications to one of the Home screens. For more information, refer to “Customizing the Screens” on page 41. You can also add an application icon as a Primary Shortcut that will display on all Home screens. If you add an application as a primary shortcut, the application icon will not be displayed in the Applications menu.
Applications

Gmail

Google Mail (Gmail) is a web-based email service. Gmail is configured when you first set up your device. Depending on your synchronization settings, Gmail can automatically synchronize with your Gmail account on the Web.

- From the Home screen, tap 👃 (Apps) ➔ 📧 (Gmail).

Creating a New Google Account

You should create a Google™ Account when you first use your device in order to fully utilize the functionality. This account provides access to several device features such as Gmail™, Hangouts™, and the Google Play Store™ applications. Before you are able to access Google applications, you must enter your account information. These applications sync between your device and your online Google account.

Signing into Your Google Account

1. Launch an application that requires a Google account (such as Play Store or Gmail).
2. Click Existing.
3. Tap the Email and Password fields and enter your information.
4. Tap ➔ (Sign in). Your device communicates with the Google servers to confirm your information.
5. If prompted, you can enable the option to stay up to date on news and offers, then tap OK.
**Opening Gmail**

1. From the Home screen, tap 📱 (Apps) ➔ 📧 (Gmail).
2. Tap an existing email message.

**Google**

Use Google Search to search the Web. Google Now® (a part of the Google application) recognizes a user’s repeated actions performed on the device (including access of common locations, repeated calendar appointments, search queries, etc.). This information is then used to display more relevant information to the user in the form of “cards”. These scrollable on-screen cards are displayed when the Google Now application is launched.

These cards are not manually added. The service uses your GPS, Google Search, and usage information to generate these cards automatically.

- From the Home screen, tap 📱 (Apps) ➔ ☰ (Google) and enter the search text.
  - or –
  Tap 🎤 on the Google Search bar and say the search information.

**To initially set up Google Now:**

1. Press and hold 🍎 (Home) and then tap Google.
  - or –
  From the Home screen, tap 📱 (Apps) ➔ ☰ (Google).

2. Follow the on-screen instructions to review the available information.
3. When prompted, agree to launch the application. Some initial on-screen “cards” are shown. A default is the Weather card that provides updated weather information in your area.

To configure the Google Now settings:

1. From the Home screen, tap (Apps) → (Google).
2. Press and select Settings.
3. Access each desired Settings page and configure it as desired.

When these condition are met, new card information will begin to appear in the Google Now list of cards.

Note: Google Now will recognize searches and display them on your device, even if that search took place on your home computer or on another device. These searches are linked into your Google Account.

Google Settings

As Google has become more intertwined with other applications, this menu provides a quick and ready access point to configure preferences for Google+, Maps, etc.. You can also use the Search function to initiate a Google Search from this menu.

1. From the Home screen, tap (Apps) → (Google Settings) and select an on-screen option.
2. Select one of the available on-screen options.
3. Follow the on-screen prompts.
Google +

Google+ makes messaging and sharing with your friends a lot easier. You can set up Circles of friends, visit the Stream to get updates from your Circles, use Messenger for fast messaging with everyone in your Circles, or use Instant Upload to automatically upload videos and photos to your own private album on Google+.

1. Sign on to your Google account. For more information, refer to “Creating a Samsung Account” on page 280.
2. From the Home screen, tap Apps ➔ Google+.
3. Select the account you want to use to sign in to Google+.
   – or –
   Tap Add account to create another account.
4. Follow the on-screen instructions to use Google+.

Google+ instant upload may resize your images in order to reduce size.

Hangouts

Previously known as Google Talk™, is an updated place to hangout, share photos, and even video calls. This is a free web-based application for instant messaging offered by Google. Conversation logs are automatically saved to a Chats area in your Gmail account. This allows you to search a chat log and store them in your Gmail accounts.

Note: Before using this application, you must first have an active Gmail account available and be currently logged in.
1. From the Home screen, tap ☰ (Apps) ➔ 📮 (Hangouts).

**Note:** Make sure you are logged into your Google account.

2. When prompted, read the on-screen information and confirm your phone number is correct before using the application. Tap Confirm.

**Note:** Confirming your phone number does not make it publicly available.

**Maps**

Google Maps allow you to track your current location, view real-time traffic issues, and view detailed destination directions. There is also a search tool included to help you locate places of interest or a specific address. You can view locations on a vector or aerial map, or you can view locations at the street level.

---

**Important!** Before using Google Maps you must have an active data (3G) or Wi-Fi connection. The Maps application does not cover every country or city.

---

**Important!** For best results, it is recommended that you enable all of your location services. For more information, refer to “Location Services” on page 283.
Enabling a Location source

Before you use Google Maps and find your location or search for places of interest, you must enable a location source. To enable the location source you must enable the wireless network, or enable the GPS satellites.

Important! The more location determining functions are enabled, the more accurate the determination will be of your position.

1. From the main Settings page, tap More tab → Location services.
2. Tap Access to my location to enable sharing your location with requesting applications.
3. Tap Use GPS satellites to enable the GPS satellite.
4. Tap Use wireless networks to allow apps to use data from sources such as Wi-Fi and mobile networks to provide a better approximation of your current location.
5. Tap My places to enable the storage of your favorite locations.

To receive better GPS signals, avoid using your device in the following conditions:

• inside a building or between buildings
• in a tunnel or underground passage
• in poor weather
• around high-voltage or electromagnetic fields
• in a vehicle with tinted windows
Opening Maps
1. From the Home screen, tap (Apps) ➔ (Maps).
2. Tap Accept & continue from within the Welcome page.
3. Tap the bottom-right My location button to find your location on the map with a blinking blue dot.

• **Share via**: allows you to share your memo (Text file (.vnt) or Memo file (.snb), via Bluetooth, Drive, Email, Gmail, Messages or Wi-Fi Direct.

6. When you are finished creating your memo, tap **Save** on the top menu bar.

**Messages**

This application allows you to use the Short Message Service (SMS) to send and receive short text messages to and from other mobile phones.

You can also use the Multi Media Service (MMS) to create multimedia messages to send and receive from other mobile phones.

- From the Home screen, tap (Apps) → (Messages).
Music

The Music player is an application that can play music files. The music player supports files with extensions AAC, AAC+, eAAC+, MP3, WMA, 3GP, MP4, and M4A. Launching the Music Player allows you to navigate through your music library, play songs, and create playlists (music files bigger than 300 KB are displayed).

Playing Music

1. From the Home screen, tap Apps (Apps) → Music (Music).
2. Tap a library category tab to select the music category: Songs, Playlists, Albums, Artists, or Folders.
3. Scroll through the list and tap an entry to begin playback.
4. Use any of the following Music player controls:

- **Pause** the song.
- **Start** the song after pausing.
- **Press and hold** to rewind the song. Tap to go to previous song.
- **Press and hold** to fast-forward the song. Tap to go to next song.
- **Volume control and SoundAlive**.

Wi-Fi Settings

About Wi-Fi

Wi-Fi (short for "wireless fidelity") is a term used for certain types of Wireless Local Area Networks (WLAN). Wi-Fi communication requires access to an existing and accessible Wireless Access Point (WAP). These WAPs can either be Open (unsecured) as within most Hot Spots, or Secured (requiring knowledge of the Router name and password).

Note: After you complete a connection to an active Wi-Fi network, the Wi-Fi Calling feature will automatically be enabled.

Activating Wi-Fi

By default, your device’s Wi-Fi feature is turned off (deactivated). Activating Wi-Fi allows your device to discover and connect to compatible in-range WAPs (Wireless Access Points).

1. From the Home screen, press ☰ and then tap Settings ➔ (Connections tab).

2. In a single motion touch and slide the Wi-Fi slider to the right to turn it on . The device scans for available in-range wireless networks and displays them under Wi-Fi networks on the same screen.

Connecting to a Wi-Fi Network

1. From the main Settings page, tap Connections tab ➔ Wi-Fi. The network names and security settings (Open network or Secured with WEP) of detected Wi-Fi networks display in the Wi-Fi networks section.
2. Tap the network you wish to connect to.

**Note:** When you select an open network you are automatically connected.

3. Enter a wireless password (if necessary).
4. Tap **Connect**.

**Wi-Fi Status Indicators**

The following icons indicate the Wi-Fi connection status:

- ![Wi-Fi Connected](image.png) Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).
- ![Wi-Fi Active](image.png) Displays when Wi-Fi is active and there is an available open wireless network.
- ![Wi-Fi Direct](image.png) Displays when Wi-Fi Direct is active and communicating.

**Manually Adding a Wi-Fi Network**

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi** ➔ **Add Wi-Fi network**.
2. Enter the Network SSID (the name of your Wireless Access Point).
3. Tap the **Security** field and select a security option. This must match the current security setting on your target WAP (Wireless Access Point).
4. Enter your WAP’s password if the WAP is secure.
5. Tap **Connect** to store the new information and connect to the target WAP.

**Note:** An SSID is a unique key which identifies a wireless LAN. Its purpose is to stop other wireless equipment from accessing your LAN - whether accidentally or intentionally. To communicate, wireless devices must be configured with the same SSID.

---

**Deactivating Wi-Fi**

1. From the Home screen, press and then tap **Settings ➔ Connections** tab.

2. In a single motion touch and slide the **Wi-Fi** slider to the left to turn it off.
   – or –
   Activate and Deactivate Wi-Fi from the Notification bar.

**Note:** Use of wireless data connections such as Wi-Fi and Bluetooth can reduce battery life and use times.

---

**Manually Scan for a Wi-Fi Network**

1. From the Home screen, press and then tap **Settings ➔ Connections** tab ➔ **Wi-Fi**.

2. In a single motion touch and slide the **Wi-Fi** slider to the right to turn it on.

3. Tap **Scan**.
**Wi-Fi Advanced Settings**

The Wi-Fi settings - Advanced menu allows you to set up many of the device’s Wi-Fi services, including:

- Setting the Wi-Fi sleep policy
- Check for Internet service
- Viewing the device’s MAC Address
- Configuring use of either a DHCP or Static IP

To access the Wi-Fi Advanced Settings menu:

1. From the Home screen, press and then tap **Settings** ➔ **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.

**Wi-Fi Notification**

By default, when Wi-Fi is on, you receive notifications in the Status bar anytime your phone detects an available Wi-Fi network. You can deactivate this feature if you do not want to receive notifications.

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Tap **Wi-Fi notification**. A check mark displayed next to the feature indicates Network notification is active.
4. Tap **Wi-Fi notification** again to remove the check mark and deactivate this feature.

**Sorting your Wi-Fi Entry List**

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Tap the **Sort by** field and select either **Alphabet** or **Signal strength**.

**Wi-Fi During Sleep**

By default, when your device enters a sleep mode, your Wi-Fi connection stays on all the time. If the feature is never enabled during sleep that current data usage is taken over by your SIM and its network connection.

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press `>` and then tap **Advanced** ➔ **Keep Wi-Fi on during sleep**.
3. Select an available option:
   - **Always**: maintains your current active Wi-Fi connection even during sleep.
   - **Only when plugged in**: maintains the active Wi-Fi connection only when the device detects it is connected to a power supply. This reduces the drain on your device’s battery.
   - **Never (increase data usage)**: shuts off the current Wi-Fi connection during sleep and diverts any current data usage to the cellular network connection.

**Allow scanning**

Allows the Google location service and other apps to scan for networks, even when Wi-Fi is turned off.

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press `>` and then tap **Advanced**.
3. Tap the **Always allow scanning** field to activate or deconstruct the feature.
**Auto Network selection**

Allows the device to automatically switch between Wi-Fi network or cellular network.

