1.1.2 Removing or Installing the Battery

a. Place the battery on the back of the phone so the metal contacts match up on the battery and in the battery cavity.
b. Slide the battery down into the battery cavity until it locks into place.
c. To remove, lift the battery out of the cavity from the lower left corner.

1.1.3 Removing or Installing the SD Card

a. Open the microSD card protector according to “OPEN” indicating arrow, insert the microSD card into the slot with chip facing downward.
b. Cover the slot according to “LOCK” indicating arrow.
c. To remove the microSD card, open card protector, gently press it out, and then cover the slot.

1.2 Powering On or Off

1.2.1 Power On Your Phone

a. Press and hold the key until the phone powers on.
b. Enter your PIN code if necessary and then press and hold the key.
c. The Home screen is displayed.

If you don’t know your PIN code or if you have forgotten it, contact your service provider.

1.2.2 Power Off Your Phone

Press and hold the key from the Home screen.

1.3 Charging Your Device

The light at the front cover of the phone when the phone is plugged in indicates it’s charging.
a. Plug the AC Charger into a standard outlet.
b. To access the charging port on the lower left side of your phone, open the flap and plug the other end of the AC charger into the charging port.

• Charging may take about 10 minutes to start if the battery is completely dead.
• Be careful not to force the plug into the socket.
• Make sure the battery is correctly inserted before connecting the charger.
• Use a wall socket that is easily accessible and in close proximity to the phone (avoid electric extension cables).
• When using your phone for the first time, charge the battery fully (approximately 3 hours). When the battery is fully charged the will display on the screen.

To reduce power consumption, when the battery is fully charged, disconnect your phone from the AC Charger and the charger from the wall outlet. Switch off some applications when not in use; reduce the backlight time, etc.

1.4 Phone Overview

1. Send key: Answer/Send a call
   Enter Recent calls

2. 1 key:
   Press: Dial "1"
   Press and hold: Access your voicemail
   In Edit mode
   Press: Input frequently-used symbols
   Press and hold: Input "1"

   In Edit mode
   Press: Switch between lower/upper case input methods
   Press and hold: Access the Symbols table

4. 0 key: Press: Dial "0"
   Press and hold: Switch between "+/0"
   In Edit mode
   Press and hold: Input "0"

5. # key: Press: Dial "#"
   Press and hold: Vibrate alert

6. Navigation key: Press to go left/right/up/down to access different functions
   OK key: Press to confirm an option
2 Getting Started

2.1 Status Bar Icons (1)
This list covers the symbols appearing on your phone’s display and indicator area.

- Signal strength
- NO Service
- Roaming
- Data connection
- Dormant
- Service unavailable
- Missed call
- SMS/MMMS
- Urgent message
- Calendar
- Multiple alerts
- Email
- Voice message
- Silence all
- Ringtone off
- Vibrate
- Beep once
- Bluetooth active
- Bluetooth connected
- Bluetooth discoverable
- Bluetooth headset connected
- Bluetooth stereo connected
- Location on
- Location off
- Camera
- Camcorder
- Battery status
- Alarm
- TTY
- Hearing AID
- Airplane Mode
- Camera: phone
- Camera: SD card

(1) The icons and illustrations in this guide are provided for informational purposes only.

1.5 Setting Up Voicemail

a. From the Home screen, press and hold the key.
b. When connected, you’re prompted to set up your voicemail.

End key: Press: End a call
Return to the Home screen
Press and hold: Power on/off

Back key: Press: Delete content, go back to the previous menu or option.
2.2 Menu Navigation

2.2.1 Accessing Menus
You can access menus and submenus by scrolling the Navigation keys or by using the shortcut keys.

2.2.2 Accessing a Menu Function by Scrolling
a. From the Home screen, press the Left softkey to access the main menu.
b. Access submenus included in the menu by scrolling to and highlighting the option and pressing the key. If the menu contains further options, repeat this step.
c. Press the Up or Down Navigation key to scroll through the menus. Make your selection by pressing the key.
d. Return to the previous menu level by pressing the Right softkey or the key.
e. Press the key to directly exit the menu without changing any settings.

