

Message Group Screen Breakdown

CrisisGo Mobile App

+ Symbol opens the additional multimedia feature box at the bottom of the screen.

Invitation allows you to invite people to the communication group.

Check In allows you to notify your group that you are safe in the event of an emergency. Check In is started by a group Manager.

Tapping on Report allows you to access any reports available for your group.

Group Managers can tap on the private chat icon to open a directory of Group Members and access the All Managers chat.

The Panic tool enables you to send an audible signal to group Managers that immediate assistance is needed. This is typically used for isolated incidents.

The Alert tool enables users to send a silent or audible signal to all group users in the event of a serious emergency.

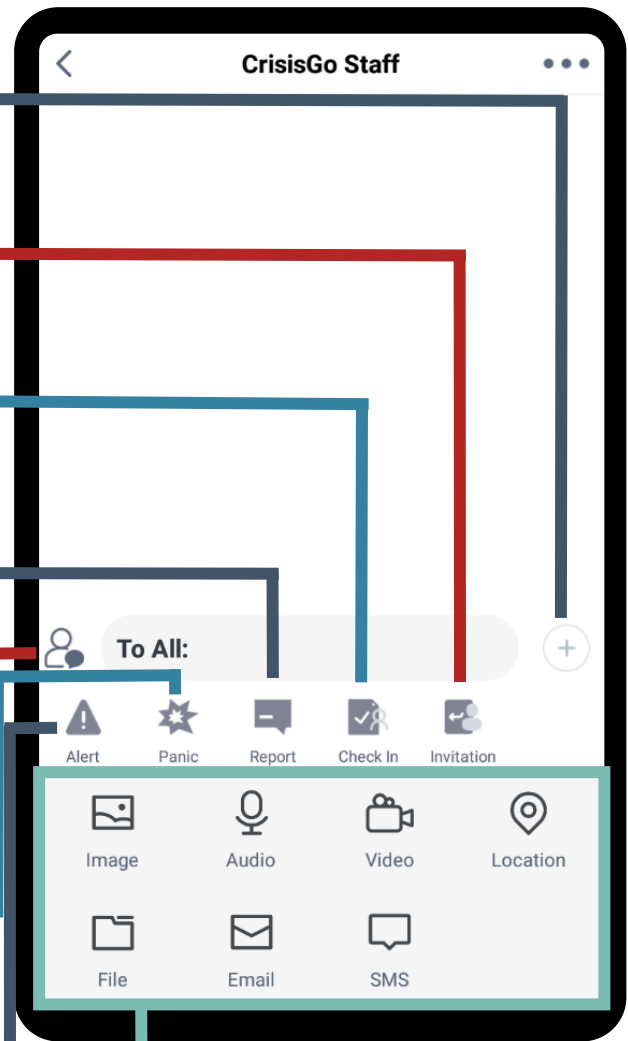

Image – Using the camera on your device, you can send a photo of suspicious people or incident scenes.

Audio – Using the microphone on your device, you can record and send audio clips.

Video – Using the camera on your device, you can record and send video clips.

Location – Connected with the GPS embedded within your device, you can send the exact coordinates of your location to your message group.

File – You can access files, photos, or video stored on your device and send them to your Message Group.

Email – Group Managers can send an email to all group users and/or to recipients found on the Email Members Tab of the Web Console.

SMS (add on service) – Group managers can send an email to all group users and/or to recipients found on the SMS Members Tab of the Web Console.