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Tap the **Auto network switch** field to activate the feature that would allow the device to connect to the best available signal connection.

**Wi-Fi timer**

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Move the **Wi-Fi timer** slider to activate the feature.
4. Tap the field to access the configuration page where you can set the start and end connection times. Tap **Done** to store the new parameters.

**Install certificates**

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Tap **Install certificates** and follow the on-screen instructions.

**Finding your WI-Fi Address Information**

1. From the main **Settings** page, tap **Connections** tab ➔ **Wi-Fi**.
2. Press and then tap **Advanced**.
3. Locate the MAC Address and IP Address information at the bottom of the screen.
• **MAC address**: view your device’s MAC address, required when connecting to some secured networks (not configurable).

• **IP address**: view your device’s IP address.

**Manage networks**

Allows you to manage previous connected Access Points.

1. From the main Settings page, tap Connections tab ➔ Wi-Fi.
2. Press and then tap Manage networks.
3. Follow the on-screen prompts.

**WPS Push Button**

The WPS (Wi-Fi Protected Setup) feature (sometimes associated with a physical or on-screen button on most WAPs) allows you to pair your device and WAP without the need for entering a passcode. This process is similar to Wi-Fi Direct pairing.

In this case, once the WPS feature is active on your WAP, your device can then detect it and then immediately pair to it.

**Note:** WPS-capable routers appear in the Wi-Fi list of available devices with the term *(WPS available)* below their name.

To pair your device using WPS:

1. Follow the WPS activation instructions specific to your Wireless Access Point.
2. From the main Settings page, tap Connections tab ➔ Wi-Fi.
3. Press and then tap WPS push button.
4. Once the connection is complete, confirm the external router now appears in the Wi-Fi list as connected.
**WPS PIN Entry**

If a WPS Push Button does not work, there is an alternative WPS connection method where you would use a device generated PIN number to establish the connection. This number is then entered into your WAP’s WPS client PIN field to complete the connection.

**To pair your device using WPS PIN:**

1. From the main **Settings** page, tap **Connections** tab → **Wi-Fi**.
2. Press 🔄 then tap **WPS PIN entry**.
3. Write down the generate PIN number and enter it into your Wi-Fi Router’s client PIN field.
4. Once the connection is complete, confirm the external router now appears in the Wi-Fi list as connected.

**Wi-Fi Direct Setup and Settings**

You can configure your device to connect directly with other Wi-Fi capable devices. This is an easy way to transfer data between devices. These devices must be enabled for Wi-Fi direct communication. This connection is direct and not via a Hotspot or WAP.

Displays when Wi-Fi Direct is active and communicating

**Note:** Activating this feature will disconnect your current Wi-Fi network connection.
To activate your connection:

1. From the main **Settings** page, tap **Connections** tab.

2. In a single motion touch and slide the **Wi-Fi** slider to the right to turn it on. The slider color indicates the activation status.

3. Tap **Wi-Fi Direct**.

4. Tap **Scan** and select the single device name to begin the connection process to another Wi-Fi Direct compatible device.  
   – or –
   
   Tap **Multi connect ➔ Scan** and select all the device names to begin the connection process to these Wi-Fi Direct compatible devices.

---

**Note:** The target device must also have Wi-Fi Direct service active and running before it can be detected by your device.

---

5. Tap **Done**. The direct connection is then established. Confirm 📣 appears in the Status bar.

6. When prompted to complete the connection, the recipient should tap **OK**. Your status field now reads “Connected” and your connected device is listed within the Wi-Fi Direct devices listing.
Bluetooth settings

In this menu you can activate Bluetooth, view or assign a device name, activate your phone so other Bluetooth devices can discover it, or scan for other, available Bluetooth devices with which to pair.

About Bluetooth

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, printers, and wireless devices. The Bluetooth communication range is usually up to approximately 30 feet.

Turning Bluetooth On and Off

To turn Bluetooth on:

1. From the Home screen, press and then tap Settings ➔ (Connections tab).

2. In a single motion touch and slide the Bluetooth slider to the right to turn it on.

   The slider color indicates the activation status. When active, displays in the Status area.

To turn Bluetooth off:

1. From the Home screen, press and then tap Settings.

2. In a single motion touch and slide the Bluetooth slider to the left to turn it off.

Note: Bluetooth must be enabled prior to use.
Bluetooth Status Indicators

The following icons show your Bluetooth connection status at a glance:

- Displays when Bluetooth is active.
- Displays when Bluetooth is connected (paired) and communicating.

Bluetooth Settings

The Bluetooth settings menu allows you to set up many of the characteristics of your device’s Bluetooth service, including:

- Entering or changing the name your device uses for Bluetooth communication and description
- Setting your device’s visibility (or “discoverability”) for other Bluetooth devices
- Displaying your device’s Bluetooth address

Changing the Device Name

1. From the Home screen, press 📱 and then tap Settings → (More tab) → About device.
2. Tap the Device name field and use the on-screen keyboard to edit the current device name.
3. Tap 🗑️ to erase the current device name and enter a new name for this device using the keyboard.
4. Tap OK to confirm your setting.
Activating Visibility

1. From the main **Settings** page, tap **Connections** tab ➔ **Bluetooth**.
2. Verify your Bluetooth is active.
3. From the top of the Bluetooth settings page, toggle the state of the visibility check mark. Activating this feature enables your device visible allows other devices to pair and communicate.

**Note:** Your device visibility is based on the time set within the Visible timeout field (2 minutes, 5 minutes, 1 Hour, or Never timeout). Press 📡 (Menu) ➔ **Visibility timeout**. This value appears as a countdown within this **Visibility timeout** field.

Scanning for Devices

This option allows you to scan for active Bluetooth devices so you can pair with them.

1. From the main **Settings** page, tap **Connections** tab ➔ **Bluetooth**.
2. From the bottom of the Bluetooth settings page, tap **Scan** to search for visible external Bluetooth-compatible devices such as headsets, devices, printers, and computers.

**Important!** Some Bluetooth devices are secured and require a PIN number to confirm and pair with them.

3. Enter a PIN to pair with the device, if one is required, and tap **OK**.
**Review Received Files**

1. From the main Settings page, tap Connections tab ➔ Bluetooth.
2. Verify Bluetooth is active.
3. From the Bluetooth settings page, press and then tap Received files.

**Pairing Bluetooth Devices**

The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device. When you pair devices, they share a passkey, allowing for fast, secure connections while bypassing the discovery and authentication process.

---

**Note:** Pairing between two Bluetooth devices is a one-time process. Once pairing is established the devices continue to recognize their partnership and exchange information without entering a passcode.

---

**To pair your device with another Bluetooth device:**

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap the Visibility field (shown by the device name).
   
   Your device must be visible to successfully pair with an external device. This is shown by a green check mark.
3. Tap Scan. Your device displays a list of discovered in-range Bluetooth devices.
4. Tap a device from the list to initiate pairing.
5. Enter the passkey or PIN code, if needed, and tap OK.
6. The external device must accept the connection and enter your device’s PIN code.
   Once successfully paired to an external device, the Bluetooth symbol (bluetooth) displays in the Status area.

**Note:** Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.

**Important!** If callers can not hear you during a call while using a paired Bluetooth headset (with built-in microphone), verify the **Call audio** option is enabled within the entry’s Bluetooth Settings page.

**Configuring Bluetooth Device Settings**

Some connected Bluetooth devices are capable of more than just functioning as a headphone, but also have built-in microphones for picking up voice. Although both functions are detected by the device and activated, there might be times when you need to change or update these settings for Phone and Media Audio:

- I can hear the other person but they can’t hear me...
- I want to use my Bluetooth device only as a headphone

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap **Settings**.
3. Toggle the **Call audio** field to activate/de-activate the Bluetooth device’s on-board microphone.
4. **Toggle the Media audio** field to activate/de-activate the Bluetooth device’s headset functions.

**Note:** If callers can not hear you during a call while using a paired Bluetooth headset (with built-in microphone), verify the **Call audio** option is enabled within the entry’s Bluetooth Settings page.

---

**Disconnecting a Paired Bluetooth Device**

Disconnecting a paired device breaks the connection between the device and your phone, but retains the knowledge of the pairing. At a later point when you wish to reconnect the device, there is no need to setup the connection information again.

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, tap the previously paired device (from the bottom of the page).
3. Tap **OK** to confirm disconnection.

**Note:** Disconnections are manually done but often occur automatically if the paired device goes out of range of your phone or it is powered off.
Deleting a Paired Bluetooth Device

Deleting a device from your list removes its “connection record” and upon reconnection would require that you re-enter all the previous pairing information.

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap Settings ➔ Unpair to delete the paired device.

Sending Contacts via Bluetooth

Depending on your paired devices’ settings and capabilities, you may be able to send pictures, Contact information, or other items using a Bluetooth connection.

Note: Prior to using this feature, Bluetooth must first be enabled on both your phone and the external device, and the recipient’s device must be visible.

1. Verify your Bluetooth is active and your phone is visible.
2. From the Home screen, tap Contacts.
3. Touch and hold the entry from the list to display the on-screen context menu.
4. Tap Share via ➔ Bluetooth and select a paired external Bluetooth device.

Note: The external Bluetooth device must be visible and communicating for the pairing to be successful.

5. A Bluetooth share notification displays in your notifications list.
Data Usage

Monitor and manage your device’s data usage capabilities.
Features include activation/deactivation or network data usage, set mobile data usage for a set period of time, and view application data usage.

- From the Home screen, press ☰ and then tap Settings ➔ (Connections tab) ➔ Data usage.

To activate/deactivate Mobile data usage:

1. From the main Settings page, tap Connections tab ➔ Data usage.
2. Tap the Mobile data field to activate the feature. A green check mark indicates the feature is active.
3. Tap the Mobile data field again to deactivate the feature.

To set a data usage cycle range:

1. From the main Settings page, tap Connections tab ➔ Data usage.
2. Touch and drag the bottom grey vertical lines to adjust the time frames.
3. Press ☰ and then select from the available on-screen options:
   - **Restrict background data** prevents background data usage. This can help prevent over usage of your data minutes.
   - **Auto sync data** allows the device to automatically sync information and updates with your various services.
   - **Show Wi-Fi usage** activates an additional Wi-Fi tab that shows you your Wi-Fi data usage.
More Networks

This tab displays additional wireless and network information.

- From the Home screen, press and then tap Settings ➔ (Connections tab) ➔ More networks.

Airplane Mode

This mode allows you to use many of your device’s features, such as Camera, Games, and more, when you are in an airplane or in any other area where making or receiving calls or data is prohibited.

**Important!** When your device is in Airplane mode, it cannot send or receive any calls or access online information or applications.

1. From the main Settings page, tap Connections tab ➔ More networks.

2. Tap Airplane mode. A check mark displayed next to the feature indicates Airplane mode is active. The Airplane mode icon 🛫 is displayed at the top of your screen.
Mobile networks

Before you use applications such as Google Maps and find your location or search for places of interest, you must enable the Mobile networks options.

- From the main Settings page, tap Connections tab ➔ More networks ➔ Mobile networks.

The following options display:

Use mobile data

Allows you to activate mobile data usage on your device.

- From the main Settings page, tap Connections tab ➔ More networks ➔ Mobile networks ➔ Mobile data.

Setting Global Data Roaming

Allows you to assign your Global Data Roaming parameters.

1. From the main Settings page, tap Connections tab ➔ More networks ➔ Mobile networks ➔ Global Data Roaming Access.

Roaming Status and Signal Strength

1. From the main Settings page, tap Connections tab ➔ More networks ➔ Mobile networks.

2. Review the on-screen information to determine your roaming status and signal strength information.
**VPN settings**

The VPN settings menu allows you to set up and manage Virtual Private Networks (VPNs).