2.2.3 Using Numbered Menu Shortcuts key
Numbered menu items, such as menus, submenus, and options can be quickly accessed by using their shortcut numbers. From the Home screen, you can also press and hold the number keys (2 to 99) to call a contact to which you have previously assigned a shortcut.
a. From the Home screen, press the Left softkey to access the main menu and select Contacts.
b. Highlight a contact, select OPTIONS > Settings > Speed Numbers.
c. Set speed numbers (2 to 99) and press ASSIGN to confirm.

2.2.4 Navigation Keys
The Navigation keys come preset, however you are able to change them to suit your needs.
a. From the Home screen, press the Left softkey to access the main menu.
b. From the main menu, select Settings > More settings > Navigation keys.
c. Change the Up, Down, Left and Right menu options by highlighting the option and pressing the key.
d. Use the Up or Down Navigation keys to your new shortcut choice.
e. Press the Left softkey key to save the change.

3 Phone Calls

3.1 Making a Call
a. From the Home screen, enter the area code and phone number.
b. If you press an incorrect key, press BACK to delete the incorrect digits.
c. Press the key to make the call.

3.1.1 Making an Emergency Call
• Dial the emergency number and press the key.
   You do not need a SIM card or unlock your phone to make an emergency call.

3.1.2 Making an International Call
a. Press and hold the key until the + character appears.
b. Enter the country code, area code and phone number.
c. Press the key to make the call.
3.1.3 Calling Your Voicemail
Voicemail allows callers to leave voice messages in your voice mailbox. You can review, play, and delete your voice messages any time you are in your carrier’s network coverage area.
From the Home screen, press and hold the 1 key.

3.2 Answering a Call
• Press the #/key to answer an incoming call.

3.2.1 Muting the Incoming Call
To mute ringtone of current incoming call, press the volume key down.

3.2.2 Rejecting a Call
• Press the #/key once to reject the call.
• Press the Down Navigation key, then select Send to Voicemail to reject the call, or select Ignore with Text Message to send a SMS to the calling party.

3.2.3 Handling Two Calls
a To respond to an incoming call while you are on a call, press the 0 key.
b After answering a second call, the first caller are on hold, press OPTIONS (Right softkey) > Switch Calls to switch back to the first caller.

3.2.4 Switch to Bluetooth device
a Make sure Bluetooth device connected.
b Select audio from handset to Bluetooth device.

3.2.5 3-Way Call
Your phone allows you to talk to several people at the same time.
a If you receive a second call, press the Options softkey and select Conference Call.
b If a third call comes in, answer it by pressing the 0 key and speak with your new caller.
c This caller becomes a member of the conference if you press Options and select Conference call.
d To end the conference call, press Options and select End > End conference.

3.3 Ending a Call
When you want to end your call, briefly press the 0 key.

3.4 Adjusting Call Volume
You can adjust the sound level during a call using the Volume key.
You can use Handsfree function by pressing the Right softkey during a call.
Move the handset away from your ear while using the “Handsfree” option because the amplified volume might cause hearing damage.

3.5 Recent Calls
You can access the function using the following options:
• Select Menu from Home screen, then select Recent Calls.
• Press the 0 key from Home screen.

(1) Contact your service provider to check service availability.
This menu displays the following lists:

- Missed calls
- Outgoing calls
- Received calls
- Call log: select to empty one of the lists in recent calls.

Select a number from the call memory and press OPTIONS, to send message, create new group, save contact, delete number, etc.

3.6 In-Call Options

During a call, press the Options softkey to access the following:

- Mute/Unmute: Mutes/Unmutes the conversation from your end.
- Speaker On/Off: Route the phone’s audio through the speaker (On) or through the earpiece (Off).
- Add New Contacts: Add a new contact or update existing.
- Main menu: Display the main menu list.
- 3-Way Call: Initiate a 3-way conference call.
- Contacts: Display your contacts list.
- Voice Memo: Create a new memo while remaining on the call.

4 Contacts

4.1 Using the contact list

a From the main menu, select Contacts.
b Press the Down Navigation key to access the contact list.

4.1.1 Available Options

When you highlight a specific contact, press the OPTIONS softkey to access the following:

- New Group: Create a new group.
- Edit Contact: Modify the contents of a file: name, number, ringtone, etc.
- Delete Contact: Delete a single contact highlighted.
- Delete All: Delete all contacts.
- Contact History: Check events in history log.
- Send Contact: Send contact through device such as Bluetooth.
- Set as Secret: Hide contact from the list.
- Settings: Find more options for contact settings.

4.2 Adding New Contacts

a From the main menu, select Contacts.
b When the contact list screen appears, select Add New.
c Enter information into the fields provided. Press the Up or Down Navigation key to scroll the list.
d To save the new information, press DONE.

4.3 Editing/Deleting Contacts

Edit contacts information or delete the contacts you do not want to keep.

4.3.1 Editing a Contact

a From the main menu, select Contacts.
b When the contact list screen displays, highlight and select a contact to edit the information.
c Once you have selected the contact, press OPTIONS> Edit Contact to edit each field.

(1) Contact your service provider to check service availability.
4.3.2 Deleting Contacts
a From the main menu, select Contacts.
b To delete a contact, highlight the contact and press Options > Delete Contact; to delete all contacts, press Options > Delete All.

4.4 Making a Call from Your Contact List
a From the main menu, select Contacts.
b When the contact list screen displays, highlight the contact you want to call and press the key.

4.4.1 Searching for a Number in the Contacts
a From the main menu, select Contacts.
b When the contact list screen displays, enter the first few letters of the name to display. A list of contacts appears based on the letters you have entered.
c Scroll to the name you are looking for by pressing the Up or Down Navigation key.
d Press the key to select the contact.

4.5 Speed Dial List
Once you have stored phone numbers to your Contacts, you can set speed dial entries and then dial them easily by pressing and holding the corresponding numeric key.

4.5.1 Setting Up Speed Dial Entries
a From the main menu, select Contacts, highlight a contact, select OPTIONS > Settings > Speed Numbers.
b Enter the number with which you wish to assign the speed-dialing number (from 2 to 99), press ASSIGN.

4.5.2 Changing a Number Assigned to a Key
a From the main menu, select Contacts, highlight a contact, select OPTIONS > Settings > Speed Numbers.
b Highlight the speed number you want to change, select OPTIONS > Replace.

5 Entering Text
This section describes how to choose your preferred text input mode when entering characters.

5.1 Keypad Input

5.2 Text Input Mode
Text mode allows you to choose between T9 Word, Abc, or Numeric modes.
When you are in a text entry field, press OPTIONS > Text Mode to switch between text input mode.

Navigation keys:
Validate a letter/word.
Left/Right: Previous/next letter/word.
Up/Down: Page up/down.
Keypad:
Press: Alphabetic input (a, b, c).
Press and hold: Numeric input (1, 2, 3).
key: Input “0” in numeric mode.
key: Access the Symbols table when input mode is not numeric.
• **T9Word:** Enter text using a predictive text system that reduces the number of key presses required while entering a word.

• **Abc:** Allows you to enter alphabetic characters by pressing the key labeled with the corresponding letter.

• **123:** Allows you to enter numbers.

5.3 **Changing Text Mode**

a When you are in a text entry field, press **OPTIONS > Text Mode** to change text input mode.

b Choose from the following options: T9Word, Abc, 123, Symbols, Smileys, Text Settings.

### 6 Messages

You can create, edit and receive SMS and MMS. The MMS function can only be used if the service is provided by your operator, if your contract includes an MMS option.

#### 6.1 Types of Messages

The Short Message Service (SMS) allows you to send and receive text messages to and from other mobile phones. To use this feature, you may need to subscribe to your service provider's multimedia message service.

6.1.1 **Preset Messages**

Gives you the option to send commonly used messages to save time.

From the main menu, select Messages > Settings > Preset Messages. You can use/delete the existing messages, or add new messages in this group.