---

**Note:** Before using VPN, you must first set up a screen unlock PIN or password. For more information, refer to “Security” on page 285.

---

**Adding a VPN**

Before you add a VPN you must determine which VPN protocol to use: PPTP, L2TP/IPSec PSK, L2TP/IPSec RSA, IPSec Xauth PSK, IPSec Xauth RSA, IPSec Hybrid RSA.

---

**Important!** Before you can use a VPN you must establish and configure one.

---

1. From the main **Settings** page, tap **Connections** tab ➔ **More networks ➔ VPN**.
2. If prompted, read the screen lock information and follow the on-screen steps to setup an unlock PIN or password.
3. Tap ✪ **(Tap to add VPNs)**.
4. In the form that appears, fill in the information provided by your network administrator.
5. Tap **Save**.

---

**Note:** Similar setup process can be used for all available VPN types.
Connecting to a VPN

1. From the main Settings page, tap Connections tab ➔ More networks ➔ VPN.
2. Tap the VPN entry you want to connect to.
3. Enter any requested credentials into the pop-up that opens.
4. Tap Connect.

Edit a VPN

1. From the main Settings page, tap Connections tab ➔ More networks ➔ VPN.
2. Touch and hold the VPN that you want to edit.
3. In the pop-up that opens, select Edit network.
4. Make the desired VPN setting changes.
5. Tap Save.

Delete a VPN

1. From the main Settings page, tap Connections tab ➔ More networks ➔ VPN.
2. Touch and hold the VPN that you want to delete.
3. Tap Delete network within the pop-up that opens up.
Lock Screen

This menu contains features that allows you to configure the device’s security parameters.

Screen Unlock Pattern Overview

To secure data and limit phone access, set the phone to require a screen unlock pattern each time you turn on the device, or every time the phone wakes up from sleep mode (when the screen automatically turns off).

- From the Home screen, press and then tap Settings ➔ (My device tab) ➔ Lock screen ➔ Screen lock.

The Screen lock menu allows to choose from a variety of locking features such as:

- **Swipe**: Swipe the screen to unlock it.
- **Pattern**: A screen unlock pattern is a touch gesture you create and use to unlock your device. Follow the prompts to create or change your screen unlock pattern.
- **PIN**: Select a PIN to use for unlocking the screen.
- **Password**: Create a password for unlocking the screen.
- **None**: No pattern, PIN, or password is required. The screen will never lock.

Using Swipe

This feature is the least secure locking method and only requires that a user swipe the screen to unlock the device.

1. From the main Settings page, tap My device tab ➔ Lock screen.
2. Tap Screen lock ➔ Swipe.
**Swipe options**

1. From the main **Settings** page, tap **My device** tab → **Lock screen**.

2. Configure one of the following options.
   - **Shortcuts** sets shortcuts to appear at the bottom of the Lock screen. Touch and slide the slider to the right to turn it on.
   - **Unlock effect** sets the effect you receive when unlocking the phone. You can select None, Ripple effect, or Light effect.
   - **Help text** shows help information on the Lock screen.

**Setting an Unlock Pattern**

Creating a screen unlock pattern increases security on the phone. When you enable the User visible pattern field, you will draw an unlock pattern on the screen whenever you want to unlock the phone’s buttons or touch screen. When you activate the User tactile feedback field, you feel vibration as feedback while drawing the pattern.

The feature is now paired with a backup PIN code that acts as a backup to the pattern lock. If you forget your pattern, you can regain access to the device by entering a PIN code.

---

**Note:** Make sure the Require Pattern field is activated.

1. From the main **Settings** page, tap **My device** tab → **Lock screen**.

2. Tap **Screen lock** → **Pattern**.
3. Draw your pattern by touching your first on-screen point. Then, without removing your finger from the screen, drag your finger over adjacent points until the gray trace line overlaps each point and they are highlighted with a green circle.

4. When you have connected at least four dots in a vertical, horizontal or diagonal direction, lift your finger from the screen and tap Continue.

5. Confirm the new pattern by redrawing it and then tapping Confirm. The Unlock pattern is set.

6. Enter the backup PIN code and tap Continue.

7. Reenter the PIN to reconfirm the previous entry and tap OK.

**Changing the Screen Lock Pattern**

This feature allows you to change the previously stored unlock pattern and update it if necessary. This process is similar to changing your password from time to time.

1. From the main Settings page, tap My device tab ➔ Lock screen.

2. Tap Screen lock.

3. Retrace your current pattern on the screen.

4. Tap Pattern and repeat steps 3 - 7 from the previous section.

**Deleting the Screen Lock Pattern**

1. From the main Settings page, tap My device tab ➔ Lock screen.

2. Tap Screen lock.

3. Retrace your current pattern on the screen.
4. Tap None.

**Pattern options**

Once an unlock pattern is enabled, additional options are available:

- **Make pattern visible** allows you to see the pattern as you draw it.
- **Lock automatically** allows you to set a time-out for lock screen.
- **Lock instantly with power key** allows you to lock the screen by pressing .

**What If I Forget my Pattern?**

If you forget your device’s lock pattern, you can unlock your device or reset it using your Google™ Account credentials. When you enter the wrong unlock pattern too many times, you should see an option at the bottom of the screen that says *Forgot pattern?* Follow these steps to use either your PIN or email address.

**Important!** You can only enter an incorrect lock pattern 5 times before the device is locked.

**Important!** If you are unsuccessful in retrieving your lock pattern or unlocking your device, please contact customer service for assistance.

**To unlock your device with a PIN code:**

1. Tap **Backup PIN** (located at the bottom of the screen).
2. Tap **Done**.
3. If you have forgotten your current pattern, tap Pattern from the Screen unlock settings menu and follow the procedures outlined in "Setting an Unlock Pattern" on page 247 to create a new pattern.

To unlock your device using your Google account:
1. Tap Forgot pattern? (located at the bottom of the screen).
2. Tap the Username (email) and Password fields, use the on-screen keyboard to enter your Google Account credentials, and tap Sign in to complete the login process.
3. If you have forgotten your Google Account credentials, visit the Google website to recover them. If you still cannot get your Google Account credentials, contact your wireless carrier for additional options.

PIN Lock and Unlock
1. From the main Settings page, tap My device tab ➔ Lock screen.
2. Tap Screen lock ➔ PIN.
3. Enter a PIN number using the numeric keypad and touch Continue to confirm the password.
4. Confirm the PIN by re-entering it and tap OK to confirm. Your phone now requires you to enter this PIN number in order to unlock the phone.
Password Lock and Unlock

1. From the main Settings page, tap My device tab → Lock screen.
2. Tap Screen lock.
3. Tap Password.
4. Enter a password using the keypad and tap Continue to confirm the password.
5. Confirm the password by re-entering it and tap OK to confirm.

Customizing Your Lock Screen Shortcuts

Your device also provides up to 4 application shortcuts that can be used to quickly access an application right from the lock screen.

Important! To use these shortcuts, your Screen Lock feature can only be set to either Swipe or None.

To open a shortcut from the lock screen:

- In a single motion, swipe your finger over the on-screen icon and towards the top of your device. Your device will unlock and you will be taken immediately to the application.

To edit these Lock screen shortcuts:

1. From the main Settings page, tap My device tab → Lock screen → Shortcuts.
2. In a single motion touch and slide the Shortcuts slider to the right to turn it on.
3. Tap the Shortcuts field to activate the menu.
4. Tap a shortcut icon you wish to replace.
5. From the select application menu, tap a replacement application.

**Display Settings**

In this menu, you can change various settings for the display such as the wallpaper, brightness, orientation, and screen timeout, and power saving mode.

**Adjusting the Screen Display**

1. From the Home screen, press \[ Menu \] and then tap **Settings** \(\rightarrow\) (My device tab) \(\rightarrow\) **Display**.

2. Configure the following screen display settings:
   - **Wallpaper**: allows you to set the Wallpaper for your Home screen, Lock screen, or both.
   - **Notification panel**: allows you to set the brightness of your notification panel and also select the quick setting buttons that you want to display at the top of the notification panel.
   - **Brightness**: adjusts the on-screen brightness level. For more information, refer to “Adjusting Screen Brightness” on page 253.
   - **Auto rotate screen**: when enabled, the phone automatically switches from portrait to landscape orientation and vice versa. When this setting is disabled, the phone displays in portrait mode only.
   - **Screen timeout**: adjusts the delay time before the screen automatically turns off. Selections are: 15 seconds, 30 seconds, 1 minute, 2 minutes, 5 minutes, 10 minutes, and 30 minutes.
   - **Daydream**: allows you to control what your screen does when your device is docked or sleeping. Tap the adjacent OFF / ON icon to turn it on. Follow the on-screen instructions.
• **Font style**: sets the fonts used on the LCD display. Selections are:
  - **Default font**. Tap **Get fonts online** to download additional fonts.
• **Font size**: allows you to select which size of font is displayed.
• **Show battery percentage**: to activate/deactivate the display of battery charge percentage atop the battery icon at the top of the screen.

### Adjusting Screen Brightness

This feature configures the LCD Brightness levels.

1. From the main **Settings** page, tap **My device** tab ➔ **Display** ➔ **Brightness**.
2. Touch and slide the on-screen slider to adjust the level and tap **OK**.

### Assigning a Wallpaper

The Wallpaper settings option allows you to set the Wallpaper for your Home screen, Lock screen, or both.

1. From the main **Settings** page, tap **My device** tab ➔ **Display** ➔ **Wallpaper**.
2. Select an available option to change its current wallpaper.

For more information, refer to “Managing Wallpapers” on page 47.

### Sound Settings

From this menu you can control the sounds on the phone as well as configure the display settings.

- From the Home screen, press ☰ and then tap **Settings** ➔ (My device tab) ➔ **Sound**.

The following options display:
Silent mode via Device Options Screen

Silent mode is convenient when you wish to stop the phone from making noise, in a theater for example. In Silent Mode the speaker is muted and the phone only vibrates to notify you of incoming calls, or other functions that normally have a defined tone or sound as an alert.

1. From the Home screen, press and hold (Power/End) until the Device options screen displays.
2. Tap either Mute, Vibrate, or Sound from the Device options screen to activate or deactivate these features (the current mode displays).

Adjusting the Volume Settings

The Volume menu now provides access to various volume settings within one on-screen popup menu.

1. From the main Settings page, tap My device tab ➔ Sound ➔ Volume.
2. Touch and drag the on-screen slider to assign the volume settings for any of the following volume levels.
   • Music, video, games and other media, Ringtone, Notifications or System.
3. Tap OK to assign the volume levels.
Setup the Ringtones
This option allows you to set the ringtone.
1. From the main Settings page, tap My device tab → Sound.
2. Tap Ringtones.
3. Tap a ringtone from the available list. The ringtone briefly plays when selected.
4. Tap Add to locate a compatible media file that can be used as a ringtone.
5. Tap OK to assign a ringer.

Setup the Vibration
This option allows you to set your device to vibrate and ring.
1. From the main Settings page, tap My device tab → Sound.
2. Tap Vibrations.
3. Select a vibration pattern and tap OK.
   – or –
   Tap Create to then use an on-screen touch circle to create your own custom vibration pattern. Tap Save to store the new vibration pattern.

Setting a Default Notification Ringtone
This option allows you to set the ringtone that will sound for notifications and alarms.
1. From the main Settings page, tap My device tab → Sound.
2. Tap Default notification sound.
3. Select a ringtone and tap OK.
**Setting up Vibration When Ringing**

This option allows you to enable your phone to vibrate when a call is incoming.