The Multimedia Message Service (MMS) allows you to send and receive multimedia messages (such as picture messages) to and from other mobile phones. To use this feature, you may need to subscribe to your service provider's multimedia message service.

#### 6.2 Creating and Sending New Text Messages

a From the main menu, select Messages > Send message.

b Press Go to Contacts to select a contact and write a text message.

c Press SEND (Left softkey)/key to send the message.

### 6.3 Creating and Sending New Multimedia Messages

An SMS will be converted to MMS automatically when pictures or sounds are included.

An SMS message of more than a certain number of characters (the number of characters depends on your language) will be charged as several SMS messages. An MMS message containing photos and/or sounds may also be billed as more than one message. Specific letters (accented) will increase the size of the SMS, which may also cause multiple SMS messages to be sent to your recipient.
6.4 Reading New Messages
a From the main menu, press Messages > Inbox.
b Highlight an unread message and press the key.
c Press the Up or Down Navigation key to scroll through the screen.
d When you have finished, press the key to return to the Home screen.

6.5 Using Message Options
When text or multimedia messages are highlighted, the following options are available by pressing the Left softkey.
- View: Allows you to view the message.
- Reply: Allows you to reply to the message.
- Forward: Allows you to forward this message to another recipient.
- Call: Allows you to call the sender of the message.
- Delete: Allows you to delete the selected message.
- Delete Inbox: Allows you to delete all Inbox messages.
- Lock: Keep the message when you delete all messages.

6.6 Deleting Messages
a From the main menu, select Messages.
b Delete messages by pressing Options > Delete or Delete Inbox.
c Select the message you want to delete, press Done > YES.

6.7 Message Settings
a From the main menu, select Messages > Settings.
b Select of the following options to see the available settings.
- Reset Envelope: Allows you to reset envelope.
- Preset Messages: Select a message template.
- Signature: Set your signature at the end of a message.
- Emergency Alerts: Allows you to activate Presidential Alerts/Extreme Alerts/Severe Alerts/Amber Alerts.

7 Web
Your phone is equipped with a Browser allowing you to access Internet sites specifically for mobile phones.

7.1 Launching Web
a From the main menu, select Web.
b Your phone connects to the network and loads the homepage of the Wireless Web service provider. The content of the start-up homepage depends on your Wireless Web service provider.
c To scroll through the screen, use the Up and Down Navigation keys.
d To exit the Web at any time, simply press the key.
7.2 Accessing a WAP Site
There are several ways to access a WAP site:
- By selecting a link on the Web.
- By using a bookmark item. Use View all bookmarks in the Web Options.
- By entering a URL address manually. Use URL address field in Navigation menu.

7.3 Navigating with the Web
- To scroll through Web items, press the Up or Down Navigation keys.
- To select a Web item, press the [ ] key.
- To return to the previous page, press Navigation > Select or the [ ] key.
- To move to next page, press Navigation > Proceed.
- To access the Web menu list, press the Right softkey.

There are other options below based on open web:
- Search the web: To launch a Web search.
- Add this page to Bookmarks: Add the current page to your Bookmarks.
- View all Bookmarks: To display a list of saved bookmarks.
- View browsing history: To display a list of visited Web pages.
- Send this page to a friend: You can send the current page address as SMS or MMS.
- Overview Mode: To display the entire Web page.

7.4 Settings
- Startup page: Set startup page.
- Automatic Overview Mode: Turn on/off Automatic Overview Mode.
- Default zoom size: Select automatic or customized zoom value.
- Do not show images: Display or Hide images on the web page.
- Icon row: Display or hide the area showing icons.
- Popups: Allow or block pop-ups.
- Clear private data: Clear cookies, cache, history, or stored passwords.
- Advanced: View more settings such as page information, browser information, disable JavaScript, etc.

8 Media
8.1 Camera/Camcorder
Your mobile phone is fitted with a camera for taking photos and shooting videos that you can use in different ways:
- store them in your "My Folder\ Phone".
- send them in a multimedia message (MMS) to a mobile phone.
- send them directly by Bluetooth.
- customize your Home screen.
- select them as incoming call picture to a contact in your Contacts.
- transfer them by data cable to your computer.