1. From the main **Settings** page, tap **My device** tab ➔ **Sound**.
2. Tap the **Vibrate when ringing** field to activate the feature.

**Audible System Tone Settings**

These options are used when you use the dialing pad, make a screen selection, lock your screen, or tap the screen. Each time you press a key or make a selection the selected tone sounds.

1. From the main **Settings** page, tap **My device** tab ➔ **Sound**.
2. Tap **Dialing keypad tone** to activate a tone when you use on-screen keys. A check mark displayed next to these features indicates active status.
3. Tap **Touch sounds** to activate a tone when you touch the screen. A check mark displayed next to this feature indicates active status.
4. Tap **Screen lock sound** to activate a tone when you use the Lock screen. A check mark displayed next to this feature indicates active status.
**Samsung Keyboard**

These options are used when you use the on-screen keypad.

1. From the main **Settings** page, tap **My device** tab ➔ **Sound**.
2. Tap **Key-tap sound** to activate a tone when you use on-screen keys. A check mark displayed next to this feature indicates active status.

**Adapt Sound**

This sound feature to configure your device to find the best sound for use during a call and while you play music.

1. From the main **Settings** page, tap **My device** tab ➔ **Sound** ➔ **Adapt Sound**.
2. Tap **Start** and follow the on-screen prompts to complete the configuration.

**Home Screen Mode**

This application allows you to set your display to the conventional layout of **Standard mode** or provide an easier user experience for the first-time smartphone users using **Easy mode**.

1. From the Home screen, press 📱 and then tap **Settings** ➔ (My device tab) ➔ (Home screen mode).
2. Select one of the following options:
   - **Standard mode**: provides conventional layout for the apps and widgets on your home screens.
   - **Easy mode**: provides easier user experience for first-time smartphone users on the home screens.
3. Tap **Apply** and give your device a few seconds to update the device with the new look and feel.
Call Settings

1. From the Home screen, tap ☎ (Phone).
2. Press ⌘ and then tap Call settings.

   – or –

   From the Home screen, press ⌘ and then tap Settings ➔ (My device tab) ➔ Call.

Configuring General Call Settings

Configure the general call settings using this option.

1. From the Home screen, tap ☎ (Phone).
2. Press ⌘ and then tap Call settings and then tap one of the following options:

   • Call block: allows you to manage your rejection mode and rejection list.
     - Block calls: sets the phone block calls status. Choose from: Off, All numbers, or Call block list only.
     - Call block list: provides access to current rejection entries and numbers.

2. Tap **Use wireless networks** to allow apps to use data from sources such as Wi-Fi and mobile networks to provide a better approximation of your current location.
Security

The Security settings allow you to determine the security level for your device.

Encrypt Device

When enabled, this feature requires a numeric PIN or password to decrypt your device each time you power it on or encrypt the data on your SD card each time it is connected:

1. From the Home screen, press \[\text{[Menu]}\] and then tap Settings \(\rightarrow\) \(\text{[More]}\) (More tab) \(\rightarrow\) Security.
2. Tap Encrypt device. For more information, read the displayed help screen.
3. Tap Encrypt external SD card to enable the encryption on SD card data that requires a password be entered each time the microSD card is connected.

Tip: Make sure your battery is charged more than 80 percent. Encryption may take an hour or more.

Password Settings

When you create a phone password you can also configure the phone to display the password as you type it instead of using an asterisk (*).

1. From the main Settings page, tap More tab \(\rightarrow\) Security.
2. Tap Make passwords visible to activate this feature.
Device Administration

Activating this feature allows Google to administrate your phone in a way similar to IT security settings on a corporate PC. This would be beneficial in the case that your phone was lost or stolen. The phone could be “deactivated” or “restricted” (through administration) from a remote location.

1. From the main Settings page, tap More tab ➔ Security.
2. Tap Device administrators to begin configuring this setting.
3. Select an administrator device and follow the prompts.

Unknown Sources

Before you can download a web application you must enable the Unknown sources feature (enables downloading). Developers can use this option to install non-Play Store applications.

1. From the main Settings page, tap More tab ➔ Security.
2. Tap Unknown sources to active this feature.

Verify Apps

Allows you to block or warn yourself before installing apps that can cause harm.

1. From the main Settings page, tap More tab ➔ Security.
2. Tap Verify apps to active this feature.

Note: Enabling this feature can prevent installation of some applications from the Play Store.
**Credential Storage**

This option allows certain applications to access secure certificates and other credentials. Certificates and credentials can be installed to the SD card and password protected.

1. From the main **Settings** page, tap **More** tab → **Security**.
2. Tap **Storage type** to designate the backup storage location for certificates.
3. Tap **Trusted credentials** to display only trusted CA certificates. A check mark displayed next to the feature indicates secure credentials.
4. Tap **Install from device storage** to install encrypted certificates from the USB Storage location.
5. Tap **Clear credentials** to clear the device (SD card or phone memory) of all certificate contents and reset the credentials password.

**Application Manager**

This device can be used for Android development. You can write applications in the SDK and install them on this device, then run the applications using the hardware, system, and network. This feature allows you to configure the device for development.

---

**Warning!** Because the device can be configured with system software not provided by or supported by Google or any other company, end-users operate these devices at their own risk.
This menu allows you to manage installed applications. You can view and control currently running services, or use the device for application development.
You can also view the amount of memory or resources used as well as the remaining memory and resources for each of the applications on your phone and clear the data, cache, or defaults.

- From the Home screen, press ☰ and then tap Settings ➔ (More tab) ➔ Application manager ➔ ALL.

### Clearing Application Cache and Data

Running Services

The Running services option allows you to view and control currently running services such as Backup, Google Talk, SNS (messaging), Swype, and more.

1. From the main Settings page, tap More tab → Application manager.
2. Tap the RUNNING tab to view all currently active and running applications. This tab also shows the total RAM being used by these currently active applications.
3. Tap a process and select Stop to end the process and stop it from running. When you stop the process the service or application will no longer run until you start the process or application again.
4. Tap Show cached processes to view additional cached applications.

Important! Stopping a process might have undesirable consequences on the application.

Storage Used

This option allows you to view a list (on the current tab) of current applications as sorted by size.

1. From the main Settings page, tap More tab → Application manager.
2. Tap the ALL tab to display all available applications.
3. Press and then tap Sort by size to change the current list to show items based on the amount of storage they occupy.
**Reset App Preferences**

This feature provides you with the ability to reset all preferences for the following features: Disabled apps, Disabled app notifications, Default applications for actions, and Background data restrictions.

1. From the main **Settings** page, tap **More** tab ➔ **Applications manager**.

2. Tap the **ALL** tab to display all available applications.

3. Press [ ] and then tap **Reset app preferences ➔ Reset apps**.

---

**Important!** As an example, if you assigned your browser to always launch YouTube links and want that changed, you must reset the default actions.

---

**Battery Usage**

This option allows you to view a list of those components using battery power. The amount of time the battery was used also displays. Battery usage displays in percentages per application.

1. From the Home screen, press [ ] and then tap **Settings ➔ (More tab) ➔ Battery**. The battery level displays in percentage.

2. From the upper-right tap [ ] (Refresh) to update the list.

   – or –

   Tap an entry to view more detailed information.

---

**Note:** Other applications may be running that affect battery use.
SD Card & Device Storage

From this menu you can view the memory allocation for the memory card as well as mount or unmount the SD card.

**To view the memory allocation for your external SD card:**

- From the Home screen, press Settings ➔ (More tab) ➔ Storage.

  The available memory displays under the Device memory and SD card headings.

---

**Important! DO NOT** remove a microSD card while the device is accessing or transferring files. Doing so will result in loss or damage of data. Make sure your battery is fully charged before using the microSD card. Your data may become damaged or lost if the battery runs out while you are using the microSD card.

---

**Mounting the SD Card**

To store photos, music, videos, and other applications. You must mount (install) the SD card prior to use. Mounting the SD card establishes a USB connection with your computer.

1. From the main Settings page, tap More tab ➔ Storage.

2. Tap Mount SD card.

**Unmounting the SD card**

Unmounting the SD card prevents corruption and damage to the SD card while removing it from the slot.

1. From the main Settings page, tap More tab ➔ Storage.

2. Tap Unmount SD card ➔ OK.
3. After the “SD card will be unmounted” message displays and the Mount SD card now appears in the menu list, remove the SD card.

**Erasing Files from the SD card**

To erase files from the SD card using the device:

1. Ensure the SD card is mounted.
2. From the main Settings page, tap More tab ➔ Storage ➔ Mount SD card.
3. Tap Format SD card ➔ Format SD card ➔ Delete all to format the SD card. The SD card formats and erases all the data stored on it.

**Date and Time**

This menu allows you to change the current time and date displayed.

1. From the Home screen, press and then tap Settings ➔ (More tab) ➔ Date and time.
2. Tap Automatic date and time to allow the network set the date and time.

**Important!** Deactivate Automatic date and time to manually set the rest of the options.

3. Tap Set date and use the arrow icons to set the Month, Day, and Year then tap Set.
4. Tap Set time and use the arrow icons, set Hour, and Minute. Tap PM or AM, then tap Set.
5. Tap **Automatic time zone** to allow the network set the time zone information automatically.

6. Tap **Select time zone**, then tap a time zone.

7. Tap **Use 24-hour format**. If this is not selected the device automatically uses a 12-hour format.

8. Tap **Select date format** and select the date format type.

**About Device**

This menu contains legal information, system tutorial information, and other phone information such as the model number, firmware version, baseband version, kernel version, and software build number.

**To access phone information:**

- From the Home screen, press 📞 and then tap **Settings ➔ (More tab) ➔ About device**. The following information displays:
  
  - **Software update**: allows you to connect to the network and upload any new phone software directly to your device. The device automatically updates with the latest available software when you access this option.
  - **Status**: displays the battery status, the level of the battery (percentage), the Network, Signal strength, Mobile network type, Service state, Roaming, Mobile network state, My phone number, MIN, PRL version, ERI version, MEID, IP address, Wi-Fi MAC address, Bluetooth address, Serial number, Up time, and Device status.
• **Legal information**: This option displays information about Open source licenses, License settings, Samsung Legal, as well as Google legal information. This information clearly provides copyright and distribution legal information and facts as well as Google Terms of Service, Terms of Service for Android-powered Phones, and much more pertinent information as a reference.

Read the information and terms, then press ➔ to return to the Settings menu.

**Tip:** To find your device’s DivX® registration code and information about registering your device to play DivX protected video, tap **License settings ➔ DivX® VOD**.

• **Device name**: allows you to both display and edit the device’s name.

• **Model number**: displays the device’s model number.

• **Android version**: displays the firmware version loaded on this device.

• **Baseband version**: displays the baseband version loaded on this device.

• **Kernel version**: displays the kernel version loaded on this device.

• **Build number**: displays the software, build number.

**Note:** Firmware, baseband, kernel and build numbers are usually used for updates to the handset or support. For additional information please contact your service representative.

• **Hardware version**: displays the current hardware version.
Software Update

The Software Update feature enables you to use your device to connect to the network and upload any new software directly to your device. The device automatically updates with the latest available software when you access this option.
The following icons show your Bluetooth connection status at a glance:

- Displays when the Software updated feature is active.
- Displays when the Software update feature is in progress.

To update your device:

1. From the Home screen, press \( \equiv \) and then tap **Settings → (More tab) → About device → Software update.**
2. Read the Software update information screen.
3. Select an available option:

**Note:** You configure the device’s software update parameters.

- **Cancel:** Tap this option to cancel the operation.
- **Wi-Fi settings:** Enable this option to only download available updates via an active Wi-Fi connection. If disabled, the device will begin available downloads via its’ cellular connection.
- **OK:** Tap this option to connect to the remote server, detect if there is an available update, the begin the download over your existing data connection.