8.1.1 Take a Photo, Save or Delete
- From the main menu, select MENU > Media > Camera.
- Position the object or landscape in the viewfinder and press the [ ] key to take the picture and the picture will be automatically captured.

8.1.2 Take a Video, Save or Delete
From the main menu, select **MENU > Media > Camcorder**.

Position the object or landscape in the viewfinder and press the ○ key to take the video and the video will be automatically saved.

### 8.1.3 Settings in Framing Mode
From the photo shot screen, press OPTIONS through the Right softkey, you can adjust a number of settings:
- Camcorder
- Resolution
- White Balance
- Brightness
- Effect
- Self-Timer
- Shutter Sound
- Storage
- Location

### 8.2 Player
You will have full control over managing music on your mobile.

#### 8.2.1 Player List
- From the main menu, select **MENU > Media > Player**.
- Select **LIBRARY > All** to view all songs on phone.
- Select **Album/Artist/Genre** to view the music files are categorized by Album, Artist or Genre based on information stored in the tags.

### 8.3 My Album
A library links to the pictures in phone.

#### 8.4 Voice Memo
##### 8.4.1 Recording a New Memo
- From the main menu, select **MENU > Media > Voice Memo**.
- The first time you record the memo, press **Record New**.
- The voice recorder screen displays.
- Press the ○ key to start/pause the recording.
- When done, the record will be automatically saved.

##### 8.4.2 Naming/Renaming a Voice Memo
- From the main menu, select **MENU > Media > Voice Memo**.
b To rename the memo, press OPTIONS and select Rename.

8.4.3 Sending a Voice Memo
a From the main menu, select MENU > Media > Voice Memo.
b To send the memo via MMS, press OPTIONS and select Send.

8.4.4 Deleting a Voice Memo
a From the main menu, select MENU > Media > Voice Memo.
b To delete the memo, press OPTIONS and select Delete/Delete All.

9 Tools

9.1 Alarm
Your mobile phone has a built-in alarm clock with a snooze feature. You can set up to five separate alarms and choose whether or not the alarm should repeat.

9.1.1 Setting an Alarm
a From the main menu, select MENU > Tools > Alarm.
b The first time you create an alarm, press CREATE NEW. The following options display:
   • Alarm: Turn alarm on/off.
   • Time: Set the specified time for this alarm.
   • Repeat: Select Once (default)/Every day/ Days or customize as preferred.
   • Volume: Set with volume, vibrate or silence.
   • Ringtone: Choose a melody as your alarm notification sound.
   • Snooze Times: Turn on/off snooze times.
   • Snooze Interval (Mins): The alarm will repeat at regular intervals.
   c Press DONE to save the changes and turn on your new alarm.

9.1.2 Viewing Saved Alarms
a From the main menu, select MENU > Tools > Alarm.
b The screen displays all saved alarms.

9.2 Calculator
a From the main menu, select MENU > Tools > Calculator.
b Enter a number, select the type of operation to be performed using the Navigation keys, and enter the second number, then select the key to display the result.
c Once an operation is complete, you can select CLEAR to clear numbers and carry out a new operation.

9.3 Calendar
Your phone has a built-in Calendar with a monthly-view calendar for you to keep track of important meetings, appointments, etc.

9.3.1 Viewing Your Calendar
From the main menu, select MENU > Tools > Calendar. Days with events entered will be marked in color.

9.3.2 Adding an Event
a From the main menu, select MENU > Tools > Calendar.
b Using the Navigation key, highlight the date, and press OPTIONS and select Add New Event.
c Fill in all required information for this new event.
d When done, press SAVE.
9.3.3 Viewing an Event
a From the main menu, select MENU > Tools > Calendar.
b To check the event, use the Navigation key to highlight the date.
c To view the details of the event, press the key.

9.3.4 Editing/Deleting an Event
a From the main menu, select MENU > Tools > Calendar.
b To view the event, press the key.
c To edit the event, press EDIT; to delete the event, press DELETE.