**Note:** Software updates can include bug fixes, enhancements to services, to the device or currently installed software.
Section 11: Health and Safety Information

This section outlines the safety precautions associated with using your phone. The terms “mobile device” or “cell phone” are used in this section to refer to your phone. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Signals

The U.S. Food and Drug Administration (FDA) has published information for consumers relating to Radio Frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

**Do cell phones pose a health hazard?**

Many people are concerned that cell phone radiation will cause cancer or other serious health hazards. The weight of scientific evidence has not linked cell phones with any health problems.

Cell phones emit low levels of Radio Frequency (RF) energy. Over the past 15 years, scientists have conducted hundreds of studies looking at the biological effects of the radio frequency energy emitted by cell phones. While some researchers have reported biological changes associated with RF energy, these studies have failed to be replicated. The majority of studies published have failed to show an association between exposure to radio frequency from a cell phone and health problems.

The low levels of RF cell phones emit while in use are in the microwave frequency range. They also emit RF at substantially reduced time intervals when in the stand-by mode. Whereas high
levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects.

The biological effects of radio frequency energy should not be confused with the effects from other types of electromagnetic energy.

Very high levels of electromagnetic energy, such as is found in X-rays and gamma rays, can ionize biological tissues. Ionization is a process where electrons are stripped away from their normal locations in atoms and molecules. It can permanently damage biological tissues including DNA, the genetic material.

The energy levels associated with radio frequency energy, including both radio waves and microwaves, are not great enough to cause ionization of atoms and molecules. Therefore, RF energy is a type of non-ionizing radiation. Other types of non-ionizing radiation include visible light, infrared radiation (heat), and other forms of electromagnetic radiation with relatively low frequencies.

While RF energy does not ionize particles, large amounts can increase body temperatures and cause tissue damage. Two areas of the body, the eyes and the testes, are particularly vulnerable to RF heating because there is relatively little blood flow in them to carry away excess heat.

**Research Results to Date: Is there a connection between RF and certain health problems?**

The results of most studies conducted to date say no. In addition, attempts to replicate and confirm the few studies that have shown a connection have failed.
The scientific community at large therefore believes that the weight of scientific evidence does not show an association between exposure to Radio Frequency (RF) from cell phones and adverse health outcomes. Still the scientific community has supported additional research to address gaps in knowledge. Some of these studies are described below.

**Interphone Study**

Interphone is a large international study designed to determine whether cell phones increase the risk of head and neck cancer. A report published in the International Journal of Epidemiology (June, 2010) compared cell phone usage for more than 5,000 people with brain tumors (glioma and meningioma) and a similar number of healthy controls.

Results of this study did NOT show that cell phones caused brain cancer. In this study, most people had no increased risk of brain cancer from using cell phones. For people with the heaviest use of cell phones (an average of more than ½ hour per day, every day, for over 10 years) the study suggested a slight increase in brain cancer. However, the authors determined that biases and errors prevented any conclusions being drawn from this data. Additional information about Interphone can be found at [http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf](http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf).

Interphone is the largest cell phone study to date, but it did not answer all questions about cell phone safety. Additional research is being conducted around the world, and the FDA continues to monitor developments in this field.
International Cohort Study on Mobile Phone Users (COSMOS)

The COSMOS study aims to conduct long-term health monitoring of a large group of people to determine if there are any health issues linked to long-term exposure to radio frequency energy from cell phone use. The COSMOS study will follow approximately 300,000 adult cell phone users in Europe for 20 to 30 years. Additional information about the COSMOS study can be found at http://www.ukcosmos.org/index.html.

Risk of Brain Cancer from Exposure to Radio Frequency Fields in Childhood and Adolescence (MOBI-KIDS)

MOBI-KIDS is an international study investigating the relationship between exposure to radio frequency energy from communication technologies including cell phones and brain cancer in young people. This is an international multi-center study involving 14 European and non-European countries. Additional information about MOBI-KIDS can be found at http://www.creal.cat/programes-recerca/en_projectes-creal/view.php?ID=39.

Surveillance, Epidemiology, and End Results (SEER) Program of the National Cancer Institute

The National Cancer Institute (NCI) actively follows cancer statistics in the United States to detect any change in rates of new cases for brain cancer. If cell phones play a role in risk for brain cancer, rates should go up, because heavy cell phone use has been common for quite some time in the U.S. Between 1987 and 2005, the overall age-adjusted incidence of brain cancer did not increase. Additional information about SEER can be found at http://seer.cancer.gov/.
Cell Phone Industry Actions

Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the cell phone industry to take a number of steps, including the following:

- Support-needed research on possible biological effects of RF for the type of signal emitted by cell phones;
- Design cell phones in a way that minimizes any RF exposure to the user; and
- Cooperate in providing users of cell phones with the current information on cell phone use and human health concerns.

The FDA also is working with voluntary standard-setting bodies such as the Institute of Electrical and Electronics Engineers (IEEE), the International Commission on Non-Ionizing Radiation Protection (ICNIRP), and others to assure that safety standards continue to adequately protect the public.

Reducing Exposure: Hands-Free Kits and Other Accessories

Steps to Reduce Exposure to Radio Frequency Energy

If there is a risk from being exposed to radio frequency energy (RF) from cell phones - and at this point we do not know that there is - it is probably very small. But, if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your RF exposure.

- Reduce the amount of time spent using your cell phone;
- Use speaker mode or a headset to place more distance between your head and the cell phone.
**Hands-Free Kits**

Hands-free kits may include audio or Bluetooth® headsets and various types of body-worn accessories such as belt-clips and holsters. Combinations of these can be used to reduce RF energy absorption from cell phones.

Headsets can substantially reduce exposure because the phone is held away from the head in the user's hand or in approved body-worn accessories. Cell phones marketed in the U.S. are required to meet RF exposure compliance requirements when used against the head and against the body.

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used for convenience and comfort. They are also required by law in many states if you want to use your phone while driving.

**Cell Phone Accessories that Claim to Shield the Head from RF Radiation**

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that accessories which claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone.

Studies have shown that these products generally do not work as advertised. Unlike “hands-free” kits, these so-called “shields” may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption.
Children and Cell Phones

The scientific evidence does not show a danger to any users of cell phones from RF exposure, including children and teenagers. The steps adults can take to reduce RF exposure apply to children and teenagers as well.

- Reduce the amount of time spent on the cell phone;
- Use speaker mode or a headset to place more distance between the head and the cell phone.

Some groups sponsored by other national governments have advised that children be discouraged from using cell phones at all. For example, The Stewart Report from the United Kingdom made such a recommendation in December 2000. In this report, a group of independent experts noted that no evidence exists that using a cell phone causes brain tumors or other ill effects. Their recommendation to limit cell phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

Additional information on the safety of RF exposures from various sources can be obtained from the following organizations (updated 10/1/2010):

- Environmental Protection Agency (EPA): [http://www.epa.gov/radtown/wireless-tech.html](http://www.epa.gov/radtown/wireless-tech.html).

Specific Absorption Rate (SAR) Certification Information

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for Radio Frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government.

These FCC RF exposure limits are derived from the recommendations of two expert organizations: the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.
The RF exposure limit set by the FCC for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg).

The FCC SAR limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum reported value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the SAR limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body-worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the mobile device a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. The FCC has granted an Equipment Authorization for this mobile device with all reported SAR levels
evaluated as in compliance with the FCC RF exposure guidelines. This mobile phone has a FCC ID number: A3LSMS765C [Model Number: SM-S765C] and the specific SAR levels for this mobile phone can be found at the following FCC website: http://www.fcc.gov/oet/ea/.

The SAR information for this device can also be found on Samsung’s website: http://www.samsung.com/sar.

SAR information on this and other model phones can be accessed online on the FCC’s website through http://transition.fcc.gov/oet/rfsafety/sar.html. To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone. Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional SAR information can also be obtained at http://www.fcc.gov/encyclopedia/specific-absorption-rate-sar-cellular-telephones.

**FCC Part 15 Information to User**

Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by Samsung could void your authority to operate the device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Commercial Mobile Alerting System (CMAS)**

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System ("CMAS"); which may also be known as the Personal Localized Alerting Network ("PLAN"). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider's coverage area. If you travel outside your provider's coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.
Smart Practices While Driving
On the Road - Off the Phone

The primary responsibility of every driver is the safe operation of his or her vehicle.

Responsible drivers understand that no secondary task should be performed while driving whether it be eating, drinking, talking to passengers, or talking on a mobile phone - unless the driver has assessed the driving conditions and is confident that the secondary task will not interfere with their primary responsibility. **Do not engage in any activity while driving a moving vehicle which may cause you to take your eyes off the road or become so absorbed in the activity that your ability to concentrate on the act of driving becomes impaired.**

Samsung is committed to promoting responsible driving and giving drivers the tools they need to understand and address distractions.

**Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas. For example, only hands-free use may be permitted in certain areas.**

Before answering calls, consider your circumstances. Let the call go to voicemail when driving conditions require. Remember, driving comes first, not the call!

If you consider a call necessary and appropriate, follow these tips:

- Use a hands-free device;
- Secure your phone within easy reach;
- Place calls when you are not moving;
- Plan calls when your car will be stationary;
- Do not engage in stressful or emotional conversations;
• Let the person with whom you are speaking know that you are driving and will suspend the call if necessary;
• Do not take notes or look up phone numbers while driving;

Notice regarding legal restrictions on mounting this device in an automobile:
Laws in some states may prohibit mounting this device on or near the windshield of an automobile. In other states, the law may permit mounting this device only in specific locations in the automobile. Be sure to consult the state and local laws or ordinances where you drive before mounting this device in an automobile. Failure to comply with these restrictions could result in fines, penalties, or other damages.

Never mount this device in a manner that will obstruct the driver's clear view of the street and traffic.

Never use wireless data services such as text messaging, Web browsing, or e-mail while operating a vehicle.

Never watch videos, such as a movie or clip, or play video games while operating a vehicle.

For more information, go to http://www.ctia.org.

Battery Use and Safety

Important! Handle and store batteries properly to avoid injury or damage. Most battery issues arise from improper handling of batteries and, particularly, from the continued use of damaged batteries.
• **Do not disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.** Do not put a high degree of pressure on the battery. This can cause leakage or an internal short-circuit, resulting in overheating.

• **Do not let the phone or battery come in contact with liquids.** Liquids can get into the phone's circuits, leading to corrosion. Even when the phone appears to be dry and appears to operate normally, the circuitry could slowly corrode and pose a safety hazard. If the phone and/or battery get wet, have them checked by your service provider or contact Samsung, even if they appear to be working properly.

• **Do not place your battery in or near a heat source.** Excessive heating can damage the phone or the battery and could cause the phone or the battery to explode. Do not dry a wet or damp battery with an appliance or heat source such as a microwave oven, hair dryer, iron, or radiator. Avoid leaving your phone in your car in high temperatures.

• **Caution: Some applications or prolonged usage may increase device temperature.** Prolonged skin contact with a device that is hot to the touch may produce skin discomfort or redness, or low-temperature burns. If the device feels hot to the touch, discontinue use and close all applications or turn off the device until it cools. Always ensure that the phone has adequate ventilation and air flow. Covering the device with bedding, your body, thick clothing or any other materials that significantly affect air flow may affect the performance of the phone and poses a possible risk of fire or explosion, which could lead to serious bodily injuries or damage to property.
- Do not dispose of the phone or the battery in a fire. The phone or the battery may explode when overheated.

- Do not handle a damaged or leaking battery. Do not let leaking battery fluid come in contact with your eyes, skin or clothing. For safe disposal options, contact your nearest Samsung-authorized service center.