9.4 Bluetooth®
From the main menu, select MENU > Tools > Bluetooth.
To use your phone with a Bluetooth device, you need to proceed in two steps:
a Turn on your Bluetooth,
b Pair and register the device to your phone,
b Select it to use hands-free communication. Only one Bluetooth audio device (your Bluetooth headset or your Bluetooth car kit) can be connected during the communication.

9.4.1 Pair and register your Bluetooth device
a Activate the Bluetooth feature by selecting the “Bluetooth\On” option.
b Select Add New > YES to search for connectable Bluetooth devices.
c From the list, select the device you want to pair. If the Bluetooth device has no keyboard, enter its default password to register it with your phone. If the Bluetooth device has keyboard/keypad, enter the same set of password on both handset and the device to get it registered.
d Press the Options to show service, rename, authorization, delete and delete all from the connected list.

9.4.2 Using Options
• Data transmit: Exchange files with another Bluetooth device.
• Handle a call: Initiate or receive a phone call with a Bluetooth headset.
• Listen to music: Listen music by Bluetooth headset.

Always activate Bluetooth in your phone first before connecting it to a Bluetooth device. Be aware that Bluetooth activation will slightly affect battery life of your phone.

Bluetooth technology allows free wireless connections between all Bluetooth-compliant devices within short range. Please make sure that the Bluetooth headset or the Bluetooth car kit and your mobile phone are in this range and set as visible.

10 My Folder
10.1 Buy Ringtones and Graphics
Touch to customize your phone with ringtones or graphics.

10.2 Phone
You can access music and audio clips or images you have saved in phone.

10.3 Memory Card
a From the main menu, select MENU > My Folder > Memory Card.
b Your phone's memory is shared between several functions: contacts, calendar, messages, images, melodies, etc.
11 Settings
Accessing the Settings Menu
From the main menu, select Settings and select the function of your choice in order to customize your mobile phone.

11.1 Display
Adjusting your phone’s display settings not only helps you see what you want, it can also help increase battery life.

From the main menu, select Settings > Display, you can find below menus:
- Main screen: Change the wallpaper of Main screen.
- Outer Screen: Change the contrast of outer screen.
- Picture ID: Set picture for saved contacts, unsaved numbers or unknown numbers.
- Backlight Control: Reduce brightness for enhanced battery performance and to save power during periods of expected inactivity.
- Brightness: Set brightness degree.

11.2 Volume
Allows you to adjust volume for ringtones.

11.3 Ringtones
Allow you to personalize ringtones for incoming calls, voicemail, messages, etc.

11.4 Accessibility
The Accessibility menu lets you enable and manage accessibility-related applications. To access the menu, please follow below instructions:
From the main menu, select Settings > Accessibility.
- TTY: Press to select TTY functions or turn off TTY.
- Hearing AID: Turn on hearing aid to reduce unacceptable noise.
- Font Size: Select font size.

11.5 Phone Information
The phone information menu allows you to get more information of the device, such as phone number, software version, internal storage, etc.

From the main menu, select Settings > Phone Information.
- Phone Number/User ID: Show information of phone number, software version, hardware version, etc.
- Memory: Show phone storage status.
- Icon Glossary: Show status icons used on the phone.
- Version: Show version of software, hardware, PRL, browser, etc.
- Advanced: Show information of SID, channel, technology, frequency.

11.6 Lock Phone
Set password to lock your phone and protect your private information.

11.7 Location
Your Location Services settings menu lets you select how your phone determines its location.

11.8 Reset/Delete
Your phone’s reset menu erases all data from the phone’s application storage, including messages, phones calls, downloaded application, etc.

a From the main menu, select Settings > Reset/Delete.

Before performing a factory data reset on your phone, you may want to remove the microSD card to avoid losing any data you may have stored on it.

11.9 More settings
Allow you to get more information of call, text message, contact, languages and key functions.

From the main menu, select Settings > More settings.

11.9.1 Abbreviated Dialing
Activate/deactivate abbreviated dialing.
11.9.2 Call Answer
Select a key or open flip to answering calls.

11.9.3 Text Entry
- Auto-Capital: Automatically capitalize the first letter of the first word after a period, the first word in a text field, and each word in name fields.
- Auto-Space: Automatically insert a space.
- Predictive Language: Change the languages.
- Personal Dictionary: Touch to open a list of the words you’ve added to the dictionary.
- Word Choice List: Turn on/off word choice list.
- Word Prediction: Turn on/off the functions on showing the predictive word.
- Word Completion: Automatically complete the word spelling.
- Use My Words: Use the stored or created from your side.
- Help: Get more information about text entry from the website.

11.9.4 Airplane Mode
Functions such as Voice calls and Messages etc. are barred. It can also be used to increase the length of time the phone can be left in standby mode.
From the main menu, select Settings > More settings > Airplane mode.

11.9.5 Contact Match
The contact match allows you to find an existing contact by entering the first 4 digits of the number.
From the main menu, select Settings > More settings > Contact Match.

11.9.6 President Alerts
Set a president alert as audible tone, vibration or show on LED.

11.9.7 Language
Adjust the language used for phone display.
From the main menu, select Settings > More settings > Language.

11.9.8 Navigation Keys
Customize the Navigation key by assigning specific functions, numbers from contacts to each key. (See more details on Section 2.2.4)

12 Safety and Use
We recommend that you read this chapter carefully before using your mobile phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.
- TRAFFIC SAFETY:
  Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile phone when the vehicle is not parked. Check the laws and regulations on the use of wireless mobile phones and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas.
  When driving, do not use your mobile phone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.
When switched on, your mobile phone emits electromagnetic waves that can interfere with the vehicle’s electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:
- do not place your mobile phone on top of the dashboard or within an airbag deployment area,
- check with your car dealer or the car manufacturer to make sure that the car’s electronic devices are shielded from mobile phone RF energy.

**CONDITIONS OF USE:**
You are advised to switch off the mobile phone from time to time to optimize its performance. Remember to abide by local authority rules of mobile phone use on aircrafts.

Operational Warnings: Obey all posted signs when using mobile devices in public areas.

Follow Instructions to Avoid Interference Problems: Turn off your mobile device in any location where posted notices instruct you to do so. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Switch the mobile phone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, mobile phones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the mobile phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, gas station, or chemical plant, or in any potentially explosive atmosphere.

When the mobile phone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump. In particular when using the mobile phone you should hold it against the ear on the opposite side to the device, if any.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your healthcare provider.

To avoid hearing impairment, answer the call before holding your mobile phone to your ear. Also move the handset away from your ear while using the "hands-free" option because the amplified volume might cause hearing damage.

It is recommended to have proper supervision while small children use your mobile phone.

When replacing the cover please note that your mobile phone may contain substances that could create an allergic reaction.

Always handle your mobile phone with care and keep it in a clean and dust-free place. Do not allow your mobile phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc.). The manufacturer’s recommended operating temperature range is 14°F (-10°C) to 131°F (+55°C) (the max value depends on device, materials and housing paint/texture).

Over 131°F (55°C) the legibility of the mobile phone’s display may be impaired, though this is temporary and not serious.

Do not open or attempt to repair your mobile phone yourself.

Do not drop, throw or try to bend your mobile phone.

Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your mobile phone model. TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Your mobile phone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products.

Remember to make back-up copies or keep a written record of all important information stored in your mobile phone.
Prolonged exposure to music at full volume using the music player may damage your hearing. Set your mobile phone’s volume to its lowest setting prior to inserting headphones in your ears and adjust the volume to your preference. Only use headphones that are recommended by TCT Mobile Limited and its affiliates.

- **PRIVACY:**
  Please note that you must respect the laws and regulations in force in your jurisdiction or other jurisdiction(s) where you will use your mobile phone regarding taking photographs and recording sounds with your mobile phone. Pursuant to such laws and regulations, it may be strictly forbidden to take photographs and/or to record the voices of other people or any of their personal attributes, and reproduce or distribute them, as this may be considered to be an invasion of privacy.
  It is the user’s sole responsibility to ensure that prior authorization be obtained, if necessary, in order to record private or confidential conversations or take a photograph of another person; the manufacturer, the seller or vendor of your mobile phone (including the operator) disclaim any liability which may result from the improper use of the mobile phone.