- Avoid dropping the cell phone. Dropping the phone or the battery, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.

- Never use any charger or battery that is damaged in any way.

- Do not allow the battery to touch metal objects. Accidental short-circuiting can occur when a metallic object (coin, key, jewelry, clip, or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.

---

**Important!** Use only Samsung-approved batteries, and recharge your battery only with Samsung-approved chargers which are specifically designed for your phone.

---

**WARNING!**

Use of a non-Samsung-approved battery or charger may present a risk of fire, explosion, leakage, or other hazard. Samsung’s warranty does not cover damage to the phone caused by non-Samsung-approved batteries and/or chargers.
• Do not use incompatible cell phone batteries and chargers. Some websites and second-hand dealers not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers. Consumers should purchase manufacturer or carrier-recommended products and accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.

• Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, or leakage, leading to serious injuries, damages to your phone, or other serious hazard.

**Samsung Mobile Products and Recycling**

Samsung cares for the environment and encourages its customers to recycle Samsung mobile devices and genuine Samsung accessories. Proper disposal of your mobile device and its battery is not only important for safety, it benefits the environment. Batteries must be recycled or disposed of properly.

Recycling programs for your mobile device, batteries, and accessories may not be available in your area.

We've made it easy for you to recycle your old Samsung mobile device by working with respected take-back companies in every state in the country.

**Drop It Off**

You can drop off your Samsung-branded mobile device and batteries for recycling at one of our numerous Samsung Recycling Direct (SM) locations. A list of these locations may be found at:
Samsung-branded devices and batteries will be accepted at these locations for no fee.

Consumers may also recycle their used mobile device or batteries at many retail or carrier-provided locations where mobile devices and batteries are sold. Additional information regarding specific locations may be found at: http://www.epa.gov/epawaste/partnerships/plugin/cellphone/index.htm or at http://www.call2recycle.org/.

Mail It In

The Samsung Mobile Take-Back Program will provide Samsung customers with a free recycling mailing label. Just go to http://fun.samsungmobileusa.com/recycling/index.jsp and follow the instructions to print out a free pre-paid postage label and then send your old mobile device or battery to the address listed, via U.S. Mail, for recycling.

Dispose of unwanted electronics through an approved recycler. To find the nearest recycling location, go to our website: www.samsung.com/recyclingdirect
Or call, (877) 278-0799.

Follow local regulations regarding disposal of mobile devices and batteries

Dispose of your mobile device and batteries in accordance with local regulations. In some areas, the disposal of these items in household or business trash may be prohibited. Help us protect the environment - recycle!
Warning! Never dispose of batteries in a fire because they may explode.

UL Certified Travel Charger

The Travel Charger for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines:

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE.

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET.

THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.
Display / Touch-Screen

Please note the following information when using your mobile device:

WARNING REGARDING DISPLAY

The display on your mobile device is made of glass or acrylic and could break if your mobile device is dropped or if it receives significant impact. Do not use if screen is broken or cracked as this could cause injury to you.

WARRANTY DISCLAIMER: PROPER USE OF A TOUCH-SCREEN MOBILE DEVICE

If your mobile device has a touch-screen display, please note that a touch-screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch-screen may damage the tempered glass surface and void the warranty. For more information, please refer to the “Standard Limited Warranty”.

GPS & AGPS

Certain Samsung mobile devices can use a Global Positioning System (GPS) signal for location-based applications. A GPS uses satellites controlled by the U.S. Government that are subject to changes implemented in accordance with the Department of Defense policy and the 2008 Federal Radio navigation Plan (FRP). Changes may affect the performance of location-based technology on your mobile device.
Certain Samsung mobile devices can also use an Assisted Global Positioning System (AGPS), which obtains information from the cellular network to improve GPS performance. AGPS uses your wireless service provider's network and therefore airtime, data charges, and/or additional charges may apply in accordance with your service plan. Contact your wireless service provider for details.

**Your Location**

Location-based information includes information that can be used to determine the approximate location of a mobile device. Mobile devices which are connected to a wireless network transmit location-based information. Additionally, if you use applications that require location-based information (e.g. driving directions), such applications transmit location-based information. The location-based information may be shared with third-parties, including your wireless service provider, applications providers, Samsung, and other third-parties providing services.

**Use of AGPS in Emergency Calls**

When you make an emergency call, the cellular network may activate AGPS technology in your mobile device to tell the emergency responders your approximate location.

AGPS has limitations and **might not work in your area**. Therefore:

- Always tell the emergency responder your location to the best of your ability; and

- Remain on the mobile device for as long as the emergency responder instructs you.
Navigation

Maps, directions, and other navigation-data, including data relating to your current location, may contain inaccurate or incomplete data, and circumstances can and do change over time. In some areas, complete information may not be available. **Therefore, you should always visually confirm that the navigational instructions are consistent with what you see before following them.** All users should pay attention to road conditions, closures, traffic, and all other factors that may impact safe driving or walking. Always obey posted road signs.

Emergency Calls

This mobile device, like any wireless mobile device, operates using radio signals, wireless and landline networks, as well as user-programmed functions, which cannot guarantee connection in all conditions, areas, or circumstances.

Therefore, you should never rely solely on any wireless mobile device for essential communications (medical emergencies, for example). Before traveling in remote or underdeveloped areas, plan an alternate method of contacting emergency services personnel. Remember, to make or receive any calls, the mobile device must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless mobile device networks or when certain network services and/or mobile device features are in use. Check with local service providers.
To make an emergency call:

1. If the mobile device is not on, switch it on.
2. From the Home screen, tap 📞.
3. Key in the emergency number for your present location (for example, 911 or other official emergency number). Emergency numbers vary by location.
4. Tap 📞.

If certain features are in use (call blocking, for example), you may first need to deactivate those features before you can make an emergency call. Consult your User Manual and your local cellular service provider. When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your mobile device may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

Care and Maintenance

Your mobile device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years:

Keep your Samsung Mobile Device away from:

Liquids of any kind

Keep the mobile device dry. Precipitation, humidity, and liquids contain minerals that will corrode electronic circuits. If the mobile device does get wet, do not accelerate drying with the use of an oven, microwave, or dryer, because this may damage the mobile device and could cause a fire or explosion.
Do not use the mobile device with a wet hand. Doing so may cause an electric shock to you or damage to the mobile device.

**Extreme heat or cold**
Avoid temperatures below 0°C / 32°F or above 45°C / 113°F.

**Microwaves**
Do not try to dry your mobile device in a microwave oven. Doing so may cause a fire or explosion.

**Dust and dirt**
Do not expose your mobile device to dust, dirt, or sand.

**Cleaning solutions**
Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the mobile device. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution. If the mobile device has a retractable camera lens, do not use soap and water to clean the lens. Use a blower or brush or lens cleaning paper dampened in a lens cleaning solution.

**Shock or vibration**
Do not drop, knock, or shake the mobile device. Rough handling can break internal circuit boards.

**Paint**
Do not paint the mobile device. Paint can clog the device’s moving parts or ventilation openings and prevent proper operation.

**Responsible Listening**

---

**Caution! Avoid potential hearing loss.**
Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cell phones, at high volume settings for long durations may lead to permanent noise-induced hearing loss.

This includes the use of headphones (including headsets, earbuds, and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound, and distorted hearing. Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings, and equipment.

You should follow some common sense recommendations when using any portable audio device:

- Always turn the volume down before plugging the earphones into an audio source.
- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- Be aware that you can adapt to higher volume settings over time, not realizing that the higher volume may be harmful to your hearing.
• When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.

• Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.

• Limit the amount of time you listen. As the volume increases, less time is required before you hearing could be affected.

• Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.

• Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech, or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

Operating Environment

Remember to follow any special regulations in force in any area, and always switch your mobile device off whenever it is forbidden to use it, or when it may cause interference or danger. When connecting the mobile device or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

Using Your Mobile Device Near Other Electronic Devices

Most modern electronic equipment is shielded from Radio Frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless mobile device. Consult the manufacturer to discuss alternatives.

Implantable Medical Devices

A minimum separation of six (6) inches should be maintained between a handheld wireless mobile device and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

- Should ALWAYS keep the mobile device more than six (6) inches from their implantable medical device when the mobile device is turned ON;
- Should not carry the mobile device in a breast pocket;
• Should use the ear opposite the implantable medical device to minimize the potential for interference;
• Should turn the mobile device OFF immediately if there is any reason to suspect that interference is taking place;
• Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless mobile device with an implantable medical device, consult your health care provider.

For more information see: http://www.fcc.gov/oet/rfsafety/rf-faqs.html#.

Other Medical Devices

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your mobile device off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle before using your mobile device in a motor vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Switch your mobile device off in any facility where posted notices require you to do so.
**Potentially Explosive Environments**

Switch your mobile device off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised to switch the mobile device off while at a refueling point (service station).

Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle engine. Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association.

**When your Device is Wet**

Do not turn on your device if it is wet. If your device is already on, turn it off and remove the battery immediately (if the device will not turn off or you cannot remove the battery, leave it as-is). Then, dry the device with a towel and take it to a service center.
FCC Hearing Aid Compatibility (HAC) Regulations for Wireless Devices

The U.S. Federal Communications Commission (FCC) has established requirements for digital wireless mobile devices to be compatible with hearing aids and other assistive hearing devices.

When individuals employing some assistive hearing devices (hearing aids and cochlear implants) use wireless mobile devices, they may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and mobile devices also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless mobile devices to assist hearing device users find mobile devices that may be compatible with their hearing devices. Not all mobile devices have been rated. Mobile devices that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated mobile device successfully. Trying out the mobile device with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Wireless mobile devices rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. M4 is the better/higher of the two ratings. M-ratings refer to enabling acoustic coupling with hearing aids that do not operate in telecoil mode.
**T-Ratings**: Mobile devices rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. T4 is the better/higher of the two ratings. T-ratings refer to enabling inductive coupling with hearing aids operating in telecoil mode.

Hearing devices may also be rated. Your hearing aid manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise.

Under the current industry standard, American National Standards Institute (ANSI) C63.19, the hearing aid and wireless mobile device rating values are added together to indicate how usable they are together. For example, if a hearing aid meets the M2 level rating and the wireless mobile device meets the M3 level rating, the sum of the two values equals M5.

Under the standard, this should provide the hearing aid user with normal use while using the hearing aid with the particular wireless mobile device. A sum of 6 or more would indicate excellent performance.

However, these are not guarantees that all users will be satisfied. T ratings work similarly.
The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

**HAC for Newer Technologies**

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids.

It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.
Restricting Children's Access to Your Mobile Device

Your mobile device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the mobile device, or make calls that increase your mobile device bill.

Keep the mobile device and all its parts and accessories out of the reach of small children.

FCC Notice and Cautions

FCC Notice

The mobile device may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the mobile device if such interference cannot be eliminated.

Cautions

Any changes or modifications to your mobile device not expressly approved by Samsung could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas, and chargers. The use of any unauthorized accessories may be dangerous and void the mobile device warranty if said accessories cause damage or a defect to the mobile device.

Although your mobile device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.

Other Important Safety Information

- Only qualified personnel should service the mobile device or install the mobile device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted.

Check regularly that all wireless mobile device equipment in your vehicle is mounted and operating properly.

When using a headset in dry environments, static electricity can build up in the headset and cause a small quick static electrical shock. To minimize the risk of electrostatic discharge from the headset avoid using the headset in extremely dry environments or touch a grounded unpainted metal object to discharge static electricity before inserting the headset.

Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the mobile device, its parts, or accessories.

For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including installed or portable wireless equipment near or in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Switch your mobile device off before boarding an aircraft. The use of wireless mobile devices in aircraft is illegal and may be dangerous to the aircraft's operation. Check with appropriate authorities before using any function of a mobile device while on an aircraft.

Failure to observe these instructions may lead to the suspension or denial of cell phone services to the offender, or legal action, or both.

While using your device, leave some lights on in the room and do not hold the screen too close to your eyes.
• Seizures or blackouts can occur when you are exposed to flashing lights while watching videos or playing games for extended periods. If you feel any discomfort, stop using the device immediately.

• Reduce risk of repetitive motion injuries. When you repetitively perform actions, such as pressing keys, drawing characters on a touch screen with your fingers, or playing games, you may experience occasional discomfort in your hands, neck, shoulders, or other parts of your body. When using your device for extended periods, hold the device with a relaxed grip, press the keys lightly, and take frequent breaks. If you continue to have discomfort during or after such use, stop use and see a physician.

• If your device has a camera flash or light, do not use the flash or light close to the eyes of people or pets. [122011]
Section 12: Warranty Information

Standard Limited Warranty

What is covered and for how long?

SAMSUNG TELECOMMUNICATIONS AMERICA, LLC (“SAMSUNG”) warrants that SAMSUNG’s handsets and accessories (“Products”) are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase by the first consumer purchaser and continuing for the following specified period of time after that date:

Device 1 Year
Battery(ies)* 1 Year
Case/Pouch/Holster* 90 Days
Other Device Accessories* 1 Year

*If applicable.

What is not covered?

This Limited Warranty is conditioned upon proper use of the Product. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abnormal use, abnormal conditions, improper storage, exposure to liquid, moisture, dampness, sand or dirt, neglect, or unusual physical, electrical or electromechanical stress; (b) scratches, dents and cosmetic damage, unless caused by SAMSUNG; (c) defects or damage resulting from excessive force or use of a metallic object when pressing on a touch screen;
(d) equipment that has the serial number or the enhancement data code removed, defaced, damaged, altered or made illegible;
(e) ordinary wear and tear; (f) defects or damage resulting from the use of Product in conjunction or connection with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (g) defects or damage resulting from improper testing, operation, maintenance, installation, service, or adjustment not furnished or approved by SAMSUNG; (h) defects or damage resulting from external causes such as collision with an object, fire, flooding, dirt, windstorm, lightning, earthquake, exposure to weather conditions, theft, blown fuse, or improper use of any electrical source; (i) defects or damage resulting from cellular signal reception or transmission, or viruses or other software problems introduced into the Product; or (j) Product used or purchased outside the United States. This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery; (ii) any of the seals on the battery are broken or show evidence of tampering; or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG’s obligations?
During the applicable warranty period, provided the Product is returned in accordance with the terms of this Limited Warranty, SAMSUNG will repair or replace the Product, at SAMSUNG’s sole option, without charge. SAMSUNG may, at SAMSUNG’s sole option,
use rebuilt, reconditioned, or new parts or components when repairing any Product, or may replace the Product with a rebuilt, reconditioned or new Product.

Repaired/replaced cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Products will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for ninety (90) days, whichever is longer. All replaced Products, parts, components, boards and equipment shall become the property of SAMSUNG. Except to any extent expressly allowed by applicable law, transfer or assignment of this Limited Warranty is prohibited.

**What must you do to obtain warranty service?**

To obtain service under this Limited Warranty, you must return the Product to an authorized phone service facility in an adequate container for shipping, accompanied by the sales receipt or comparable proof of sale showing the original date of purchase, the serial number of the Product and the seller’s name and address.

To obtain assistance on where to deliver the Product, please call SAMSUNG Customer Care at 1-888-987-4357. If SAMSUNG determines that any Product is not covered by this Limited Warranty, you must pay all parts, shipping, and labor charges for the repair or return of such Product.

You should keep a separate backup copy of any contents of the Product before delivering the Product to SAMSUNG for warranty service, as some or all of the contents may be deleted or reformatted during the course of warranty service.
What are the limits on SAMSUNG’s liability?

THIS LIMITED WARRANTY SETS OUT THE FULL EXTENT OF SAMSUNG’S RESPONSIBILITIES, AND THE EXCLUSIVE REMEDY REGARDING THE PRODUCTS.

ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SAMSUNG BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT OR FOR, WITHOUT LIMITATION, COMMERCIAL LOSS OF ANY SORT; LOSS OF USE, TIME, DATA, REPUTATION, OPPORTUNITY, GOODWILL, PROFITS OR SAVINGS; INCONVENIENCE; INCIDENTAL, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES; OR DAMAGES ARISING FROM THE USE OR INABILITY TO USE THE PRODUCT. SOME STATES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, OR THE DISCLAIMER OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND DISCLAIMERS MAY NOT APPLY TO YOU.

SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT USED IN CONJUNCTION WITH THE PRODUCT, OR THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE. RESPONSIBILITY FOR THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF
ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT RESTS SOLELY WITH THE USER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT.

Nothing in the Product instructions or information shall be construed to create an express warranty of any kind with respect to the Products. No agent, employee, dealer, representative or reseller is authorized to modify or extend this Limited Warranty or to make binding representations or claims, whether in advertising, presentations or otherwise, on behalf of SAMSUNG regarding the Products or this Limited Warranty.

This Limited Warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

**What is the procedure for resolving disputes?**

ALL DISPUTES WITH SAMSUNG ARISING IN ANY WAY FROM THIS LIMITED WARRANTY OR THE SALE, CONDITION OR PERFORMANCE OF THE PRODUCTS SHALL BE RESOLVED EXCLUSIVELY THROUGH FINAL AND BINDING ARBITRATION, AND NOT BY A COURT OR JURY.

Any such dispute shall not be combined or consolidated with a dispute involving any other person’s or entity’s Product or claim, and specifically, without limitation of the foregoing, shall not under any circumstances proceed as part of a class action. The arbitration shall be conducted before a single arbitrator, whose award may not exceed, in form or amount, the relief allowed by the applicable law. The arbitration shall be conducted according to the American Arbitration Association (AAA) Commercial Arbitration Rules applicable to consumer disputes. This arbitration provision is entered pursuant to the Federal Arbitration Act. The laws of the State of Texas, without reference to its choice of laws principles, shall govern...
the interpretation of the Limited Warranty and all disputes that are subject to this arbitration provision. The arbitrator shall decide all issues of interpretation and application of this arbitration provision and the Limited Warranty.

For any arbitration in which your total damage claims, exclusive of attorney fees and expert witness fees, are $5,000.00 or less (“Small Claim”), the arbitrator may, if you prevail, award your reasonable attorney fees, expert witness fees and costs as part of any award, but may not grant SAMSUNG its attorney fees, expert witness fees or costs unless it is determined that the claim was brought in bad faith. In a Small Claim case, you shall be required to pay no more than half of the total administrative, facility and arbitrator fees, or $50.00 of such fees, whichever is less, and SAMSUNG shall pay the remainder of such fees. Administrative, facility and arbitrator fees for arbitrations in which your total damage claims, exclusive of attorney fees and expert witness fees, exceed $5,000.00 (“Large Claim”) shall be determined according to AAA rules. In a Large Claim case, the arbitrator may grant to the prevailing party, or apportion among the parties, reasonable attorney fees, expert witness fees and costs. Judgment may be entered on the arbitrator’s award in any court of competent jurisdiction.

This arbitration provision also applies to claims against SAMSUNG’s employees, representatives and affiliates if any such claim arises from the Product’s sale, condition or performance.

You may opt out of this dispute resolution procedure by providing notice to SAMSUNG no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product. To opt out, you must send notice by e-mail to optout@sta.samsung.com, with the subject line: “Arbitration Opt Out.” You must include in the opt out
e-mail (a) your name and address; (b) the date on which the Product was purchased; (c) the Product model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable, if you have it (the IMEI or MEID or Serial Number can be found (i) on the Product box; (ii) on the Product information screen, which can be found under “Settings;” (iii) on a label on the back of the Product beneath the battery, if the battery is removable; and (iv) on the outside of the Product if the battery is not removable). Alternatively, you may opt out by calling 1-888-987-4357 no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product and providing the same information. These are the only two forms of notice that will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect the coverage of the Limited Warranty in any way, and you will continue to enjoy the benefits of the Limited Warranty.

Severability

If any portion of this Limited Warranty is held to be illegal or unenforceable, such partial illegality or unenforceability shall not affect the enforceability of the remainder of the Limited Warranty.

**Precautions for Transfer and Disposal**

If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software.

To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung’s Customer Care Center for an Extended File System (EFS) Clear which
will eliminate all user memory and return all settings to default settings. Please contact the **Samsung Customer Care Center** for details.

**Important!** Please provide warranty information (proof of purchase) to Samsung’s Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.

**End User License Agreement for Software**

IMPORTANT. READ CAREFULLY: This End User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and Samsung Electronics Co., Ltd. ("Samsung") for software, owned by Samsung and its affiliated companies and its third party suppliers and licensors, that accompanies this EULA, which includes computer software and may include associated media, printed materials, "online" or electronic documentation in connection with your use of this device ("Software").
This device requires the use of preloaded software in its normal operation. BY USING THE DEVICE OR ITS PRELOADED SOFTWARE, YOU ACCEPT THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THESE TERMS, DO NOT USE THE DEVICE OR THE SOFTWARE.

1. **GRANT OF LICENSE.** Samsung grants you the following rights provided that you comply with all terms and conditions of this EULA: You may install, use, access, display and run one copy of the Software on the local hard disk(s) or other permanent storage media of one computer and use the Software on a single computer or a mobile device at a time, and you may not make the Software available over a network where it could be used by multiple computers at the same time. You may make one copy of the Software in machine readable form for backup purposes only; provided that the backup copy must include all copyright or other proprietary notices contained on the original.

   Certain items of the Software may be subject to open source licenses. The open source license provisions may override some of the terms of this EULA. We make the applicable open source licenses available to you on the Legal Notices section of the Settings menu of your device.

2. **RESERVATION OF RIGHTS AND OWNERSHIP.** Samsung reserves all rights not expressly granted to you in this EULA. The Software is protected by copyright and other intellectual property laws and treaties. Samsung or its suppliers own the title, copyright and other intellectual property rights in the Software. The Software is licensed, not sold.

3. **LIMITATIONS ON END USER RIGHTS.** You may not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code or algorithms of, the Software (except and only to the extent
that such activity is expressly permitted by applicable law notwithstanding this limitation), or modify, or disable any features of, the Software, or create derivative works based on the Software. You may not rent, lease, lend, sublicense or provide commercial hosting services with the Software.

4. CONSENT TO USE OF DATA. You agree that Samsung and its affiliates may collect and use technical information gathered as part of the product support services related to the Software provided to you, if any, such as IMEI (your device's unique identification number), device number, model name, customer code, access recording, your device's current SW version, MCC (Mobile Country Code), MNC (Mobile Network Code). Samsung and its affiliates may use this information solely to improve their products or to provide customized services or technologies to you and will not disclose this information in a form that personally identifies you. At all times your information will be treated in accordance with Samsung's Privacy Policy, which can be viewed at:

5. SOFTWARE UPDATES. Samsung may provide to you or make available to you updates, upgrades, supplements and add-on components (if any) of the Software related to security, including bug fixes, service upgrades (parts or whole), products or devices, and updates and enhancements to any software for security previously installed (including entirely new versions), (collectively “Update”) after the date you obtain your initial copy of the Software related to security to improve such Software and ultimately enhance your user experience with your device. This EULA applies to all and any component of the Update that Samsung may provide to you or make available to you after the date you obtain your initial copy of the
Software related to security, unless we provide other terms along with such Update. To use Software related to security provided through Update, you must first be licensed for the Software identified by Samsung as eligible for the Update. After the Update, you may no longer use the Software that formed the basis for your Update eligibility. The updated Software version may add new functions and, in some limited cases, may delete existing functions.