- **BATTERY AND ACCESSORIES:**
  Before removing the battery from your mobile phone, please make sure that the mobile phone is switched off.
  Observe the following precautions for battery use:
  - Do not attempt to open the battery (due to the risk of toxic fumes and burns).
  - Do not puncture, disassemble or cause a short-circuit in a battery.
  - Do not burn or dispose of a used battery in the garbage or store it at temperatures above 140°F (60°C).
  Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries or those not recommended by TCT Mobile Limited and/or its affiliates.
  This symbol on your mobile phone, the battery and the accessories means that these products must be taken to collection points at the end of their life:
  - Municipal waste disposal centers with specific bins for these items of equipment
  - Collection bins at points of sale.
  They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

- **In European Union Countries:**
  These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

- **In Non European Union Jurisdictions:**
  Items of equipment with this symbol are not be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

- **CHARGERS**
  Home A.C./Travel chargers will operate within the temperature range of: 32°F (0°C) to 104°F (40°C).
  The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipment use. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

In the United States you may learn more about CTIA’s Recycling Program at www.recyclewirelessphones.com

**CAUTION:** RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.
Characteristics of power supply (depending on the country):

- **Travel charger:**
  - **Input:** 100~240 V, 50/60 Hz, 0.15A
  - **Output:** 5 V, 550 mA

- **Battery:** Lithium 850 mAh

**RADIO WAVES:**

THIS MOBILE PHONE MEETS THE GOVERNMENT’S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada, is 1.6 W/Kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the mobile phone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the mobile phone while operating can be well below the maximum value. This is because the mobile phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the mobile phone. Before a mobile phone model is available for sale to the public, compliance with national regulations and standards must be shown.

The highest SAR value for this model mobile phone when tested is 1.075 W/Kg for use at the ear and 1.473 W/Kg for use close to the body. While there may be differences between the SAR levels of various mobile phones and at various positions, they all meet the government requirement for RF exposure. For body-worn operation, the mobile phone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site: http://www.phonefacts.net

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children’s RF exposure by limiting the length of calls, or using “hands-free” devices to keep mobile phones away from the head and body. (fact sheet n°193). Additional WHO information about electromagnetic fields and public health are available on the following website: http://www.who.int/peh-emf.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service (e.g. FM broadcast), they bear the following statement:

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Your mobile phone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset or usb data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the mobile phone at least 1.5 cm away from the body.

Hearing Aid Compatibility

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer. Your telephone is rated: “For Hearing Aid”, to assist hearing device users in finding phones that may be compatible with their hearing devices.

Your telephone is rated: “For Hearing Aid”, to assist hearing device users in finding phones that may be compatible with their hearing devices.

This device is HAC M4/T4 compatible.

13 General Information

- **Website:** www.alcatelonetouch.com
- **Hot Line Number:** In the United States, call 855-368-0829 for technical support.

On our Internet site, you will find our FAQ (Frequently Asked Questions) section. You can also contact us by e-mail to ask any questions you may have.

An electronic version of this user guide is available in English and other languages according to availability on our server: www.alcatelonetouch.com

Your phone supports a CDMA 1x (B0/1) network.

**Protection Against Theft** *(1)*

Your mobile phone is identified by an MEID (mobile phone serial number) shown on the packaging label and in the product’s memory.

We recommend that you note the number the first time you use your mobile phone by entering ##6343# and keep it in a safe place. It may be requested by the police or your operator if your mobile phone is stolen.

**Disclaimer**

There may be certain differences between the user manual description and the mobile phone’s operation, depending on the software release of your mobile phone or specific operator services.

TCT Mobile shall not be held legally responsible for such differences, if any, nor for their potential consequences, which responsibility shall be borne by the operator exclusively.

*(1)* Contact your service provider for service availability.