While the Update will be generally available, in some limited circumstances, the Software updates will only be offered by your network carrier, and such Software updates will be governed by your contractual relationship with your network carrier.

With the “Automatic Update” function enabled (as in the default setting in the Security menu in the Setting), your device downloads some Updates automatically from time to time. Given the importance of receiving Updates for security software in a timely manner to defend against new threats, such Update may be automatically downloaded and installed. We recommend that you check availability of any new Updates periodically for optimal use of your device. If you want to avoid any use of network data for the Update downloads, then you should choose the “Wi-Fi Only” option in the Setting.

6. Some features of the Software may require your device to have access to the internet and may be subject to restrictions imposed by your network or internet provider. Unless your device is connected to the internet through Wi-Fi connection, the Software will access through your mobile network, which may result in additional charges depending on your payment plan. In addition, your enjoyment of some features of the Software may be affected by the suitability and performance of your device hardware or data access.
7. **SOFTWARE TRANSFER.** You may not transfer this EULA or the rights to the Software granted herein to any third party unless it is in connection with the sale of the mobile device which the Software accompanied. In such event, the transfer must include all of the Software (including all component parts, the media and printed materials, any upgrades, this EULA) and you may not retain any copies of the Software. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the Software must agree to all the EULA terms.

8. **EXPORT RESTRICTIONS.** You acknowledge that the Software is subject to export restrictions of various countries. You agree to comply with all applicable international and national laws that apply to the Software, including all the applicable export restriction laws and regulations.

9. **TERMINATION.** This EULA is effective until terminated. Your rights under this License will terminate automatically without notice from Samsung if you fail to comply with any of the terms and conditions of this EULA. Upon termination of this EULA, you must cease all use of the Software and destroy all copies, full or partial, of the Software.

10. **DISCLAIMER OF WARRANTY.** UNLESS SEPARATELY STATED IN A WRITTEN EXPRESS LIMITED WARRANTY ACCOMPANYING YOUR DEVICE, ALL SOFTWARE PROVIDED BY SAMSUNG WITH THIS MOBILE DEVICE (WHETHER INCLUDED WITH THE DEVICE, DOWNLOADED, OR OTHERWISE OBTAINED) IS PROVIDED "AS IS" AND ON AN "AS AVAILABLE" BASIS, WITHOUT WARRANTIES OF ANY KIND FROM SAMSUNG, EITHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT POSSIBLE PURSUANT TO APPLICABLE LAW, SAMSUNG DISCLAIMS ALL WARRANTIES EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY,
Satisfactory quality or workmanlike effort, fitness for a particular purpose, reliability or availability, accuracy, lack of viruses, quiet enjoyment, non infringement of third party rights or other violation of rights. Some jurisdictions do not allow exclusions or limitations of implied warranties, so the above exclusions or limitations may not apply to you. No advice or information, whether oral or written, obtained by you from Samsung or its affiliates shall be deemed to alter this disclaimer by Samsung of warranty regarding the software, or to create any warranty of any sort from Samsung.

11. Third-Party Applications. Certain third party applications may be included with, or downloaded to this mobile device. Samsung makes no representations whatsoever about any of these applications. Since Samsung has no control over such applications, you acknowledge and agree that Samsung is not responsible for the availability of such applications and is not responsible or liable for any content, advertising, products, services, or other materials on or available from such applications. You expressly acknowledge and agree that use of third party applications is at your sole risk and that the entire risk of unsatisfactory quality, performance, accuracy and effort is with you. It is up to you to take precautions to ensure that whatever you select to use is free of such items as viruses, worms, Trojan horses, and other items of a destructive nature. References on this mobile device to any names, marks, products, or services of any third-parties are provided solely as a convenience to you, and do not constitute or imply an endorsement, sponsorship, or recommendation of, or affiliation with the third party or its products and services. You agree that Samsung shall not be responsible or
liable, directly or indirectly, for any damage or loss, including but not limited to any damage to the mobile device or loss of data, caused or alleged to be caused by, or in connection with, use of or reliance on any such third party content, products, or services available on or through any such application. You acknowledge and agree that the use of any third-party application is governed by such third party application provider's Terms of Use, License Agreement, Privacy Policy, or other such agreement and that any information or personal data you provide, whether knowingly or unknowingly, to such third-party application provider, will be subject to such third party application provider's privacy policy, if such a policy exists. SAMSUNG DISCLAIMS ANY RESPONSIBILITY FOR ANY DISCLOSURE OF INFORMATION OR ANY OTHER PRACTICES OF ANY THIRD PARTY APPLICATION PROVIDER. SAMSUNG EXPRESSLY DISCLAIMS ANY WARRANTY REGARDING WHETHER YOUR PERSONAL INFORMATION IS CAPTURED BY ANY THIRD PARTY APPLICATION PROVIDER OR THE USE TO WHICH SUCH PERSONAL INFORMATION MAY BE PUT BY SUCH THIRD PARTY APPLICATION PROVIDER.

12. SAMSUNG APPLICATIONS. Certain Samsung applications and services may be included with, or downloaded to, this mobile device. Many of them require Samsung Services membership registration ("Samsung Account"), and your rights and obligations will be set forth in separate Samsung Account terms and conditions and privacy policies. There are non-Samsung Account applications and services that require your consent to their separate terms and conditions and privacy policies. You expressly acknowledge and agree that your use of such applications and services will be subject to the applicable terms and conditions and privacy policies.
13. LIMITATION OF LIABILITY. SAMSUNG WILL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND ARISING OUT OF OR RELATING TO THE USE OR THE INABILITY TO USE THE SOFTWARE OR ANY THIRD PARTY APPLICATION, ITS CONTENT OR FUNCTIONALITY, INCLUDING BUT NOT LIMITED TO DAMAGES CAUSED BY OR RELATED TO ERRORS, OMISSIONS, INTERRUPTIONS, DEFECTS, DELAY IN OPERATION OR TRANSMISSION, COMPUTER VIRUS, FAILURE TO CONNECT, NETWORK CHARGES, IN-APP PURCHASES, AND ALL OTHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES EVEN IF SAMSUNG HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. NOTWITHSTANDING THE FOREGOING, SAMSUNG ELECTRONIC CO.'S TOTAL LIABILITY TO YOU FOR ALL LOSSES, DAMAGES, CAUSES OF ACTION, INCLUDING BUT NOT LIMITED TO THOSE BASED ON CONTRACT, TORT, OR OTHERWISE, ARISING OUT OF YOUR USE OF THE SOFTWARE OR THIRD PARTY APPLICATIONS ON THIS MOBILE DEVICE, OR ANY OTHER PROVISION OF THIS EULA, SHALL NOT EXCEED THE AMOUNT PURCHASER PAID SPECIFICALLY FOR THIS MOBILE DEVICE OR ANY SUCH THIRD PARTY APPLICATION THAT WAS INCLUDED WITH THIS MOBILE DEVICE. THE FOREGOING LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS (INCLUDING SECTIONS 10, 11, 12 AND 13) SHALL APPLY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EVEN IF ANY REMEDY FAILS ITS ESSENTIAL PURPOSE.

14. U.S. GOVERNMENT END USERS RESTRICTED RIGHTS. The Software is licensed only with "restricted rights" and as "commercial items" consisting of "commercial software" and "commercial software
documentation" with only those rights as are granted to all other end users pursuant to the terms and conditions herein. All Products are provided only with "restricted rights" with only those rights as are granted to all other end users pursuant to the terms and conditions herein. All Software and Products are provided subject to Federal Acquisition Regulation (FAR) 52.227.19.

15. **APPLICABLE LAW.** This EULA is governed by the laws of the jurisdiction where you are a resident or, if a resident of the United States, by the laws of the state of Texas, without regard to its conflict of law provisions. This EULA shall not be governed by the UN Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.

16. **DISPUTE RESOLUTION.**

(a) Non-United States residents. If a dispute, controversy or difference arising in any way from this EULA or your use of the Software is not amicably settled, it shall be subject to the non-exclusive jurisdiction of the courts of the jurisdiction where you are a resident. Notwithstanding the foregoing, Samsung may apply for injunctive remedies (or an equivalent type of urgent legal relief) in any jurisdiction.

(b) United States residents. ALL DISPUTES WITH SAMSUNG ARISING IN ANY WAY FROM THIS EULA OR YOUR USE OF THE SOFTWARE SHALL BE RESOLVED EXCLUSIVELY THROUGH FINAL AND BINDING ARBITRATION, AND NOT BY A COURT OR JURY. Any such dispute shall not be combined or consolidated with any other person's or entity's claim or dispute, and specifically, without limitation of the foregoing, shall not under any circumstances proceed as part of a class action. The arbitration shall be conducted before a single arbitrator, whose award may not exceed, in form or amount, the
relief allowed by the applicable law. The arbitration shall be conducted according to the American Arbitration Association (AAA) Commercial Arbitration Rules applicable to consumer disputes. This arbitration provision is entered pursuant to the Federal Arbitration Act. The laws of the State of Texas, without reference to its choice of laws principles, shall govern the interpretation of the EULA and all disputes that are subject to this arbitration provision. The arbitrator shall decide all issues of interpretation and application of this arbitration provision and the EULA. For any arbitration in which your total damage claims, exclusive of attorney fees and expert witness fees, are $5,000.00 or less ("Small Claim"), the arbitrator may, if you prevail, award your reasonable attorney fees, expert witness fees and costs as part of any award, but may not grant Samsung its attorney fees, expert witness fees or costs unless it is determined that the claim was brought in bad faith. In a Small Claim case, you shall be required to pay no more than half of the total administrative, facility and arbitrator fees, or $50.00 of such fees, whichever is less, and Samsung shall pay the remainder of such fees. Administrative, facility and arbitrator fees for arbitrations in which your total damage claims, exclusive of attorney fees and expert witness fees, exceed $5,000.00 ("Large Claim") shall be determined according to AAA rules. In a Large Claim case, the arbitrator may grant to the prevailing party, or apportion among the parties, reasonable attorney fees, expert witness fees and costs. Judgment may be entered on the arbitrator's award in any court of competent jurisdiction. This arbitration provision also applies to claims against Samsung's employees, representatives and affiliates if any such claim arises from the licensing or use of the Software. You may opt out of this dispute resolution procedure by providing notice to Samsung no later
than 30 calendar days from the date of the first consumer purchaser's purchase of this device. To opt out, you must send notice by e-mail to optout@sta.samsung.com, with the subject line: "Arbitration Opt Out." You must include in the opt out e-mail (a) your name and address; (b) the date on which the device was purchased; (c) the device model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable, if you have it (the IMEI or MEID or Serial Number can be found (i) on the device box; (ii) on the device information screen, which can be found under "Settings;" (iii) on a label on the back of the device beneath the battery, if the battery is removable; and (iv) on the outside of the device if the battery is not removable). Alternatively, you may opt out by calling 1-888-987-4357 no later than 30 calendar days from the date of the first consumer purchaser's purchase of the device and providing the same information. These are the only two forms of notice that will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect your use of the device or its preloaded Software, and you will continue to enjoy the benefits of this license.

17. ENTIRE AGREEMENT; SEVERABILITY. This EULA is the entire agreement between you and Samsung relating to the Software and supersedes all prior or contemporaneous oral or written communications, proposals and representations with respect to the Software or any other subject matter covered by this EULA. If any provision of this EULA is held to be void, invalid, unenforceable or illegal, the other provisions shall continue in full force and effect. [090413]
